ISBN(softcover): 978-3-03785-380-1 ISBN(eBook): 978-3-03813-733-7

Table of Contents

Preface and Committees

Chapter 1: Manufacturing Technology and Processing

Free Vibration of Functionally Graded Material Beams in a Uniform Electric Field
S.R. Yu, S.H. De and J.L. Fan 3

Ultrasonic TOFD Method for near Surface Defect Detection Using Longitudinal Secondary Wave
C. Lu, G. Chen and X. Wang 7

Simultaneous Process Mean and Variance Monitoring Using Wavelet Transform and Probabilistic Neural Network
S.X. Wu 11

Development of Centrifuge for Multi-Parameter Combined Environmental Test
Z.C. Rong, W. He and R.J. Shen 16

Development and Application of Activating Fluxes in TIG Welding
Q. Fu 21

Structural Analysis and Optimization Design of the Frame of YC460LC-8 Excavator
G.L. Shi, K. Wu and L. Zhu 27

Magnetorheological Materials Theory United in Energy
H. Sun and X.H. Peng 33

Experimental Investigation of Mechanical Characteristics of Parallel Polygonal Line Groove Multilayer Winding Drum
Y. Hu, Z.H. Hu and J.Q. Hu 37

Motion Analysis & Simulation of Cloth Rolling Machine
C.M. Wu and Q. Zhang 41

Three-Dimensional Discrete Element Simulations of Round Hopper in Thermal Power Plant
Q. He, D.M. Du, Y. Wang and Z.R. He 45

Structural Optimization Design of Parallel Piezoelectric Six-Component Force Sensor
G.C. Wang and Y.J. Li 49

Study of Partial Discharge Ultrasonic Wave Propagation in Generator Stator
Y.M. Yang, X. Duan and F. Jiang 53

Analysis on the Stability of Supercavitation Projectile
P. Wei, J. Hou and T.F. Chen 58

Optimized Processing in IMU-Aided GPS Signal Tracking
L. Zhao, Y. Hao and L.S. Guo 62

Deformation Prediction of Deep Excavation Using Support Vector Machine
X.C. Shi, W.X. Chen and X.J. Lv 66

Bionic Semi-Cylindrical Metal Surface and Soil Direct Shear Test
Y.M. Tang and X. Jia 70

Reliability-Based Robust Design of Variable Cross-Section Wedge Beam
T.X. Zhang, X.H. Liu and Q.L. Liu 74

Prediction on Transverse Thickness of Hot Rolling Aluminum Strip Based on BP Neural Network
H.Y. Wang, C.Q. Huang and H. Deng 78

Research of Creating Method for Laser Inner Carving 3D Model Surface Texture Point Cloud
L. Cheng and H.Y. Liu 84

Optimum Setting of DC Drives PID Controller via Particle Swarm Optimization
G.H. Chang, J.C. Wu and C.J. Zhang 88

Simulation on Supporting Characteristics of Heavy Hydrostatic Thrust Bearing
Y.Q. Zhang, R. Li, C.X. Dai, J.P. Shao, X.D. Yu and B. Qin 94

Design of Cement Mixer Body Based on the Pro/E
G.G. Zhang, Z.B. Chang, W. Jiang and L. Zhang 98

Optimization Analysis of the Tridimensional Container Terminal Transmission System
M.L. Liang, J.L. Wang and W.D. Zhao 102

Electromagnetic Design of a Novel DC Lorentz Motor for Micromanipulation
X.Y. Qin 106

OPC UA Discovery: A Study of Challenges and Perspective
M. Son and M.J. Yi 110

Study on the Friction Properties of Surface Iodide Modified Nitrile Rubber
H. Han, S.J. Wang and X.R. Lv 114

The Method and Technique of 2D Drawing Creation Based on NX7.5
X.H. Zhan and X.D. Li 119

Surface Roughness Prediction Model of Cylinder Grinding
N. Ding, Y.C. Wang, D.T. Zhang, Y.X. Shi and J. Shi 123

Design of Temperature Testing System in Multi-Parameter Combined Environmental Test
G.H. Xu, W. He and R.J. Shen 127

Research on the 3D Modeling of Aviation Gas Turbine Blades Base on Free Surface
J. Tang, L.W. Wang, T. Wang and H. Wang 132

Airborne Single Observer Passive Tracking Algorithm Based on Improved CS Model
W.X. Li, C.Q. Huang, Y. Wang and Y.B. Xuan 136

Concrete Damage Constitutive Relation Based on Characteristic Parameters of Acoustic Emission
J. Lu, S.W. Hu and X.Q. Fan 140

The Simulation of Solder Bridging on TuMR Magnetic Head Connector
R. Roajanasiri, N. Afzulpurkar and S. Boonsang 144

Design of Electric Vehicle Energy Regenerative Braking System Based on Super Capacitor
Q.S. Feng and H. Li 149

The Analysis for the Storage of Difficult Bulk Materials with Central Cone Silo
W.J. Meng, T.W. Hong and H.T. Bian 154

Study on the Mechanical Properties of Cement Modified by Nanoparticles
X.Y. Liu, X.R. Wang, A.H. Liu and L. Chen 161

Design and Implementation of Trajectory Tracking for 3-Axis Servo Table Using UMAC Based on Optimal Preview Controller
M.M.S. All Bail and Y.G. Tan 165

Key Technologies of Digital Pre-Assembly in Networked Collaborative Design and Manufacturing
H.F. Wang, F.Q. Nan and T.T. Liu 171

Strengthening of Ceramic Coated Steel by Laser Quenching
H. Tanabe, K. Ogawa, T. Saraie, M. Gotoh, H. Hagino and T. Yamaguchi 175

Effect of Cold Working and Annealing Condition on Scale Formation of AISI 4140 Steel
S. Butsabong and K. Jirapattarasilp 181

Research on Measurement of Pulsed-GTAW Process by Multiple Sensors
B. Chen, H.T. Zhang, S.B. Chen and J.C. Feng 185

A Resource Allocation Model of Logistics Services Supply Chain for Multi-Agent Based on Ant Colony Algorithm
B. Yang, C.X. Li, Y.B. Zhang and W. Kong 189

