

Table of Contents

Preface and Conference Organization

Chapter 1: Architectural Design and its Theory

Translation Motion and Dynamic Analysis of Ancient Architecture T.C. Wang, L. Zhang and H.L. Zhao	3
How to Create Green Buildings from Perspective of Evaluation Label: Taking Taiyuan No. 63 Middle School Campus Rebuilding Project as an Example X. Zhao and Y.S. Zhang	8
Ecological System Theory in Planning and Design: Ecological Conception and Level Analysis K.Z. Sun	13
Promotion and Abandonment on the Traditional Local Residence in Northern Jiangsu during the New Rural Construction X.F. Gong and Y. Li	17
Architecture and Environmental Sustainability: Critical Issues in Vernacular Kampong of Bena, Flores M. Susetyarto, E. Budihardjo, G.W. Pangarsa and G. Hardiman	22
The Tangling Line X. Chong, H.E. Zhang and N. Tong	27
Research on Protection of Rural Historical Building and Development of Villages Individual Style S.J. Xing	32
Analysis of the Ecological Technology in Pitched Roof of Chinese Traditional Dwelling J. Li and H.W. Ma	37
The Provincial Third Middle School of Shanxi – A Masterpiece of Pre- Modern Architectures in Shanxi Province J.W. Pang and Y. Wang	41
Embodiment of Polytheism in Architectures of Southeastern Shanxi - A Case Study of Hongji Monastery in Wuxiang County Q. Guo, X.D. Zhu and C.E. Wang	45
Discussion on Metaphor in the Architectural Design of Small Administrative Building in Practice Y.Y. Zheng	49
Study on the Metro Construction Project's Heritage Impact Assessment System of Historic City H.Q. Chang	53
Study a New Approach to Uniform Indoor Illumination from Natural Light B.Q. Zhang and Y.S. Chen	57
Analysis of Temple Form and Sculpture Value of Song Dynasty in Southeast Shanxi – The Case of Zhangzi Chongqing Temple L. Chai, X.D. Zhu and C.E. Wang	67
Analysis on Site Selection and Spatial Layout of Buddhist Temple in Mountainous Region in Southeast of Shanxi Province - The Case of Dinglin Temple in Gaoping, Shanxi B.R. Zhang, X.D. Zhu and C.E. Wang	71
Design Languages of Contemporary Neo-Vernacular Architecture in China M. Zhao and W. Gao	75
Establishment and Experiment of IMGE^{SB} as a Sustainable Building Design Method D.Z. Chu and S.X. Wei	81

Chapter 2: Urban Planning and Design

Paradigm Study in the New Rural Landscape Design and Innovation L. Jiao	89
---	----

Study on the Fire Safety Situation and Risk Evaluation of Chongqing City High-Rise Buildings L. Zhan	93
Exploration of Theory and Practice on the Construction of Affordable Housing Projects - Research on the Reconstruction of Taiyuan Xishan Coal-Mine Shantytowns W. Wang and Y.B. Gao	98
Evaluation of Urban Regeneration Project Plans with an Integrated Model Based on Analytic Network Process Y.J. Liao, K.H. Ye, H.Y. Fu and L. Ma	102
Study on Spatial Planning Pattern of Urban Producer Services X.G. Yang	106
Study on the Space Utilization under the Urban Viaducts of Harbin Main City Zone H.J. Xia, Z.L. Gao and B.J. Wang	110
Research of Tourism Town Planning Based on Symbiosis Theory - A Case Study of Controlling-Detailed Plan of Drift Town, Qingyuan City J.J. Zhang, Y.L. Sun and K.J. Shan	114
Exploration about the Stratagem of Sustainable Development of Small Town Planning in China Y.N. Yang and F.F. Yu	126
Preliminary Study on Mountain Urban Color Planning - Take Yichang for Example Z.Y. Duan and G.Y. Li	130
Exploration Interactive Development between Mountain Towns Ecological Security and Tourism Industry – Take Ye Sanguan as Example G.Y. Li and F.F. Yu	136
Exploration on the Impact of Traditional Chinese Philosophy on Urban Planning in Ancient China Q.P. Liao and S.L. Yang	143
A Study on the Value of Integration Development of Urban and Rural Public Sports Service C. Liu and W. Chen	147
An Exploration into Green Land System and Unexpected Disaster Prevention in Mountain City: A Case Study of the Shapingba Downtown in Chongqing B. Yan, S.B. Chen and S.Y. Deng	151
The Research of the Power Mechanism in the Coastal City Spatial Expansion in Period of Rapid Urbanization - Take Qingdao as an Example H.E. Zhang, X. Chong and N. Tong	157
A Study on Problems and Countermeasures in Old City Reconstruction in China B.B. Ning and W.L. Tian	162
Analysis on the Idea of Modern University Campus Planning Based on the Place Spirit Z. Cui and T. Wen	166
Development Trend of High-Density Housing in China Q. Ning, H. Gao and N. Chen	170
Location Model of Public Parking Facilities Basing on the Optimal Total Social Cost X.Y. Ni, X.D. Ma and X.M. Xia	175

Chapter 3: Sustainable City and Regional Development

A Preliminary Study of New Rural Development in Context of Local Characters and Identity W.Q. Dong and Y.P. Liu	181
Research on the Exterior Public Space of Ecological Immigrant Settlements in Xilin Gol – Chaogewenduer Gacha as the Model M. Zhang, J. Wang, M. Ma, W.M. Wang and H. Su	186
The Research on the Evolution of Village Spatial Form under the Restriction of Institutions Z.P. Hao and J. Wang	190
Research on Small Towns' Settlements Sustainable Development of Loess Hill and Gully Area in Middle Inner Mongolia L.P. Sun and J. Wang	195

