

Table of Contents

Preface

Chapter 1: Vibration Technology

A Built-in Force Actuator for Active Unbalanced Vibration Control of Grinding Wheel X.L. Qiao and C.S. Zhu	3
A Theoretical Model for Calculating Vibration Characteristics of A Kind of Driver Seat with Air Spring and MR Damper X.X. Zhu and S.H. Zhu	8
Aeroengine Oil Fault Diagnosis Based on D-S Evidential Theory H.C. Qu, X.B. Ding and T.Y. Wang	15
Application of Generalized Stochastic Resonance to the Vibration Test Y. Zhang and S.M. Li	21
Conceptual Design of Hybrid-Driven Precision Press Y.G. Li and B. Yan	26
Control Strategy for Multi-Exciter Random Vibration Test D.J. Chen, J.Y. Chen, X.Q. Shen and Z.W. Chen	33
Design Strategy of Tightening Spindle System on the Principle of Modularity Y.W. Zhang and J.G. Yang	39
Experimental and Numerical Analysis for Two Kinds of Impact Vibration of Gear L.Y. Su, Y.Q. Sun and J.M. Wen	43
Low-Frequency Shaking of the Construction Machine Cab and Design of Vibration Isolators for Protecting X.J. Sun and J.R. Zhang	49
One-Dimensional Bi-Stage Phononic Band Gap Shaft Structure for Reducing Torsional Vibration L.X. Li, T.N. Chen, X.P. Wang and B. Li	54
Principle and Application of Free Resonance Vibration Isolation Based on Dry Friction Damper H.J. Yu and X.L. Yan	59
Study on Vibration Modes and Acoustic Radiation Modes for Air Conditioning Compressor M. Yu, L.L. Zhang, Y. Li, X.G. Yan and J. Du	64

Chapter 2: Mechanical Dynamics

An Experiment Study on the Dynamic Characteristics of Linear Rolling Guide L.B. Zhao, Z.Y. Weng, H.G. Ding, X.Q. Shen and X.Z. Tang	71
Analysis and Calculation of Vacuum Film Deaeration for High Viscosity Liquids X.B. Liu, J.R. Zhang, P. Li and X.H. Wang	76
Application Research for Super-Gaussian Random Vibration Test Control Strategy Z.W. Chen, X. Wen and D.J. Chen	83
Application Research of Improved BP Algorithm C. Yang and C. Shi	88
Based on GA Mixed with Trust Region Method Solving Nonlinear Least Square Problems M. Hu, T.Y. Wang, B. Geng, Q.C. Wang and D.P. Li	92
Deployment Simulation of Mooring Buoy System Z.Y. Chang, L. Wang, D.X. Gao and Z.Q. Zheng	98
Design of Distributed Wireless Monitoring System to Photovoltaic Modules Based on CC2530 B.J. Xu and M. Wang	103
Dynamic Analysis of Giant Magnetostrictive Actuator with Temperature and ΔE Effect Accounted H.Q. Yuan, W.B. Wu, D. Li and Y. Li	109

Dynamic Mechanism Research and Seismic Simulation Experimentation on Superconducting Busbar of the ITER K.S. Wang and Y.T. Song	114
Dynamic Modeling of CNC High Precision Surface Grinding Machine with Horizontal Spindle and Rotary Table MGK7350 X.X. Lin, Z.Y. Weng, B. Lu, T. Yang and H.G. Ding	119
Dynamic Performance Extraction and Recognition of the PT Speed Governor Based on Mathematical Morphology X.Q. Wang, D. Wang, S. Liang and H.J. Zhu	124
Dynamics Characteristic Analysis of Deliberate Mistuned Bladed-Disk System in Compressor Based on Substructure Method H.Q. Yuan, L. Zhang and L. Song	129
The Finite Element Analysis of Vibrating Screen C.G. Ding, F.Z. Song, B. Song and X.H. Men	134