Study on Numerical Simulation Method for Motion of Supercavitation Vehicles
J. Zhao, Y.Y. Su, Y. Zhao and G.Y. Wang 193

A Study on Fatigue Test for Cardiovascular Stent
Z.M. Ma, H.Y. Dong and M. Qi 197

Prediction of Residual Life Assesment Using Thermography and Crack Growth Analysis
M. Kutin, I. Vasovic, M. Maksimovic and M. Ristic 202

The Comparative Analysis of the Characteristics Drafting with ET and Richforever Clothing CAD Softwares
D.F. Yi and H.J. Liu 210

Comparative Simulation Research between Rigid Body and Flexible Body for Double-Gear Parallel Driving Systems
Q. Wang, H. Deng and Z. Xu 214

Modeling and Modal Analysis of Tool Holder-Spindle Assembly on CNC Milling Machine Using FEA
J. Wang, B. Wu, Y.M. Hu, E.H. Wang and Y. Cheng 220

Customized Titanium Plate Virtual Design and Deformation Simulation Analysis of Human Lateral Mandible Defect
W.Z. Wu, J. Zhao, L. Zhang, N. Feng and D.W. Rosen 227

Simulation Research for Strip Shearing Section Level Distribution
B. Chen, S.H. Liu and J. Yang 231

Free-Form Two-Dimensional Contour Error Estimation Based on NURBS Interpolation
F. Huo and A.N. Poo 236

Research on PMnN-PZT Ferroelectric Thin Films on Silicon Substrates
T. Zhang, H.W. Ma, M. Li, B.H. Li and P. Liu 241

A New Dynamic Test Method of Fiber Optic Gyroscope
X.Y. Li and N. Zhang 245

Design & Research of a Continuous Jack-Up System for Large Structure Object
J.Q. Zhao, Q. Zhang and S.H. Zhao 250

Research on Home Appliance Lifecycle Information Management System Based on RFID
Q.H. Zhang, N. Tang, G.Q. Cheng and Z. Wang 254

Multidisciplinary Collaborative Satisfaction Negotiation Based on the Physical Programming Method in Product Design
J.H. Zhou, L. Chen, W. Wang and B. Huang 258

The Effect of Vetrical Milling on Finished Surface of Polymethyl-Methacrylate Sheet
S. Obma and K. Jirapattarasilp 263

Data Transmission Mode of a Small-Scale, Real-Time Industry Control Network
X.C. Jie and W.T. Li 267

Optimal Deployment Model for near Space Bistatic Radar Network
S.S. Wang, W.F. Che, J.F. Feng, F.N. Wang and Q.F. Xie 273

A New Optimized Method of Excitation Signal for Closed-Loop Identification of Power System Based on Ambient Signals
M. Yu and C. Lu 277

The Experimental Study on Friction and Wear Characteristics of 25Cr12Ni5Mo Hot Work Die Steels at High Temperature
X.G. Wang and J.J. Xu 286

The Spindle Static Characteristic Analysis of HTC3250μn NC Machine Tool
H.L. Xie, W.K. Zhang, H.M. Guo and Y.X. Liu 291

Design and Implementation of Container Terminal 3D Simulation Model Repository
H.J. Lu, H.Q. Zhen and D.F. Chang 295

Design of a Pile Press Machine for Automobile Gearbox Tapered Roller Bearing
G.G. Zhang, L. Zhang and Z.B. Chang 300

Rapid Assessment of Surface Color of Chinese Fir and Eucalyptus Wood by near Infrared Spectroscopy
Z. Yang, Y.N. Liu and B. Lv 304

The Design and Analysis of Universal Inertial Switch Based MEMS
Y.P. Hao, L.Y. Bao and S.X. Gu 308

Chapter 2: Mechatronics and Automation

Wisdom Health Care Environment Systems for Monitoring and Automated Control via RBF Function
W.T. Sung, J.H. Chen and H.C. Wang 315

The Field Scale Investigation of Water Coning Phenomenon
H. Baderestani, H. Amirzadeh and J. Banavi 319

The Research of Intelligent Vehicles Mean Shift Based on Difference Algorithm
L. Tan, P. Dang and Q. Luo 323

Effect of Two-Stage Double Peak Aging on Microstructure and Properties in 7050 Aluminum Alloy
C.D. He, J.P. Ren and B. Xu 331

Evaluation of 3D-Traffic Accessibility Based on Space Syntax: A Case Study of Xi'an Subways
F.X. Zhou and C.H. Li 338

The Effects of Top Management Support on Information System Success: Manufacturing Industry Cases
X.C. Chen, Z. Zhao and Y.F. Wang 344

The Research of Forklift Control System Based on Ultracapacitor
H.L. Wei and Z.W. Wu 349

Instrument Management System for Equipment Remote Control via RFID
W.T. Sung, J.H. Chen and Y.C. Chiang 353

The Workshop Information Management for Underwater Production Facilities
S.H. Zhao, Q. Zhang and J.Q. Zhao 357

Structural Design for Dynamic Roller Device in Transporting Unit of Biomass Pyrolytic System
J.H. Wu, Q. Zhou, J. Chen, H.P. Si and C.B. Zhang 361

NC Post-Processor for 5-Axis Milling Machine of Non-Orthogonal Type
Y.W. Li and Y.S. Sun 367

Research on Spiral Drill Stabilizer Wear-Resisting Layer Repair Technology
G.W. Zhang, G.W. Zhang and Q. Zhang 373

The Improvement of Maximum Power Point Tracker Algorithm in Photovoltaic Power System
Y. Chai and D.M. Shang 377

Analysis of the Interaction between Modes by Normal Forms and Singular Perturbation Theory
J. Zhang and T.T. Jiang 381

Control of Multivariable Coupling System Based on Improved PID Neural Networks
J. Kang and W.J. Meng 386

Design and Implementation of Shortest Travel Path Searching Based on Improved Dijkstra Algorithm
T.P. Mo, H.H. Zhao and W. Mo 390

Key Factors Affecting the Amplitude of a Composite Ultrasonic Wiredrawing Vibration System
X.B. Shan, N.M. Qi, L.L. Wang and T. Xie 395

