

Table of Contents

Preface and Committee

Chapter 1: Material Science and Engineering

Analysis of Hot Working Characteristics of Aluminium Based Composites Using Response Surface Methodology B. Ramesh and T. Senthilvelan	3
An Effective Route to the Fabrication of Super-Hydrophobic Surfaces Combined by Micromolding and Photograft Polymerization Methods J.T. Yang, L. Wang, Z.Y. Huo, J. Feng, F. Chen and M.Q. Zhong	9
Influence of Cooling Rate on the Microstructures and Properties of a Nb-Ti-Mo Steel H.L. Yi, Y. Xu, Z.Y. Liu and G.D. Wang	14
Effect of Pass Thickness Reduction on Microstructure and Formability in AZ31 Magnesium Produced by Differential Speed Rolling W.J. Xia, L. Liu, F.Q. Zhang and C.C. Xu	18
The Development and Application of Super-Lightweight Aggregate Pumping Concrete C. Gao	24
Effect of Thermo-Oxidative Ageing on Aviation Polysulfide Sealants Y.Y. Wang and J.Y. Meng	28
Investigation on the Effect of Infilled Walls Utilizing Response Spectrum Analysis for Steel Staggered-Truss System Q.S. Guo and Q.S. Yang	34
TEM Analysis and Corrosion Resistance of the Ceramic Coatings on Q235 Steel Prepared by Hybrid Method of Hot-Dipping Aluminum and Plasma Electrolytic Oxidation L.H. Lu, D.J. Shen, J.W. Zhang and C.H. Guo	40
Biosorption of Precious Metal Ions by Magnetically Activated Sludge Cultured Bacteria F. Cai, J.S. Sun, T.T. Zhao and J. Li	46
Preparation and Mechanism of High Dosage Fly Ash Cement R.G. Wang	52
Research on Mechanical Model of EPDM Insulation Charring Layer Y.H. Xu, C.B. Hu, Z.X. Zeng and Y.X. Yang	57
Electrochemical Behavior of Potassium Zinc Phosphates Extract and Coating D.P. Wei, S.M. Ma, Z.G. Zhou, Z.W. Huang, A.Q. Yuan and A.P. Liao	64
Influence of MgO on Sintering and Property of Belite-Barium Calcium Sulphoaluminate Cement L.C. Lu, S.D. Wang and H. Wang	68
Tool Wear of Diamond-Like Carbon-Coated High-Speed Steel with a Cr-Based Interlayer in Cutting of Aluminum Alloys T. Wada, K. Iwamoto and H. Sugita	74
Thermal Analysis on Cryocooler Cooled High-Tc SMES Magnet L. Shi, G. Wu, X.M. Yu and Z.Y. Pang	80
Microstructures and Thermophysical Properties of Polymer Derived SiC/C Composites X.Y. Han, H.F. Cheng, X. Xing and J. Wang	86
Investigation of Hyperbranched Polyesters with Different Generation and their Application in Waterborne Polyurethanes D.Y. Yang, L. Han, H.Q. Zhang and F.X. Qiu	91
Study on the Group Settling Velocity of Non-Viscous Solid Particle Y.Z. Zhang, S. Wang and J.L. Zhu	97
Fatigue and Fracture Character of Metal Rubber Material Y.M. Li, H.B. Bai and J.C. Yang	102
Effects of Electromagnetic Stirring on the Solidified Microstructure of Martensite Stainless Steel G.F. Zhan, E.G. Wang, E. Jiang, Z.W. Jiang and J.C. He	106

Dimensional Stability of Poplar Wood after Densification Combined with Heat Treatment J.B. Cai, T. Ding and L. Yang	112
Laboratory Test Study on Asphalt Concrete with Steel Slag Aggregates W. Li, P.X. Sun and C.X. Zhang	117
Study on Dynamic Fracture Property and Temperature Effect of 4145H Drilling Collar Steel F. Liu, D.Z. Zeng, T.H. Shi, F.Z. Lv, L. Tu and J.J. Tu	121
Preparation and Characterization of Large-Sized ADM Monocrystals J. Zhang and Y.H. Guo	126
Effects of Nano-Cr₂O₃ Doping on Properties and Microstructures of Vitrified Bond CBN Grinding Tools H.J. Zheng, Z.W. Zhao, S.L. Xia, F.C. Wei and L.Q. Zhang	130
Simulation and Springback Prediction of Integral Panel with High Ribs in Age Forming Z. Gan, H.B. Tan and J.Z. Zhu	135
Structure of Mold Surface for Stress Relaxation Forming of Integral Panel of 2124 Aluminum Alloy Z. Gan, Y.P. Wu, J.Z. Zhu and H.B. Tan	140
Explicit Expression of Stresses Field in Semi-Infinite Elastic Solid S.Q. Ge, R. Wu and B.L. Wang	145
Tensile Behavior of Rolled and Annealed Copper Thin Foils T.K. Jung, S.Y. Lee, T.B. Kim, K.H. Kim, H.S. Lee and H.C. Kwon	151
Interface Microstructure and Mechanical Properties of SiCp/2014Al Aluminum Matrix Composite Vacuum Brazing Joint T. Feng, Y.A. Zhang, Z.Q. Yu and Y.Z. Wang	156
Theoretical Research on Microwave Assisted Magnetic Moment Reversal in Magnetic Recording Media S.M. Li	162
Design of ZrO₂/Ti Functionally Graded Thermal Barreir Coatings Based on a Nonlinear Micromechanical Approach H. Tsukamoto, H. Sato and Y. Watanabe	167
The Research of Energy Analysis Based on Intelligent Algorithm in Ferroalloy Enterprise D. Qiu, Y.Y. Fu and X.B. Wang	171
Hydro Thermo-Baric Processing and Properties of Nano Silica from Rice Husk U. Benjamin Iyenagbe and O. Mamat	177
Study on Bonding Properties of Copper and Aluminum in Nano Scale Using Molecular Dynamics Simulation Q.C. Hsu, Y.Y. Cheng and B.H. Liu	183
Investigation on the Freeze Casting Porous Al₂O₃ Ceramic Bodies Infiltrated with Nb-Ti-Al-Cr Alloy by Pressureless Infiltration H.M. Chen, M. Luo, H.C. Wang, P. Fu, D. Yang, X.X. Lin and X. Li	188
Experiment Research on Activated Cement Q. Zhang, H.M. Cheng, J. Cao, Z.G. Song and Y. Gui	193
Luminescent Properties, Afterglow Behavior and Thermoluminescence Characteristics of (Eu, Dy) Doped Sr₃Al₂O₆ Phosphors Y. Li, Y.H. Wang, Y. Xiong, T.Q. Peng and M.S. Mo	198
Turbocharged Solid Propellant Ramjet for Tactical Missile S. Yang, G.Q. He, Y. Liu and J. Li	204
On XFEM Applications to Crack Surface under External Force T.T. Yu and L.Y. Shi	210
Wear Behavior of Al/SiC Composite Coatings According to Sliding Speed and Applied Load J.H. Lee, K.T. Kim and Y.S. Kim	216
Ignition and Combustion of Magnesium Particles in Carbon Dioxide S.M. Zhang, C.B. Hu, S.Y. Xia, L. Li and X.G. Wei	220
Microstructure and Glass-Transition Temperature of Novel Sn-SIBR Y.B. Xu, G.Z. Yu, L. Xu and C.Q. Li	226
Densification Process of WC-MgO Nanocomposite Based on Master Sintering Curve C.X. Ouyang and S.G. Zhu	232