Chapter 3: Functional Manufacturing and Information Technology

A Euclidean Distance Optimization Model of Manufacturing Task Parameters for Collaborative Manufacturing Chain of Virtual Enterprises F.Q. Cheng	141
A Mathematical Model for Frost Formation on Ground Aircraft L.W. Wang, D.D. Xu and Z.W. Xing	147
A New Interpolation Algorithm for Auto Machining Technology of 3-D Profile of Die Edge T. Wang, Y.J. Cai and G.H. Li	152
A Nonlinear PID Controller for Electro-Hydraulic Servo System Based on PSO Algorithm J.P. Chen, B.C. Lu, F. Fan, S.C. Zhu and J.X. Wu	157
A Stochastic-Based Method for Finite Element Model Validation S.F. Bi and Z.M. Deng	162
Abnormal Noise Diagnosis of Internal Combustion Engine Using Wavelet Spatial Correlation Filter and Symmetrized Dot Pattern C. Yang and T. Feng	168
Adaptive Quadrant Error Compensation of Embedded CNC System Based on ARM and DSP Y.Y. Ding, G.F. Wang, Z.F. Qiao, Z.Y. Tang and X.G. Ling	174
Aeroelastic Analysis of Supersonic Airfoil with Hysteretic Nonlinearities M.X. Fang	180
An Algorithm for Space Tool Compensation Used in Five-Axis Numerical Control System L. Zhao, J.C. Dong, Z.F. Qiao, Y.Y. Ding and Z.Y. Tang	186
An Effective Method for Determining Finite Element Model Parameters of Rotor Elastic Support System Y.X. Wang, J. Yan and S.Z. Wang	191
An Interface Design of Communication between PC104 and DSP Based on Dual-Port RAM B. Li, Q.J. Liu, Z.F. Qiao, J.C. Dong and Q. Liu	198
Analysis and Simulation of Screw Joint in CNC Machine Tool Y.W. Zhang and W.M. Zhang	203
Analysis of Dynamics Characters of Bed Structure of CNC Machine Tool on FEM Method Y.W. Zhang and W.M. Zhang	208
Analysis of Natural Frequency of Simply Supported Beam with Vertical Elastic Constraint B. Geng, M. Hu, Q.C. Wang, J.Z. Lin and D.P. Li	212
Bearing Elevation Monitoring Instrument and its Application on Multi-Support Turbo-Generator Unit Y.J. Guo, Y.W. Tian, J.Y. Liu, Y.W. Bai and W.T. Zhang	218
Behaviour of Tube under Axial Crush Load with Considering Effect of Heat Exchanged X.S. Dai and J.M. Ma	224
Design and Implementation of Modular FPGA-Based Multiple-Axis Motion Controller for CNC X.G. Ling, Q. Li, Y.Y. Ding, Z.Y. Tang, Y.Y. Ding and J.B. Xun	233

Design of Automatic Assembly System of Saw Chain Z.X. Ding, F. Yuan and J. Zhu	239
Development of a Master-Slave Architecture Handheld Rotating Machine Fault Diagnosis Instrument J. Wan, T.Y. Wang, J.C. Dong, P. Zhang and Y. Hao	244
Development of an Ontology-Based and STEP-Compliant Intelligent CNC System P. Li, T.L. Hu and C.R. Zhang	251
Digitally Reverse Modeling for the Repair of Blades in Aero-Engines T. Wang, Y.L. Liu, L.W. Wang, H. Wang and J. Tang	258
Error Analysis and Calibration of Gyro-Stabilized Platform for Electro-Optical Pointing System X.Y. Zhou, Y.F. Lu, Z.Y. Zhang and D.P. Fan	264
Evaluation and Design of SNS User Interface in Handheld Device Based on Fuzzy Clustering R. Tian, Q.S. Xie and L.W. Shi	270
Experimental Research on the Crack Identification of Drawing Parts Based on AE Technique Z.G. Luo, B.G. Zhang and X. He	275
Extraction of Frequency-Variable Characteristics and Analysis of Modulation Mechanism under Periodic Excitation X.Q. Wang, Y. Zhao, S. Liang and S.H. Qian	279
Failure Mode, Effect and Criticality Analysis of CNC Grinder H.J. Wang, L. Sun and L. Shi	284
Finite Element Analysis of the Helical Surface Cutting Tool X.W. Sun, H. Wang, K. Wang and X. Feng	289
Finite Element Simulation of Extremely High Speed Machining of Ti6Al4V Alloy Y. Tan, Y.L. Chi, Y.Y. Huang and T.Q. Yao	293
Four-Point Regulation Algorithm for an End-Effector of a Flexible Drilling Robot L.X. Zhang and X.S. Wang	298
Fuzzy Sliding Mode Control for a Three-Links Spatial Robot Based on RBF Neural Network S.B. Hu and M.X. Lu	303
Helmholtz Resonator with Extended Neck and Absorbing Material R. Bi, Z.S. Liu, K.M. Li, J. Chen and Y. Wang	308
Influence of Crank Radius on the Curve Shapes for a Multi-Link High-Speed Precision Press X.J. Lu, S.H. Zhu, Z.M. Ke, J. Qin and S. Wei	313
Influence of Vehicle Suspension System on Ride Comfort J.Z. Xia, Z.P. Ma, S.M. Li and X.B. An	319
Interior Acoustic Field Analysis of Hydraulic Excavator's Cabin Based on Bem Y. Wang, J.R. Zhang, X.B. Liu and V. Le	323
Investigation of Laser Parameters Influence of Direct-Part Marking Data Matrix Symbols on Aluminum Alloy H.D. Qiu, W.S. Bao and C.H. Lu	328
Kinematics and Kinetostatic Analysis of a New Type of Mechanical Excavator with Controllable Mechanism Y.C. Pan, G.W. Cai, Z. Zhang, Y. Chen and Y.Z. Li	334
Machining Theory of Forming Complex Inner Helicoid and Numerical Algorithm to Design Contour of the Disc-Mill Cutter K. Wang, S.Q. Wang, X.W. Sun and G.D. Liu	339
Measurement and Analysis of Cutting Force and Optimization of Cutting Parameters by High Speed Milling H.Z. Li, Y. Wang, N.X. Zhu, R.B. Hu, C. Zhang and F.B. Wang	344
Modeling and Identification for Lightweight High-Speed Machines with Loads Variation S.X. Fan, D.P. Fan and R. Nagamune	350
Modeling and Simulation of Aircraft on Ground Deicing Process Based on Thermal Balance B. Chen and L.W. Wang	355
Modeling and Simulation of Clamp Band Dynamic Envelope in a LV/SC Separation System J.L. Li, S.Z. Yan and X.F. Tan	359