Influence of Machining Parameters and Pre-Stress on Residual Stress of Pre-Stress Hard Turning in 40Cr Steel
A.D. He, B.Y. Ye and M.Y. Qin 400

A Cooperative Search Strategy for Moving Targets Using UAV Swarms
W.C. Wu, C.Q. Huang, W.X. Li, Y.B. Xuan and Y. Wang 406

Modern Furniture Color Image Based on Eye Tracking
J.F. Xu and H.N. Zhang 410

Data Association Method for Radar Network Based on Time Restraint
S.S. Wang, W.F. Che, J.F. Feng, F.N. Wang and Y. Bai 415

Analytical Solution of 1-D Viscoelastic Consolidation of Soft Soils with Fractional Maxwell Model
Y.P. Zhang and F. Gao 419

Research of Localization Issues in Underwater Sensor Networks
X.M. Wei 424

Research on Dynamic K-Means Clustering Algorithm in Cyanobacteria Blooms Detection
X. Yang, X.R. Chen and Y.T. Li 428

Fuzzy PI Control Strategy of the Air Bleeder Valve on SIMULINK
Y. Wang, Y.Y. Wang, J.W. Du and G.X. Wang 433

Dynamic Model of the 6-DOF Parallel Manipulator Control Using Lagrangian Equation
R. Vongvit and H.T. Zhu 437

On the Practical Consideration of Source Localization Using the Location Template Matching (LTM) with Multiple Sensors
H.J. Yang, S.K. Lee and K.H. Shin 441

Analysis and Design of Electric Energy Consumption Inspection Equipment Based on ARM9
H. Hu, X. Tian, L.H. Han and B. Chen 447

Product Information Representation Method for Product Conceptual Design Based on Improved Meta-Model
Z.Y. Xu and B. He 452

The Liquid Level Control Based on New Two-Degree-of-Freedom IMC-PID
W.J. Wu, S.H. Jiang and J.L. Jiang 456

Smith Predictor Based Fuzzy Estimator for Uncertain Time-Delayed Systems
T.C. Kuo, Y.J. Huang, B.W. Hong, C.H. Chang and H.Y. Tseng 462

Control System Design of Automatic Feeding Machine
S.K. Chen 466

Study of Ambiguities of English-Chinese Machine Translation
J.J. Suo, B.Y. Yu, Y.J. He and G.Y. Zang 472

Comparison of Adomian Decomposition Method and Differential Transformation Method for Vibration Problems of Euler-Bernoulli Beam
Z. Liu, C.H. Guo, L.G. Cai, W.T. Yang and Z.M. Zhang 476

Mine Coal and Gas Outburst Prediction Area
Q. Li 484

Road Background Generation and Update Method Based on Segment Statistics
J. Li, H.Y. Liu and L.R. Hong 489

A New Algorithm on Mice Action Analysis
L.R. Hong 494

The Study of Fast Pattern Making Methods Based on ET2007 CAD System
D.F. Yi and H.J. Liu 499

Maximizing the Lifetime of Sliding Wireless Sensors in Barrier Coverage
T. Yang, P.G. Fan and D.J. Mu 503

Research on Modeling and Simulation of Active Disturbance Rejection Controller for Gas Turbine
J.P. Jiang, Q. Zhang and L.P. Wang 507

Influence of Span-Thickness Ratio on Arching Action of Reinforced Concrete Frame Beams
M.H. Chen, X.S. Song and Y.P. Su 511

Rough Properties of Rough Graph
T. He 517

A Semi-Anonymous Non-Contact Offline Mobile Payment Protocol Based on Concurrent Signature
X. Wang, C.W. Yuan and W. Fu 521

The PLC System Design of the Floating Cleaning Machine
C.H. Lu 527

A Time-Frequency Filtering Method Based on Generalized S Transform and its Application in Machinery Fault Diagnosis
X.W. Li, J.H. Yang, M. Li and J.W. Xu 531

'Theory and Practice Together' in American Engineering Education
C.H. Lu 538

Study of a Method for Improving the Anti-Lock Brake System of Electric Vehicle
L. Chu, L. Yao, Z.L. Zhao, W.R. Wei and Y.S. Zhang 542

Visual Calculation and Analysis System of Automotive Active Safety
B. Wang, X.X. Guo, W. Zhang, B. Yang and J. Zhang 546

Simulation Analysis of Seed Metering Procedure in Scoop Metering Device Based on Discrete Element Method
Y.J. Ji, H.D. Xue and C.H. Li 550

Method of Spray Gun Path Generation Based on Z-Map Theory
Z.Z. Wang, C.Y. Liu, L.Z. Cheng and X.K. Fan 558

Centrifuge Rubber Suspension Spring Characteristics of the Experimental Research
L.Z. Ren, L. Liu and Z.C. Ren 563

Mining Evolutionary Link Strength for Information Diffusion Modeling in Online Social Networks
Z. Liang, B.Y. Xu, Y. Jia and B. Zhou 567

The Centroid Wireless Localization Algorithm of Area in Underground Mine Based on TWA
S.G. Jing and Q.H. Gu 573

Development & Design of Large-Tonnage and Great-Height Hydraulic Continuous and Synchronous Jack-Up System
S.M. Li 577

Dial Instrument Calibration by both Automatic and Half-Automatic Methods
Z.L. Bai and X. Li 581

Research on the Complete Dynamic Model of Tilting-Pad Journal Bearings Including Fluid Film Temperature Effect
Z.S. Zhang and X.D. Dai 589

Analysis and Improvement to Coordination Control Circuit of 2×350MW Supercritical Units
Y. Li, X.N. Li and Y.H. Hou 595

Compressive Behavior of Aluminium Foams Prepared by Powder Metallurgy Method
L. Wei, C. Sinka, S. Lawes and T. Han 600

Application of Genetic Algorithm for Nozzle Parameters Optimization of Waterjet Propulsion System
X. Ling and X.D. Wang 604

Research on Pressure Characteristics of Vehicle Air Braking System with Leakage from Pipeline
Z.S. Wang, G.Y. Li, Q.Q. Wu and J. Xu 608

Research on Influence of Parameters Variation on the Fixed Orifice Performance of the Servo-Valve
J. Tang, D.R. Gao and L.W. Wang 612