Residence Block Design Methods Based on the Concept of Sustainable Development – A Case Study of Residence Block Design of Wuhan S. Hu, J. Li and D. Clément Noël	199
Analysis on Influencing Factors of Energy Intensity in Anhui Province Y.F. Han and Q. Li	203
The Analysis and Evaluation of Land Cover Change in Xining City Based on CA-Markov Model X.Q. Meng and Y.J. Chen	207
Technical Analysis on Relationships of Human Capital and Economic Growth Y.X. Yan	211
Concept Model and Evaluation System Research on Life City Q.C. Wang and Y.L. Gao	215
Discussion on Basic Modes of CBD Construction in Regional Central Cities in China – A Case Study of Chengdu M. He and W.Y. Zhang	219
Analysis and Forecast of the Arable Land Resource and Food Production Safety in Anhui Province H.M. Su and A.X. He	229
Reflections on Livelihood Issue in Post-Disaster Reconstruction Planning of Wenchuan Earthquake M. He and B. Zhou	233
Assessing Urban Sustainable Development in Isfahan H. Karimian, Q. Li and H.F. Chen	244
The Comparative Study on the Sustainable Sites Indicators between ESGB and LEED Z.Q. Wang and Q. Hu	249
The Definition and Connotation of the Sustainable Urban Transport L. Zhang and Y.Y. Wei	254
Coordinate Evaluation between Expressway Construction and Economy Development Based on DEA Model J.M. Jia and R.H. Zhang	263
Study on the Cross-Sea Bridge Construction and Evolution Pattern of Coastal Cities' Urban Spatial Structure in China T. Lin, Y.Y. Zhang and Y. Yu	267
Impact of Administrative Division Adjustment on Location and Accessibility of Heifei, China C.H. Zhu, H.M. Xie, W.X. Zhou and S.W. Zhang	271
An Empirical Analysis on the Relationship between Transport Infrastructure and Economic Growth in Tianjin X.Z. Meng	278
The Impact of High Speed Rail between Wuhan and Shenzhen to Tourism along the Line M.Q. Xie	282
Modal Choice of Recreational Tourists under Regional Transportation Integration: A Case Study of Pearl River Delta J.L. Huang, J. Li, X.J. Lai and H.G. Xu	287

Chapter 4: Building Materials and Processing Technology

Preparing of Glass-Ceramics and Recovering of Iron from Copper Slag Z.H. Yang, Q. Lin, Y. He, H.H. Tao, Y. Ke and G.D. Liao	295
The Chrome Thin Coating Characteristics Using Ultrasonic Testing X.G. Wang	299
Research Progress on Radiation Shielding Concrete J. Yang, Z.F. Chen, Y.C. Gan and Q.W. Tao	303
Relationship between Exothermic Effect and Crystal Growth in the Hydration Process of Waterproof Gypsum J.Q. Li, M.Z. Gong and G.Z. Li	308

Study the Influence of Soap Solution's pH Value on the Modified Asphalt Emulsion Performance J.J. Xiao and W. Jiang	312
The Applied Research of Waste Crumb Rubber in Road Base H.M. Guo, H. Zhu and Y. Zhou	317
Influence of Fly Ash on Alkalinity of Pore Solution and Microstructure Characteristics of Hardened Cement Pastes J.J. Yan, X. Li and H.Q. Yang	322
Study on Modified Wood Fiber/Recycled Plastic HDPE Composites H. Yan	326
Stiffness Calculation Method of Concrete Filled Steel Tubular Structure S.F. Zhou, X.W. Hao and Z.Q. Li	330
The High Activity of Fly Ash Used in Lime - Fly Ash H.L. Chen and D.W. Wang	335
The Analysis of 16MnR Steel Compact Tensile Fatigue Fracture after High Temperature A.Z. Liu, T. Wang and S. Zhang	341
Flexural Strength of C40 HPC after Elevated High Temperatures X.Q. Nie, H.X. Du and R.Z. Yan	345
Experimental Research on Vibrating Mixing of Concrete Based on Twin-Shaft Mixer L.J. Zhao, J.L. Weng and Z.X. Feng	349
Experimental Study of Binary Composite Phase Change Material for Building Y.J. Wang, H.G. Tao and Z.P. Zhang	354
Traditional Building Materials for Innovative Envelope G. Lombardo	358
Constitutive Behaviour of Lateral Ties Confined Polyolefin Fibre Reinforced Concrete under Monotonic Axial Compression S. Palanivel and M. Sekar	367
Recycling PEMs back to TLPAs: Is that Possible Notwithstanding RAP Variability? F.G. Praticò, R. Vaiana, M. Giunta, T. Iuele and A. Moro	376
Experimental Study on the Impact of Admixture for Concrete Heat of Hydration and Early-Age Contractile Properties J.C. Sun, B.J. Wang and W.Z. Zhao	385
Study on the Deterioration Properties of Corroded Steel Based on Weibull Distribution M.Q. Lin, S.H. Xu and D.T. Niu	390
Damage Identification of Functionally Graded Bernoulli-Euler Beam Based on the Modal Strain Energy Method L.X. Huang, Y. Chen, M. Yang, X.L. Zhang and Q. Yao	394
Quality Testing of the Chrome Coating Based on Acoustic Emission Technology X.G. Wang	399
Interfacial Transition Zone Meso-Structure of MgO Concrete Loaded to Failure by Computed Tomography H.Q. Yang, X. Chen and Y.Z. Zuo	403
Development of Mix Design Nomograph for Polyethylene Terephthalate Fiber Concrete J.M. Irwan, N. Othman, K.H. Koh, R.M. Asyraf, S.K. Faisal, M.M.K. Annas and A.M. Shahrizan	408
Effect of Admixture Additive on Properties of Polymer-Modified Lightweight Cement Mortar X.F. Wang, T.K. Jia, J.W. Li and X.A. Zhang	417
Study on Alkali-Reactivity of Aggregates Used in Projects in Kaifeng City F.L. Liu, J.H. Liu and C.Z. Zhang	421
Experimental Study on the Comparison of Resisting Semi-Armour-Piercing Projectile Penetration Ability for Steel Mesh, Steel Fiber and Steel Composites Y.F. Wang and Y.H. Wang	425
Strengths Investigation of Air Entrained Recycled Fine Aggregate Mortar J. Li and C.L. Qin	432
Preparation and Properties of Lightweight Cement Mortar with Granulated Blast Furnace Slag and Expanded Perlite as Aggregate T.K. Jia, J.W. Li, X.F. Wang and X.A. Zhang	436

