

Table of Contents

Preface, Sponsors and Organizing Committee

Chapter 1: Vibration Engineering

Free Vibration Analysis on Combined Cylindrical-Spherical Shell S.H. Wu, Y.G. Qu, X.C. Huang and H.X. Hua	3
New Method in Suppressing Vortex-Induced Vibration of Marine Riser X.F. Zhong, L.M. Lin, Y.X. Wu and S.Y. Shi	9
Flow-Induced Vibration Study of Tunnel Spillway Working Gate on One Reservoir X. Wang and S.Z. Luo	13
Simulative Analysis of Structure Vibration of Diesel Engine Based on Finite Element Method X.H. Cao and Q.Y. Kang	17
Optimal Design and Test of Ultrasonic Vibration System X.L. Miao and Y.W. Zhu	21
Application of the Force Transferring Technique for Marine Machineries X.R. Wang, X.H. Miao, C.H. Yuan, D.J. Qian and D. Jia	26
Numerical Analysis for Galloping of Iced Quad Bundle Conductors J.Y. Cai, X.J. Liu and S.X. Zhang	30
Analysis on Tower Crane under Wind Load by ANSYS Y.Q. Gu, W.F. Wang and S.D. Guo	35
Influence of Support Stiffness on Free Vibration and Force Transmission Rate of Helicopter Driveshaft H.J. Wang, D.W. Yu, Y.W. Yue and C. Wang	39
Free Vibration of Damaged Beam Structure with a Notch Defect J.Y. Chen, L.G. Fan and D.C. Qin	44
Elimination of Support Effects in Modal Testing J. Ren, S.S. Bi, W. Wang and G.H. Zong	48
Research on Numerical Simulation Method for 3D Complex Flow in Rotating Machinery G.Y. Du, Z. Tan, W. An and D.C. Ba	52
Analysis on Oil Whip of Steam Turbine X.L. Peng, J. Qian, B. Zhang and R.X. Peng	56
Modal Identification Method Based on Natural Pulsation Excitation X.J. Jiang, J.Y. Wu and J.X. Liu	60
Group Delay in Digital Filter Induced Instability of a Two-Dimensional Airfoil Active Flutter Suppression System M.L. Yu	64
Study on Calculation Method of Dynamic Response of Structure Subjected to Harmonic Load Y.X. Lu, Z.F. Lou, B. Liu and X.C. Pan	70
Vibration Characteristics of Single Pile Embedded in Nearly Saturated Soils Half Space Subjected to Harmonic Vertical Loads H. Zhang, Q. Gao and B. Xu	76
Vibration Suppression of a Saturation Control System Using Delayed Feedback Control Y.Y. Zhao	82
Real-Time Calculation of Noise Radiated by Ship Structure via Machinery Exciting Force Estimation D.D. Lu and L. He	87
Vibration and Modal Analysis of Induction Motor R. Li, Q.F. Jia and S. Zhong	92
The Bionic Vibration Damping Technology and its Inspiration for the High Speed Milling Cutter H.Q. Lv, W.X. Tang, Q.H. Song and S.S. Sun	98

The Vibration Response Analysis about High-Speed Train's Braking Wing W.Q. Zhu and Y.Y. Zhu	102
A Research on the Influence of Vessel-Propeller Coupling Effect to Shaft's Lateral Vibration J.C. Zhu, H.H. Zhu, X.P. Yan and P. Jiang	106
Study of Vibration Characteristics of Cantilever Rectangular Plate with Side Crack L.H. Chen, Y. Sun and W. Zhang	113
Vibration Analysis of the Load on Helicopter Swashplate Rod F. Wang and M. Chen	119
The Effect of Group Number and Group Coupling Stiffness on Vibration Response Localization in Tuned Grouped Blade-Disk A.L. Wang, H. Long, Q. Huang and Q.J. Wang	124
Evolution of Constrained Layer Damping Using a Modified Cellular Automata Algorithm X.B. Li, G. Wang, J.H. Wen and X.S. Wen	129
Microvibration Model Development and Validation of a Cantilevered Reaction Wheel Assembly Z. Zhang, G.S. Aglietti and W.J. Ren	133
The Rapid Series Method for Solving Differential Equation of the Odd Power Oscillator S.L. He and Y. Huang	138
Study on the Free Vibration of Odd Power Oscillators Y. Huang and S.L. He	142
Numerical Simulation of the Damping Influence on Vortex-Induced Vibration Z.J. Yin, Y.S. Cao, T. Han and X.S. Wang	146
Transverse Vibration of Axially Accelerating Moving Fabric: Experiment and Analysis H. Lin, C.L. Zhou, J. Shi and Z.H. Feng	150
Modal Analysis of a Flexible Beam Attaching Multiple Absorbers J. Li, C.S. Liu, F. Li and Z.X. Wang	154
Galloping Characteristics of Conductor Accreted with Crescent-Shaped Ice H.X. Dang, F.L. Yang, X.M. Li and J.B. Yang	158
Sensitivity Analysis of 1000MW USC Units Shafting Torsional Vibration Based on ANSYS S. Liu, C. Wang, B. Li, C. Chen and D.M. Xie	162
On Orifice Design for Reducing Self-Excited Vibration of Aerostatic Guideway Y.N. Zhang, T. Satomi and W. Si	166
Vibration Propagation Characteristics of Binary Periodic Sandwich Panels P.P. Ge and G.L. Yu	172
Experimental Study and Numerical Analysis of Sihui Metro Depot and the Superstructure J. Zhang, B. Zhang, Y.H. Liu, L.Q. Wang and Y.B. Wu	176
Investigating Nonlinear Vibration of a Fully Clamped Nanobeam in Presence of the van der Waals Attraction A.R. Askari and M. Tahani	181
Study on Impact of Vibration Direction on Linear Vibration Screening Effect Y.M. Zhao, K. Wang, L. Dong, B. Zhang, X.L. Yang and Z.S. Zhu	186
Vibration Localization in a Fluid-Loaded Rectangular Plate with Rib Irregularity H.H. Hu and D.J. Shang	191
Analysis and Experiment of an Air Vibration Isolation System with Auxiliary Chambers R.W. Wen, J.B. Tan, L. Wang and G.H. Wang	195
The Design and Dynamic Analysis of High Frequency Ultrasonic Transducer for Wire Bonding Application Z. Zhang, T.H. Yan, X.D. Chen, B. He and X.S. Xu	199
Sound Transmission Control of a Cylindrical Structure Using Acoustic Resonators D.Y. Li and L.J. Ou	203
Application of Balanced Multi-Wavelet in the Fault Diagnosis of Rolling Bearing S.Z. Zhang, J.Y. Zhang and Y. Yang	210
Effect of Mesh Size on Structure Vibration and Acoustic Radiation Z.Y. Xie, Q.D. Zhou, X.J. Lv and J.X. Duan	216
Study on Nonlinear Vibration of Motor Rotor System F.D. Zhang, Q.F. Jia and S.X. Zhang	221

Research on Ash Removal for the Water Wall of Coal Gasifier under Impact Loadings X.T. Zheng, J. Jing, J.Y. Yu, C.G. Wang and J.M. Xu	227
Influence of Radial Slots on the Vibration Characteristics of Circular Saw Blade Y. Li	232
Threshold Noise Reduction Research of Improved EEMD Method M.J. Zhang, H. Chen, C. Wang and Q. Cao	237
The Contrast Experimental Study on Operational Modal Analysis of Ship Structural Model J.C. Xu, M. Hong and H.Y. Cui	241
An Experimental Investigation of Sunroof Buffeting Characteristics of a Sedan Y.Z. He and Z.G. Yang	247
Active Vibration Control of a Double-Decker Cantilever Beam Using Shape Memory Alloy X. Yang, J. Hong, Y.H. Ma and D.Y. Zhang	252
FEM Modeling Technology and Vibration Analysis of Flexible Rotor System Z.C. Liang, J. Hong, Y.H. Ma and T.Y. He	257
Traveling Wave Vibration of Rotating Thin Circular Cylindrical Shell Y.Q. Liu and F.L. Chu	262
Application of Support Vector Machine in the Vibration Signal Measuring-Channel Modeling C.J. Li, Z.Q. Zhang, Y.P. Feng and Q. Tom	267
The Modal Analysis and Modeling Study of the Spacecraft Payload Load-Bearing Floor Structure S. Yang, C.C. Ma, G.F. Li and R.J. Wang	271
Crucial Torsional Modal Identify on Drive-Train in a Wind Turbine H.X. Li, F.M. Wu, W. Li and D. Wang	275
Modal Analysis and Optimization of Spindle Box of Turn-Milling Center Based on Finite Element Method L.D. Zhu, X.B. Wang, T.B. Yu and W.S. Wang	281
Experimental Study on Vibrational Transmission Characteristics of a Ring-Stiffened Cylindrical Shell Model H.B. Wen, Y.Y. Zuo, Z.L. Peng and H. Shen	285
The Modal Analysis of the Rotor of Electric Eddy Current Dynamometer Based on ADAMS X.B. An, D.W. Li, H. Wang and L. Wang	290
The Design and Prestressed Modal Analysis for Megawatt-Class Wind Turbine Rotor W. Gao, C. Li, Q. Liu and Y. Chen	295
Finite Element Modeling and Modal Analysis of Coilable Mast J. Wang, D.X. Li and J.P. Jiang	299
Modal Identification Based on Hilbert Transform for Time-Varying System M. Zheng and F. Shen	303
Research on Vibration Control of High-Speed Press Frame Structure X. Zheng, J.L. Yao and J.L. Wang	308
A Detection Technology for Weak Vibration Signal Based on Independent Component Analysis H.D. Guo, S.M. Li, Y.Y. Zhang, X.X. Wang and S. Ma	312
Reconstruction of Sound Field Based on Mono-Poles Array Modes Y.F. Nie, H.C. Zhu and R.F. Mao	316
Study on the Mechanism of Vibration Reduction by Variable Speed Cutting D.L. Wang	320
Study on Ambulance Stretcher Vibration Isolation System G.Y. Pan and Y. Zhang	324
Optimized Fuzzy Neural Networks Control of a Magnetic Suspension Vibration Isolation System C.S. Song and Y.F. Hu	328
Selection of Optimistic Wavelet Base in Running-In Vibration Signal Denoising of Remanufacturing Engine X.B. An, L. Chen, C.F. Chen, Y.C. Bai and C. Yang	335
Research on Condition Monitoring of Bearing Health Using Vibration Data L. Ma, J.S. Kang and C.Y. Zhao	340