Load Following Controller for Single Free-Piston Generator
C.L. Tian, H.H. Feng and Z.X. Zuo 617

Study on Non-Linear Viscous Elastic-Plastic Creep Model of Mica-Quartzose Schist
W.L. Chen and F.S. Zhao 622

Determined Key Distribution Protocol Using Non-Orthogonal Quantum States
X.Y. Li and L.S. Zhao 628

The Seismic Performance Analysis of the Overpass by the Traveling-Wave Effect
Q.G. Lei, H. Fang and J.G. Wang 632

Study on Surface Roughness in High-Speed Milling for ALMn1Cu
Z.H. Wang, J.T. Yuan and J. Huang 636

Testing Analog Circuits by PCA of Power Supply Current
G. He, C.J. Zhang, G.H. Chang and S.H. Liang 641

Research on Volume Measurement Technology for Rail Tanker Based on Computer Vision
J.B. Zhao, R.B. Xia, W.J. Liu, T. Fu, Y.J. Huang and J.Z. Li 646

Modelling Significant Wave Height Data of North Sea: Rayleigh vs Weibull Distribution
A.A. Shariff and M.H. Hafezi 652

The Relationship between Minimum Zone Sphere and Minimum Circumscribed Sphere and Maximum Inscribed Sphere
F.W. Meng, C.G. Xu, H.M. Li and J. Hao 658

Investigation on Simulation of Train Loading on Prestressed Concrete Sleepers
M.R. Salim, A.A. Bakar and A.A. Shariff 666

Chapter 3: Mechatronic and Embedded System Applications

The Exploration of the Minimum Cross-Sectional Area which is the Important Parameters of Nodular Iron Casting Foundry Process Design
X.P. Peng 673

A Design of Software Quality Model for Embedded System
H.Y. Jeong and Y.H. Kim 680

Study on the Principle of Reasonable Modeling Based on NX
X.D. Li and X.H. Zhan 684

Computer Fitting of Shielding Effectiveness for Electromagnetic Shielding Clothing
X.C. Wang and Z. Liu 688

The Structural Design of Multi-Function Hydraulic Clamp
Y.F. Wei and F.R. Kong 692

Modal Analysis of Three Rotating Blades of Large Wind Turbine
G.Y. Hu, W.L. Sun, A. Wu and Y. Xu 697

The Analysis of Stiffness Condition in Rolling Thin-Walled Ring
Z.J. Zuo, Q.Y. Han and M.M. Dai 702

Construction of Social Responsibility Comprehensive Evaluation System for the Large State-Owned Enterprises
Z.J. Wei 706

Development and Validation of a Thermodynamic Model for Predicting Traffic-Related Pollutants Dispersion in Urban Street Canyons under Low Wind Speed Conditions
G.H. Gao, J. Liu, F. Ma and W.D. Luo 710

The Geometric and Material Nonlinear Analysis of the Bioprosthetic Heart Valve
Q. Yuan, H.B. Ma, C.R. Zhang, H. Cong and X. Ye 714

Research on Aluminum Plate Reversible Hot-Rolling Mathematical Model and Schedule
H.X. Wang, J.B. Li, H.J. Liu and C.S. Wang 719

A Program Designed for the High-Speed Gearbox Test-Bed Based on LabVIEW
F.T. Wang, L. He and D. Wu 727

Model Parameter Identification of Tire Dynamic Balance Detection System
J.F. Yang, X.Y. Feng, H.J. Fu and S.G. Mu 731

Optimum Design of the Jaw Clamping Mechanism of Forging Manipulators Based on Force Transmissibility
W.H. Ding, H. Deng, Y. Zhang and Y.Q. Ren 737

The Open Colliery Slope Mechanics Stability Analysis and Forecasting Methods Reasearching
H.B. Jiang, C.S. Ji, Y.Q. Shu and J. Li 743

Adaptive Resource Management for Cyber-Physical Systems
H.H. Yan, J.F. Wan and H. Suo 747

Generalized Synchronization of Chaos in RCL-Shunted Josephson Junction with Uncertain Parameters
N. Fang and J. Fang 752

Robust Optimal Sliding Mode Control for Attitude Synchronization of Autonomous Docking to a Tumbling Target
W. Lu, Y.H. Geng and X.W. Shan 757

Research on Displacement Compensation Algorithm of Tactile Sensor on the Beating Heart
S.Y. Yang, A. Gu, M. Li and C.J. Lu 762

Design the Economical Engraving Machine for Wood
Y. Liu, B.L. Gou and Z.J. Xu 768

Analysis and Simulation of Fibre-Channel Tandem Network in Avionics System
X.L. Zhu, F.M. Zhang, Y. Wang and X.Y. Han 772

Comments on Composition of Solid Waste in University Kebangsaan Malaysia (UKM)
G. Ashtary Talkhestani 780

Research on the Determination of Total Hardness in Drinking Water by Microscale Chemistry Experiment
Y.G. Zhuo, J. Liu, J.M. Gao, Y. Liu and Z.Z. Kang 784

Indoor Ultrasonic 3D Seamless Location and Wireless Communication of Metal Can
X.Z. Chen, R.R. Li and Q.W. Hou 788

Effects of Bending Cyclic Load on Mechanical Properties of 2D Carbon Cloth Laminated C/C Composites
X. Yang, H. Li and K.H. Yu 792

Study on Over-Complete Dictionaries for Sparse Representations of Signals
G.C. Gao, K. Xiong, L.N. Shang, S.Y. Zhao and C. Zhang 796

Impact Analysis on Slip Strength Based on Fuzzy Analysis Hierarchy Process
D. Li 800

Influence of Load Rate on Arching Action of Reinforced Concrete Frame Beams
M.H. Chen, N. Ni, X.S. Song and Y.P. Su 805

Static and Transient Stress Analysis of an Elastic Oil Sump
S. Wang, Z.D. Liu, B. Li and P. Duan 810

Discontinuous Yield and Large Deformation Analysis on Rotating Disk Based on J2 Deformation Theory
S.W. Hu 818

Research of MEDM Pulse Power Based on the Non-Resonant Natural Oscillation
S.F. Sun, S.C. Di, D.B. Wei and Z.L. Li 822

