

Table of Contents

Study of Atmospheric Corrosion of Galvanized Steel Sheet in Addis Ababa Region Using Atmospheric Corrosion Models B.M. Mekuria and H. Panjiar	1
Influence of Cutting Parameters on Tool Temperatures and Residual Stresses in Machining Aerospace Alloys: A DEFORM 3D Simulation Approach M.A. Sofuoğlu, G. Haydarlar and M. Tekkalmaz	19
Modeling of Biogas Tri-Reforming for Hydrogen Production M.M. Kakpo, S. Bouraima, E.K. Ekouedjen, G. Ganhoun, F. Adamon and L.A. Fagbemi	29
Stabilization of Soil by Using Construction & Demolition Waste, Calcium Carbide Residue, Molasses and Glass Fiber Reinforcement A. Abhishek, R.K. Sharma and P. Shandil	57
Modeling a Corona Discharge Separation of Fine Particles for Different Materials Used in Electrical Engineering N. Guettaf, H.A. Said, M. Aissou, T. Zegloul and H. Nouri	77
Development of a Low-Cost Irradiance Meter with Remote Data Logger A.J. Imoleayo, A.D. Aduramigba and A.O. Melodi	91
Optimization and Performance Evaluation of Photovoltaic Thermal System with Varying Nanofluids and Environmental Parameters by Taguchi Technique M. Singh, S.C. Solanki, B. Agrawal and R. Bhargava	105
Development of Intelligent MPPT to Resolve Voltage Dips in a Grid-Connected Hybrid Power Generation PV System in a Hot Climate K. Pallaï and J. Mbainibeye	127
Power System Harmonics Estimation by the SWPT-Based Digital Design Implemented on FPGA Platform S. Baraskar	147
Climate-Multi-Criteria Optimization of the Reliability and Maintainability of a Distribution System by MARKOV Chains and Elitist Genetic Algorithms A. Oloulade, A. Richard Gilles, H. Ousseyni Ibrahim, A. Marcaire, A. Moukengue Imano, M.A. Sèminvo and V. Antoine	161