Vibration Modeling and Sensitivity Analysis of Printed Circuit Board F. Xu, C.R. Li, T.M. Jiang and L.T. Liu	345
Natural Vibration Period Analysis of Multi-Storey Reinforced Concrete Frame Structure L.N. Hao and Y.S. Zhang	351
Wind-Induced Vibration Analysis of Wind Fence Structure G.F. Ma and T.G. Chen	355
Influence of Rib Strengthening on Structure Vibration and Sound Radiation of Cylindrical Shell H. Zheng, Q.D. Zhou and G. Ji	359
Monorail Truss Structure Selection Based on Modal Analysis J.P. Wang, Y.L. Zhou, F. Wan, T. Huang and H. Liang	364
The Effects of the Jet-Flow on Sound Propagation in Low-Speed Wind Tunnel Y.G. Wang, J.S. Yang, Y. Yang and Z.G. Yang	368
Excitation Source Function of Ground Vibration from Urban Railway Traffic by an Inversion Procedure X.X. Tao, X. Zheng and F.T. Wang	374
Analysis on Vibrations due to High-Speed Railway Tunnel and Control Measures X.J. Quan, K. Shi and Y.B. Yan	381
The Characteristic Analysis of Vibration for High-Speed Train-Ballastless Track-Bridge System Base on A Hybrid FE-SEA Method W.J. Luo, X.Y. Lei, S.L. Lian and L.Y. Liu	387
An Explanation on Mechanism of Local Amplification in Attenuation of Ground Vibration from Rail Traffic in Urban Area H.M. Liu, X.X. Tao, X. Zheng and F.T. Wang	392
Technology and Application for Modal Testing of Cable-Stayed Bridge Y.S. Zou, Q.H. Chang and W. Peng	396
Numerical Simulation of the Vibration and Structure-Borne Noise of the Viaduct J. Li and N. Zhang	401
Analysis on Vibration Reduction Characteristics of Ladder Track Structure on Metro Viaduct under Measured Track Irregularities X.Z. Liu, S.L. Lian and H.L. Wei	406
Simulation and Analysis for Environment Vibration Induced by Urban Rail Transit with Ground Line H.N. Zhang, Q.Y. Sun and G.J. Sun	411
Comparative Study on Aerodynamic Noise of Dimensionally Similar Locomotive Models of High Speed Trains Y.G. Wang, Y. Yang, J.S. Yang and Z.G. Yang	417
Application of Dynamic Vibration Absorber in Noise Control of Whole Vehicle X.Y. Xu, G.H. Han and Z.G. Ma	423
Noise Decreasing Methods of Gearing Vibration for a Idling Construction Machine C.Y. Mu, C.M. Gao and Z. Ge	427
Experimental Modal Analysis of Vehicle Body in White S.M. Chen, C.L. Shen, X.W. Song, D.F. Wang and W. Li	431
Thickness Optimization Study of Constrained Damping Plate H.C. Wan, L. Zheng and Y.N. Li	436
Research on Vibration Angle of Six Degree-of-Freedom C.Z. Li, Y. Chen and Q.L. Liu	440
The Study of Sound Quality for Car Compressor Y.F. Hou, G.H. Han and X.Y. Xu	444

Chapter 2: Dynamics of Mechanisms and Systems

Dynamics of A Single Elastic Bodies under Large Rigid Rotation Z.F. Liu and S.J. Yan	451
An Experimental Study on the Effect of Submergence on a Vertically Oscillating Hydrofoil at Zero Translational Velocity R. Fernandez and K. Alexander	459

Discussion on Commonly Methods for Analysis of Drill String Acoustic Spectral Characteristics	
Y.W. Liu, Z.C. Guan, G.S. Zhao and Z.Q. Long	466
Numerical Simulation Method of Acoustic Wave Propagation Based on Semi-Symplectic Theory	
Z.F. Li and W.Z. Ma	470
Dynamics of the Oscillative Solution for a Non-Linear Ecosystem with Impulsive Perturbation	
Y.S. Tan and H. Zhang	474
Fluid-Structure Interaction Analysis of Flexible Marine Propellers	
H.T. Sun and Y. Xiong	479
Analysis of Bearing Loads for Scroll Compressor Considering Phase-Angled Counterweights	
Y. Yu, C. Li, M. Zhao and S.S. Zheng	483
The Research of Cylindrical Noise Source Distribution Using Near-Field High-Resolution Location Methods Based on MVDR Algorithm	
H. Chen, F. Xu and S. Su	487
The Near-Field Correction Method of the Basic Array Error Based on a Single Auxiliary Vector Hydrophone	
H. Chen, F. Xu and D.H. Yu	493
Aeroelastic-Acoustics Numerical Simulation Research	
X. Pei, M. Xu and D. Guo	500
Complex Dynamics in the Kummer-Olsen Model of Calcium Oscillations	
Z.F. Wu and Y. Zhou	505
Hopf Bifurcation and Numerical Simulation in a Calcium Oscillation Model	
H.K. Zuo, Q.B. Ji and Y. Zhou	510
Analysis of Attitude and Dynamics Characteristic of a Kind of Submerged Buoy	
J.X. Wang, H.B. Gui, X. Chen and Q. Fu	516
Dynamical Analysis of a Calcium Oscillation Model in Non-Excitable Cells	
Y. Zhou, Z.F. Wu and Y.H. Huo	521
Simulation Research on Defects Detection in Straight Pipes Using Guided Waves	
A.Q. Cui, S.P. Zhou, W.C. Lv and C.L. Liu	526
Bifurcation Induced by Mass Variation in Piecewise Linear System	
Y.H. Li and S.D. Chen	531
Simulation on Shock Wave Propagation in Metallic Foams Subjected to Impact Loading	
Y.F. Zhang	536
Nonlinear Dynamics of Simple-Supported Beam under Concentrated Moving Load	
D.X. Cao, B. Chen and W. Zhang	541
Dynamic Testing and Analysis of Inflatable Beams	
J.Z. Wei, H.F. Tan, J.X. Yu and X.W. Du	546
Prediction of Wave Attenuation across Multiple Joints with an Improved Elastic Nonlinear Model	
B.X. Song, J. Yu, Y.Y. Cai and X. Chen	553
An Improved Mixed-Radix FFT Technique and its Application in Frequency Spectral Analysis	
J.B. Li, J.D. Wang, B. Fu and G. Lin	560
Chirp Signal Time-Frequency Analysis Characteristic Comparison	
J.L. Zhou and F. Wang	568
Fault Diagnosis of Grinding Machine Using Choi-Williams Distribution Based on COM Module Technology	
M.Z. Sun, C. Wang and Y.L. Xu	572
Analysis of Orbiting Scroll Overturning for Scroll Compressor	
M. Zhao, S.R. Yu, C. Li and Y. Yu	576
The Frequency Veering Phenomena of the Beams of Cantilever Screen	
M.M. Li, F.Z. Song and C.G. Ding	580
Research on Semi-Active Suspension System with Variable Stiffness and Damping	
G.Y. Pan and F.Q. Fan	584