The Disquisition of the Three-Dimensional Optimize Validate System of Oil-Immersed Pump Lectotype
Q. Li and J.Z. Li 827

Study on Formation Precision for Metal Wire Bended
F.P. Guo, B. Yao and K. Hong 833

Flexible Distributed Workflow Management Systems Design Based on CORBA
Y. Li, H.R. Wang, X. Tong and L. Zhang 839

Comparison of Rough Graph and its S-Rough Graph
T. He 843

Attitude Maneuver Control of Flexible Spacecraft with Finite-Time Convergence
S.N. Wu, Z.W. Sun and X.D. Wu 847

Simulation Study on Tapered and Spherical Shaped Charge under Underwater Explosion
F.Y. Zhou, T. Jiang, W.L. Wang, F.M. Zhan and K.Y. Zhang 852

Performance Assessment of Jumbo Cylinder Pipe Produced by Rotary Expanding Technology TPCO
H.L. Dong, B.X. Li, B.A. Shou, Z.G. Huang, J.P. Zhang, Q.H. Yuan and K. Bo 856

The Fault Recognition of Motor Based on the Fusion of Neural Network and D-S Evidence Theory
H.L. Du, Z.F. Wang, F. Lv and T. Xin 861

Numerical Analysis of Grouting and Blocking of Deep Large Section Shaft at Working Face
J.M. Zhu, W.Q. Zhang, H.L. Yu and X.L. Liu 865

Automation of Authentication and Key Distribution Schemes Design Based on Trace Formulae
P. Ocenasek and L. Michal 870

Representation Form of Rough Graph
T. He 874

The Research of the Asynchronous Motor Vector Control Arithmetic
F. Gao and L. Wei 878

The Design of the Emergency Retrieval System Based on User Preference
W.D. Huang, M.Q. Li and J.D. Yang 882

Weak Signal Detection Based on the Nonlinear Dynamic Model
X.C. Liu and P.P. Li 887

Chapter 4: Applied Mechanics and Other Topics

An Online Monitoring, Diagnosis and Control System for Heavy Duty NC Machine Tool
G.F. Jia, J.P. Xuan, B. Wu, Y.M. Hu and Y. Cheng 895

Steady Heat Transfer Analysis of Leaf Spring Rotary Engine
D.J. Wang and Z.X. Zuo 901

Analysis of the Ferroresonance of 110 kV Power Systems
L.Q. Shang and Y. Hong 907

Researching on Valve System of Hydraulic Electromagnetic Energy-Regenerative Shock Absorber
Z.G. Fang, X.X. Guo, L. Xu and J. Zhang 911

Finding Values for Multi-Valued Features
W.H. Choi and H.Y. Jeong 915

Friction and Wear Analysis of Grease-Lubricated Ball Bearing Based on EHL Numerical Calculation
C.L. Peng, X.P. Xie and S.L. Chen 919

Research on Redress System of Vibration Table in Multi-Parameter Combined Environment Test System
C.Y. Wang, W. He and R.J. Shen 925

Vibration Analysis and Control for Reciprocating Compressor Piping System
Y.D. Li, S.L. Han, J. Liu, J.Y. Liu and H. Du 930

Suture Density Study of the Bioprosthetic Heart Valve
Y.H. Zheng and X. Ye 935

The Design of Intelligence Pipeline Leakage Detector
Y.Q. Liu and Q.J. Meng 940

Ecological Restoration by a Multistage Floating-Bed System in a Eutrophic Urban River, China
Y.H. Chen, Y. Zhang, M.S. Huang, Y.F. Zhang, F. Zhao and J.H. Luo 945

Design of the Variable FU Array for Forward/Backward Transform in H.264
K.H. Park, W.K. Ju and Y.H. Kim 950

Dynamics Simulation of Banana-Type Line Vibrating Screen and Analysis of Applied Force of Fastenings
X.W. An, F.G. Wang and Y.J. Ji 954

Wear and Tribotermal Effects of Nanostructured Nickel Chemical Coatings
M. Kandeva, D. Karastoyanov and A. Andonova 960

The Influence of Grain Size and Grain Size Distribution on Sliding Frictional Contact in Laterally Graded Materials
R. Khajehtourian, S. Adibnazari and S. Tashi 964

Study on Aerodynamic Properties of Impact Plate
X.W. An, S.P. Zheng and Y.J. Ji 970

Longitudinal Cracking Analysis of PCCP with Broken Wires
R. You 976

The Dynamics Analysis on a Type Palletizing Robot
M.Y. Lv, J.Q. Li, B.L. Duan and R. Fu 982

Propagation Characteristic of Ultrasonic Lamb Wave
X. Chen and K. Xu 987

Generators Effect on Voltage Stability Enhancement by Normal Forms of Diffeomorphism
P.J. Yu, T.T. Jiang and J. Zhang 991

Dynamic Balancing Modal Analysis and Vibration Suppressing Design for Reciprocating Compressor Crankshaft
Y.C. Huang and F.Y. Lee 996

Squeal Analysis of a Disc Brake Considering Damping between a Disc and a Pad Lining
K.W. Zhou, C. Kim, M.O. Yun and J.Y. Kim 1000

Study on Worst Case Coverage of Mobile Sensors in Hybrid Wireless Sensor Networks
X.L. Wang, W.J. Ni, Q.S. Fang and Y.J. Ge 1004

Human Face Fast-3D-Reconstruction from a Single Image
H.H. Zhao, Y.N. Wang, Y.Q. Sun and J.Z. Chen 1008

Level Set Segmentation Method in Medical Image Segmentation Research and Application
Y. Miao and W.L. Shi 1012

Steady-State Voltage Stability Enhancement by Using Nonlinear Participation Factor
J. Zhang, T.T. Jiang and S.W. Mei 1016

Research on Genetic Characteristics of Slab Bulge in Continuous Casting Process
C.Y. He, D.P. Wu and Q. Qin 1021

Vehicle Dynamic Analysis and Fatigue Prediction
J.S. Chen and H.Y. Hwang 1025

Asymmetric Change in Three Dimensional Magnetic Fields of Bearing Steel (JIS-SUJ2) under Spherical Hertzian Contact
K. Kida, M. Uryu, T. Honda, E.C. Santos and K. Saruwatari 1031