Effect of Cerium-Rich Mischmetal Content on the Mechanical Properties and Fracture Morphology of New 5XXX Series Aluminum Alloys H. Shen, H. Liang, G.C. Yao, W.D. Yang and X.D. Ren	239
Discussion on β-Cyclodextrin Grafting onto Chitosan Fiber Protected by Benzaldehyde W.H. Li, J. Guan, M.L. Jing, S.J. Huang, J.M. Wu, Z.H. Li, X.D. You and L.M. Hao	244
Simulation on the Slag Pool Flow Field in the Electroslag Casting Process J.P. Yao and Z. Sun	250
The Way of Obtain $C_6H_{10}O^+$ Fragments Laser-Induced by $C_7H_{12}O^+$ Excited State H.B. Chen, Y. Zhu, J. Wu and D. Wu	255
Phase Transformation during the Hot Pressing of WC-40vol.% Al_2O_3 Composites H.X. Qu and S.G. Zhu	260
3D Numerical Simulation of Compressible Gas Synthetic Jet Y.T. Ding, R.Q. Liu and R.N. Su	266
The Way of Obtain $C_5H_8O^+$ Fragments Based on Laser-Induced Calculation Y. Zhu, H.B. Chen, Y.L. Wang and D. Wu	271
Metallographical Image Segmentation and Compression Q.D. Sun, S.F. Gao, J.W. Huang and W. Chen	276
Parametric Study on Rectangular Sonic Crystal A. Gupta, K.M. Lim and C.H. Chew	281
Simulation and Experimental Research on Temperature Increase of Safety Gear Action of Explosive-Proof Lift J. Xue, H. Jiang and J. Yao	287
Probabilistic Fatigue Crack Growth in Compact Tension Specimens from FSWed 7075-T651 Aluminum Alloys S.J. Kim, Y.H. Jeong and H.J. Sohn	293
FEM Simulation of the Slab Edge Rolling in Unsteady Rolling Stage R. Ren, X.P. Zhang and X.Z. Du	297
Cantilever Protection Aluminum Profiles Extrusion Die Design Method and Numerical Simulation J.Y. Pan, Y. Wang, Z.Y. Zhou and S.B. Dong	301
Synthesis of 2-Acetoxy-6-Naphthoic Acid with P-Methylbenzenesulfonic Acid as Catalyst Y.J. Song, Y.W. Li, B.Q. Pan and H.N. Song	306
Rockwell Hardness Modeling Using Indented Volume J.D. Kim, M.C. Yoon and J.Y. Ryu	312
Study on Electric Contact Heating for Nodular Cast Iron 600-3 X.B. Qi and S.G. Zhu	316
Deformation Microstructures and Textures of Cast Mg-3Sn-2Ca Alloy under Uniaxial Hot Compression C. Dharmendra, K.P. Rao, Y.V.R.K. Prasad, N. Hort and K.U. Kainer	322
Microstructures and Properties of Hypoeutectic Al-Si Alloy Extruded in Semi-Solid State D.Z. Zhao, F.X. Yu, F. Liu, K.Z. He and L. Zuo	326
Computerized Sheet-Metal Inspection Based on the Cross Network Communication T. Suzuki, K. Sato, S. Muramatsu, M. Murata and T. Oitate	331
Relationship between Valence Electron Structures and Mechanical Properties of ZL203 H. Qu and W.D. Liu	336
Theoretical Calculation of the Polytypism Transition Temperature of Titanium Alloys on the Valence Electron Level H. Qu and W.D. Liu	342
Desulfurization and Regeneration Properties Study of Fe_2O_3/Attapulgit Removing H_2S L. Li, Q.N. Wang and J.Y. Chen	348
Chemical and Structural Characterization of the Amorphous Phases in Fused Fluxes for Submerged-Arc Welding X.H. Liang, T.J. Liu and X.M. Hua	354
Investigation of Tensile Deformation Behavior of 7075-T6 at Elevated Temperatures G.W. Zhou, D.Y. Li and Y.H. Peng	358
Pressure Behavior of a Coupling Model with Variable Permeability Effect X. Fu, X.F. Li, S.Q. Cheng, L. Huang and X.R. Nie	364