The Hydration Heat Analysis for Sealing Concrete of Swivel Construction Open Thin Wall Arch	
X.H. Feng, Z.Q. Zhu, Z.Y. Li and X. Wu	440
Preparation and Properties of Scattering Electromagnetic Function Mortar Composite	
A.Z. Deng, Y.J. Wang and X.G. Zhou	445
The Study on the Development and Innovation of Equipment Materials Used for China Competitive Dragon Lion Dance Sports	
L.Q. Chang and S.M. Shen	451
Review of Strength and Failure Criteria for Concrete After Freeze-Thaw Damage	
Y.F. Qin, B. Tian, G. Xu and X.C. Lu	456
Research on the Green Concrete Mixed the High-Volume Limestone Powder and Low-Quality Fly Ash	
G.Q. Xu, D.L. Han, J.Q. Han and S. Wang	462
Experimental and Numerical Investigation on Stress-Strain Relationships of GFRP and Lateral Ties Confined Polyolefin Fibre Reinforced Concrete under Monotonic Axial Compression	
S. Palanivel and M. Sekar	466
Prediction of Elastic Modulus of Cement-Based Materials Based on Power's Volume Model	
L. Wu, B. Yan and B. Lei	474
The Effects of Cement Volume for the Mechanics Performance of Fiber Modified Polymer Resin Concrete	
Y.J. Jin	478
Investigation and Improvement on the Mechanical Property of Cement Mortar	
H.B. Zhang, X.M. Guan and H.T. Shang	482
The Development and Application of Geosynthetics	
Q. Xue	489
Study on the Thermal System of Microporous Cementitious Materials	
Y.Y. Tong, X. Yi, B.Q. Yan and Y.L. Chen	493
Interface Bonding Property of Fiber-Reinforced Resin Mineral Composite	
X.H. Ren, Z.N. Wang, T. Wang and J.H. Zhang	499
Comparison between Manufacturing Processes of Fiber-Reinforced Cement-Based Panels (FRCBPs)	
B.Y. Lee, Y.Y. Kim, J.W. Bang, W.J. Chung, D.S. Joung and H.W. Lee	503
Study on Behaviors of Jute Fiber Reinforced Cement Based Materials	
B. Liu, L.Z. Zhang, Q.X. Liu and T. Ji	508
The Shape Change Energy Criterion of Iso-$\sigma\theta\epsilon\theta$ Line for Mixed Mode Crack and the Application in Concrete	
S.L. Chen, H. Jie, J.J. Shi and Y. Tao	512
Structural Vibration Control of Shape Memory Alloy in Martensite-Austenite Coexisting	
Z.Y. Liang and B. Xing	518
Research on Performance and Application of Mortar King (Building Mortar Admixture)	
Y. Liu	524
Influence of Crushed Basalt Aggregate on Crack Resistance of Concrete	
J.J. Yan, S.H. Zhou and S.S. Peng	529
Experimental Research on Basalt Fiber Reinforced Cementitious Composites	
J.X. Ma, M. Zhang and G. Zhao	533
Cyclic Behaviour of Lateral Ties Confined Polyolefin Fibre Reinforced Concrete under Repeated Axial Compression	
S. Palanivel and M. Sekar	537
Effect of Organic Diacid Carbon Chain Length on Crystal Morphology of α-Calcium Sulfate Hemihydrate in Preparation from Flue Gas Desulphurization Gypsum	
X.F. Liu, J.H. Peng, J.X. Zhang, J.D. Qu and M. Li	542
Predicting Compressive Strength of Recycled Aggregate Concrete by Multiple Regression Analysis	
Y.S. Shin and G.H. Kim	546
Numerical Simulation of Uniaxial Compression Performance for Recycled Concrete Using Micromechanics	
H.P. Zhou, Y.J. Peng, N.N. Dang and J.W. Pu	550
Advances in Hydration Kinetics Model for Cement-Based Materials	555