Image Retrieval Based on Edge Detection and Histogram
W. Dong and Y.D. Tang 1038

Study on a Control Method for Trajectory Correction
K.J. Zhang 1042

The Research of Travelling Crane Non-Destructive Health Monitoring Based on Artificial Incentive and PVDF Sensor
Z. Wan, Y.Y. Shang, S. Gao, X. Xiong and Z.G. Jing 1046

Estimate Method of Web-Based Distance Education for the Deaf Undergraduate
Y.J. Zhao, Q. Li, Y. Wu and X.O. Wang 1051

Green Residential Community Domestic Sewage Treatment and Recycling Analysis
R.F. Jia, J. Zhang, D.L. Song and S.B. Fang 1057

A Spectrum Allocation Algorithm Based on Graph Theory
Y.P. Xie, X.Z. Tan, Y.T. Liu, L. Ma and H.Y. Wu 1065

EWOD-Based Digital Microfluidic Chip and its Application
Y.X. Chang, S.X. Zhang and J.Y. Li 1071

Performance Calculation of a TBD234V12 Diesel Engine with STC
Y. Wang, Y.Y. Wang, F. Shi and X.G. Li 1075

Sentiment Analysis of Comparative Sentences for Chinese Document
G.S. Wu, X.Y. Wu and J.J. Wei 1079

A Case Study of Earthquake Resistant Retrofit Design with Economical Braced Steel Frame System for a Primary School
G.C. Shiah and C.L. Liu 1083

A Determination Method of Storage Performance Attribute Parameter
G.Y. Zhao, Y.F. Sun and G. Zhao 1087

Investigation of the Accuracy of the Numerical Manifold Method on *n*-Sided Regular Elements for Crack Problems
H.H. Zhang and J.X. Yan 1093

The Study of Carrier of Aerial Afforestation Design
Y.J. Hu, Y.T. Tsai, M.C. Tsai, C.H. Yen and J.B. Ke 1097

Analysis of the Optimal Value for Transmission System of Reactive Load Compensation
D. Lu, J.X. Wang and J.F. Li 1104

The Hydraulic and Air Pressure System and PLC System for the Button Cell Spreader
H.G. Wang and Y.Q. Huang 1111

Lagrangianlized Nonlinear Dynamic Equation of Timoshenko Beam and Application
P. Tan, L.W. Chen and Y.J. Li 1115

Some Qualitative Properties of Modes of Continuous System of Two-Spans Beam with Two Free-Ends
M. He, L.H. Zhang and Q.S. Wang 1121

Amplitude Incremental Generalized Potential Energy Principles with Two Kinds of Variables for Nonlinear Vibration
Z.M. Liu, B.T. Sun, G.X. Zhang and Y.Y. Zhang 1130

Computational Analysis of Low Velocity Impact Response of Composite Panels
M. Rahman, E.V. Morozov, K. Shankar and A. Fien 1135

A Compact Broadband Phase Shifting Network for a Four-Feed Multi-Mode Global Navigation Satellite System Antenna
H.B. Ge, Y. Yao, J.S. Yu and X.D. Chen 1139

Study of the Cellular Composite Beam's Behavior under HVAC Ducts' Weight while Exposed to High Temperature
L.X. Fang and M. Yang 1144

Seismic Behavior of Precast Segmental Bridge Columns with Carbon Fibre Reinforcement as Energy Dissipation Bars
Y. Wang, Z.Y. Bu and L. Hu 1148

Improvement of Computational Translation by Using Entropy Theory
J.J. Suo, B.Y. Yu and Y.J. He 1153

Research on High-Frequency Vibratory Stress Relief of Small Cr12MoV Quenched Specimens
W. He, B.P. Gu, J.Y. Zheng and R.J. Shen 1157

Analysis of Fretting Crack Propagation Behavior with X-FEM Method
W. Li, R.D. Liao, L.T. Liu and Z.X. Zuo 1162

Development of 3D Elastic Deformable Object Model for Robot Manipulation Purposes
C.H. Yew, K.S. Mohamed Sahari and C.Y. Gan 1167

Experimental and Numerical Studies on the Reinforced Concrete Frames Subjected to Blast Loads
L. Xiao, W.Z. Qu and J.G. Wang 1173

Influence of Wear and Backlash on Machined PEEK Polymer Bushes and 7075 Aluminium Alloy Cam Plates Used in Robot Joints
H. Koike, K. Kida, K. Kanemasu, K. Itakura, K. Saruwatari, J. Rozwadowska and M. Uryu 1178

Investigation of Viscoelastic Deformation and Constitutive Modeling of PC, ABS and PC/ABS Alloys
Z.N. Yin and T.J. Wang 1186

Edge Tracing of T-Shirt by Robot for Spreading Purposes
K.S. Mohamed Sahari and H. Seki 1190

Innovative Wavy Bolts and their Supporting Mechanism for Burst Prone Rock Masses
Z.L. Zhou, X.B. Li, C.D. Ma, Y. Zou and T.B. Yin 1195

Structure Design and Stress Analysis of Hollow Sucker Rod Joints
C.J. Han, J. Zhang, F.T. Hu, J.G. Li and L. Zhang 1199

Nonlinear Response and Fatigue Life Prediction of Thin-Walled Structures under Thermo-Acoustic Loadings
Y.D. Sha, J. Wei and Z.J. Gao 1204

Research on Multilevel Inventory Control of FMCG Industry Based on System Dynamics
B. Yang, S.Q. Li and C. Zhang 1212

Dynamics Analysis of an SEIQS Model with a Nonlinear Incidence Rate
N. Cui, J.H. Li, J. Qu and H.D. Xue 1220

Research on the Energy Consumption Evaluation Model of Container Terminal Logistics System
B. Yang, Y.Y. Guo, X. Shi and Y.Y. Lu 1224

Decision-Making Model on Real Estate Investment
Y.S. Wo 1230

Influence of the Tabor Parameter on the Roughness-Induced Adhesion Hysteresis
L.F. Wang, W.B. Rong, B. Shao and L.N. Sun 1233