Pressure Response of Polymer Flooding Reservoir by Considering Diffusion and Conduction Behaviors	369
X.R. Nie, S.Q. Cheng, Y.J. Zhao and Y. Zhang	
Effect of Aging Temperature on the Microstructure and Mechanical Properties of 1000MPa Grade Low Carbon Bainitic Steel	376
L.F. Zuo, Z.L. Wei, R. Ni, B. Ma and Z.D. Wang	
Effects of Composite Patch Geometry on Collapse Load of Pressurized Steel Pipes with Internal Longitudinal Flaws	381
H. Hosseini-Toudeshky and E. Fadaei	
A Simple Method to Estimate the Fatigue Crack Growth Life of Repaired Pipes with Composite Patches	387
H. Hosseini-Toudeshky and M.A. Ghaffari	
The Preparation and the Properties of CS/PVP Composite Hydrogel Microspheres	393
C.Y. Liu, F.M. Wu, D.H. Yao, Y. Wang and Y.Q. Zhang	
Effect of Temperature and Moisture Content on Thermal Conductivity of Green Teas	399
J.W. Yan, L. He and L.Y. Yang	
Stability of High Speed Milling Based on Instantaneous Cutting Force	404
H.L. Zhou, W.X. Tang and Q.H. Song	
Photocatalytic and Self-Cleaning Properties of TiO₂-Cu Thin Films on Glass Substrate	409
W. Sangchay, L. Sikong and K. Kooptarnond	
Reliability Evolution of Optical Fibre Subjected to Chemical Environment	414
I. Severin, R. El Abdi, M. Poulain and M. Caramihai	
Joining of 1100 Al Alloy to AISI 1045 Carbon Steel by Friction Stir Welding	418
N. Karimi, M. Shakeri, M. Habibnia and S. Nourouzi	
Design Criteria of a DMFC Stack with Low Scaling Effects	424
M. Shakeri, J. Imen and A. Delavar	
Error Analysis in Multistage Machining Process Using Kinematic Analysis of Workpiece Fixturing	430
V. Abedini, M. Shakeri and M.H. Siahmargouie	
Impact Response and Energy Absorption of Aluminium Foam-Filled Tubes	436
Y. An, C.E. Wen, P.D. Hodgson and C.H. Yang	
Microstructure and Hardness Property of Internally Oxidized AgCdO Alloy	440
H.S. Lee, H.W. Shin, T.K. Jung, T.B. Kim and M.H. Lee	
Rapid Analysis of the Triad Sequence Distributions of Ethylene-Propylene Rubber by IR-¹³C NMR-PLS	444
X. Zhao and G.T. Xu	
Optimization of Flow Control Device in 300,000t Heavy-Duty Casting and Forging CCM Tundish	450
W. Xiong, Z. He and G.Q. Wang	
Springback Angle and Plastic Elongation Prediction of Thin-Walled Tube Bending by FEM	456
W.J. Dan and W.G. Zhang	
High Order Numerical Study of Gas Squeeze Film with Flexural Boundary Condition	462
J. Li, J. Wu and J.Q. Ren	
Parametric Optimization of Machining Ti-Alloys in Respect to Surface Roughness - A Review	468
B.A. Kazi and M.M. Abdul	
Post-Buckling Analysis of FGM Beam Subjected to Non-Conservative Forces and In-Plane Thermal Loading	474
F.Q. Zhao, Z.M. Wang and R.P. Zhang	
Preparation of Polyurethane Immobilized Nitrifying Bacteria Pellets and Application to Treatment of Micro-Polluted Source Water	480
Y.W. Jin, Y.M. Dong and Z.J. Zhang	
The Self-Sterilized Properties of Ag@TiO₂-Styrene-Acrylic Complex Coatings	485
X.D. Zhou, F. Chen and M.Q. Zhong	
Efficiency of Pollutants Removal in Košice Area with Respect of Living Quality Increasing	489
H. Pavolová, A. Csikósová, K. Čulková and M. Antošová	
Increase of Alternative and Renewable Energy Sources Utilization in Slovakia by 2020 in Comparison to other Selected EU Countries	495
H. Pavolová, A. Senova and T. Bakalár	

Rapid Growth and Magnetic Properties of Fe₇CO₃ Intermetallic Compound Y.Y. Zhang, W.J. Yao, W. Sun, J.Y. Wang, X.J. Han and N. Wang	501
Determination of Cl⁻ and SO₄²⁻ in Boric Acid D.T. Gong	507
Nanocrystalline Silicon Films with High Conductivity Prepared by Hot Wire Chemical Vapor Deposition C.Y. Liu, Y.T. Yun, P.C. Hsieh, J.K. Hsu and S.Y. Lien	513
Effect of Templates on the Electrochromic Properties of Tungsten Oxide Thin Films D.N. Qu, H.F. Cheng, Y.J. Zhou, X. Xing and D.Q. Liu	519
Application of Fractal Dimension Feature to Recognition of Surface Defects on Hot-Rolled Strips K. Xu, P. Zhou and C.L. Yang	526
Cooling System CAE Analysis and Optimization Design of Hot Stamping for High Strength Steel Sheet Y.G. Wang, Q.H. Sun, G.H. Li and Y.J. Cai	531
Influence of Composition on the Corrosion of Steel Bar of Reinforced Geopolymer Concrete Q. Wang, J. Da, C.B. Zhang, Z.Y. Ding and Z.T. Sui	536
The Research on the Dynamic Characteristic of Rubber Isolator D.B. Han	542
Environmental Effect on Fatigue Properties of Die-Cast Magnesium Alloys M.B. Liu, Q.D. Liu, X.H. Wang and H. Gao	548
Application of Smart Coating Sensor in Crack Detection for Aircraft M.B. Liu, X.H. Wang, Q.D. Liu and H. Gao	554
Modeling of the Transient Response for Compressible Air Cushion Vehicles (ACV) A.S. Sowayan and K.A. Alsaif	560
Instability Analysis of the Bipolar Plate for Welding Fuel Cell Y.X. Yao and C.Y. Shi	568
Structure Morphology of Polyethersulfone Hollow Fiber Membrane via Immersion Precipitation Phase Inversion Process P. Lan and W. Wang	574
Dynamic Impact Analysis for <i>Ex Situ</i> Toughened Composite Laminates L.P. Liu, X.F. An, M. Zhang and X.S. Yi	579
Continuous Cooling Transformation Diagram and Properties of Hot Forming Steel M. Zhang, Q.S. Li, K. Han, C.B. Huang, R.Y. Wu, R.Y. Fu, L. Li, Z. Wan and B.L. Sun	585
Synthesis of SiC Macroscopic Spheres from Fly Ash L. Zhang, X.P. Wang and J.J. Yang	589
Computer Simulation of Cylindrical Shell Penetrated by Rigid Projectile X.H. Yu, Z.J. Han, Z.Y. Kang, G.Y. Lu and Z.F. Liu	594
Control Conditions for the Second-Class Crack of Concrete Based on Different Modulus Theory W.J. Yao, Y.T. Zhou and J.W. Ma	599
The FEA of New Type Roller Movable Teeth Reducer J.F. Wu, X. Zhou and H. Zhang	603
Fabrication of Nano-Fibrous Poly(L-Lactic Acid) Scaffold Enhanced by Silane Modified Chitosan Fibers X.J. Wang, T. Lou, X.T. Lang and G.J. Song	609
A Study of Macrogeometrical Deviations in the Dry Turning of UNS R56400 Ti Alloy J. Salguero, J. Gerez, M. Batista, J.E. Garófano and M. Marcos Bárcena	613
Stabilization of Variable Rope Length Pendulum Using Lyapunov's Theory and Differential Geometry L. Bláha	618
Investigation on Mechanical Properties of Clay-Based Material Prepared from the Yellow River Silt J.J. Yang, L. Zhang, P. Guo and X.P. Wang	624
Research on Lattice Distortion Modification Processing Technology of Cotton/Linen Fiber and Yarn Z.N. Zhu, Z. Meng, H.L. Zhu and Y.Z. Sun	630

