

Table of Contents

Preface

The Study on the ‘Real Expression’ of Spatial Objects with 2-Dimension and the Real Display Rate L.Z. Gu	1
The Research on the Designs of Optimal Contract when Carrying on Technical Transactions Y.X. Sheng and W.G. Yang	6
A New Method for Costing of Quality Based on Business Rule in Manufacture T. He, L.M. Qiao, X.F. Xu and Y.L. Fu	12
Research on Index Measurement Model of Early-Warning for Listed Companies in Shipbuilding Industry X.Z. Wei, J.M. Wu and R. Wu	18
Product Numbering System Design for Single Piece or Small Batch Customization Manufacture and its Process Organization H. Gao, X.S. Liu, Q. Li and D.M. Guo	23
Framework Studies on Manufacturing Resource Management System Based on E-Hubs Q.S. Xie, G.X. Zhou and Q.N. Yan	28
Study on Network Process System of Engine L.H. Dong, J. Huang, X.H. Xing and L.G. Wang	34
Customer-Centric Strategy for E-Manufacturing in Apparel Industry S.F. Qin, E. Lagoudakis, Q.P. Kang and K. Cheng	39
Clustering and Rough Set-Based Knowledge Discovery for Product Family Planning C.J. Zhou and Z.H. Lin	45
Modeling and Simulating of Single-Row Facility Layout Based on Manufacturing Costs X.H. Suo and Z.Q. Liu	51
Developing an Internet Based Intelligent Supplier Selection System J. Chen, M.H. Wu and P. Barber	58
Modern Data Information Retrieval and an Approach towards Content-Based Collaborative System L. Li, D.K. Harrison, J.S. Lynn and K. Cheng	62
Balancing Global Project Resources Utilising a Genetic Algorithm Approach with Stochastic Resource Assignments J. Lancaster and K. Cheng	67
An Empirical Study of the Relationship between Business Performance Measures and Environmental and Competitive Strategy Variables W.B. Wang, Y.Z. Tian and H.Y. Sun	73
Probe on Multi-Agents Collaborative Commerce System Embedded with E-Maintenance X.H. Chen, T.W. Sheng and S.P. Yi	84
Construction of ASP Platform Based on the Manufacture of Typical Components for the Engineering Machinery L.Z. Gu	89
Web-Based Process Database Support System for Green Manufacturing Z.G. Jiang, H. Zhang and M. Xiao	94
Research on Transformation Engineering BOM into Manufacturing BOM Based on BOP H.C. Xu, X.F. Xu and T. He	99
A New Approach to Routing of Advanced Flexible Manufacturing Shopfloor T. He, X.F. Xu, H.C. Xu and Y.L. Fu	104
Research on Dynamic Scheduling of Job-Shop Production with the Ant Colony Optimal Algorithm Y.X. Liu, J. Xiong and B.M. Sun	109
Task-Oriented Hierarchical Planning and Scheduling for Discrete Manufacturing Enterprise G.L. Wang, L. Lin and S.S. Zhong	114

Key Technologies in Project-Driven Hierarchical Information System of Production Management (HISPM)	
B. Liu, T.J. Jin and Y.L. Ma	121
Review of Knowledge Based Engineering with PLM	
Q.C. Ma and X.W. Liu	127
Research on the Technique of Product Configuration in PDM	
L. Lin, G.L. Wang and S.S. Zhong	132
Finite Element Analysis of Hemispherical-Shape Parts in the Hot Gas Bulge-Forming of Polycarbonate (PC) Sheet	
Z.X. Hou, E.R. Liu, A. Feng and Z.R. Wang	140
A Fuzzy Set AHP-Based DFM Tool under Concurrent Engineering Environment	