A Best Relay Based Cooperative Spectrum Sensing Scheme
M.L. Li 1238

Design of Oscillator for PWM Controller
X.Y. Wang and J.P. Liu 1242

Dynamic Simulation of Flow Behavior in a New Spray Granulation Tower
M.L. Liu, Y. Mao, J. Wang and J.Y. Wang 1246

Scheme for Shortcut Double Keys of Working Mode Selection in PLC-Based Numerical Control Machine
J.H. Han, Y. Chen and F.Z. Jiang 1253

Research on the $K_{II\,C}$ of the Two Types of Concrete Specimens
A.M. Deng, D.Y. Xu and W.X. Zhu 1260

Detecting Malicious Fast Flux Domains
M.T. Qassrawi and H.L. Zhang 1264

Analytical Solutions of Deformation for Temperature Dependent Functionally Graded Conical Shells
J.H. Zhang, G.Z. Li and Y.Y. Li 1274

Chapter 5: Materials Machining

Applications of Association Rules in Computer Crime Forensics
Y.S. Tan, Z.S. Qi and J.Y. Wang 1281

Block Compressed Sensing Based on Image Complexity
Y.M. Cao, Y. Feng, Y.B. Jia and C.S. Dou 1287

Study on Vehicle Routing and Scheduling Problems in Underground Mine Based on Adaptively ACA
Q.H. Gu and S.G. Jing 1293

Study on Application of Wireless Sensor Networking in Environmental Monitoring
Y.J. Liu and X.H. Li 1297

Helium-Injection Cooling of Hot Silica Glass Fiber in Optical Fiber Manufacturing System
D.J. Kim, I.S. Oh, H.S. Kwak and K.J. Kim 1301

Research on Stress Corrosion Behavior of In-Service Pipeline in H_2S Environment
Y. Li, Y.L. Zhang and G.D. Jia 1305

A Novel Registration Approach for Mammograms Based on SIFT and Graph Transformation
Y.J. Zhong and Q. Cai 1313

Duplex Hard Coatings with Aditional Ion Implantation
B. Škorić, D. Kakaš, G. Favato, A. Miletić and M. Arsenovic 1320

Automatic Dynamic Task Distribution between CPU and GPU for VR Systems 1324

Relation between Cubic Stiffness and Initial Conditions of Maximum Energy Dissipation in a Nonlinear Vibration Absorber
X.R. Kong, Y.C. Zhang and X.W. Shan 1331

A Robust Tracking Algorithm in Crowded Environment
M.X. Jiang and H.Y. Wang 1336

The Research of WSN Time Synchronization Algorithm Based on Clustering Network
Y.Y. Shang, Z. Wan, X.H. Zhang, Z.G. Jing and X. Xiong 1340

An Audio Watermark Algorithm in Wavelet Domain Based on SVM
Y.Q. Wang and C. Deng 1346

The Prediction and Analysis of Water Resource Carrying Capacity in Chongqing Metropolitan, China
L. Ming 1350

Distributed Attitude Consensus Control of Multiple Homogeneous Spacecrafts While Preserving Connectivity
Y.C. Zhang, F. Zhang, S.J. Zhang and W.C. Zhong 1356

Interaction of Semi-Cylindrical Gap and Multiple Shallow-Buried Cavities and Inclusions
H.L. Li and D. Sun 1361

The Exploration of Appropriate Pouring Time which is the Important Parameters in Gray Cast Iron Foundry Process Design
X.P. Peng 1365

Mechanical Characteristics of PVA/STMP Hydrogel in Tensile and Unconfined Compression
W. Zhu, J. Gao, X.G. Li, J.L. Lin, H.H. Cao and B.T. Sun 1372

Vehicle Parameter and Road Grade Estimation Based on Kalman Filter: Theory and Experiments
M. Cheng, Z. Wang and G. Tao 1376

An Analytic Method and Application on Design Planar Six-Bar Mechanisms with an Approximately Equal Velocity Ratio Transmission
S.N. An and H.X. Wang 1380

The Emissivity of the Casting Surface
L. Chen, S.L. Xu, G.H. Zhang and Z.W. Xia 1384

A Mathematical Modeling and Optimization Approach for Trajectory Planning of Robot Manipulators
J.C. Guo, Z. Liu and G.Z. Cui 1388

Research on Mechanical Property of Top Drive Casing Running Tool's Slips
F.G. Jiang, Z. Liang, G.H. Zhao, Y.H. Yan and P. Wang 1393

Background Modeling Approach Based on Eigenspace Decomposition
J.W. Long, X.J. Shen and H.P. Chen 1399

Correlation of Hardness with Mechanical Properties of SPCC Steel Spot Weld
N.Q. Nghiem, H.Y. Hwang and J.S. Chen 1404

Chapter 6: Control System Modeling

Research and Implementation on Multi-Database System Based on XML
D.X. Wang, L.J. Chen, Z.L. Wu and B.L. Zhang 1413

Design and Implementation of Remote Disaster Backup Solution to Oracle Lob
Q. Wu and Y. Mao 1420

Long-Distance Slurry Pipeline Valve Monitoring System Design and Application
X.Y. Yuan, J.D. Wu, Y.G. Fan and X.D. Wang 1427

A Prototype Target Tracking Network System for Robot Feedback Control
L. Zhao, J.Z. Ye and W.F. Luo 1431

Genetic Algorithm Design and Simulation for Job-Shop Scheduling Problem
G.C. Wang, X.J. Tian, C.P. Li and N.N. Yang 1436

Technique Influence on Cast-Iron Surface Textures Induced by LST
J.Y. Dai, Y.H. Zhang, X.J. Hua and Y.H. Fu 1441

Data Fusion Algorithm for Asynchronous Radar Networks under Blanket Jamming
Y.L. Zhao, X.Z. Ma, X.D. Gao, L. Yun and S.Q. Fu 1446

Design of the Heating Regulation Controller Based on ARM
Q.J. Meng and Y.Q. Liu 1453

The Visual Extraction of the Autonomous Lawnmower Navigation Route
L.S. Fu and Y.Y. Xing 1458

Permanent Magnet Synchronous Motor Servo System Design and Algorithm Research
L.R. Liu and J.L. Luo 1465