Effect of Lattice Distortion Modification Processing on Crystallinity and Orientation of Ramie Fiber	
Y.Z. Sun, Z.N. Zhu, Z. Meng and X.P. Gao	634
High Temperature Properties of Magnesium Based Composites Prepared by Spark Plasma Sintering	
W.N.A.B.W. Muhammad, Y. Mutoh and Y. Miyashita	638
Mechanical Properties of Metallic Glass Matrix Composites Synthesized by Powder Consolidation as Precursor of Porous Material	
M.H. Lee and B.S. Kim	643
Roughness Based Analysis of the Influence of Tool Coating in the Dry Turning of UNS R56400 Ti Alloy	
J. Salguero, J. Gerez, M. Batista, A. Gómez, P.F. Mayuet and M. Marcos Bárcena	647
Research on Protective Method of Amino in Chitosan	
X.X. Shang, B. Zhao and X.M. Zhang	653
Synthesis and Characterization of UV-Thermal Dual Hybrid Curable Organosilicon Modified Epoxy Monoacrylates	
H.B. Liu, F. Lin and W.Y. Zhang	657
Comparison of Mechanical Properties of RE-7075 Al Alloy's Hot Rolled Sheet and Cold Rolled Sheet	
J.H. Zhong, H.B. Zhu, K. Feng and Y.P. Xiao	661
Finite Element Analysis of Thermal Effect on Large Thick Titanium Alloy Electron Beam Welding with Different Focus	
B.G. Zhang, G.Q. Chen, W. Guo and M.X. Shi	665
Study of Static Recrystallization Microstructure Evolution of 304 Stainless Steel	
X.D. Zhao, J.S. Liu, H.Q. Chen, X.W. Duan and W.W. He	672
Smokeless Chemical Polishing Practical Techniques	
J.G. Zhang and H.B. Zhu	678
Poly(ϵ-Caprolactone)-b-Hyperbranched Polyglycidol for Targeted Drug Delivery	
X.H. Li, L. Wang, J. Yang and C.X. Song	683

Chapter 2: Applied Mechanics and Mechanical Engineering

Pressure Behavior of a Coupling Model with Variable Permeability Effect	
X. Fu, X.F. Li, S.Q. Cheng, L. Huang and X.R. Nie	689
The Oil Condition Analysis of Involute Spur Gear	
H. Zhao and Y.Q. Wang	694
Research of Engine Oil Change Period about Shenzhen LNG Bus	
F.S. Meng and W.W. Huang	698
Twist-Bend Coupling Analysis for 5MW Wind Turbine Blades	
X.Y. Zhou, L.Q. An and Z.Q. Wang	703
Based on ANSYS Design Optimization of Vehicle's Tailgate	
Y. Tao, Z.H. Li, S.F. Wang, J.J. Fan, W.W. Zou and Y. Huang	709
Research on Lubricating Capability of Gear Oil Pump with the Arc-Cycloid Tooth Profiles at Meshing Zone	
Y.C. Zhang	714
Geotechnical Engineering and Engineering Practice in Artificial Filling	
W. Lei	720
Numerical Analysis Technique to Estimate the Reliability of a Disc Brake System – Hot Judder Simulation	
H.J. Do, P.J. Sung and S.C. Won	723
Simulation Calculation Method Study on Machinery Output Torque	
J. Jin, W.G. Liang and Z.S. Zhang	727
Nonlinear Analysis of Bioprosthetic Heart Valves under Dynamic Loading	
Q. Yuan, X. Ye, H.B. Ma, H. Cong and X. Huang	732
Research on Crosswind Stability of FSAE Racing Car with Rear Wing at Different Attack Angles	
J. Ni, S.Z. Chen, D. Feng, X.J. Wang and J.X. Hao	737

Performance Analysis of the Flotation Cushion with Elastic Pressure Equalizing Groove for Aerostatic Slideway	
J.A. Zhang, H. Dong, F.J. Ma and B. Liu	743
Effects on Mechanical Behavior of the Flexible Tube for Automobile	
J.B. Kim	749
Finite Element (FE) Analysis of Meshing Performance of a Theoretical Assembling Symmetrical Bevel Gear Differential	
S. Deng, L. Hua, X.H. Han and S. Huang	753
Conceptual Design and Optimal Torque Sharing Strategy for Hybrid Vehicles with Epicyclic Gear Trains	
N. Mir-Nasiri	759
Computation of Theoretical Stress Concentration Factor of V Shaped Notch Tip	
L.J. Zhang, J.Q. Xue, Y.R. Zhao and H.F. Xiang	765
Approach and Effect Analysis of Amplitude Frequency Performance Improvement in Metal Bar Cropping with Variable Frequency Vibration	
L.J. Zhang, J.Q. Xue, S.D. Zhao and Y.R. Zhao	770
Numerical Study on Dispersion Characteristics and Damage Results of Pre-Fragment Warhead	
N. Zhou, J.X. Wang and R. Yang	775
Modeling Quasi-Static Errors in a Five-Axis Gantry Machine Tool	
J. Yin, M. Li and F.Y. Pan	781
4-Axis Machine Tool Geometric Error Modeling and Measurement	
F.Y. Pan, M. Li and C.K. Xu	788
Damage Identification of Benchmark Structure Using ANN	
X.M. Yang and Y.M. Mi	796
Forecast and Analysis on the Stability of Open-Pit Ultra-High Slope	
F. Zhang, J. Cao, M. Chen and L. Peng	802
The Optimization Research on Treatment of the Soft Clay Foundation	
Y. Ma, J. Cao, Y. He and Z.X. Yu	809
Multi-Objective Optimization Method for Borehole Trajectory Design of Directional Well	
J.B. Zhang, X. Liu and X.H. Lv	816
Study on Dynamic Stability of Large-Scale Underground Cavern Group during Construction Period of Hydropower Station	
W.P. Nie and C. Shi	820
Research on Applying the Reborn Resource and New Materials for Energy Saving and Protecting Environment in the Design of Green Ecological Residential Building Design at the Super Cold District	
Y.M. Qian, Y.J. Jin and W. Tian	826
The Mechanism of Influence of Roof Properties on Impact Energy Distribution	
F.K. Hao, H.T. Li and C. Wang	835
Under Uniformly Distributed Load are Fixed on one Side (Simple) on the Edge Simply Supported and Fixed Half Bending of Rectangular Plates	
Y.J. Chen, B.L. Fu, L. Wang and J. Wu	840
A Study of the Spray Characterization from a Centrifugal Nozzle by Pulsed Laser Holography	
N. Cao, L. Cao, C.C. Han, Q. Xu, L. Lei, J.Y. Du, J. Xue and Z.H. Zhang	846
Effects of Ozone Treatment on Wool Scales and Mechanical Properties	
F.G. Ning, J. Wang and W. Yu	852
Behaviors of a Blast Wall According to the Angle of Vee Stiffener	
C. Wijaya and B.T. Kim	856
Influence of Position Initiation Error on Formation of New EFP	
F. Wang, Z.H. Du, J.D. Gao and Y.C. Dong	860
Axial Force Studies of ESPCP System Based on Triz Theory	
W.X. Li and S.J. Wang	866
Structure of Combustion Enhancement on Impinging Diffusion Flame	
J.H. Leu and A. Su	872
Residual Stress of Gear Meshing under Shakedown Condition with Direct Analysis	
Y. Yuan, P.F. Li and K. Liu	877