H.G. Liu, R. Mo, Q.M. Fan, Z.Y. Chang and Y. Zhao	145
The Study on Data Exchange of Huge 3D Model	
X.S. Liu, H. Gao and D.M. Guo	150
Design Optimization Process of Complex Product Based on MDO	
W. Wang, W.H. Fan, T.Q. Chang and G.L. Xiong	155
Research on Collaborative Manufacturing Process Design System Based on Workflow and Web	
M. Lv, G. Wang and G.Q. Wang	160
The Design State Maturity Model for Collaboration between Design and Manufacturing	
Y. Zhao and R. Mo	165
Numerical Simulation and Optimal Design of Rotary Draw Bending Pipe	
Y.N. Lai, G.Y. Zhang, H.N. Yu and G.F. Liu	172
Research on Anti-Sway Control System for Overhead Crane Based on Single Neuron	
W. Li, J.S. Yao and R.H. Li	177
Modeling and Simulation of a Externally Pressurized Spherical Gas Bearing	
H.B. Zhang, L. Zhou, Y.X. Yao and D.L. Qin	182
A Cohesion Metric for Design of Task Based on Activity Relationship Matrix in Product Process	
F.S. Qiu, W.J. Liu, Y.H. Chen and D.F. Zhao	187
Study on Free Oscillations of Systems with Even Nonlinearities by Means of the Method of Multiple Scales	
J.M. Wen and Z.C. Cao	193
Conceptual Design Method Based on Behavior Re-Creation	
H.B. Miao	198
Backtracking Greedy Algorithm for Cutting Stock Problems	
A.J. Crispin and K. Cheng	203
An SVG-Based Interactive Drawing Viewing Solution for Mobile Design or Manufacturing Collaboration	
H.B. Sun, P.Y. Jiang, B. Yu and M. Zheng	208
Web-Based Enterprise Knowledge Management for Product Life-Cycle	
A.M. Gong and P.Y. Jiang	213
A Web-Based Collaborative Design Advisory System for Micro Product Design Assessment	
X. Dai, Y. Qin and N.P. Juster	220
Evaluation Model of the Product Design Team under Internet Environment	
N.J. Wang, Q.H. Liu and Z. He	225
A XML-Based Distributed Workflow Modeling Tools	
G.Q. Wang, G. Wang and M. Lv	230
Relationships among SFLP, DFLP and Robust Layout	
X.H. Suo and Z.Q. Liu	235
Population Diversity and Algorithm Realization of Sustainable HFC Model	
S.B. Li and X. Chen	242
Manufacturing Process Flow Reasoning of Micro Device Based on Ontology	
Z. Liu, P.Y. Jiang and S.Y. Zhou	248
Support Vector Machine-Based Method for Quality Characteristic Modeling	
J. Liu, L.J. Xu and Z.H. Lin	253
Finite Element Analysis of Thermal Characteristics of High-Speed Motorized Spindle	
Y. Lu, Y.X. Yao and R.H. Hong	258

Design of a Crab-Like Octopod Robot H.W. Ma, L.Q. Wang, D.L. Chen, X.W. Hao and H.W. Luo	263
The Research on the Static Calibration of Fingertip Force Sensor for Underwater Dexterous Hand on RBF Neural Network P. Jia, Q.X. Meng, H. Wang and H.B. Wang	267
The Design of Self-Adjusting Delivering Warp Mechanism in Knitted Carpet Weaving Equipment Z. Meng, J.J. Sun, Z.J. Sun and L. Zeng	271
Research on Cooling Action and Simulation of Temperature Distribution with Water Vapor as Coolants and Lubricants in Green Cutting J.Y. Liu, R.D. Han and Y. Wang	276
Research on the Key Technologies in Optimization of a Self-Sealing Flange H.F. Wang, G.L. Wang and S. Zou	281
The Study of Computer Simulation on Vibratory Metal Machining with Low Frequency J.L. Song and G.J. Chen	286
