

THE EUROPEAN MATERIALS RESEARCH SOCIETY

The European Materials Research Society (E-MRS) is a non-profit making scientific society founded in 1983 with its Headquarters in Strasbourg, France. The Society focuses its activities on creating synergy from the interaction between interdisciplinary, innovative fields of materials research. Great attention is given to disseminating and exchanging information and promoting technology transfer from public institution to industry.

The primary objective of E-MRS is to promote and enhance the efficiency of research in Europe in the field of Advanced Materials. E-MRS seeks to quickly inform researchers about the scientific and technological developments in their fields of interest, taking advantage of the Society's links with other Materials Research Societies belonging to the International Union (IUMRS).

Since 2002, in parallel with the Spring Meeting held in Strasbourg, Fall Meetings have been held in Warsaw, The 2006 Fall Meeting consisted of 10 symposia running concurrently, Plenary Sessions, a joint session with other symposia and included an exhibition of relevant products and services as well as training activities for young researchers and scientists.