Heat Flux Measurement Method of Two-Phase Flow in SRM X.Y. Zhang, G.Q. He, P.J. Liu and J. Li	883
A Gyro-Based Inclinator for Oil and Gas Well Logging B. Wei, P. Feng, D.L. Mi, Y. Ren, F. Yang and Q.H. Zhao	889
The Application of SEA in Automobile Dash Sound Transmission Loss Numerical Calculation J. Mao, Z.Y. Hao, X.R. Chen and J. Yang	894
Cutting Force Analysis of Large Branch Crusher Based on the Finite Element S.T. Yu, C.M. Yang, C.Q. Ren and G. Luo	900
CFD Analysis of Oscillating Airfoil during Pitch Cycle A. Kamran, Z.G. Wu and M. Amjad Sohail	906
Stress Analysis of Internal Wall Worn Casing String under Uniform Earth Pressure Based on ANSYS Y.P. Cao, Y.H. Dou and Y. Yu	912
Improved Hilbert-Huang Transform and its Application in Seismic Data Spectrum Decomposition P.P. Bing, S.Y. Cao and J.T. Lu	920
Study on LCF Lifetime Prediction of Thermal Shock W.M. Zhao, W.Z. Zhang and Z.J. Qin	924
A Prediction of the Optimal Blank Contour of an Inner Elliptic Flange from Flanging C.T. Kwan and J.T. Chang	931
Pressure Fluctuation of the Low Specific Speed Centrifugal Pump Q. Fu, S.Q. Yuan and R.S. Zhu	935
Modeling of Thrusting Trajectory for Articulated Needle Y.Z. Wang, Q. Zhao, R. Zhang and Y.H. Chen	940
Towards an Articulated Needle Y.Z. Wang, Q.L. Yin, C.J. Liu and Y.H. Chen	946
Study on Magnetic Field for Navigation of Articulated Needle H.F. Huang, Y.Z. Wang, Z.G. Zhou and Y.H. Chen	952
Beam Element Considering the Warping Effect of Cross Section in Large Displacement Finite Element Analysis P.F. Li, Y. Yuan and H.Z. Liu	958
To Analyze the Effects of Geometric Misalignment in a Cylindrical Pressure Vessel M. Abbas, A. Israr and A.U. Rehman	964
Nonlinear Analysis of Large Deflection of Elastically-Bossed Sensor Plate under Initial Tension C.F. Chen and N.D. Gao	970
Analysis of the Impact of the New Emissions Limits on the Temperatures of the Vehicle Floor G.I. Bicalho, B.d.S. Baptista, F.V.L.d. Silva, S. de Moraes Hanriot, L. Cabezas-Gómez and C.B. Maia	976
On the Stability of Discrete Models of Compressed Beams in Elastic Media F. de Angelis	982
Evolutionary Laws and Constitutive Relations in Nonlocal Viscoplasticity F. de Angelis	990
The Effect of an External AC or DC Electric Field on Collision and Agglomeration in an Electrostatic Agglomerator X.R. Zhang and L.Z. Wang	997
The Application of State Feedback Control in Double-Stage Vibration Isolation System S.Y. Liu, Q.C. Yang, A.B. Yang and L. Deng	1006
6-Axis Serial Robot Simulation Based on SimulationX S.J. Zhao, J.Y. Shan and L.Y. Bi	1010
Developments in Detection of Rock Damage R.D. Peng, Y.C. Yang, P. Wang and Y.J. Zhang	1018
A Study on the Integrated Modeling of Decoupled Vibratory Feeder L. Han and M.M. Yang	1024
A Study on the Teaching Platform of Linear Vibratory Feeder L. Han and M.M. Yang	1030

Sedimentary Facies and Evolution of early Cretaceous in the Fault Depressions, Songnan Area	
Y.S. Wu, D.K. Zhong, N.S. Qiu and X.Y. Zhang	1036
Effect of Operating Conditions on Water Injector of District Heating Supply System	
K. Zhang, B. Zhang and S.Q. Shen	1041
Fuzzy Orthogonal Optimization for Determining the Optimal Resistance Spot Welding Parameters	
L. Gong, C.L. Liu, J. Yuan and B.C. Li	1046
The Design and Implementation for a Monitoring & Controlling System Based on 3-Teles Technology and Visual Interface	
T.J. Li, Y.D. Shi and N.L. Zhou	1052
Simulation Analysis on Wearing Quantity of Marine Low-Speed Diesel Engine's Piston Ring	
G.J. Chen, Z.M. Peng, J.G. Yang and Q.Y. Huang	1057
Experimental Study of the Impact of a Strong Underwater Shock Wave on a Concrete Dam	
L. Lu, L. Xin and Z. Jing	1063
Vibration Response Localization of Bladed Disk with Pre-Twist Mistuning	
A.L. Wang and X.H. Cao	1071
Vibration Analysis of Nonlinear Isolator's Characteristics by ADAMS	
Z.Q. He, Y.C. Song and H.L. Yu	1077
Selection and Analysis of Parameters in Model Test of Ice Breaking by Air Cushion Vehicle	
C. Wang, Z.H. Zhang, J.B. Liu, J. Yao, L.Y. Zhang and K. Chen	1082
Design and Simulation of Fully Integrated Micro Electromagnetic Vibration Energy Harvester	
K. Tao, G.F. Ding, P.H. Wang, Q.F. Liu and Z.Q. Yang	1087
Whisper Denoising in Joint Time-Frequency Domain Based on Real-Valued Discrete Gabor Transform	
J. Zhou, C. Huang, M. Zhang, L. Tao and L. Zhao	1091
The Pressure Relief Control Technology of the Defects Method on Dynamic Pressure Area in Zhaogezhuang Coal Mine	
Z.D. Yang	1097
A New Method for Dynamic Position Measurement While Drilling String Rotating	
Q.J. Yang, X. Zuo and E.H. Lin	1102
Preparation, Thermal Stability and Electrochemical Properties of LiODFB	
H.M. Zhou, F.R. Liu and J. Li	1106
Research on Supporting Force of Several Models of Hydrophobic Plant Leaves	
Q.C. Wang, X.D. Yang, G.R. Shang, Z.J. Yang, G.H. Cao and H.J. Xu	1112
The Influence Factors and Improvement Measures for Accuracy of Correlation Velocity Measurement	
X.L. Yang and X.B. Huang	1118
Failure Effects of Tilting Control System on Train	
J.M. Zhang, L.W. Man, H.C. Zhou and K. Yang	1122
Sectionalized Motion Control for Automatic Guided Vehicle	
X.H. Yin, C. Yang and H. Zhao	1127
Design and Simulation of Fuzzy Self-Tuning PID Controller for Two-Link Robot	
J.H. Jiang, C. Wu and G. Zhang	1133
Use BP Neural Network Set up the Corrosion Prediction Model of Low Temperature Parts of Atmospheric Pressure Device	
Y.G. Fan, Z.D. Piao, B. Chen, H.X. Lin and Y. Yang	1138
The Partial High Point and the Influence to the Hot Strip Profile Control	
X.T. Zheng, J. Zhang, H.B. Li, H.H. Li, Y. Su and H. Su	1143
Modelling and Simulation of Maritime UAV-VTOL Robot Flight Control	
D.L. Zhao and A.M. Anvar	1149
Ship-Borne Transfer Alignment under Low Maneuver	
X. Liu, B. Wang, Z.H. Deng and S.T. Wang	1155
Intelligent Condition Monitoring Systems for an AUV Robot	
A.P. Anvar, M.S. Garcha, R.D. Saliba, T.M. Singh, A.M. Anvar and S. Grainger	1159