Emulating and Modeling for Position Errors of Ultra-Precision Aspherical Grinding D.J. Chen, Y. Zhang, F.H. Zhang and H.M. Wang	291
Simulation of Particles' Activity in Discharge Channel of PMEDM Y.G. Wang and F.L. Zhao	297
Comparative Analyses on FEM Simulation and Experiment of the Hard Turning Using Chamfered PCBN Tool T. Chen, Y.W. Wang, Y.F. Li, C.J. Yang and X.L. Liu	303
A New Tool-Path Generation Algorithm for Sculptured Surface Using Taper-Cutter L.C. Fan, L.N. Sun and Z.J. Du	308
Preparation and Analysis of Nano-Palygorskite and its Modified PF Y.K. Zhou, Z.H. Zheng, R. Li, Y. Li and M.L. Wang	312
The Tooth Profile Modification in Gear Manufacture Z. Li and K. Mao	317
Numerical Study of the Effect of Welding Parameters on the Strength of Spot-Welded Joints X. Kong, B. Li, Q.X. Yang, G. Rothwell, R. English and X.J. Ren	322
Experimental Research on the Influence of Indenter Tip Radius to Indentation Hardness L. Zhou, Y.X. Yao and Q. Liu	327
Numerical Simulation of Temperature Distribution during Ceramic Sintering X.F. Zhang, B. Lin and S.H. Chen	331
Multimedia Cutting Database of PCBN Tools X.L. Liu, X.H. Zhao, Y.Z. Liu, Y.W. Wang and S.H. Jiang	336
A Structured Approach for Iron & Steel Manufacture Processing Equipment Innovation Y.M. Liu, Q.Q. Zhang and J. Yao	341
Effect of Low Energy ECR Ion Beam Irradiation on Micro Nano Scale Mechanical Properties of Silicon Y.X. Yao, S.A. Pahlavy and S. Momota	344
Modeling of High Speed End Mills Based on Simulation of Dynamic Cutting Forces and Safety Prediction B. Jiang, M.L. Zheng, H.Z. Ma and Y.J. Huang	348
Finite Element Analysis of Precision Hard Cutting Using Different Cutting Edge Preparation Y. Wang, F.G. Yan, P. Wang, C.X. Yue and X.L. Liu	353
On Saw-Tooth Chip Formation in High Speed Cutting GH4169 D.J. Zhang, G. Liu, X. Sun and M. Chen	359
Simulation of Complex Curved Surface WEDM System Based on OpenGL T. Wang and Z.K. Hu	364
Research on Surface Roughness Prediction Model Based on Genetic Algorithm for Optical Ultra-Precision Machining J.J. Du, C.F. Cheung, S. To and Z.Y. Liu	369
Research on Temperature Field of Milling Insert with 3D Complex Groove M.Y. Wu, Q.X. Meng and Q. Liu	374

Study on Machining Error Propagation for Multistage Processes D.Y. Liu, P.Y. Jiang and L. Guo	379
Experimental Research on Polishing Spot of Bonnet Polishing J.F. Song, Y.X. Yao, D.G. Xie and B. Gao	385
Explicit Analysis on Temperature Field of 3D Laser Forming of Square Metal Sheet to Spherical Dome L.J. Yang and Y. Wang	390
Effect of Glycerin on Micro Arc Oxidation Process and Performance of Ceramic Coatings at the Surface of Magnesium Alloy AZ61 L.Q. Li, J.J. Xi, J. Zhao and J.Y. Chen	396
Molecular Dynamics Simulation for Single Crystal Aluminum Nano-Indentation Effect by Indenter Radius Y. Zhu, L. Zhou, Y.X. Yao and G.W. Kang	401
Investigation of Grinding Process of Particle Reinforced Matrix Aluminium Composites (PRAMCs) D.P. Li and Y.X. Yao	406
Petri Net Models for Assembly Sequences Planning Y.L. Fu, R. Li, H.B. Feng and Y.L. Ma	411