Dynamic Modeling for a Thin Plate with Large Deformation T. Zheng, D.G. Zhang and J. Zhu	590
The Study of Reliability in MDO of Aircraft Q. Xia, M. Li, Z.J. Cao and H.W. Wang	598
Dynamical Sensitivity Analysis on Blades in Turbine Machines D.Y. Zhang, Y.H. Ma and J. Hong	602
Simulation Modeling of Ball Screw Feed Drive System Based on MRAS Y.Q. Wang, C.R. Zhang and Y. Zhang	607
The Research of Strain Rate of Common Bolt Materials X.H. Gao, Y. Wang and J.Y. Du	613
Analysis on Static Characteristic of HTC100 NC Lathe Bed M.W. Lu and G.M. Zhang	617
A Study on Dynamic Performance of Deviation-Based Sliding-Door in Closed State G.P. Chu and P.F. Liu	621
Research on Fatigue Life Prediction of Gear Box in Caterpillar Based on Running Simulation Test Z.W. Dong, J. Wu and X.J. Du	627
The Dynamic Analysis of High-Speed Cam with Considering Damping L.Y. Su	632
NN-PID Adaptive Control for 6_PUS Parallel Mechanism X.Q. Tan and G.Y. Li	636
A Dynamic Analysis of Reciprocating Compressor Transmission Mechanism with Joint Clearance H.Y. Zhao, M.Q. Xu, J.D. Wang and G.J. Chen	641
Identification of Quadratic Volterra System Using Random Multi-Tone Excitation L.N. Tan, L.B. Lu, G.D. Jin, P. Li and J. Liang	646
The Rotor Dynamic Analysis and Optimization in Turbocharger N.N. He and H. Zhang	651
The Assessment on the Accuracy of Chart Datum Transfer Algorithm X.X. Sun, F.M. Xiao, W. Xia, G. Bian and S.H. Jin	656
Modeling and Simulation of Hydraulic Turnover Device for Large Bearing House X.C. Zhu, L. Guo, Y.Q. Ding and S.H. Lin	660
Dynamic Analysis of the Rotor System with a Semi-Elliptical Fronted Crack on the Shaft Y. Di, C.L. Liu, Q.D. Zhang, W. Cheng and S.P. Zhou	665
The Performance Analysis of Vertical Automatic Tool Changer System H.Y. Dong, Y.H. Zhang, Y.S. Li, H.X. Sun and Y. Zou	672
Investigation of Human Masticatory Movements Using ADAMS and MATLAB/SIMULINK M.D. Lei, S.L. Xu, J.J. Lu and W. Li	677
Study on the Time Lag between Steering Input and Vehicle Lateral Acceleration Response under Different Key Vehicle Parameters G.M. Dong, J. Chen and N. Zhang	681
Impact Dynamics of Multi-Link Robots with Link and Joint Flexibility Z.J. Qian and D.G. Zhang	685
A Linear Stepping Piezoelectric Motor Using Inertial Impact Driving W.H. Liu, Y. Wang, W.Q. Huang and Q.J. Ding	693
The Discretization Methods of a Rotating Flexible Cantilever Beam J.H. Fan and D.G. Zhang	697
A Hybrid Finite Element-Analytical Approach for Dynamic Analysis of a Micro-Resonator Driven by Electrostatic Combs M.T. Song and D.Q. Cao	708
Analysis on Axial Displacements of an Engine Main Shaft in Complex Temperature Environments J.Z. Pan, D.Q. Cao and S.M. Chu	714
Dynamic Performance Test and Analysis of Spindle System of High Speed Grinding Machine Tools M.X. Guo, B.Z. Li and J.G. Yang	720

Anti-Noise Simulation of the Hysteresis Mathematic Model Using Computationally-Efficient GA	
X.M. Xue, Q. Sun and X.H. Wu	725
Variable Weight Fuzzy Comprehensive Evaluation Method for Health Condition of Warship Electromechanical Device	
G.Y. Zhang, Q.M. Li and E.S. Ge	729
Study on System for Monitoring Mine Belt Conveyor Fire	
M. Huang	734
Aeroengine Rub-Impact Fault Diagnosis Based on Wavelet Packet Transform and the Local Discriminate Bases	
Y.H. Wu, M.X. Shan, Y.N. Qian, X.L. Li and R.Q. Yan	740
An Automaton Fault Diagnosis Based on Shock Response Analysis	
H.X. Pan, M.Z. Pan, R.P. Zhao and H.F. Ren	745
Fault Diagnosis of Railway Axlebox Bearing Based on Wavelet Packet and Neural Network	
X.F. Li, Y.X. Fu and L.M. Jia	749
Fault Feature Extraction Method of Large Rotating Machinery	
Z.L. Jiang, X.L. Xu and P. Chen	756
Blind Extraction of Correlated Fault Sources Based on Constrained Non-Negative Matrix Factorization	
N. Li and H.T. Chen	760
Compound Fault Feature Separation of Rolling Bearing Based on Complex Wavelet and Energy Operator Demodulation	
Y. Yang, J.Y. Zhang and S.Z. Zhang	765
The Current Situation and Recent Advances of Deep-Water Floating Wind Turbine	
Y. Chen, C. Li, W. Gao and J.B. Nie	772
Analysis of Underwater Projectile Experiment Using One Stage Light Gas Gun and Numerical Simulation	
B.Q. Wang, C. Wang, H.L. Huang, Y.J. Xing and J.Z. Zhang	776
Mechanical Analysis on Destruction of Coal Cutters Guide Shoes	
Z.J. Yang and W.N. Zhang	780
A Dynamic Optimization Design Method for the Turbine Engine Frame Foundation	
Z.J. Li and X.C. Wang	784
Time-Accurate Simulation of Longitudinal Flight Mechanics with Control by CFD/RBD Coupling	
D. Guo, M. Xu and S.L. Chen	788
Analysis and Simulation of Two Hinged Ends Micro-Beam Relaxation Process	
X.W. Zhu and W.F. Wang	793
The Comparison of Two Processing Methods of Sliding Bearing in Impact Dynamics Analysis of Finite Element Software	
X.H. Gao, Y. Wang, J.Y. Du and X.P. Gao	798
Effect of Service Speed on Dynamic Response of Heavy-Load Depressed Center Flat	
S.X. Zhou, T. Long, Y.Y. Xie and J.L. Xie	802
Optimization of Refrigerator Door Structure Based on ABAQUS	
H.Y. Zhu, C.L. Zhang and W.X. Wang	807
Analysis of CFD for Design Method of Swirl Atomizer	
L. Yu, S.S. Yuan, Z.B. Pang and Y.L. Wang	812
Rotary Kiln Drive System of Kinematics Modeling Analysis Based on ADAMS	
Z.H. Jiang and G.P. Cai	816
On the Basis of Double Fuzzy Control of Honing Machine Reciprocating Motion	
C.B. Hu, Y.Z. Wang, S.S. Chen, J.L. Zhao and J. Gong	820
Numerical Simulation of Natural Cavitating Flow over Axisymmetric Bodies	
Q.K. Liu and Y. Gao	825
Prediction of Nonlinear Contact Force of Piston Skirt and Cylinder Liner under the Function of Clap Force	
Z. Jin, Z.Z. Yu and L.S. Yang	831
Reduced-Order Model for Unsteady Compressible Flow Based on POD-Galerkin Projection	
Y.B. Dou and M. Xu	835

Fast Terminal Fuzzy Sliding Mode Control for a Three-Links Spatial Robot S.B. Hu, W.H. Lu, D.M. Cao and H.R. Xu	840
CPG-Based Movement Control for Bionic Flapping-Wing Mechanism Y. Hou and F. Wang	844
Fatigue Strength Analysis of the Actuator for the Steering Gear Based on DFR G. Duan and H.J. Yuan	850
Research on the Damage of Warship Structure Subjected to Mixed Explosion Load H.J. Wang, C. Wang, Y.W. Yue and D.C. Sun	855
Research on Fatigue Life Prediction of Planetary Cage in Caterpillar Base on Running Simulation Test X.J. Du, C.Z. Jia and J. Wu	862
Study on the Effect of Dynamic Wheel-Rail Contact Geometry Relationship in Turnout Region by the Track-Distance Roughness K.Z. Xie, P. Wang, L. Wang, B. Wang and S.X. Quan	867
Analysis of Influence Factors of Switching Force and Inadequate Displacement of Switch Rail of NO.9 Turnout B. Wang, P. Wang, K.Z. Xie, L. Wang and S.X. Quan	872
Dynamic Property Analysis of Rubber Absorber in Rail Fastenings of Different Force Condition S.W. Wang, Y.Y. Luo, L. Li and Y. Liu	877

Chapter 3: Geotechnical and Structural Engineering

Rehabilitation of Strength of Steel Plate with a Corroding Hole Bonded by Composite Patches X.M. Zhang, L.W. Chen, Z.L. You, M.Y. Hu and S.H. Yang	883
Lessons Learnt from Seismic Damage Induced by the 2008 Wenchuan Earthquake D.P. Guo and M. Hamada	889
Seismic Risk Assessment of Structures Using Multiple Stripe Analysis P.P. Ni, S.H. Wang, L. Jiang and R.Q. Huang	897
Influence Analysis of Layout of Braces on Structural Dynamic Properties of Large Space Multi-Storey Buildings J.Z. Yu, P.Z. Cao, K. Wu and M.B. Min	901
Analysis of Influence of Material Damping on the Dynamic Response of Concrete-Filled Square Steel Tubular Columns Y.F. Wang and X.R. Li	905
Tunnel Surrounding Rock Classification Forecast Based on the Geological Advanced Prediction System in Seismic Area T. Ren, D.Y. Jiang, J. Chen, W. Guo and S. Ren	910
Influence of Transition Layer Position on Seismic Performance in Multi-Story Buildings of SRC-S Vertical Hybrid Structures H. Huo, P.Z. Cao, K. Wu and M.B. Min	916
Damage Detection of Concrete Structure Based on Approximate Entropy Z.K. Xie, G.H. Liu and Z.H. Zhang	920
Study on Earthquake Resistant Performance of a Large Span Structure Strengthened with HADAS Y. Yao, Y.J. Deng, D.G. Chen and H.J. Wang	926
Dynamic Reliability Analysis on Arch Dam by Considering Random Elastic Modulus H.J. Chen, Q.X. Wu and H.F. Zhen	931
Effect of Crack-Depth Ratio on Double-K Fracture Parameter of Reinforced Concrete S.W. Hu, Z.X. Mi and J. Lu	937
Design Guidelines on the Ultimate Strength of Retrofitted Deep Concrete Coupling Beams by Laterally Restrained Side Plates B. Cheng, R.K.L. Su and J. Luo	942
Experimental Study on Seismic Performance of Non-Dispersible Underwater Concrete Short Columns D.M. Sun, H.G. Kang, Y.F. Lu and W.Q. Zhong	949