Environmental Sustainability and Engineering Performance of Self-Compacting Mortar Incorporating Fly Ashes P.Z. Razi and H. Abdul Razak	559
A Review of Aerogels and Their Application as a Multi-functional Building Material Z.G. Yan	564
Influence of the Variations of Chemical Composition on the Poroelastic Properties of Hardened Cement Paste	568
Optimization of HSC Compressive Strength by Taguchi Method S.H. Hashemi and A. Soleymani	572
Analysis of the Possibility of Using Geopolymers as a Matrix in Sprayed Concretes Used under Extreme Conditions A. Dufka, J. Kosíková, L. Mészárossová and M. Liška	576
Contribution of Physico-Chemical Diagnostic Methods to Assessment of Real Reinforced Concrete Structures A. Dufka and J. Bydžovský	583
Stud Bolt Effects on the Bearing Performance of Pseudo Strain-Hardening Cementitious Composite (PSH2C) Wall-Steel Coupling Beam Connections S.W. Kim, W.S. Park, N.Y. Eom and H.D. Yun	587
Dynamic Analysis of Reinforced Concrete Beam under Shock Wave L. Yang, D.R. Wang and C.C. Shi	591
Feasible Study on Using Recycled Ceramic Sand and Ultra Fine Sand in Combination F.L. Liu, J.H. Liu and C.Z. Zhang	595
Research on Influence of Different Fibers on Pavement Performance of SMA G. Dong, N.X. Zheng and L.T. Qie	599
Effect of Curing Agents on Early Cracking of Road Concrete Y.C. Zhang, L.L. Gao and J.W. Liu	603
Experimental Study on Overlay Asphalt Mixture Y.Q. Yuan, W. Li, X.C. Li and T. Guo	607
Application of Improved TOPSIS Method to the Evaluation on Asphalt Pavement Performance Q.Y. Shuai and Y.B. He	611
The Performance Research of Adjusting Material Based on Asphalt Pavement J.G. Qiao, Y.Q. Wang and N. Yang	616
High Temperature Stability Performance of Open Graded Asphalt Friction Course Y.Q. Yuan, X.C. Li, W. Li and T. Guo	621
Parametric Analysis of Flexible Pavement Layers' Accumulating Deflections F.C. Yin, G.C. Zhou and H. Guo	626

Chapter 5: Renewable Energy and Building Energy Saving

Analysis about the Traditional Dwellings Passive Technology Energy Efficiency in Huizhou J. Zhong and S.H. Jia	635
Inspection and Assessment of Energy-Saving Renovation Effect of Existing Residential Buildings, Taking Changfeng Residential District in Taiyuan University of Technology as an Example X.B. Zhang and Y.S. Zhang	641
Building External Wall Thermal Insulation Construction Quality Safety Measures Analysis X.H. Zhang, J.X. Liu and H.Z. Zhang	646
Study on the Integration Design of Solar Energy Light Heat Utilization in High-Rise Housing J.K. Sun, S.H. Huang, T.F. Yang and J. Liu	650
The Application of Aluminum and its Alloy Materials in Energy-Saving Building L.Y. Yuan, Z.J. Han and L.Q. Gao	655
CFD Investigation of the Effect of Building Passive Design Strategy on Energy Efficiency and Wind Comfort in Extreme Weather Conditions in Astana, Kazakhstan S. Tokbolat, R. Tokpatayeva and S. Al-Zubaidy	658
Study on the Layout of Water-Filled Raft WEC in Wave Farm Z.G. Bai and L.B. Shi	670

Comparison Study on Thermal Performance of the RC Sandwich Panels with Different Connectors	
R.N. Liu, K.Y. Zhang and M.L. Tao	674
Research on Energy Saving Directing at Building Lighting System	
J.H. Xie, J.P. Wang, M.X. Shang Guan and Y. Shao	679
Research on the Problems and Countermeasures of Energy Conservation Reconstruction of the Existing Buildings in the Industrial Urban Renewal	
L.L. Chen, H.C. Qu and H.Y. Li	684
Improved Performances of Graphite Counter Electrode for Dye-Sensitized Solar Cells by Incorporating Graphene Nanosheets	
S.J. Xu, Y.F. Luo, W. Zhong, X.Y. Liu, Z.H. Xiao and Y.P. Luo	689
Sustainable Development of Building Energy	
B.D. Zhao, P.C. Chen and Y.L. Zhang	693
Renewable Energy in Building Design Strategies of Application	
J.G. Ye	697
The Energy, Environmental and Economic Benefits Analysis of Ground-Source Heat Pump in Wuhan Region of Summer Condition	
Y. Ma, Y.Y. Li, Y.C. Ma, X.F. Hu and G.H. Hu	701
Robotics Application in Remote Data Acquisition and Control for Solar Ponds	
M. Elbanhawi and M. Simic	705
Analysis of the Influence of the Roof Greening Technology on Building Energy Efficiency	
Y. Wang and Y. Chen	716
A New Time Domain Analysis of the Wave Power	
M.X. Wei and Z.G. Bai	720
The Interaction and Monitoring System for Energy Saving in Building	
M. Zhong, S.S. Chen, H. Wang and H.G. Yan	724
Energy Efficiency Research in Building Based on the Concept of Life Cycle	
L.L. Sun, C.A. You, J.X. Liu and L.Z. Sun	731
Research on the Duty Mechanism of Energy Consumption Control of Public Buildings in China	
G.F. Ding, G. Xu and X.F. Zhang	735