Conceptual Design and Simulating Research Based on Virtual Prototype Technology for Parallel Machine Tool (PMT) X.W. Guo, Z.X. Wang and L.Q. Wang	416
Elevator Feel and Centering Unit Simulation Based on SimMechanics Y. Yang, D.C. Cong and J.W. Han	424
Pipe-Routing Algorithm for Pipelines with Branches H.B. Feng, Y.L. Fu and R. Li	430
Research on Knowledge-Based Virtual Assembly Planning B. Wang, D.F. Liu, P. Wang and Q.S. Xie	435
A New Man-Machine Interactive System for Virtual Assembly of Large-Scale Products G.H. Liu, Y.X. Yao and S. Zhang	440
Virtual Assembly System for Large-Scale Complex Products Y.D. Lang, Y.X. Yao, P.J. Xia and J.G. Li	444
Off-Line Feed Rate Scheduling Using Virtual CNC J. Wu, Y.X. Yao and J.G. Li	451
Data Transfer from Heterogeneous CAD to Division Mockup Virtual Prototype B. Yuan, W. Xiong and Z.W. Wang	456
Research on Exact Placement Technology of Virtual Assembly for Large-Scale Products Y.D. Lang, Y.X. Yao, P.J. Xia and G.H. Liu	460
Intelligent Control of BRHL Based on MR Damper H.L. Xie, F. Li, F. Wang and Y.X. Liu	466
DSP Curve Surface Interpolator Research Based on Open Platform W.T. Sun, Y.X. Liu, G.M. Sun and Y.C. Zhang	471
PC-Based Human-In-the-Loop Simulation for Flight L. Zhang, H.Z. Jiang and H.R. Li	476
Cutting Parameters Optimization for Constant Cutting Force in Milling H. Zhao, J.G. Li, Y.X. Yao and C.Q. Liu	483
Tool Path Simulation Software with Ultra-Precision Grind for Aspherical Elements H.F. Wang, G.L. Wang and Z.S. Lu	488
Optimising Shot Peening Parameters Using Finite Element and Discrete Element Analysis T. Hong, D.H. Wen and J.L. Yuan	493
Code Translator of STEP-NC Based on ISO14649 T. Liu, Z.Y. Han, Y.Z. Wang and H.Y. Fu	498
Triangular Surface Reconstruction of CT Images by Using Isosurface Construction X.D. Yang, B.H. Liu and Y. Wang	503
The Controller of Vision Detecting Instrument for Steel Ball Surface Quality Based on DSP P. Wang, Y.Z. Liu, D.L. Liu, C.Y. Wu and X.L. Liu	508
An Integrated Approach for the Realization of the Real-Time Control in Electro-Hydraulic Servo System Y. Zhao, D.C. Cong and J.W. Han	513

Design of Displacement Measuring System for Nano-Hardness Test Device Q. Liu, Y.X. Yao and L. Zhou	518
Systems Analysis for Commercial Aircraft Flight Simulator P.G. Qi, D.C. Cong, H.J. Jiang and J.W. Han	522
Research of the Static Balance for Spherical Rotor H.B. Zhang, L. Zhou and Y.X. Yao	528
Research on a New Nanohardness Test Device Q. Liu, Y.X. Yao and L. Zhou	533
Development of a Self-Feedback Adjustment Piezoelectric Ceramic Power Supply L. Zhou, Q. Liu and Y.X. Yao	538
Defect Identification and Classification for Digital X-Ray Images Y. Yin, G.Y. Tian, G.F. Yin and A.M. Luo	543
A Cluster-Based Wavelet Feature Extraction Method for Machine Fault Diagnosis G. Yu, C.N. Li and S. Kamarthi	548
Bearing Fault Diagnosis Using Gaussian Mixture Models (GMMs) J. Sun, G. Yu and C.N. Li	553
Prognosis of Blade Material Fatigue Using Elman Neural Networks J.H. Yan and P.X. Wang	558
The Design of Software Platform of Data Transformation and Integration Based on J2EE Technology J.H. Ge, G.A. Gao, Y.P. Wang and C.B. Zhou	563