Seismic Fragility Analysis of Reinforced Concrete Frames Based on the Service Age Variation	953
N.J. Wang, J.M. Wang and W.T. Jiang	
Improvements on Technologies of Shield Tunnel Construction in Sandy Soil	957
Z. Wang, G.S. Liu, F. Long and F. Zheng	
Experimental Study on Bending Behavior of the Wood Beams in Historic Building with CFRP Sheets	963
N.Q. Meng, C.L. Deng, Z.W. Jia Ding and B. Jia	
Seismic Behavior of Super High-Rise Frame-Core Wall Structure	967
J.X. Yuan and Q. Zhang	
Studies on Aseismic Performance of a Typical Subway Tunnel with Initial Defects Caused by Construction of New Down-Through Tunnels	972
W.Z. Sun, J. Dong, Y.P. Cui and F. Dong	
The Corrosion of Concrete Shaft Lining of Mine and its Related Research Progress	976
Y.T. Yang and H.G. Ji	
Nonlinear Finite Element Analysis of the Temperature Field of Special-Shaped Concrete-Filled Steel Tubular Column under Standard Fire Condition	980
Y.W. Wang, Y.B. Li, Z.H. Chen, X.D. Wang, B. Song and G.H. Wang	
Blasting Demolition Technology and Vibration Testing of 210m Reinforced Concrete Chimney	986
S.X. Xu and D.Z. Chen	
Material Strain Analysis of CFRP Reinforced RC Columns Subjected to Combined Action of Force by Finite Element Method	991
Y.Z. Liu, Z. Liu, J. Li and X. Chen	
A Fatigue Analysis Method Research for Main Frame of the Large-Scale Wind Turbine	995
L. Wang, F.M. Wu, X.M. Lv and D. Wang	
Researches on the Structural Influencing Coefficient of Steel Frames under Different Sites Based on the Energy Concept	1000
H.J. Jia, H. Dai and R.Q. He	
Studies on Dynamic Response of Subway Tunnels with Initial Defect under Long-Term Train Loads	1005
F. Dong, J. Dong and W.Z. Sun	
Analysis of Strong Ground Motion Caused by Blasting Demolition of a 22-Storey RC Building	1010
Y.S. Wang and X.J. Li	
Study on Strength and Stiffness of Special-Shaped SRC Columns	1015
M.Z. Luo, J.Z. Du and W.L. Cao	
Numerical Simulation of Pile-Soil Interaction Considering Sand Liquefaction under Earthquake	1019
P.Z. Li, D.Y. Ma, D.M. Zeng and X.L. Lu	
Tilt Response of Multi-Storey Building of Different Types due to Progressive Collapse of the Adjacent Underground Structure under Internal Blast Loading	1023
L. Tian and H.X. Song	
Precipitation Characteristics of CaCO₃ Scaling on Stainless Steel in Cooling Tower Condition	1029
J. Sheng and H. Zhang	
Numerical Simulation for Progressive Collapse and Protection of a Multi-Storey Building due to an Explosion in its Basement	1034
L. Tian and Z.L. Li	
Numerical Analysis for Progressive Collapse and Protection of Underground Structure under Internal Blast Load	1039
L. Tian and Q. Wang	
Experimental Study on Shear Behavior of Prestressed Concrete Beams	1045
G.L. Wang and W.S. Ding	
A Fire Disaster Intelligence Alarm System Applicable to Underground Space	1049
Y. Zhang	
The Marine Derrick Test Tool Design and Optimization	1055
J. Liu, J.P. Wang, F. Wan, Y.L. Zhou and S. Xia	

Pushover Analysis of Eccentric High-Rise Single-Tower Building's Frame-Shear Wall Structure	
X.J. Cheng, Y.C. Tai and L.L. Jia	1060
Analysis of Brick Wall's Failure Modes under Earthquake Effect	
K. Qin, W.F. Zhang and L.J. Niu	1066
Statistics and Analysis of Typhoons Landing and Failure Mechanism of Coastal Low-Rise Buildings in China	
Y.M. Dai, X.G. Yan, X.J. Wang, H.X. Sun and Y.G. Li	1072
Seismic Damage Evaluation of Recycled Concrete Frame Using Wavelet Transform	
B. Hu, B.K. Liu and C.G. Wang	1076
Study on Influence of Infilled Wall of RC Frame Structures	
Y.N. Liu, L.B. Wang and Y.S. Zhang	1081
The Bottom-Up Underpinning Construction Technology for Base Isolation Reinforcement of the Existing Masonry Structure	
F.Y. Zhang, M. Pei, L.J. Mao and Y.Y. Dong	1085
A New Method for Dynamic p-y Curves of Pile-Cap Structure in Layered Soil	
Y.R. Li, Y. Liang, X. Wei and Y.L. Wang	1089
Deep Well of Coal Roadway Bolt-Cable Mechanism Analysis and its Engineering Application	
B.X. Tang and Y.W. Wang	1094
Discussion of Different Methods of Strengthening Masonry Walls with Constructional Column	
C. Wang, Y.K. Luo and X.L. Xu	1098
Based on the Test of Dynamic Characteristics of the Structure Retrofit Design	
P. Li and F. Ma	1102
Study on Determining Safety-Monitoring Index for Concrete Dam Based on Cloud Model	
D. Qin, X.Q. Zheng and S.L. Wang	1106
Application Research of the Dynamic Compaction Method with Precipitation in Foundation Treatment Dredger Fill	
F. Xuan, C.Q. Peng and Y. Jia	1111
Study of Performance Levels of Masonry Buildings Based on Damage	
W. Liu, P. Xu and B. Zhang	1115
Identification of Nonlinear Parameters of Rubber-Bearing in Base-Isolated Building	
Y. Lei and M.Y. He	1119
Nonlinear Behaviors of Submerged Floating Tunnels under Seismic Excitation	
C.X. Shi, M. Domaneschi and L. Martinelli	1124
Deflections of Steel Reinforced Concrete Beams Considering the Bond-Slip Effects	
X.L. Cao, G. Ye and H.G. Gou	1128
Performance-Based Seismic Analysis of Infilled Wall Frames Structure	
S.H. Wang, J.L. Wang, Z.G. Mu, J.B. Zhang and Y.T. Liu	1132
Seismic Behavior Analysis and Earthquake Damage Prediction of Buildings in Langfang	
Q.Y. Li, P.P. Zhao and G.D. Xu	1136
A Framework of Assessing Remaining Fatigue Life of Aged Crane Structures	
K. Qi, W.X. Wang, X.H. Wang, A.H. Jiang and B.Q. Liu	1141
Research on Prestressed Concrete Cable-Beam Structure System	
X.Y. Xie and X.S. Yin	1145
Shaking Table Test Study on Mid-Story Isolation Structures with Viscous Damper	
J.M. Jin, P. Tan, F.L. Zhou and X.Y. Huang	1149
Temperature Control Measures Optimization of RCC Gravity Dam	
S.P. Huang, J.Y. Fu and Y.C. Li	1153
Research Progress of Smart Concrete Structures Reinforced by Shape Memory Alloy	
D. Cui, Y. Zhang and P. Guan	1157
Failure Characteristics of Transmission Towers Subjected to Downbursts	
J.W. Wang	1161
Behavior of New Type of Semi-Rigid Joints under Moment and Tensional Force	
M. Xu, S. Gao and Y.Y. Wang	1165
The Study on Environmental Evolved Characteristic of Sandy Coast	
Q.P. Zhang, X.Q. Han, J. Li, J.J. Zhao, W.B. Zhou and W.M. Gao	1170