A Driver Fatigue Recognition Model Based on Visual Information and Bayesian Network M.H. Zhang, L.H. Gang and Y.B. Zhao	1165
The Warping Defect Control with Tension Leveling in Continuous Galvanizing Line X.F. Zhang, H.W. Wang, Q.D. Zhang and S. Zhou	1172
An Investigation on Speedometer Pointer Residual-Value of Crashing Vehicle and its Application in Accident Reconstruction Y. Quan, X.Q. Chen and Y.B. Li	1177
Modal Analysis of Dynamically Tuned Gyroscope Based on ANSYS11.0 Z.B. Qin, G.B. Liu, J.F. Guo and X.L. Hu	1183
Hybrid RANS–LES Modeling for Unsteady Cavitating Flow Simulation G.H. Gao, J. Zhao, F. Ma and W.D. Luo	1187
Study on Vehicle Emissions Dispersion in Asymmetrical Street Canyons and Proper Location of Air Intake for Ventilation System G.H. Gao, J. Liu, F. Ma and W.D. Luo	1191
Side Scan Sonar Modeling for Maritime Robotic Operations K.M. Tan, T.F. Lu and A. Anvar	1195
Calculation for Circulating Velocity in Curved Channel S.C. Tong, G.X. Xu and L. Zhong	1202
Mechanical and Creep Properties of the Cast Magnesium Alloy K.C. Park, B.H. Kim, S.M. Jo, S.H. Kim, Y.H. Park and I.M. Park	1207
Synthesis and Antifouling Capability of New Mixture Ratio Coating Containing Methoxysilane Moiety Q. Wang, Z.N. Yu and L.M. Yu	1211
6061 Aluminum Powder Making and its Thermal and Mechanical Properties Y.C. Chen, C.Y.A. Tsao, S.C. Yang and C.C. Hsu	1215
Measurement of a Void Fraction in Bubbly Gas-Water Two Phase Flows Using Differential Pressure Technique H.A.M.H. Abbas	1221
Wear Resistance Improvement of Titanium Bearings by Laser Gas Nitriding E.C. Santos, K. Kida, J. Rozwadowska, T. Honda, H. Koike, Y. Kashima, K. Kanemasu and R. Matsumoto	1227
Investigation of Crack Initiation and Propagation during Rolling Contact Fatigue of SUJ2 Steel Bearings Using a Newly Developed One-Point Testing Machine J. Rozwadowska, K. Kida, E.C. Santos, T. Honda, H. Koike and K. Kanemasu	1233
Coating of Ti64 Bearings in Air by Using a Q-Sw Laser J. Rozwadowska, K. Kida, E.C. Santos, T. Honda, H. Koike, Y. Kashima and R. Matsumoto	1239
Epitaxial Growth of Ni-Based Superalloys Using Laser and Spark Deposition E.C. Santos, K. Kida, J. Rozwadowska, M. Kidera and C.J. Chen	1244

Chapter 3: Manufacturing Engineering

Comparison of Temperature Computation Methods for Nozzle in SRM X.Y. Zheng and P. Li	1253
Design and Simulation of Missile-Borne Measuring Device Shell L.L. Gao, C.A. Di, D.R. Kong and X. Liu	1258
Special Problems and Solutions for Numerical Prediction on Longitudinal Motion of Trimaran W.P. Zhang, Z. Zong and W.H. Wang	1262
Design and Realization of Two-Axis Horizontal Stabilized Platform Based on Self-Correction Control Method C.S. Qi, H.J. Pan and Y.L. Wang	1276
An Investigation of Thin Film Coating for Evaluation Friction Coefficient Using Ring Compression Test K. Lawanwong	1281
Measurement of the Irregular Geometric Shapes G. Wang, N.E. Huang, W.T. Hsu, M.T. Lo, F.L. Qiao and M. Lin	1287
Based on Topology Optimization Method the Cab Mount Bracket Lightweight Design X. Li and L. Wang	1292

Design of Large Branches Grinder Based on the Using of China's Biomass Power Generation	
C.M. Yang, S.T. Yu and C.Q. Ren	1298
The Numerical Simulation on Steam-Water Two-Phase Flow Field of Car Exhaust Pipe	
C.M. Yang and Y. Ma	1303
Large Eddy Simulation with Three Kinds of Sub-Grid Scale Model on Temperature Fluctuation of Hot and Cold Fluids Mixing in a Tee	
T. Lu, Y.W. Wang and P. Wang	1307
Larger-Eddy Simulation of Velocity Fluctuation in a Mixing T-Junction	
T. Lu, S.M. Liu, P. Wang and W.Y. Zhu	1313
Numerical Simulation of Flow and Heat Transfer with Large-Eddy Simulation in a Mixing T-Junction	
T. Lu, X.G. Zhu, P. Wang and W.Y. Zhu	1319
Study on Adaptive Control of Restrained Cantilever Pipe Conveying Fluid	
R.D. Bao	1325
The Research to Hydrocyclone Desander of Sand Removing Based on Crude Oil	
D. Feng, X.F. Chang, X.Y. Zhang, S.Y. Li, C. Ruan and Y. Xie	1336
Mode Analysis on the Car Body of Special Gondola Car for Coal	
C.L. Hong, Y. Geng and Y.S. Hu	1342
Computer-Aided Design and Simulated-Mechanical Study of Individualized Femoral Prosthesis	
D.S. Li, S.Q. Li, B. Cai, W. Feng and J.G. Liu	1347
Finite Element Analysis of Acetabular Medial Wall Displacement Osteotomy in Adult Acetabular Dysplasia	
D.S. Li, S.Q. Li, B. Cai, C. Yang and J.G. Liu	1353
Study on Integration Architecture of Product Design and Manufacturing Based on Knowledge Engineering	
P. Zhang, X.W. Xue and Z.L. Li	1359
Research on Feature Edge Detection Method of Large-Size Components Based on Machine Vision	
Q. Lu, Y.H. Ge and Z. Cui	1367
Development and Application of a New Type Rock Drill with Hydraulic Rotary Cutting and Pneumatic Impacting	
Y.X. Luo, H.J. Wen and Y. Zhou	1373
The Propulsion Mechanism with Logarithmic Spiral Profile Shaft Connection	
Y.X. Luo, H.S. Li, H.J. Wen and Y. Zhou	1377
The Profile Shaft Connection of Inner Gear with Swing Movable Tooth in Propulsion Mechanism	
Y.X. Luo, H.S. Li, H.J. Wen and Y. Zhou	1381
The Propulsion Mechanism with High-Order Elliptic Profile Shaft Connection	
Y.X. Luo, H.S. Li, H.J. Wen and Y. Zhou	1385
The Propulsion Mechanism with Cosine Tooth Profile Shaft Connection	
Y.X. Luo, H.S. Li, H.J. Wen and Y. Zhou	1389
The Propulsion Mechanism with Enveloped Isometric Trilateral Profile Shaft Connection	
Y.X. Luo, H.S. Li, H.J. Wen and Y. Zhou	1393
The Research of Drill Propulsion Mechanism with Eccentric Wheel Handspike Roller Movable Inner Gear Profile Curve Shaped-Connection	
Y.X. Luo, H.S. Li, H.J. Wen and Y. Zhou	1397
Experimental Modal Analysis and Modal Reproduce Experiment Research of a Chladini Plate	
X. Ma, J.W. Zhang and S.M. Yan	1401
Formability of Tailor Welded Blanks Based on the Improved Rule of Mixture Considering the Welding Residual Strain and Stress	
Y.L. Song and L. Hua	1406
Fatigue Properties of the Cell 3D Composite Structure	
M. Růžička, J. Had and O. Uher	1413
Bending and Fracture Properties of Small Scale Elastic Beams – A Nonlocal Analysis	
X.F. Li and B.L. Wang	1417