Modeling and Simulation of Full-Float Tractor Cab Suspension System Based on ADAMS L. He, S.H. Zhu and H.L. Zhu	364
Module Partition and Evaluation Method of NC Spiral Bevel Gear Machine Tools Z.G. Han and M. Hu	370
NC Machining Simulation of Spiral Bevel Gear Based on VERICUT Y. Wang, J.C. Dong, T.Y. Wang and L. Zhao	376
Numerical Prediction on Noise from Axial Flow Fan Based on Modified Blade Force Model C.J. Wu and X.Y. Zhang	381
Numerical Study on Structural Improvement of the Grill Fixed at the Outlet of the Air Conditioner Outdoor Unit Y. Liu and C.J. Wu	386
NURBS Curve Design and CNC Machining Principle B.Y. Peng and Q.S. Han	392
Online Identification of the Bearing Dynamic Parameters for Rotor-Bearing Systems C.L. Liu, S.P. Zhou, Y. Di and P.R. Xie	397
Optimization of Milling Parameters Based on Genetic Algorithm Q. Li, R. Wang, Q.J. Liu, R.Z. Wu, M.K. Shao and C.J. Liao	403
Pneumatic Mechanism of Gas Cooled or Heated Through a Throttle Orifice Y.B. Yin and L. Li	408
Precision Analysis for Large-Travel Rotational Butterfly Pivot Y.F. Lu, X.Y. Zhou, D.P. Fan and Z.Y. Zhang	413
Processing Parameters Optimization Based on PSO Algorithm R.Z. Wu, Q.J. Liu, M.K. Shao and R. Wang	419
Research of the Soft PLC Based on the Open PLC Z.Y. Tang, J.C. Dong, Z.F. Qiao, X.G. Ling, Y.Y. Ding and J.B. Xun	424
Research on Integrated Architecture for Tool Wear Monitoring System of CNC Machine Center Q. Ning, Q.J. Liu and L. Liu	429
Research on Mechanical Fault Diagnosis Based on Cascaded Bistable Stochastic Resonance and Fractal Box Dimension Y. Hao, J.C. Dong, T.Y. Wang, J. Wan and P. Zhang	434
Research on Post Processing of 5-Axis Linkage Machines M.K. Shao, Z. Wang, J.Z. Zhi, R.Z. Wu and R. Wang	438
Research on Power Flow Transmitted through Rolling Bearing in the Gear Shaft-Plate Coupled Structure X.F. Zhang, R. Huo, Y.Q. Zhou and Z. Zhou	442
Research on Subdivision Interpolation for High Speed CNC Applications J.C. Dong, Q.J. Liu and T.Y. Wang	449
Research on the Information Extraction Technology of STEP X.B. Liu, W. Zhao, C.N. Li and D.J. Hu	455
Research on the Post-Processing Algorithm about Five-Axis High-Speed Machine Center W. Zhao, T.A. Hadush and Q.Y. He	460
Research on the Remote Monitoring and Fault Diagnosis of CNC System Based on Network J.Z. Lin, D.Y. Jiang, B. Geng and Z.H. Zhang	465
Research on the Vibration of Sheet Metal near the Zinc Pot Area in Continuous Hot-Dip Galvanizing Line P.M. Xu, B. Wang, J.J. Ye, H.J. Zhang, Z.L. Huang and X.K. Xu	471
Resin Concrete Specimens Attenuation Characteristics Research H.G. Ding, Z.Y. Weng, H.W. You, B. Lu and X.Z. Tang	478
Signal Feature Extraction about the Oil Whirl and Oil Oscillation Based on EMD B.J. Xu and R. Liu	483
Singularity Analysis of Limited-DOF Parallel Manipulator Based on Jacobian Matrixes X.Y. Li and W.Y. Chen	488
Smart Reverse Supply Chain: An Application of IoT to Green Manufacturing X.Q. Xu, C. Jin and Y.D. Cao	493
Software Development of Portable Data-Acquisition and Signal Analysis Instrument Based-on Qt D.Y. Jiang and J.Z. Lin	498