Numerical Simulation of Fatigue Crack Growth of New-Material Track Rollers
C. Liu, X.H. Guo and X.X. Gao 1471

Research on the Application of Wireless Communicating Technology in the Rescue of Earthquake
H.M. Li 1477

Research for Control System of Four-Axis Automatic Winding Machine
C. He 1483

Comparison and Evaluation of Lightweight Formats of 3D Models
Y.C. Miao, G. Zhao and G.R. Yan 1490

Improved GA Based Multi-LAVs' Aerial Delivery Areas-Choosing Method
D.L. Li, J. Li, Z.Y. Guan and J.B. Wang 1498

A Study of Virtual Remote Laboratory and its Subsystem by Using Modelica
J.H. Ge and S. Zhu 1506

Automobile Active Suspension System Optimization Design Based on Modified Multi-Objective Genetic Algorithm
Y. Zhang, C. Lu and H. Zhang 1515

Study on Tensile Strength of Composite Double-Lap Joint
S. Liu, Z.D. Guan, X. Guo, D.X. Yan, P. Chen and J. Liu 1519

Steady Data Acquiring and Robust Neutral Network Training for Boiler Combustion Optimization
J. Su and X.G. Wang 1527

An Improved Airborne Single Observer Passive Location
Y. Wang, C.Q. Huang, Z. Wang and W.X. Li 1533

The Development of the GAT High Accuracy Magnetic Suspension Gyro Station and the Application on the Underground Engineering
Y. Gong, Z.Q. Yang and Z. Shi 1537

Development of a Vertical Axis Pipe Flow Generator with Swing Gates
S.H. Wang and E.J.T. Corado 1541

SRAP Pre-Stressed Reinforcing Techniques for Concrete Structures
S.W. Hu 1545

Model and Simulation on Flow and Pressure Characteristics of Axial Piston Pump for Seawater Desalination
J. Zhai and H. Zhou 1549

Long Term Voltage Stability Enhancement by Model Predictive Control
P.J. Yu, T.T. Jiang and J. Zhang 1553

Chapter 7: Intelligent Mechatronics

Comprehensive Line Selection Method Based on the Relative Intensity of Transient Signal
L.Q. Shang, J.J. Zhao and J.N. Wang 1561

Intelligent Sunshading Control System Based on Lonworks Fieldbus
F. Yan and M.J. Li 1565

BSC Application in the Performance Management of Service-Oriented Manufacturing Enterprises
T.Z. Zhang and Y. Huang 1570

Failure Analysis of Reinforced Concrete Columns after High Temperature
L.L. Bai and T. Song 1578

Serial Communication of PC and SCM in Distributed Control System
L.M. Cao, Q.L. Zeng, X.Y. Xiao and X. Zhang 1582

Using SVM to Predict Stock Price Changes from Online Financial News
S.Y. Dai and N. Li 1586

A Service Component Model for Semiconductor Test Equipment
H.Y. Jeong and Y.H. Kim 1591

A Revised Clustering Algorithm Based RBF Neural Network Approach for Modeling of an Electro-Hydraulic Servo System
J.L. Chen, J. Qian, Z.Z. Tong and Y.L. Hou 1595

Computer-Aided Optimization of a 5.8 GHz ETC Receiver Front-End Design Using Memetic Algorithm
L. Jiang, H. Yu, Y. Li, Y. Yin and Z. Li 1601

A Neural Network Model for Simulating Cloth Texture Deformation
Z.H. Zhao 1608

The Wet Clutch Pressure Control of Dual Clutch Transmission Based on FCMAC
Y.S. Wang, X.S. Cheng, Y.D. Song and P. Han 1614

Jam Status Monitoring System in Manufacturing System Environment
H.Y. Jeong and Y.H. Kim 1620

Rapid Classification of Softwood and Hardwood by Near Infrared Spectroscopy of Wood Tangential Section
Z. Yang, Y.N. Liu, B. Lv and X.Q. Xie 1624

Investigation on Wear Behavior at High Temperature of Smooth and Bionic Non-Smooth Samples
X.D. Yang, Z.J. Yang and Y.Q. Chen 1628

Research on Earthquake Load Analysis of Large Structures in Non-Slide Construction
G.S. Yang 1632

Optimal Structural Frequency Design of Stiffened Shell
D.H. Mi, R. Yang, L. Zhou, Y. Liu and D.M. Guo 1636

Maximization of Productivity by Distributed Robot System for Manufacturing Operation
K. Matsuda and H. Ishihara 1640

FEM Analysis of Large Load and Long Span Suspended Platform Based on APDL
X.J. Zheng, X.Y. Zhao and X.L. Gao 1646

Design of a New Suspension Mechanism of Temporarily Installed Suspended Access Equipment
X.J. Zheng, X.L. Gao and X.Y. Zhao 1650

Demerit-GWMA Control Chart with Fast Initial Response
H.W. Kang, J.W. Baik, Y.J. Choi and S.H. Nam 1655

Finite Element Analysis for the Body Frame of Open-Front Press
H.P. Pan and H. Feng 1661

Study on X-Voronoi for Heterogeneous Wireless Sensor Networks
X.L. Wang, M. Liu, Q.S. Fang and Y.J. Ge 1665

Numerical Simulation and Experimental Study on Bonding Tool Design of Thermosonic Transducer for Flip-Chip Bonding
Y.C. Huang and K.Y. Li 1670

Theoretical and Experimental Research on the Features of Cutting Force in Rotary Ultrasonic Face Milling of K9 Glass
C.L. Zhang, P.F. Feng, J.F. Zhang, Z.J. Wu and D.W. Yu 1674

Evaluation of DBPs Formation Potential during Chlorination of Dissolved Organic Matter Fractions Isolated from Eutrophic Water
J.H. Luo, B.H. Zheng, Q. Fu, X.R. Zhao, Y. Liu, M.S. Huang and Y.H. Chen 1680

Dynamic Characteristics of Belt Conveyor Based on Virtual Prototyping
D.M. Du, C.S. Zhu, H. Li and Q. He 1685

A High Efficient Variable Cross-Section Compound Ultrasonic Wiredrawing Vibration System
X.B. Shan, N.M. Qi, L.L. Wang and T. Xie 1689