A Study of Cutting State Monitoring System Based on Virtual Instrument C.Y. Wu, X.L. Liu, Y.W. Wang, P. Wang and Y. Wang	568
A Hybrid Feature Selection Based on Ant Colony Optimization and Probabilistic Neural Networks for Bearing Fault Diagnostics Y.H. Gai and G. Yu	573
Depth Control Method of AFM-Based Nanomachining with Diamond Tip in Deflection Mode Z.J. Hu, Y.D. Yan, T. Sun, S. Dong and Z.Z. Zhao	578
Fuzzy Logic Combined Logistic Regression Methodology for Gas Turbine First-Stage Nozzle Life Prediction J.H. Yan, N. Isobe and J. Lee	583
A New Method with Supersonic Focalize Decomposition and Chemical Flocculate Floating-Air to Process the Dyeing and Printing Wastewater Y.N. Rui, M. Wang, W.J. Liu, D.W. Zuo and M. Wang	588
Research and Realization of Auto-Calibration Technique Based on Structured Grating 3D Measuring System J.T. Cheng, C. Zhao and W.T. He	594
Study on Substrate Temperature Field during its Swing Movement in Miniature HFCVD System D.W. Zuo, D. Zeng, H.X. Wang, W.Z. Lu and M. Wang	599
Research on Wear Behavior of Tools while Infeed Cutting Austempered Ductile Iron (ADI) with Ceramic Tools X.H. Guo, G. Liu and G.S. Su	605
Hot Affect Region of Base Clad by Laser Beam and its Repeated-Impact Properties S.H. Shi and M.D. Wang	610
The Parallel-Chain in the Machining-Process-Dimension-Chain and Application K.L. Li, Z.Y. Wang, J.F. Li and J. Geng	615
Non-Contact Measuring Modeling and Simulation of CNC Machine Tools under High Feed Rate Condition X.S. Wang and J.G. Yang	621
Machining Induced Defects and the Influence Factors when Diamond Turning of SiC_p/Al Composites Y.F. Ge, J.H. Xu, H. Yang, S.B. Luo and Y.C. Fu	626
A Finite Element Analysis of Micro/Meso-Scale Machining Considering the Cutting Edge Radius Z.Y. Cao, N. He and L. Li	631
Scheme Design of Large-Scale Hydraulic Turbine System Based on Multilayer-Case S.S. Zhong and T.C. Wang	637

Development of Differential Capacitive Displacement Sensor Based on RC Multi-Oscillating Circuit	
L. Zhou, H.B. Zhang and Q. Liu	643
Dynamics Simulation Analysis of Flexible Multibody of Parallel Robot	
C.X. Zhu, Y.X. Liu, G.Q. Cai and L.D. Zhu	647
Research on Open-Loop Control of a Microactuator with High-Resolution and Large-Stroke Based on Inverse Preisach Model	
W.R. Jiang and Z.S. Lu	652
Inequi-Diameter Milling of Gear Indexing Cam and Computer Aided NC Programming	
P.Q. Guo, C.Z. Huang, W. Wang and N. Fan	657
3-D Modeling for Teeth Correction on the Basis of Optical Measurement	
X.D. Yang, Y. Wang and P. Yang	662
Assessment of Ground Surface Roughness Based on Computer Vision Technology	
C.Y. Wu, X.L. Liu, Y.J. Wang, P. Wang and Y.Z. Liu	667
Optimization Algorithm for Automated Assembly of Circular Parts	
F. Jiang, J.F. Li and F.Y. Li	672
Prediction Models and Generalization Performance Study in Electrical Discharge Machining	
Q. Gao, Q.H. Zhang, S.P. Su, J.H. Zhang and R.Y. Ge	677
Research on Feature-Based Rapid Programming for Aircraft NC Parts	
Y.G. Li, T.L. Fang, S.J. Cheng and W.H. Liao	682