SR Recovery Methodology Based on the Signal Classification P. Zhang, J.C. Dong, T.Y. Wang, J. Wan and Y. Hao	503
Stability Analysis of Turning Process Based on a 2-DOFs Model with Overlap Factor L.X. Zhang, X.S. Wang and S.L. Liu	508
Strength Optimization Design of Box-Shape Arms of a Scissor Lift Mechanism with Single Hydraulic Cylinder W. Zhang, X.X. Wang and L.W. Wang	513
Study of Camshaft Grinders Faults Prediction Based on RBF Neural Network T. Dong, H.J. Wang and L. Shi	519
Study on Post-Processing of Five-Axis Cnc Machining J.Z. Zhi, C.Z. Ren and J.C. Dong	524
Study on the Test Method for High Temperature and Heavy Loaded Grease Bearing Life Y.G. Xu, Z.Y. Weng, H.W. You, Y.Q. Zheng and X.P. Huang	529
The Analysis of Transient Stability for Four Wheel Steering Automobile with Proportional Control Z.J. Song	534
The Comparison of Acoustic Emission with Vibration for Fault Diagnosis of the Bearing X.L. Feng, G.F. Wang, X.D. Qin and C. Liu	539
The Design of Modal Analysis System Based on an Improved Algorithm of Discrete Orthogonal Polynomial Z.W. Chen, L. Yuan and Y.C. Hu	544
The Development of DNC Transfer Software Used in CNC Machine Tools J.B. Xun, G. Wang, Z.F. Qiao, Y.Y. Ding, X.G. Ling and Z.Y. Tang	550
The Effect of the Restrictor Structural Parameters on the Static Properties of the Aerostatic Guide Way by Finite Element Analysis H.P. Li, P. Ma and B. Zhou	554
The Machining Parameters Online Monitoring Method for Stability Prediction Y.X. Jiang, S.P. Deng, Y.M. Qi and B. Du	559
The Online Monitoring of Surface Quality Based on Time-Frequency Spectrum Analysis of Acoustic Emission C. Liu, G.F. Wang, X.D. Qin and L. Zhang	564
The Optimization Design and Analysis of Motorcycle Frame Structure J. Wang, J. Zhou, B.B. Li, X.L. Li and S.Y. Song	569
Tool Wear Monitoring in Milling Processes Based on Time-Frequency Analysis of Acoustic Emission L. Zhang, G.F. Wang, X.D. Qin and X.L. Feng	574
Vehicle Frame Fatigue Life Prediction Based on Finite Element and Multi-Body Dynamic S.H. Zhu, Z.J. Xiao and X.Y. Li	578

Chapter 4: Other

Application of Growth Production Design DNA Calculation Inference on the Building Process of Packing Product Line Virtual Prototype L.W. Shi, Q.S. Xie and R. Tian	589
Reliability Analysis Based on Efficient Simulation X.S. Gong and G.Q. Zhang	594
Research on Ride Comfort of Off-Road Vehicles J.Z. Xia, Z.P. Ma, S.M. Li and X.B. An	601
Study on an EV Traction Control Strategy S.R. Yan and S.Z. Li	605
Technology of Magnetic Flux Leakage Signal Detection Based on Scale Transformation Stochastic Resonance Y.S. Peng, Y.G. Leng and J. Wan	611
Test Methods for Durability of Electric Nail Gun H.G. Ding, Y.Q. Zheng, L.J. Song and Z.Y. Weng	616