Chapter 5: Renewable Energy and Building Energy Saving

Lighting Energy Management System Based on PC's Power Save Mode	
J.S. Han, Y.K. Jeong and I.W. Lee	741
Automatic Sensor and Meter Arrangement System for Building Energy Management	
J.W. Kim, Y.K. Jeong and I.W. Lee	746
Combination of Chemical Hydride Hydrogen Generation System with Low-Temperature PEMFCs	
A. Su, H.L. Chiang and Z.M. Huang	751
Optimizing Exergy Efficiency of Flat Plate Solar Collectors Using SQP and Genetic Algorithm	
M. Khademi, F. Jafarkazemi, E. Ahmadifard and S. Younesnejad	760
Optimizing the Tilt Angle of Solar Panels by SQP Algorithm	
M. Khademi, F. Jafarkazemi, S.A. Saadabadi and E. Ghazi	766
The Experimental Study on Forced Circulation Solar Hot Water Supply	
X.M. Zhang and Y.R. Zhang	772
Ionic Liquid 1-Ethyl-3-Methylpyridinium Diethyl Phosphate Pretreatment of Mulberry Residue	
Q. Li, X.D. Gu, G.S. Ji, J.J. Fei, Y.Y. Feng and Y.T. Wu	777
Analysis of Ejector Performance Using 1-D Model	
F.L. Li, B. Cao and Q. Tian	781

Chapter 6: Building Ecological Environment

Design and Calculation of a Large Self-Anchored Ecological Block Retaining Wall X.Y. Niu and Y.F. Xing	789
A Study on Residents Consciousness of Low Carbon Building in Jiaxing City B.B. Ning and W.L. Tian	796
Research on Construction of City Road Greening L. Bai	800
Analysis of Hohhot's Traffic Pollution and its Control Countermeasures Y.L. Su and J.W. Wang	804
Waters Ecological Reconstruction of Ling Lake Scenic Area in Anqing L.H. Zhang and B.H. Zhou	809
Chromium Concentrations and Regional Distribution of Urban Soils in Suzhou City Y.F. Han and Q. Li	817
Low-Carbon Space in Urban and Rural Areas: Ecological Greenway Planning of Shanhaiguan District, Qinhuangdao City, China F. Zhang, N. Wang and Q. Li	821
Identification of Non-Volatile Components and Volatile Organic Compounds in Wet Building Materials J. Chen and N. Zhu	825
Environment and Culture during the Pre-Qin Period in the Chaohu Lake Basin, Anhui Province, East China L. Wu, F. Li, X.Y. Wang, S.Y. Li and C. Zhu	829
Research on Characteristic of North Zhejiang Residential Indoor Environmental M.F. Yu and B. Zhao	835
Nature Landscape Farms Rural Areas – Ecological Cycle – A Case Study of Yansaihu Greenway Planning of Qinhuangdao City X.F. Liu, N. Wang and Z.G. Wu	840

Chapter 7: Environmental Engineering and Environmental Protection

Research on Utilizing Environmental Friendly Materials of Barrier Board for Turbidity Reduction of High-Turbidity Raw Water J.L. Chen, Y.H. Shen, Y.K. Chang, K.L. Chen and W.J. Guo	847
Research on the Eco-Renovation Strategy on Old Industrial Buildings Y. Chen and Z.Q. Xiao	853
Researches on Environmental Value of Existing Buildings' Adaptive Reuse L. Zhang and H.M. Lei	857
2D Simulation of Effects of Position of Baffles on the Removal Rate of Solids in a Sedimentation Tank Y.L. Liu, P. Zhang and W.L. Wei	861
Preparation and Characterization of Al₂O₃/TiO₂/PVDF Polymer Composites Ultrafiltration Membrane S. Hong, S. Hua and L. Yan	865
Biomorphous Porous Carbon Prepared from Cotton Stalk Q. Wang, X. Cheng and Y.H. Zhang	871
Pilot Study of Ultrafiltration for Tertiary Wastewater Treatment P.K. Jin, X. Jin, X.C. Wang and J.N. Song	875
Research on Gas Emission Index System for Dynamic Prediction of Outburst Danger X.L. Liu, X.S. Zhao and G.G. Dong	879
Preparation of Porous Carbon Material by Carbonizing Polyacrylonitrile Microspheres Y.L. Rong, S.F. Wang, D.D. Jia, C. Liu, L. Cao, H.Y. Tian, X.F. Zheng, L. Liu and D.J. Wang	884
Characteristics of Organic Matters Translation and Removal on Sludge Reduction HA-A/A-MCO Process D.W. Mu and N. Zuo	888
Humic Acid Removal from Water by Poly Aluminium Chloride (PAC) P. Zhang, B.Z. Ren and F. Wang	892
Effect of Dry Matter Concentration on Dry Anaerobic Digestion of Animal Manure and Straw L.J. Shi, M. Huang, W.Y. Zhang and H.F. Liu	897