Statistical Analysis of Fundamental Periods of Frame Structures Y.Q. Gao and W.F. Liu	1174
Finite Element EMI Model for Cracked Portal Frame and Parameter Study W. Yan, W.C. Li and W. Wang	1181
Stability Analysis of the Radiant Cable Suspendome J. Kang and X.Y. Liu	1185
Quasi-Static Analysis of Stiffened Plate under Axial Pressure G.M. Ji, G. Sun and G.Y. Zhang	1190
Component Modeling of Steel Bolted End-Plate Joints under Bending and Shearing Loads J.F. Zhang, Z.Y. Wang and J.Q. Jiang	1194
Nonlinear Finite Element Analysis of Steel Frame with Semi-Rigid Connections G.H. Li, C.Z. Qi and J. Luo	1199
Structural Safety Monitoring during Retrofit of Shanghai Expo Puxi Entertainment Hall M. Zhao and J. Liao	1203
Simulation Study on Construction Process of Complex Spatial Steel Structure Based on the Construction Mechanics W.L. Zhang, Z.X. Wu and B.H. Chen	1209
A Structural Damage Alarm Index Based on the Statistical Probability of Abnormal Frequency Offset Y.S. Song, Z.G. Sun and L.Y. Sun	1214
Reduced Equivalent Static Wind Loads for Tall Buildings with Tuned Liquid Dampers A.S. Ross, A.A. El Damatty and A.M. El Ansary	1218
Tall Building Subsidence Data Regression Analysis Methods and the Final Settlement Value Prediction Z.Y. Xu, S.J. Liu and L.X. Wu	1228
Design of Cold-Formed Thin-Walled Steel Fixed-Ended Channels with Complex Edge Stiffeners under Axial Compressive Load by Direct Strength Method C.G. Wang, P. Ma, D.J. Song and X.Y. Yu	1232
The Research on the Nonlinear Stability of the Steel Spatial Arch Truss with 120m J. Liu, H.W. Li, Y.N. Sun and X.F. Shu	1236
Effect of Geometric Nonlinear Behaviour of a Guyed Transmission Tower under Downburst Loading C. Ladubec, A.A. El Damatty and A.M. El Ansary	1240
Force Analysis of Ring Gate Based on ANSYS X.C. Hu	1250
Numerical Simulation of Wave Overtopping of Breakwater Armored with Porous Layers and Water-Structure Impaction Z.L. Huang and P.Z. Lin	1255
Numerical Simulation of Mean Wind Pressure on the Roof of Yantai Gymnasium X. Meng, R. Gao and H.J. Zhang	1260
The Structure Statics Analysis and Optimal Design of Hydraulic Support K.M. Xue, P. Huang, P. Li, L. Chen and W. Liu	1265
Application of Root Pile to Reinforce High Embankment P.C. Jiang, L.H. Zou and X. Wang	1269
Experimental Study on the Strength and Deformation Quality of Granite with Effect of High Temperature X.L. Xu and F. Gao	1275
The Experiment to Research the Mudstone Interbeds which Affect the Mechanical Characters of the Layered Rock Salt D.Y. Jiang, X.Q. Fan, T. Ren, J. Chen and S. Ren	1279
The Analysis of Dynamic Characteristics for the Powerhouse Structure of the Riverbed-Hydroelectric Station X.M. Peng, Z.X. Song and L. Jiang	1285
Affecting Slope Stability Condition of Structure and Engineering Geology Overview in Xiao-Wan Project Region D.S. Zhang	1289
The Calculation of Landslide-Thrust Based on Reliability Theory Y.X. Wu, D.S. Liu, L. Wang and Q. Xin	1293

Model and Application on Displacement Calculation of Abutment by Considering Earthquake Effects	
H.K. Chen, L. Tang, X.Y. He and R.C. Liu	1297
Effect of Wetting on the Pullout Resistance of Grouted Soil Nails	
J.Y. Wu and J.M. Chang	1304
The Study of Environmental Characteristic by Coastal Engineering in Rock Coast	
C.H. Zhang, X.Q. Han, J. Li, W. Zhang, K. Wu and W.M. Gao	1308
Characteristic of Development of the Fractured Zone in Mining under Medium Hard Overburden Using Fully-Mechanized Top-Coal Caving Method	
W. Zhu and Y.H. Teng	1312
Comparative Study on Landslide Hazard Deformation Forecast Method	
H. Fu, J.L. Yang, J.H. Zhang and M.W. Liu	1318
Study on Impact of Reservoir Leakage on the Proposed Tunnel Project in Metamorphic Region	
Y.H. Du and Q.H. Zhao	1322
Block Element Analysis for Earthquake Response of Joint Rock Slope	
D.S. Yin, W.X. Qing and C.S. Li	1326
Reliability Analysis of Arch Dam Considering Temperature Change Field	
M.Z. Yang, Q.X. Wu and J. Lu	1332
Experimental Research on Failure Mode of Micro-Pile in Landslide Reinforcement	
S.F. Wang, Y.P. Fu and X. Zhao	1338
Two-Dimensional Numerical Wave Simulation for Port with Submerged Breakwater	
N. Zhang, K. Guo and W.Z. Zhang	1343
Based on Crack the Second Expansion the Variation and Generalized Variation Problem of Fractured Rock Mass under Unloading	
L. Yu, M.F. Fu and B. Tu	1348
Dynamic Response Analysis of Jacket Wharf Structure under Wave	
Y. Zhang and T.G. Chen	1353
Application of Vacuum Preloading for Soft Foundation Treatment in Grain Storage	
Q.X. Liu and Y. Zhao	1359
The Records of Slope Reinforcement Engineering in a Loess City	
Q.X. Liu and L. Fan	1365
Research on the Concrete Dam Damage and Failure Rule under the Action of Fluid-Solid Coupling	
K.M. Sun, Z. Li and M.R. Bagale	1371
Dynamic Response Simulation of SCR in TDZ Considering the Soil Property	
G. Li and X.P. Huang	1377
Research on Factors Influence of Vegetation Slope Protection Based on Grey Incidence Analysis Theory	
F. Chen, X.B. Xiong, Z.M. Zhai, C. Gu and X.B. Zhang	1382
Study on Construction Parameters of Cement Deep Mixing Piles	
W.T. Rong	1386
Analysis of the Surrounding Rock's Stability Based on Fuzzy Comprehensive Evaluation Model	
X.Z. Zheng, Q.L. Chen, H.F. Li and P.F. Shi	1390
The Application of Compaction Sand Pile in the Yellow River-Crossing Project for South-to-North Water Diversion	
Q.X. Liu and Y. Bai	1396
Study on Deformation-Based Seismic Performance Index of Arch Dams	
X.W. Yao and J.Q. Jiang	1401
Seepage-Stability Analysis of a Mine Tailings Dam in Yunnan Province Based on ANSYS	
S.Q. Ma, S.J. Cai and M. Guo	1406
Splitting Criterion of Grouting Bore-Hole Wall and Study on Numerical Simulation of Crack Propagation	
P.L. Su and S.C. Gu	1411
Application of Improved Threshold's Lifting Wavelet to the Analysis of the Dam's Displacement	
X.Q. Zheng, D. Qin and H.Z. Liu	1415

Distribution of Lateral Pressure in Large Diameter Squat Silos under Eccentric Discharge Y.Z. Zhu, S.P. Meng, W.W. Sun, W. Wang, Y.L. Feng and C.H. Jin	1420
Stability Analysis of Sinkhole Considering Groundwater Level Fluctuation S.M. Huang, Y.C. Liu and C.C. Wang	1426
Damage Identification Research of Cantilever Truss Based on the Principle of Strain Mode J.H. Zhang, N.J. Du and Y.G. Shen	1432
Research on Damage Status of the Reinforced Concrete Ground Floor Columns L.J. Gao, Y.S. Zhang and Q. Li	1436
Analysis for Eccentrically Loaded of Steel Bolted Group W.T. Hsu, D.M. Lue and C.Y. Liao	1441
Analysis on Mirror Lateral Displacement and Steel Frame Connection Strength of Collector J.B. Gu and J.G. Zhu	1445
Slope Stability Analysis Based on the Element-Free Galerkin Method F.H. Qin and L.B. Wang	1449
Rocking Response of a Surface-Supported Strip Foundation under a Harmonic Swaying Force J. Wang, D. Zhou, W.Q. Liu and S.G. Wang	1453
Numerical Simulation on Forming Dynamics Mechanism and Stress State of Qianning Basin S.R. Su, Y. Zhang, H.J. He and X.J. Wang	1458
Stability Analysis of Unloading Slope by Interface Element Method Y.X. Sun, S. Chen and S.R. Cheng	1462
Research on the Selecting Control Sections of Internal Force Envelope by Simulation H.X. Lu, J.H. Diao and Z.Z. Li	1467
Study of Fire Smoke Flow of Tunnel at Different Longitudinal Ventilation P.P. Yang, X.L. Shi and B.M. Shi	1472
A Study on Micro-Seismic Monitoring of Rock Failure during the Excavation of Tunnel D.D. Ding and S.C. Wu	1476
Fracture Mechanics-Based Fatigue Behavior of Jointed Concrete Pavement Y. Wei	1481
The Numerical Analysis and Field Measurements of the Shield Tunnel Passing through the Pipeline Groups G.S. Liu, L.W. Sun, B. Wang, S.M. Wu, C.P. Hong and Q. Hong	1488
Tunnel Support Parameters Optimization Based on Micro-Seismic Monitoring D.G. Pan, Y.X. Xiong and J. Li	1495
Experiment Study on Air-Deck Divided Decoupling Charge in the Subway Construction R.S. Yang, Y.L. Che, Q. Sun, S.M. Zhang and C. Huo	1500
Study on the Method of Construction of Large Section Tunnel Crossing the Ancient Great Wall A.B. Jin, L.F. Li, F.G. Deng and M.Z. Zhang	1504
Test Study on the Influence of Interface of Soil and Rock on the Stability of Sandy Soil Tunnel Face J.J. Tong, M.N. Wang and H. Jin	1509
Research Advances in the Interaction among Stratum-Ground Fissure-Tunnel under Subway Dynamic Loading L.Q. Yuan, H.J. Liu and Y.M. Men	1513
Monitoring of Large Section Tunnel Crossing Qiantang River during Operation Period G.S. Liu, Z.L. Li, S.M. Wu and L.Q. Yu	1517

Chapter 4: Road and Bridge Engineering

Numerical Analysis on Dynamic Behavior of Damping Fasteners in Rail Transit Viaduct System under Wheel Load Drop X.D. Zheng, C.Z. Geng and T.F. Qu	1527
Design and Construction of Locking Steel Pile Cofferdam of South Tower Pile Cap for Taizhou Bridge Z.H. Wu, Y. Xun, Y.N. Gan, C.H. Wang, Y. Li and S.C. Tang	1531