Prediction of Residual Stress in Hard Turning of AISI 52100 Using 2D FEM	
Z.Q. Wang, J. Sun, J.F. Li and I. Al-Zkeri	688
Optimization of Laser Peening Parameters Using Taguchi Method	
Y.Q. Sun, J.Z. Zhou, Y.B. Chen and S. Huang	692
An Integrated Modeling Method for an Engine Cylinder Body Based on Cross-Sectional Imaging System	
H.B. Lan, Y.C. Ding, J. Hong and B.H. Lu	697
Optimal Selection of Tool Geometry by Finite Element Simulation	
S.W. Zhang, C.Y. Gong, X.F. Fang and G.C. Wang	702
Frequency Spectrum Analysis on Cutting Forces in Cutting Process	
N. Fan, P.Q. Guo, X. Chi and Z.H. Gao	707
A Survey of Virtual Assembly Technology	
Y.D. Lang, Y.X. Yao and P.J. Xia	711
Design of a STEP-Compliant CNC System for Intelligent Manufacturing	
R.L. Liu, C.R. Zhang and X.Z. Zhang	717
Intelligent Tool Condition Monitoring System Based on Rough Sets and Mathematical Morphology	
L. Zhang, S.M. Ji, Y. Xie, Q.L. Yuan, Y.D. Zhang and Z.N. Yao	722
A New and High Precision Measurement Method of Spindle Rotation Induced Error and its Performance Research	
Z.C. Du, P. Zhang, J.G. Yang and M.S. Hong	727
Load Performances Analysis of Orifice Compensated High-Speed Externally Pressurized Spherical Gas Bearing	
Y.X. Yao, D.L. Qin and L. Zhou	732
Adaptive Signal Analysis Based on Radial Parabola Kernel	
S.C. Wang, J. Han, J.F. Li and Z.N. Li	737
The Influences of Cutting Speed on the Fatigue of Titanium Alloy	
G.S. Geng and J.H. Xu	742
Compaction Structure Designing of New Vane-Hydraulic Motor and Calculating the Angle of Pressure	
J. Cao, Y.L. Dong, H.G. Xu and Q.H. Zhang	747
Research on Chip-Breaking Model and Prediction of 3-D Complicated Groove Insert	
E.L. Liu, R.D. Han, Z.J. Li, H.P. Zhang and G.L. Wei	752
Efficient Algorithms for Calculations of the Maximum Surface Form Errors in Peripheral Milling	
Y.G. Kang, Z.Q. Wang, J.J. Wu and C.Y. Jiang	757

PCBN Tool Performance Evaluation Based on Image Analysis of Machining Surface Texture	
P. Wang, D.L. Liu, Y.Z. Liu, X.L. Liu and C.Y. Wu	762
A Trust Fine-Grained Access Control Model for ERP System	
Z.L. Jiang, S.H. Feng, M.F. Qi and Z.Q. Li	767
Study on a MEMS CAD System Based on SolidWorks	
C.F. Zhang, D.J. Lu and Z.D. Jiang	772
Using Hybrid Strategy for Region-Growing Mesh Reconstruction	
Y. Wang, H.M. Lv and S.J. Ji	777
A Framework of a NC Program Translator for Virtual Machining	
D. Gao, Y.X. Yao, W.B. Lee and C.F. Cheung	782
Estimate of Tool Wear in Milling Operation Based on “Differential” Wear Rate Model	
L.J. Xie, D. Zheng, C. Schmidt and J. Schmidt	786
The Precise Design and Machining of Formed Milling Cutters Profile Based on Feature Modeling	
W. Cheng, P. Liang and Y.F. Bu	791
Material Constitutive Model of 2Cr13 for FEA of Chip Formation Process	
L. Li, L.J. Xie, X.B. Wang, L. Wang, J. Xie and H.J. Yang	796
Tolerance Optimal Design System Development and Application Based on UG Quick Stack Module	
S.K. Cao, Z.Q. Li, Q. Gao and J. Xu	801
Model Research on Special Metal Cutting NC Machine Tool	
T. Zhao, P.Q. Ye, H. Zhang and X.K. Wang	806
On-Line Error Measurement Based on CCD in Quick-Point Grinding of Curve Parts	