Aerobic Denitrification Characteristics Research of Pseudomonas Strains HFX08 X.L. Ma, Y.X. Shan, F.Y. Zhang and J.H. Wang	903
The Research and Development Based on the UV + US Synergistic Sterilizer J.G. She, X.Z. Meng and N. Chen	908
Effects of Additional Stimulants on Phenol Degradation by a Halotolerant Rhodococcus sp. JDD1H F.Y. Chen, D.D. Jiang and Y.B. Tang	914
Particle Removal Efficiencies of a Barrier Board that Pre-Treats High-Turbidity Raw Water J.L. Chen, Y.K. Chang, C.H. Lai and Y.H. Shen	921
Amplification Experiment on Quick Start-up of Filter for Removing Manganese by Contact Oxidation Method W. Zhang, C. Lv, Y.J. Wang, M.Y. Sun and J.K. Guo	927
The Progress of the Preparation of Coagulant from Industrial Wastes N. Suo, Y.Z. Yu, H.D. Zhang, M.W. Li, Y.X. Zhou and L. Cheng	931
Meteorological Conditions Influences on the Variability of Algae Bloom in Taihu Lake and its Risk Prediction Y.S. Jing, Z.H. Jing, J.Y. Hu and F. Chen	935
Adsorption Characteristics for Lead(II) by Fulvic Acid-Modified Vermiculite W.J. Xiang	939
Comparative Study of the Degradation of Real Dyestuff Effluents by Three Kinds of Electrolysis Methods Z.L. Chen, X.H. Huang, X.R. Sun and L. Li	943
A Cost Model of Wastewater Treatment Plant in Tianjin D.G. Han and X.H. Zhao	949
Study on Cu²⁺ Removal from Water via an Cation Exchange Membrane D.H. Xie	954
Simultaneous Removal of SO₂ and NO with Activated Carbon from Sewage Sludge Modified by Chitosan X.D. Fan and X.K. Zhang	960
Performance of Horizontal Subsurface Flow Constructed Wetland of Application of Oily Wastewater X. Yang, X.P. Zhang, J.F. Wang, B.J. Wang and X.Q. Guo	965
Suspended Solids Removal Efficiencies of a Barrier Board that Pre-Treats High-Turbidity Raw Water J.L. Chen, Y.K. Chang, C.H. Lai and Y.H. Shen	969
Anodic Oxidation and Electropolymerization on CF Surface and Effects on Immobilization of Microorganism in Waste Water Y.L. Bao and G.Z. Dai	975
Field Studies on the Treatment Capacity of the Stormwater Wetland J. Xu, L.G. Xu, R. Gong and L. Dong	980
Influence of Organic Load on Phosphorous Release and Absorption in HA-A/A-MCO Sludge Reduction Process J.C. He and N. Zuo	984
Preparation of Coal-Based Activated Carbon and its Application for Methylene Blue Removal G.Z. Gong, Q. Xie, W.F. Yang and X. Yao	988
Investigation of Chemical Cost Reduction in Demineralized Water Production Process S. Tangjitsitharoen and B. Poolsuwan	993
CFU Combined Process for the Treatment of Oily Car Washing Wastewater J.K. Zhang, Y.B. Yang, H.Y. Wang and Z.B. Dong	999
An Evaluation on Heavy Metal Contamination of Soils in Suzhou by Fuzzy Mathematics Model Q. Li and Y.F. Han	1005
Numerical Simulation of Influence of Vegetation on Atmospheric Diffusion of Radon Emanating from Uranium Tailings Impoundment X.Y. Peng, Q.F. Xie, F. Wan, S. Huang and X. Zhang	1009

Numerical Simulation of Atmospheric Migration of Particles from Uranium Tailings Impoundment	
X.Y. Peng, F. Wan, Q.F. Xie, X. Zhang and S. Huang	1014
Long Term Effect to the Geological Environment by Mining	
J.N. Zou and H. Wei	1019
Reflections on Environmental Inspection Culture Building	
S.Y. Sun	1024
Study of Gray Correlation Degree Method in Environmental Warning	
S.F. Li and W. Dai	1028
Research on Reverse Logistics Mode and Implementation of EPR	
Y. Wang	1032
Research on the Belt Loader Waste Rock Gravity Backfill Mining Technology	
W.Y. Lv and Z.H. Zhang	1036
Research Progress on Biological Removal of Arsenic Technology	
X.S. Kang, Q. Su, J. Shen and Y. Li	1040
Use of Ornamental in Phytoremediation of Heavy Metals in Sewage Sludge	
S.G. Li, K.F. Zhang, L.Q. Zhang and Q.L. Chen	1044
Features of Water for Ecological Demand in Arid Area in the Northwest China	
R.H. Wang	1051
Prediction Model for <i>Pinus sylvestris</i> L.var.monogolica Litvin Plantation	
L.J. Zhao, F.R. Li and W.W. Jia	1055
Spatial Structure Features and Distributing Rules of Soil Heavy Metal Concentrations of Antimony Mining Area	
B.Z. Ren, Y. Zhou, Z.H. Tao and L.J. Cheng	1063
Land Reclamation Suitability Evaluation Based on the Limit Method	
D. Shi	1069
The Natural Restoration Capability of Vegetation in Different Site Types along the Expressway 25, Lu-Su Section, China	
Y.Y. Li, F.Y. Zhao, L. Wang, F. Liu, J. Wang and C.D. Zhu	1075
A Path Based Algorithm for Solve the Hazardous Materials Transportation Bilevel Problem	
J.F. Camacho Vallejo and R. Muñoz Sánchez	1082
An Enhanced Remediation Technology for Contaminated Groundwater	
H.T. Hu	1089
Research on Secondary Resource Utilization and Mining Damage Control in Gob-Effect Gypsum Mines	
G.F. Ren, Z.M. Qian and Z.C. Hu	1093
The Efficiency of Natural and Electrokinetic Enhanced Migration of Pb in Aquifer	
H.T. Hu	1098
Case Studies of Strategic Environmental Assessment on Urban or Regional Comprehensive Plans in China	
L.L. Tian	1102
Highway Through the Wetlands Landscape AVC Evaluation	
H. Yin and X.F. Li	1107
Experimental Research on Vibrating Compaction Characteristics of River Sand	
Y.Y. Li, W.D. Cao and S.T. Liu	1114

Chapter 8: Transportation Planning, Construction and Operation Organization

Prospective Prognosis of Beijing Urban Transportation Energy Consumption and Carbon Emission	
Y.Y. Hu, F. Chen and Y. Huang	1121
The Analysis of Planning Guide Effect of Guangzhou Metro Line Five's Construction to the Non-Existed Central District of the City	
Q. Zhao and J. Tang	1130
A New Monitoring and Early-Warning System on Large Range Road Using IPv6 Network	
Y.C. Cheng and K. He	1135