The Full Flow of Precise Die Face Design Process for Automobile Die C.F. Men and Q. Yu	1427
Failure Analysis and Life Prediction of Coatings for Gas Turbines C. Che, Q. Zhang, F.M. Duan, T. Zhang and H.D. Jiang	1431
Analysis and Simulation of Air Drag in Vehicles Close-Following J. Zhang, Z.J. Li, B. Bai and L. Zhang	1438
The Deformation Character of Retaining Wall under Horizontal Earthquake K.Y. Jiang, J. Cao, L. Peng and M.M. Chen	1443
A Driven Model Research of a Parallel Coil Gun F. Guo, Y.J. Tang and R. Li	1448
Study of Intelligence Virtual Maintenance Training System Base on STEP Standard F.C. Wang, Y.C. Sun and C.Y. Zhao	1453
Movement Analysis of Micro-Robot's Fin Actuated by ICPF L. Nie, X.L. Zhang and R. Nie	1460
Driving Force Guaranteed Cost Control Method for Independent Four Wheels-Drive Electric Vehicle F.Y. Yu, L. Ma and J.S. Li	1464
An Investigation on Buckling Behaviour of Functionally Graded Plates Using Finite Strip Method S.A.M. Ghannadpour, H.R. Ovesy and M. Nassirnia	1470
Lay-Up Effects on the Dynamic Instability of Moderately Thick Stiffened Curved Panels H.R. Ovesy and J. Fazilati	1477
Finite Element Analysis of Damping Plate for the Airbag Vibration Damper J.L. Wang	1483
Evaluation Dispatching Rules for Two-Stage Hybrid Flow Shop Scheduling with Parallel Machines P. Kaweegitbundit	1487
Design of Stress Monitoring and Safety Assessment System for Crane Metal Structure Based on Virtual Instrument W.J. Meng and T.W. Hong	1492
Numerical Simulation of the Flow Field for Rotor Ventilation System of Large-Scale Nuclear Power Turbo-Generator X.H. Zhang, L. Hu, J.H. Yuan and Y.C. Yuan	1498
Applications of CAD in the Modern Garment Industry W. Cheng and Z.L. Cheng	1505
Hydrodynamic Performance of Leading-Edge Tubercle Three-Dimensional Airfoil F. Feng, X.R. Cheng, X.Y. Qi and X. Chang	1509
A Design of a Mechanical Synthetic Jet Actuator I. Benhegouga and A. Boukehili	1516
Contribution to the Study of a Flow Controlled by a Synthetic Jet I. Benhegouga and A. Boukehili	1522
Workspace Analysis and Dimensional Synthesis on a Delta Parallel Mechanism with Branch Chain Offset C.C. Huang, L.Y. Shen, J.W. Qian and Y.A. Zhang	1526
Design, Modelling and Simulation of Maritime UAV-VTOL Flight Dynamics J. Cao and A.M. Anvar	1533
A New Morphological Method for Faults Diagnosis of Rolling Element Bearings Y.B. Dong, M.F. Liao, X.L. Zhang and Y.M. He	1539
Compressor Surge Detection Based on Support Vector Data Description C.Z. Li and Y. Lei	1545
Effect of Thermal Residual Stress on FBG Sensors Embedded in Composite T-Stiffened Panels Y.J. Zhou, G. Liu, X.Q. Li and X.S. Yi	1550
The Dynamic Analysis of Multibody Systems with Uncertain Parameters Using Interval Method J.L. Wu and Y.Q. Zhang	1555
Optimal Design of Biomass Molding Machine J.G. Li, J.R. Wang, J. Li, Y.Y. Wang and Y.L. Chen	1562