Y.M. Luo and D.J. Hu	812
Study of Knowledge-Based Engineering (KBE) Technology for the Cutting of Large Containers	
Y.Q. Chen, Z.J. Li, J.X. Guo and A.M. An	817
Research on Material Removal Algorithm Model in Virtual Milling Process Based on Adaptive Dynamic Quadrtrees Algorithm	
W.J. Wang, T.Y. Wang, S.B. Fan and W.Y. Wang	822
Development of Surface Image Scanning Device Measurement Head Mechanism Based on AFM	
L. Zhou, H.B. Zhang and Q. Liu	828
Adaptive Quadrangular Segmentation of Triangle Meshes	
H.M. Lv, S.D. Xiu and Y. Wang	833
Research on Product Development Process Management for Virtual Enterprise	
S.L. Xue, Q.Y. Wei, G.M. Jiao and X.F. Li	838
Predictive Modeling and Optimization of High Performance Machining	
S.Y. Liang and B.M. Abraham	842
Path Optimization for EDM of Rimed Turbine Blisks	
Z.L. Wang, M.S. Li and X. Wu	850
Laser Sintering of Reconstituted Nanostructured PSZ Feedstock Powders	
L.D. Shen, Z.J. Tian, Y.H. Huang and G.R. Hua	855
The Development of Virtual Machining System Based on ACIS	
J. Wu, Y.X. Yao and J.G. Li	860
Simulation of Substrate Temperature Distribution in Diamond Films Growth on Cemented Carbide Inserts by Hot Filament CVD	
W. Zuo, B. Shen, F.H. Sun and M. Chen	864
State Recognition Technology and Application on Milling Tool Wear	
C.W. Xu, H.L. Chen and Z. Liu	869
5-Axis Tool Positioning via RFIM Strategy	
D. Wang, W.Y. Chen and R.Q. Wang	874
Cutting Parameters Optimization by Using Particle Swarm Optimization (PSO)	
J.G. Li, Y.X. Yao, D. Gao, C.Q. Liu and Z.J. Yuan	879
An Intelligent Optimization Controller for a Non-Linear System: Application to an Injection Molding Machine	
J.M. Liang	884

Survey on the Design and Planning of Cable Harness Assemblies in Electromechanical Products	
J. Yan, D.W. Zuo, G.M. Jiao and J.P. Li	889
Position Control System Design and Low Speed Analysis of the Three-Axis Simulator	
J. Cao, Y.L. Dong, H.G. Xu and G.Z. Cui	894
Finite Element Analysis of Dynamic Characteristics of High-Speed Motorized Spindle	
Y. Lu, Y.X. Yao and W.Z. Xie	900
Analyze of Clamp Rod on Spring Tube Stiffness Measurement	
H.F. Wang and G.L. Wang	905
Dynamic Balance Analysis of Drum-Shape Rotor	
H.B. Zhang, L. Zhou and Y.X. Yao	909
The Investigations of Tool Wear and Wear Mechanism with Water Vapor as Coolants and Lubricants in Green Cutting	
J.Y. Liu, R.D. Han and Y. Wang	913
Simulation Study on Spool Edge's Round Angle Effects on Spool Valve Orifice Discharge Characteristic	
X.D. Pan, G.L. Wang and L. Zhang	918
Three-Dimensional Finite Element Analysis on Precision Cutting for Tool with Nose Radius Considering Tool Edge Radius	
Y.S. Zhai, Y.C. Liang and Q.S. Bai	923
Emissivity Calibration and Research of Infrared Image Processing in the Cutting Temperature Test	
Y.W. Wang, H.R. Hao, X.L. Liu and C.X. Yue	928
Grey Theory Approach to Sequential Turbocharged Diesel Engine	
P.Q. Zhang, J.W. Du and Y.Y. Wang	934
Dynamic Stress Intensity Factor with Griffith – II Type Crack in Vibratory Machining and its Influence on Chip Formation	
L.Z. Gu and T. Lee	939