The Study on Expressway Reconstruction Project of China C.Y. Yuan	1139
Transportation Accessibility Research on Shenyang TieXi Industrial Corridor Area W.H. Zhao, B. Zhang and D.W. Zheng	1147
Research on Traveling Salesman Problem of Short-Haul Freight Transportation X.C. Li and Y. Xu	1151
Study on the Line Capacity on Passenger Dedicated Lines Based on the Stops Adjustment X.J. Li, B.M. Han, D.W. Li and H. Li	1158
Port Competition in the International Transshipment Hub Sector, Busan and Shanghai X.L. Huang, P. Roiseux Racine and L. Tian	1163
The Queuing Model and Simulation of Container Terminal Based on Liner Transport J.S. Gui and C.X. Yang	1167
Study on Planning of Entrance Fairway for Sea Port Based on Maritime Simulator Y.T. Fan	1171
Safe Departure Interval of Bullet Trains: Based on Block Section P.X. Xie and W. Yang	1177
Evaluation of Nodes Importance in of Highway Transportation Hubs Planning Based on Fuzzy-AHP S.E. Xi	1181
Hubs Planning of Comprehensive Passenger Transportation Based on Fuzzy Entropy Weight Method S.E. Xi	1188
Modeling of Distribution Service Network System in Comprehensive Passenger Transportation Hub Z. Zhang, C.X. Ji, M.J. Jin, Q. Li, L. Yun, L. Gao, H. Lan and L. Huang	1195
Road Network Pyramid Model X.H. Cai, C.G. Bai and W. Dou	1201
Evaluation Model of Public Transportation Hub Based on Yishan Road Station, Shanghai, China Y.L. Yang, H. Chen and R.P. Zhang	1209
Information Sharing Framework for the Integrated Collaborative Operation in Through Transport of Railway Freight W.Y. Chen	1213
A Study of Exploring the Second Channel for Yangshan Deep-Sea Port X.Y. Li, H. Hu and C.Y. Li	1218
A New Evaluation Model of Response Ability to Railway Dispatching Emergency S.Y. Qu and X.F. Xu	1222
To Promote the Development of Container Rail-Sea Intermodal Transport in China Through Optimization of Railway Transport Organization X. Huang and R. Xing	1227
Study on the Assembling Regularity of Passengers at Large-Scale Railway Station L. Huang, Y.B. Lv and Y. Ren	1231
Application of Particle Swarm Algorithm in Train-Set Circulation Problem of China H. Li, B.M. Han, F. Lu and X.J. Li	1235
The Uncertainty Study of Waterway Freight Volume Forecast Model H.Y. Xie, X.Z. Zhang and D.P. Zhao	1241
Optimization on Configuration of Handling Equipment in Railway Container Terminal during Operation F. Ye, H.H. Xie and X. Jin	1245
Urban Rail Transit Passenger Transport Microcosmic Simulation Model Framework Design Z.Q. Wang	1249
Motivation, Problems and Countermeasures Research on the Rapid Development Highways of Chongqing X.L. Cao and L.D. Jiao	1254
Dynamic Pricing for Multiple-Class High-Speed Railway on the Internet Q.Q. Yang, L.P. Xu and Y. Yang	1263

Forecasting Model of Maritime Accidents Based on Influencing Factors Analysis D. Wang, C.Z. Yin and J. Ai	1268
Research of High-Speed Railway Running Economic Benefit Based on Gray Model X.D. Du and N. Ren	1273
Study on the Transportation - Economy Coordinated Development Based on Entropy Weight H.Q. Zhang	1278
Guiding Model and Empirical Analysis of Vehicle Behavior at Signalized Intersections Based on Carbon Emissions Y.L. Zheng, Y.Q. Wei, Y.X. Xiao and Y. Feng	1282
Energy Consumption and CO₂ Emission in Transportation Sector: A Comparison among BRIC Countries Y. Huang and M.J. Wang	1289
Research on Energy Consumption and CO₂ Emission for Transportation Sector in China Y. Huang and M.J. Wang	1294
Traffic Performance of Signalized Intersections with Protected Pre-Signal Established Upstream Y.P. Zhou and H.B. Zhuang	1299
Research on Recovery Model for Flight Disturbance of Airlines X.H. Zhang and F.L. Bai	1307
Determining Bridge Maintenance Priorities by Time Series-Based Multi-Attribute Decision-Making Method J.S. Zhu and Y. Yang	1312

Chapter 9: ITS Theory and Applications

The POI of Highway Transportation and its Visual Search X. Ma, Y. Cao and X.W. Mu	1319
Optimal Prediction for Braking Speed of Urban Rail Vehicle M.N. Zhang and H.Z. Xu	1324
The Research on Electric Bus Operation Intelligence Scheduling Model and Algorithm S. Gao, P.P. Zhang, D.R. Tan and X.L. Zhang	1330
The Study of Traffic Simulation System Based on B/S Pattern Y. Kong, J.P. Wu and Y.M. Du	1335
A Short-Term Combination Forecasting Model for Traffic Flow Based on the BP Neural Network T.X. Cheng, W.B. Du and J.Z. Chen	1339
Study of Travel Mode Choice Behavior Based on Nested Logit Model B. Shang and X.N. Zhang	1345
Lane-Based Road Network Model and its Application in Simulation Road Network Modeling M. Huang, M.L. Rao, M. Li and Z.M. Niu	1351
Optimization of Vehicle Routing Problem Based on Multi-Objective Genetic Algorithm R. Zhong, J.P. Wu and Y.M. Du	1356
Research of Vehicle Scheduling Problem and Algorithm Based on Emergency Needs Y.J. Wen, Z. Wang, H.H. Dong, Y.C. Liang and L.M. Jia	1360
Research on the Traffic Simulation Platform Based on the Real-Time Mobile Phone Data G.Q. Qi, J.P. Wu and Y.M. Du	1365
Study on Multi-Depot Vehicle Routing Problem Based on Cloud Adaptive Particle Swarm Optimization T.J. Wang and K.J. Wu	1369
Model Reference Adaptive Algorithm Designed for Automatic Train Braking Control H.Y. Luo and H.Z. Xu	1374
Evaluating Flight Delays Rating Using Fuzzy Simulation Approach Z.W. Zhao	1380
Algorithm Design of Micro Inertial Strap-Down Heading and Attitude System J. Li, C.Y. Fan and J. Liu	1384