Performance Prediction and Experimental Verification of Axial Flow Pump Based on CFD D.S. Zhang, G.J. Zhang, W.D. Shi and T.T. Li	1566
Numerical Simulation of Solid Particles Movement in the Axial Flow Impeller and Wear Experiment D.S. Zhang, W.D. Shi, Y. Xu and F. Long	1572
Knowledge-Based Manufacturability Evaluation System for Shipbuilding J. Li and H. Yi	1578
Research on the Roll Contour Configuration for Schedule Free Rolling in Hot Wide Strip Mills K.F. Mi, J. Zhang, J.G. Cao, H.B. Li, F.W. Cheng and W.D. Hu	1584
Marine Diesel Engine Speed Control System Based on Fuzzy-PID X.Q. Shen and Y.X. Su	1589
Design of Planetary Gear Reducer with Double Circular-Arc Helical Gear C.Y. Wang	1595
Semiquantitative SDG Graphical Modeling for Complex System Fault Diagnosis Y. Su	1601
Effect of Casting Design to Microstructure and Mechanical Properties of 5 mm TWDI Plate J.W. Soedarsono, B. Suharno and R.D. Sulamet-Ariobimo	1607
Study on TBM Cutterhead Working Principle H.P. Liu	1612
The Analysis of Overtaking of Whole Wheel Steering In-Phase of Multi-Axle Vehicle Y.Q. Zhu, Q.S. Chen and P.X. Zhang	1619
The Effect of Polyurethane Hardness on the New Die-Set of Sheet Hydroforming Process Parameters M. Hosseinzadeh	1623
A Bearing Intelligent Fault Diagnosis Method Based on Cluster Analysis S.Q. Cao, X.M. Zuo, A.X. Tao, J.M. Wang and X.Z. Chen	1628
Using Surface Electromyography to Analyze the Assistive Force Produced by Wearable Assistive Robot M. Zhu, X.L. Li and Q. Zhang	1634
Small Satellite Modelling and Three-Axis Magnetorquer-Based Stabilisation Using Fuzzy Logic Control A. Asadabadi and A.M. Anvar	1639
Dynamic Analysis and Design Method Study on the Combined-Boom System of Portal Crane Y.T. Sun and D. Li	1645
Intelligent Signal Generator Based AT89C51 Microcontroller L.R. Zhang	1650
Investigation of the Effect of Blank Shape on the Sheet Hydroforming Parameters S.A. Zamani and M. Hosseinzadeh	1658
A Study of the Effect of Ship Size on Components Selection for an LNG Carrier Z. Md Redzuan, N. Rose and M. Ehsan	1664
The Intelligent Clamping Fixture M. Kostalova and P. Košťál	1670
Optimization of the Raw Part Shape for the “Fork” Production by Computer Simulation M. Kostalova and M. Kapustova	1675
Diffusion Modes of Generic Technologies of Equipment Manufacturing Industry Chain Z.H. Yu	1679
A Warehouse Management System for 3 Dimensional Tracking and Positioning W.Y. Leong and J. Ee	1685
Hidden Defects Diagnosis Using Parameter Optimization X.C. Wen and W.Y. Leong	1691
Design of a Compact and Multi-Function Magnetic Field Steered Arc Source W.C. Lang, B.Z. Wu and B. Gao	1698
Process Development of Films Deposited on Inner Wall of Long Tube by Arc Ion Plating W.C. Lang, B. Gao and X.R. Nan	1705

Design of Fast Scanning Langmuir Probe Diagnostic System Suitable for Transient Arc Plasma Diagnosis in Arc Ion Plating W.C. Lang, X.H. Wang and X.R. Nan	1711
An Integrated Approach for Optimization of Honeycomb Sandwich Structure under Impact Load H.A. Khan, F.H. Vance, A. Israr and T.U. Rehman	1717
The Fast Image Matching Algorithm for Building Photogrammetry M.L. Fu, C. Zhao and J.T. Cheng	1723
Radioactive Research on Main Steam Pipe Rupture Accident of Nuclear-Powered Equipment of Ship W. Wang, F. Zhang and L.S. Chen	1729
The Development for Green Channel Cargo Inspection System Y.P. Shi, J.S. Yu, L.Q. Zhang, H.Q. Sun and P. Hao	1736
Development of Parameter Program for On-Line Measurement Technology Based on Fanuc-18i S.H. Zheng, J.Q. Liu and X.D. Shu	1741
Research on Coordinated Control of the Vehicle Chassis System Based on a Hybrid Model W.W. Chen, L.F. Zhao, J. Yang and H. Zhu	1747
An Encryption Algorithm A.M. Dastgheib	1754
Numerical Simulation of Liquid Nitrogen around Hydrofoil Cryogenic Cavitation X.F. Ma, Y.J. Wei, C. Wang, W. Cao and W.H. Huang	1760
A New-Style Efficient Heat-Pipe Heat Exchanger on Flue Gases Q.C. Wang	1766
Damping Characteristics Simulation and Test Research of Vane Damp W.R. Wang, H. Chen, X.Q. Yan and B. Yang	1769
Analysis of Vane Hydraulic Damp Static Seal Mechanism and Performance Influencing Factors W.R. Wang, Z.H. Sun, X.Q. Yan and Q. Jiang	1774
Position and Orientation Analyses of Mechanism by PHCpack Solver of Homotopy Continuation H.B. Xin, Q. Huang and Y.Q. Yu	1779
A New Trend for Reverse Engineering: Robotized Aerial System for Spatial Information Management J. Fernández-Hernandez, D. González-Aguilera, P. Rodríguez-Gonzálvez and J. Mancera-Taboada	1785
Signal Processing System for Wheel Speed Measurement Based on FPGA C.F. Zhang and Q.J. Yan	1791
Positioning Control System Based on ZPETC and Optimal Control Method for Plant with Dead-Time J. Endo, K. Sasaki, K. Matsumoto, H. Shibasaki and Y. Ishida	1795
Research on AC Short-Circuit Transfer Low-Energy Welding Technology P.F. Huang, Z.Y. Lu, X.C. Liu and J.M. Gu	1801
Large Eddy Simulation of Wind Loads on a Low-Rise Structure and Comparison with Wind Tunnel Results I. Janajreh and S. Emil	1806
CFD Analysis of Wind Loads on Permeable Low-Rise Structures I. Janajreh	1814
New Approaches for Network-Based Control Systems with Time-Varying Delays Z.M. Liu, Y.W. Feng and D.S. Luo	1821
Theory of Fast Multipole Virtual Boundary Element Method and Discussion on Key Issues Y.T. Jiang and H.Y. Bai	1828
A Delay-Constrained Multicast Routing Balanced-Optimization Algorithm of Link-Sharing W.Q. Liu and X.K. Chen	1834
Method of Recognition and Feature Rapid Extraction about Multi-Objective Rounds Based on Rotating Scanning D.H. Lu, S.L. Xie and J. Wang	1840

Design of MEMS Based Energy Harvester to Profile Environmental Parameter Using Autonomous WSN Components	1846
M. Zaman, G. Witjaksono, M. Othman, M. Islam and N. Amin	
Experimental Study on NVH Performance of Midi Pure Electric Vehicle	1852
H.B. Li, C.X. Zhang, Q.X. Li, T. Jin and K.F. Wang	
Research and Design of the New Investment Casting Production Line	1858
X.R. Chou and Y.X. Kang	
MIMO Non-Linear Mechanism Analysis Based Matlab	1865
X.M. Wu	
Digital Noise Generator Based on Bernoulli Chaotic Map	1869
R.F. Martínez-González, J.A. Díaz-Méndez, C.E. Rojas-López and R. Vázquez-Medina	
A Nonlinear Fuzzy Control Modeling Method Using Evolutionary Algorithm	1874
P. Teng	
The Study on College Library Knowledge Service	1880
J.J. Wu and F.R. Cai	
The Study on Electronic Equipments Reliability Prediction Model	1885
Z.X. Liu	
KTX Interior-Noise Reduction Performance Comparison Using Multichannel Active-Noise Control	1891
H.S. Jang, Y.M. Kim, S. Kim, T. Lee and K.S. Lee	
Research on the Application of Fuzzy Neural Network in the Tobacco Heights Department of Tractor Reliability	1899
Y.Z. Men and D.T. Zou	
The Design for Computer Monitoring System Based on Ethernet	1904
C. Xie and H. Wang
