Preface

As a prestigious conference, the calls for papers stimulated an active response of distinctive submissions with more than 500 papers. All the papers submitted were peer-refereed, and, based on the referees’ comments, less than 300 papers are finally selected for the conference presentation and inclusion in the proceedings. The authors’ and referees’ efforts for enhancing the quality of the papers are greatly appreciated.

The conference is sponsored by Chinese Mechanical Engineering Society, National Natural Science Foundation of China, Brunel University in UK and Northeastern University in China.

On behalf of the academic committee of e-ENGDET 2009, I would like to take this opportunity to express my appreciation of the generous contribution by the kind support from the conference organizers, supporters, and co-sponsors.

I would also like to express my deeply appreciations and thanks to the keynote and special session speakers, and to all contributors and delegates for their support and high quality contributions.

The Organizing Committee is grateful to Prof. Kai Cheng from Brunel University, Prof. Xipeng Xu from Huaqiao University and Dr. Hualong Xie from Northeastern University for their contribution to the conference from many aspects. Thanks are also given to Mr. Yuan Li and Ms. Xueqiong Huang from Huaqiao University for their excellent editing work; and Trans Tech Publications for producing the volume.

Professor Yongxian Liu  
Chairman, e-ENGDET 2009 Organizing Committee  
Northeastern University, Shenyang, Liaoning, 110004, China