Research on the Bridge Safety Monitoring System Based on Wi-Fi Network Technology G.M. Jiang and J.B. Song	1535
Calculating Analysis of Reinforcing Layer Utilization on Stone Arch Bridge Strengthened by Composite Main Arch Circle Method W.J. Qiao, Y.F. Song and W.Y. Zhang	1539
Studies on Dynamic Characteristics of a Typical Model of Asymmetric Continuous Rigid-Frame Bridge under Different Ratio of Middle Span to Side Span T. Liang, J. Dong and X.J. Xiang	1543
Field Test and Analysis for the Static and Dynamic Behaviour of Multi-Box Steel Concrete Composite Girder Bridge Y.L. He, Y.Q. Xiang, H.X. Ke and L.S. Liu	1547
Analysis of Seismic Response for an Extradosed Cable-Stayed Curved Bridge Based on Different Design Parameters H.S. Liu, J. Dong, Y. Yang and J.Q. Gao	1551
Dynamic Response of Vehicle-Bridge Coupled Oscillation Subjected to Velocity-Varied Moving Loads F.L. Mei and G.L. Li	1555
Evaluation of Strength and Ductility of Thin-Walled Stiffened Box Sectional Steel Bridge Piers Using Fiber Model J.D. Zhang, H.B. Ge and C.L. Wang	1561
Research and Analysis about the Effects of Curved Bar-Tied on Arch Bridge's Structural Performance S.Q. Zhao	1567
Red Clay Subgrade Settlement Calculation Methods in Ballastless Track Design on High-Speed Railway X. Yang and G.L. Yang	1571
Numeric Analysis on Seismic Performance of RC Round-Ended Piers with HRBF500 Steel Bars H.J. Jia and H. Dai	1577
Existing Concrete Girder Bridges' Bending Stiffness Assessment Based on Crack Characteristics Parameters D.L. Tan and W.H. Yan	1581
Design Application in Suspender Tensile Force of Tied-Arch Bridges Based on Inversion Optimization Method X.X. Sun, Y. Wang and F. Chen	1586
Photogrametry-Based 3D Modeling and Measurement for Scale Model of an Arch Bridge P. Li, J.Q. Zhang, J.G. Nie, J.M. Lu, W.H. Li and M.H. Yuan	1591
Experimental Study of Stress Corrosion of High-Strength Wires Affected by Four Typical Ions J.G. Yin, C.H. Deng, Y.G. Fu and L.C. Li	1597
Study on Model Experiment of Long-Span Steel Truss Arch Bridge X.L. Jiang, D.B. Zhang and H.B. Yi	1604
Finite Element Model Updating of Existing T-Girder Bridge by Field Quasi-Static Generalized Influence Line J.B. Liao, G.W. Tang and F. Pan	1609
The Research of Road Profile Estimation Based on Acceleration Measurement Y.C. Qin, J.F. Guan and L. Gu	1614
Studies on Mechanical Model of Geometrically Pre-Eccentric Optimization Based on a Small Radius Ramp Curved Bridge with Single Column in City Z.G. Qi, J. Dong and D. Hu	1618
Application Study of GIS and GPS in Bridge Structural Health Monitoring Y.L. Yang, X.H. Dang, Y.M. Wei and X.P. Wang	1622
Mechanical Mechanism Analysis of Longitudinal Cracks Appeared in a Large Cable-Stayed Bridge Cable Tower L.L. Yang, J. Dong, J. He and T. Liang	1626
Mitigation of Wind-Rain-Induced Cable Vibration in Cable-Stayed Bridges: Measurement Error L.Y. Wang	1630

Analysis of Error Control Techniques for the Urban Bridge Cluster Monitoring System Y. Li, Z. Guo and B.C. Chen	1634
Identification of Loads on Suspenders in Bridges Based on Measured Response Data in Time Domain L.T. Zhang and Y.F. Zhang	1640
A New System for Dynamic Deflection Measurement of Highway Bridge X.L. He, T.L. She and L.Z. Zhao	1645
Comparison and Analysis of Permafrost Railway Subgrade Settlement Deformation Monitoring Q.L. Tan and C. Xie	1651
Settlement Control and Impact Analysis of the Subway Shield Under-Passing Beijing-Shanghai High Speed Railway Bridge H. Peng, J.C. Wei and B. Zhang	1655
The Bridge Health Monitoring System Based on SCM X.L. Zhu, X.L. Chen and Y. Yao	1661
Remote-Controlled Visual Inspection Machine for Bridge Supports S. Tokuomi, K. Mori and A. Miura	1665
Effect of Eccentric Pounding on Elasto-Plastic Behavior of a Simply Supported Bridge under Transverse Earthquake Y. Shi, H.G. Qin and F.Q. Liu	1669
Damage Assessment and Repair Design and Implementation for Underpass Bridge Based on Fire Effects Z.L. Li, H.L. Wu, Z.Y. Liu, D.J. Xu, X.D. Zhu and H.J. Gu	1674
Study on Reliability Evaluation Method of Existing CFST Arch Bridge Y.S. Zou, H.T. Hou and W. Peng	1679
Effectiveness Analysis on the Protection Measures for the Mountain Bridge Piers against Rockfall Z.X. Yu, L.Y. Zhang, Y.N. Zhao and T. Wei	1683
Damage Identification of Multi-Box Steel-Concrete Composite Bridges Based on Modal Curvature Difference Method Y.Q. Xiang, L.S. Liu and Y.L. He	1689
Experimental Study on Seismic Isolation Bearing of Large Aqueduct Y.J. Jiang, Y.G. Zhou and Y.L. Song	1693

Chapter 5: Building Materials

The Application of Thermal Insulation Glazed Hollow Bead Concrete in Tunnel Cooling Structure K.J. Li, Z. Li, X.H. Guo and Y.Z. Liu	1699
Research on the Thermo Physical Properties of Lauric Acid-Capric Acid Binary Mixture Phase Change Materials Q. Zhou, Y. Zhang, H.B. Guo, Q.H. Li and D.X. Li	1704
The Influence on High-Temperature Mechanical Properties of Hybrid-Fiber-Reinforced High-Performance Concrete and Microscopic Analysis L. Yan, Y.M. Xing and J.J. Li	1709
Analysis on Potential Alkali Reactivity of the Aggregate and its Inhibiting Method in Dam Concrete of a Hydro Project W. Ye, Y.M. Yang and H.C. Wang	1714
Experimental Research on Tensile-Shear Behavior of Spot-Welded Lap Joints of Ultra-High Strength Steel Y.H. Liu, H.P. Yu, W.W. Wang, X.Y. Li and S.J. Chen	1720
Analysis of Deflections and Stresses for Laminated Composite Plates Based on a New Higher-Order Shear Deformation Theory X.J. Lan and Z.H. Feng	1725
Study on Failure Criterion and Yield Criterion of Early-Age C20 H.Y. Ding, C. He and P.Y. Zhang	1730
Polyamide 6 Microfiber Reinforced Porous Polyurethane Composites L. Wang and S.T. Cao	1735

Effect of Ultraviolet and Moisture Aging on the Mechanical Properties of Hemp Fibers Composites	
S. Jin and X.L. Gong	1739
Analysis on Freeze-Thaw Cycling Damage of Layered Hybrid Fiber Reinforced Concrete	
D.Q. He and B. Liu	1743
Adsorption of Naphthalene-Based Water Reducer on Alkali-Activated Slag Cement	
C.H. Yang, Q. Pan and J. Zhu	1747
The Iron Ore Dosage of Cement Base Composite Material Mechanics Effect on the Performance of the Experimental Research	
Z.Q. Huang, X.M. Pi and F. Liang	1751
Study on the Dynamic Performance of Asphalt Concrete under Passive Confined Pressure	
H. Zhang, F. Li and Y.W. Gao	1755
Experimental Research on Small Diameter Concrete-Filled Steel Tubular by Ultrasonic Detection	
R. Xiong, Z. Lu, Z.G. Ren and C.W. Xu	1760
Ultimate Flexural Bearing Capacity Research Based on Carbon Fiber Sheet to Reinforce Rough Sleeper Beam	
Z.L. Li, H.L. Wu, Z.Y. Liu, D.J. Xu, H.J. Gu and X.D. Zhu	1766
Experimental Study on Mixed-Mode Fracture for Concrete	
Z. Luo	1771
Experimental Study of the Foam Agent in Lightweight Aggregate Concrete	
Y.W. Wang and B.X. Tang	1776
Numeric Analysis of Size Effect on Mesol Concrete Random Aggregate Model	
X.Y. Liang and F.N. Dang	1780
Experimental Studies on Loads Acting on Two Piles of Side-by-Side Arrangements in the Uniform Flow	
Z.Q. Zhu and G.L. Dai	1785
Fractal Characteristics of Sandstone Cutting Fracture under Mechanical Shock Loading Conditions	
S.R. Wang, P. Hagan and Y. Cheng	1789
A Comparative Experiment on the Bond-Slip of Reinforced Concrete	
C.G. Cai and G.L. Chen	1795
Load Stress Analysis on BFRC-RCC Composite Pavement	
D.Q. He, Y.M. Wang and C. Lu	1800

