This dedication is about dedication. For the past twenty plus years Dr. Zsolt Nenyeyi has dedicated his considerable energies, enthusiasm and intellect to advancing the art and science of Rapid Thermal Processing technology. While that would consume a normal individual, Dr. Nenyeyi concurrently advanced first AST Elektronik, then Steag Electronic Systems and is now concluding his career by advancing the products and market success of Mattson's Thermal Products Group. Along the way Dr. Nenyeyi has touched all in the business with his assistance in technical, professional and sometimes even personal matters. Dr. Nenyeyi has developed many of the next generation of scientists in the thermal processing field and leaves a rich legacy of selfless dedication.

Those of us who have been honored to have worked with Dr. Nenyeyi have been enriched by the experiences. Zsolt, we thank you!