Chapter 6: Measurement

An Energy-Efficient Cluster Head and Router Selecting Protocol for Wireless Sensor Networks	
S.Z. Huang and X.Z. Zhao	1807
The Discussion of Acoustic Seabed Sediment Classification Methods	
H.B. Zheng, P. Yan and J. Chen	1811
Research on Precision Measurement and Fitting Method for Sliding-Shoe's Inferior Concave Spherical Surface	
W.G. Zheng, C. Tang, M. Dai, H.B. Huang and X.X. Ma	1817
The Use of Synthetic Aperture Radar Interferometry to Study Geohazards	
M.L. Jiao	1821
Design of New Attitude Measuring Method of Non-Spinning Projectile Based on Magnetic Sensors	
C. Xiang, X.Z. Bu and Y.P. Zhu	1825
Numerical Analysis of Flow Field Characteristics in Three-Z-Shaped Ultrasonic Flowmeter	
J.Y. Tang, J.M. Chen, H.B. Ma and G.Y. Tang	1829
Research on Fruit State Discrimination Method for Harvesting Robot	
J.D. Lv, D. Zhao, W. Ji, Y. Zhang and Z.K. Ma	1835
The Urban Objects Classification Based on LiDAR 3D	
Z.W. Huang, S. He and L. Qiu	1840
Risk Fuzzy Measurement and Early-Warning of the Project in Material Supply Chain	
X.F. Fu, J.J. Li and L.X. Li	1844

The Determining Method of Background Light Attenuation Coefficient in Discerning of High Temperature Forgings Z.H. Yin, C. Li and J.B. Nie	1848
Measurement of the Transient Velocity of Nanoparticles in Flowing Nanofluids by Using the Method of Dynamic Laser Speckles Q. Yan, J. Lu and X.W. Ni	1852
Research on Image Identification of D.Huoshanense with Joint Transform Correlation Using the Electronic-Addressing Spatial Light Modulator Y.S. Bao, R.D. Lu, Y.X. Ren, Q. Zhang and X.Y. Ding	1858
Model-Based GA Evolutionary 3-D Position Measurement Method X. Liu, W. Song, Y.N. Zhang and X.L. Li	1866
A Passive Ranging Algorithm Based on Imaging Detection X.M. Chen and X.N. Fu	1872
FPGA-Based Image Processing System for Target Locating L. Wang and X.N. Fu	1878
Air Quality Analysis and Evaluation in Jinan Based on Field Measurement L. Lei, H. Zhang, J.Z. Wang and X.G. Wu	1882
Design of Three-Phase Multi-Function Energy Meter Based on Measurement Chip RN8302 X.H. Zhang, J. Liu and Z.J. Cheng	1888
Development on Filtering Algorithms of Airborne LiDAR Point Clouds J.Q. Shi, T.C. Jiang and M.L. Jiao	1892
Research on Integrated Diagnosis of Contact and Non-Contact Method for Analog Circuit Y.H. Hao and J.L. Wang	1899
Method to Detect Bolting Devices Based on Ultrasonic Guided Wave M.H. Xu, Q.Q. Lan and W.J. Jin	1906
The Effect of Abscission of Insulation Lining of Electromagnetic Flowmeter on Output Signal S. Gao, B. Li, S.Y. Yin and X.J. Li	1910
The Realization of Communication Interface Module for Dynamic Belt Weighting Device in Transporting Unit of Biomass Pyrolytic System J.H. Wu, Q. Zhou, J. Chen, H.P. Si, K.Y. Lin and C.B. Zhang	1916
A Scheme for Excavation Displacement Monitoring Based on Image Processing M.H. Sun, Y.X. Zhao, W. Jiang and T.T. Feng	1923
The Application of Multi-Wavelet in GPS Deformation Signal Processing Y.H. He, H.Y. Wen and P.W. Jin	1927
The Achievement of the Algorithm of the High Precision Dynamic Rail-Weighbridge System X. Tian and W. Hou	1932
Three-Dimensional Scanning System with Double Structured-Light Sensors B. Peng, H.S. Tan and F.Q. Zhou	1938
Methods for Testing Micro-Dose X-Ray Radiation C.X. Liu, J. Huang and W. Zheng	1942
Local Quasi-Geoid Refinement Based on Spherical Cap Harmonic Model J.Y. Guo, S.Y. Wang, G.W. Li, W.H. Mao and Y.M. Ji	1947
Calculations on Optical Path Difference of a Reflecting Scanning Fourier Transform Spectrometry Based on Cube Reflector X.J. Zhang, X.X. Yang and W.F. Wang	1951
Evaluation of 3D Geo-Positioning Based on Bias-Compensated RPCs for Across-Track QuickBird Stereo Imagery W. Wang, S.Y. Xu and G. Qiao	1958
Experimental Research on Shrinkage Deformation Measurement of Light-Cured Composite Resin Using ESPI Q.R. Zhu, W.L. Shen, M.R. Xie and G.B. Yang	1965
Research on Application of Hall Integrated Sensors Q.T. Li	1971
Vibration Testing Parameters Measured by Sampling Moiré Method Z.K. Lei and Z.L. Wang	1975

Multi-Axis Load Cell Designs Employing Multiple Shear Beams R. Fernandez	1981
A Monocular Vision System Based on the Equidistance Pseudo Binocular Feature Recognition J. Zhang, M. Zhong and B. Huang	1987
Research on the Technology of Flexible Tactile Type Sensor Y.X. Zhang and B. Li	1993
Slope Adaptive Based Filtering for Airborne LIDAR X.Y. Yang, M.Y. Cen and X. Liang	1999
Development and Application of Velocity Collection in River Model Based on ZIGBEE H. Chen, L.M. Tang, H.M. Zhang and H. Wang	2005
Design of Automatic Level Control for Microwave Signal Source S. Li, T.L. Bai and Y. Han	2009
The Research of Surface Residual Stress about Glass Ceramics J.H. Wang, K. Wang, X. Wang, W. Song, X.L. Song and S.Z. Li	2014
The Measurement of Compressible Elasticity Modulus and Poisson Ratio of Ziziphus Montana Wood J.X. Duan, Q.D. Zhou, G. Ji and L.C. Wang	2019
Non-Intrusive Measurement of the Temperature and Size Distribution of Water Droplets in a Flat Fan Spray Q. Pan and Z.J. Zhang	2024
Research on Verification and Analysis of Micro-Gyroscope Measuring System Based on Dynamic Response H.G. Sun and Y. Zhou	2029
Testing and Analysis of Actuator Parameter Identification of Heavy Load Stewart Platform R. Ren, C.C. Ye and G.B. Fan	2036
Study on Far-Field Scatter of Ship Wake for Micro-Bubbles Based on CST J. Tian, H. Chen and X.X. Qu	2042
The Research of Measurement System Based on Linear CCD in Industrial Line J.H. Wang, L. Zhang, W.J. Chen and H.D. Chen	2046
Real-Time Measurement Method of Doppler Based on GPS Carrier Signals S.F. Dong, B.Q. Du and W. Zhou	2050
Compressed Sensing Technology Applied to Fault Diagnosis of Train Rolling Bearing X.F. Li, X.C. Fan and L.M. Jia	2056
Real Time Monitoring of Structural Health Using Fiber Bragg Grating Sensors Based on Arrayed Waveguide Grating Demultiplexing L.X. Chen, W. Xu and X.G. Huang	2062
Case Studies of LDV-Aided Dynamic Testing K.S. Dai, X.S. Ren, Q.J. Chen and B. Zhao	2066
The Diagnostic Method of Concrete Dam Monitoring Information Valid Interval D. Qin, X.Q. Zheng, F.M. Wang and H.Z. Liu	2072
Analysis and Research of Deep Foundation Pit Pars Horizontal Displacement Prediction Method J.B. Sun and D. Wang	2078
Assessment on Pore Structure of Western Sichuan Reservoir through Mercury Intrusion Porosimetry C. Guan, Z.H. Lou and H.J. Xie	2082
An Innovative Approach of Drilling Process Monitoring for Slope Characterization in Mountainous Regions J. Chen, Z.Q. Yue and S.J. Liu	2088
Application Research of Geological Radar in Volcanic Lava in the Geological Survey Q.L. Xiao and F. Lü	2093
Analysis and Mechanism of Impact of GPR Detection Effect Result from Soil Water Content X.J. Wang, Z.Q. Hu, Y.L. Zhao, Y.M. Guo and P.J. Wang	2098
Research on Extracting Residential Information from ETM+Images - A Case Study of Jiaxing City J.N. Xiong, S. Liu, Y.M. Yang and Z.G. Wang	2103

The Design of New Low Cost Ocean Bottom Seismometers H.S. Guo, B. Yan and Z.D. Wu	2107
Research the AVG Curve Based on the Method of Flat Bottom Hole X.R. Wang, X.Q. Zhang and S.S. Jia	2111
The Application of GPS for High Rise Building Deformation Monitoring During the Servicing Stage H.T. Zhang and L. Hu	2115
Research on Using WSInSAR to Monitor and Analyze Deformation Wenchuan Earthquake T.C. Jiang	2120
Derrick Stress Monitoring System Based on Fiber Bragg Grating Sensor Technology J.P. Wang, F. Wan, J. Liu, H.X. Sun and H. Zhang	2124
Stress Real-Time Monitoring of Marine Derrick Based on Environmental Loads T. Huang, J.P. Wang, F. Wan, S.W. Chen and Y. Dong	2128
Experimental Research of Distributed Optical Fiber Sensor Monitors the Embankment Hidden Hazard H. Lei, P.Y. Zhu, H.Q. Liang and G.Q. Hou	2132
Experiment of Underwater Acoustic Produced by Single Drop Impacts Z.R. Meng, W.Q. Zhang and H. Sun	2137
Research on Water Pipeline Leak Location J.R. Zhang, D.H. Nie and C. Wang	2143
Distribution of the Stray Current of Rebar in the Ballast Bed Z.J. Dong, X.Y. Li, P.Y. Yan and F. Xing	2147
Research on $\text{Fe}_{(100-x)}\text{Ga}_x$ Alloy Applied to Magnetostrictive Displacement Sensors X.Z. Zhou, C. Yu, Y.Q. Xiong and Q. Ning	2154

Chapter 7: Related Themes

Design and Implementation of Optimal Noise Shaping Filters J.L. Zhou and Z.Y. Zhu	2163
Realization and Comparison of System Identification Based on Different Least Squares Methods X.D. Zhang, J.F. Guan and L. Gu	2167
Damage Detection in a Cracked Rod Using High-Frequency Electro-Mechanical Impedance Signatures W. Wang, W. Yan and W.C. Li	2171
Design and Analysis of Flexure Hinge in the Double Crystal Monochromator X.G. Zhao, S.Z. Zhou, B. Jiang, K. Jiang and C. Mei	2175
An Investigation of Interpolation Scheme Based on Indirect Radial Basis Neural Networks H.T. Sun	2181
Molecular Dynamics Simulation of Crack Propagation for Leak Before Break (LBB) H.J. Yu, J. Liu and Y.Y. Wang	2189
Cushion Surface Modeling Based on Body Pressure Distribution and Subjective Rating Z.L. Yang, Y.M. Chen and Z. Liu	2193
Numerical Simulation of the Impact between the Front-End-Coated Projectile and the Substrate Coated by Ceramic Film Z.L. Wu and X.M. Wang	2198
A Real Electronic System to Control Virtual Machine in NC Machining Simulation Q. Wang, Q.M. Wang and X.F. Zhang	2203
A Comparison of Characteristics of Improved Total Contact Insoles Q. Wang and Q.M. Wang	2207
Application of the FTA in the Risk Management of Refined Oil Pipeline L.L. Zhang, G. Fu and X.F. Wang	2211
BIM-Based Real-Time Monitoring of the Equipment Maintenance of Property C.S. Sun and Q. Che	2217
Set Pair Analysis Method of Containing Target Constraint Mixed Interval Multi-Attribute Decision-Making W.S. Lü and B. Zhang	2222

An Entropy Function Implementation of Quadratic Programming X.G. Wang and C.J. Hou	2227
Nonlinear Iterated Difference Inequalities W.S. Wang and L.J. Zhao	2231
Study on Instrumental Intensity Using Wenchuan Earthquake Records M. Zhang, Y. Zhang and G.C. Zhou	2235
Heat Transfer and Thermal Load Analysis of Exhaust Manifold S.L. Xu, Y. Shi and S.C. Li	2240
The Evaluation and Research of Disasters Emergency Shelter in Laoshan District, Qingdao W.H. Zhang and H.Y. Gao	2245
Sound Radiation of Underwater Structure Based on the Arithmetic of Coupled Acoustic-Structural Analysis with ABAQUS D.J. Qian, X.H. Miao and X.R. Wang	2249
The Evolution Model of Emergency Response System for Sudden Accidents of Construction Projects R.H. Liu and B. Yu	2253
On Evaluation Methodology for the Performance of Engineering Project Management Based on 5-Element Set Pair Analysis Y. Zhao and Y. Wang	2258
Research on the Land Decision of Real Estate Enterprises Based on Fuzzy AHP R. Zuo	2263
Research on Quality Management System of Wuxi Taihu International Expo Center Project H.Z. Chen, A.J. Wu and L. Shen	2268
External Factors Influencing the Ethical Responsibility of Construction Project L.F. Wang and P. Mao	2273
Study of Erosion Mechanism by Modelling Abandoned Yellow River Delta J. Liu and T. Gao	2278
Application of Extension Theory Based on Optimal Combination Weighting Method in Risk Assessment on Geological Hazards X.L. Wang and B.W. Yan	2284
Numerical Simulation of Velocity Attenuation of Aerated Jet Flows W.R. Wei and J. Deng	2292
An Experimental Study on the Performance of Wave Dissipation of Artificial Sand Bar D.C. Zhao, B. Shi, L.P. Yang and Z.Y. Zhang	2299
Application Research of Support Vector Machine Based on Particle Swarm Optimization in Runoff Forecasting L.X. Wang, L.N. Wang, G.F. Li, C. Luan and F.F. Sun	2303
Reliability Study of Excavation Safety in Underground Space of Chen Clan Academy Square J. Pan and J. Gao	2308
Study on Critical Conditions of Scour-and-Siltation in Flood Seasons of Ningmeng Reach in the Upper Yellow River Y.S. Zheng, X.H. Zhang and H. Peng	2313
Effects of the Large-Scale Reclamation Project on Hydro-Dynamic Environment in the Estuary J.B. Mu, S.C. Huang and H.F. Lou	2317
The Riverbed Evolution and its Influence on Channel in Tunaozi Reach after Three Gorges Water Storage H. Fu, X. He, Y.C. Ma and Y.Y. Yang	2323
Taking Fangcun District of Guangzhou as an Example to Discuss the New Joint Repair Technology of Water Distribution Network D. Gao, Z.H. Wang, G. Ren, Z.H. Long and Y.L. Chen	2328
Influence of Radius of Horizontal Curve on Driver's Psychology and Physiology on the Two-Lane Mountain Highway L. Zhao and M.L. Zhang	2335
ITS - The Key of Traffic Transportation Sustainable Development H.W. Yuan and J.T. Zhang	2340

Application of Differential Transform Method to Buckling Problems at Clamped-Clamped Boundary Conditions	
L.F. Han, K.Q. Cheng and S.Y. Wu	2344
An Algorithm for Connecting Suburban Rail Line to Urban Rail Transit Network	
F. Wu and B.N. Gu	2349
Synchronous Transfer Model of Bus Timetabling for Regional Public Transit	
J. Zhang, W. Wang, B. Ran and W.Q. Li	2356
Study on the Highway Speed Limit at the Days of Snow and Ice	
J.D. Liu, T.T. Peng, J. Zhuang and Y.J. Deng	2362
Road Traffic Safety Assessment Based on the ADAMS/Car under Snow and Freezing Weather	
T.Q. Li, R.G. Ma, F.C. Wu and Y.J. Deng	2366
Real-Time Risk Assessment Model of Freeway Traffic in Rain and Fog Weather	
F. Guo, W. Gu and F. Yuan	2370
Application of Unmanned Aerial Vehicle Remote Sensing for Geological Disaster Reconnaissance along Transportation Lines: A Case Study	
J.P. Hu, W.B. Wu and Q.L. Tan	2376
Freeway Construction and Management Technology Research Based on the Data Net Toll-by-Weight Fees	
J.F. Zhu, Z.Q. Li and K.Q. Zhou	2380
Load Dependent Hysteresis Model for GMM and its Parameter Identification	
G.H. Chang, S.J. Zhu and J.J. Lou	2385
Study about the Recycled Construction Wastes for Landscape Design	
M.F. Lin and Y. Chen	2390
Application of Western Surrealistic in Design of Landscape Architecture	
D. Huo and F. Yang	2394
Research on Energy Saving Supervision System of Colleges and Universities Heating Based on Control Theory of Time & Temperature Sharing	
H.Q. Yang, F. Xi, H.G. Zhang and H. Li	2398
Experimental Study on a Shower Waste Water Heat Recovery Device in Buildings	
Y.X. Guo, Y.L. Cai, S.Q. Liang and W. Chen	2402
Studies on Building Entrance Cold Adaption Design and Structure in Cold Region - Take Harbin Institute of Architecture as Example	
P. Cui and M. Huang	2407
The Evaluation of Design for Energy Efficiency of Buildings Based on Analysis Hierarchical Process and Grey Theory	
Q. Feng, B. Wu and W. Jiang	2412
Theory Landscape Architecture Skit the Flower Window Design Culture	
Y. Xu	2418
Brief Analysis of Landscape Architecture Sculpture Sketch	
S.H. Xiong	2422
Developing a Framework for Evaluating Architectural Style Based on GEP	
K. Su and X.L. Li	2426
A Brief Analysis on Technological Expression of Contemporary Architecture	
R.L. Liu and H. Jin	2430
Study on Energy Conservation in Rural Residential Buildings in China	
L. Hu and H.T. Zhang	2434
The Research of the Development of Architectural Surface	
X. Chen and H.Z. Yang	2438
Study on the Evaluation of Urban Industrial Land Intensive Use	
Z.H. Lu, J.L. Zhang, X.W. Li, X.L. Wang, X.F. Bai and J. Zhang	2442
Analysis of Methods of Creating Microclimate for Waterfront Residential Areas in Tropics of South Asia	
Y.Z. Huang and S.F. Jiang	2450
Implementing a New Urbanization Strategy, Enhancing Tai'an's Tourist Soft Power and Quickening Economic Development	
S. Han and X.F. Han	2454

The Elaboration of Five "Perspectives": Application to Traditional Landscape Idea in Modern Landscape Design S. Feng and K.Y. Xu	2458
Planning of Disaster Prevention Space System Based on Urban Morphology - Take Suzhou Old Urban Area as an Example Y. Zhu, Y.Z. Huang and J.Y. Jiang	2462
A New Continuous Model of Shape Memory Alloys W. Wang and S. Yan	2467
The Freeway Energy Conservation and Emission Reduction Guarantee System Research Z.Q. Li and Z. Li	2471
Data-Driven Tracking Based on Kalman Filter X.B. Jin, J.J. Du and J. Bao	2476
Design of High Frequency Program-Controlled Filter Q.Q. Lan, M.H. Xu and W.J. Jin	2480