Studying the Effect of Coordination on the Drivers Behavior during Signal Change Intervals at a Typical Intersection in Tokyo, Japan ~ Detailed Methodology and Hypotheses M. Ahmed Rasheed, S. Tanaka, T. Oguchi and S. Hong	1388
A Signal Priority Algorithm for BRT Based on Intersection Resource Integration Z.S. Yang, C.L. Tian and S.N. Liu	1396
A New Automatic Detective Method of Traffic Incident H.J. Zhang, X.P. Jin and P. Zhang	1401
A Improved Bus Timetable Scheduling Model Using Quantum Genetic Algorithm Based on Penalty Strategy X.L. Tang and S.H. Yang	1406
Target Range and Velocity Measurement to Reduce False Targets in FMCW Automotive Anti-Collision Radar Z.G. Li and Q.C. Gu	1410
Application Research on RFID Technology in Container Transportation Management Y. Geng and P. Li	1418
Architecture Design for Intelligent Vehicle Computing Platform Based on Internet of Vehicles Q. Wang, Y. Yu and Z.M. Tang	1423
Research on Train Control System Based on Communications L.N. He	1427
The Analysis of Behavioral Responses to Transit Information R. Sun, H.T. Yu, Y. Du and S.L. Geng	1431
On Hybrid Control System Methods for Traffic and Transportation System X.L. Meng, L.M. Jia, Y. Qin and J. Xu	1438
A High Performance Algorithm of Vehicle Plate Location and Recognition in Intelligent Transportation W.J. Liu, Z. Zhang, W.T. Jiang and H. Yuan	1443
A System Analysis Tool for Airline Gate Assignments C.H. Tang and W.C. Wang	1453

Chapter 10: Modern Logistics System Planning and Optimization

Improved Genetic Algorithm for Capacitated Vehicle Routing Problem C.Y. Ren	1459
Milk-Run Vehicle Routing Optimization Model and Algorithm of Automobile Parts H.J. Ma and J. Wei	1463
Urban and Rural Logistics and Distribution System Based on Supply and Marketing Cooperatives X.L. Huang, H.X. Jia and P. Roiseux Racine	1468
The Planning of the Dynamic Path of the 3rd Party Logistics Center, which Based on the Ant Colony Optimization Y.R. Zhen, J.C. Huang, W.Y. Li, F.X. Li and Y. Zhang	1472
Application of Composite Ant Colony Optimization in Logistics Distribution Center Location X.L. Liu and W.Y. Zhang	1476
Improved Heuristic Search Algorithm for Multi-Cargo Loading Problem C.Y. Ren	1482
Study on Optimization Model of Multiple Depot Vehicle Scheduling in Logistics Distribution of Expressway Service Area Q. Zhou, C.L. Xu and J. Liu	1486
Empirical Study on Influencing Factors of Sichuan Logistics Development Based on Grey Relation Degree Model X.F. He and Y.W. Jing	1492
Research of the Car Demand Forecasting Based on the Seasonal Index Correcting Smoothing Model Q. Kong, W.H. Sun and W. Jiang	1496

Chapter 10: Modern Logistics System Planning and Optimization

Definition of the Logistics Park Hinterland Based on Weighted Voronoi Diagram Y.B. Zhang, G. Wu, W.X. Peng and Y.R. Chen	1503
Logistics Reorganization of Supermarket Chains Based on Agriculture Super Docking S.W. Ji, K. Wang and K. Yan	1508
An Integrated Predicting Model of New-Built Regional Logistics Center's Demand Based on the Artificial Neural Network J.F. Luo and T.S. Ma	1512
The Space Buffer Analysis Based on Grid Algorithm X. Xu and P.H. Wang	1518
Key Factors Analysis of Port Logistics Development Based on Principal Component Analysis S.W. Ji and L.S. Zhao	1522
Research on Key Elements of the Regional Logistics Capability Considering Integration of Evaluation, Prediction and Planning Y. Zhang, G. Wu and Z.B. Wang	1527
Planning and Design for Nanjing Logistics Park of Automobile and Auto Parts L. Xue	1532
An Evaluation Method of Route Risk for Regional Emergency Logistics J.F. Luo and T.S. Ma	1536
Online Shopping Logistics System Improvement Based on TOC Y.L. Zhang, G.Y. Xie and J. Chen	1540
Researches on Support Capacity Building of Military Transportation on Basis of Multimodal Transport X.S. Yang, Z.P. Gong, S. Wang and B.C. Ding	1547
Research on the Optimization of Chemical Logistics Park Internal Areas Layout S.W. Ji, S. Zhang and F. Lin	1553
Dynamic Analysis of Store-to-Store Delivery Service through Fuzzy Cognitive Map C.C. Chung and Y.K. Huang	1558
Planning and Design of a Kind of Monitoring System for Logistics Transportation Security L.H. Zhao, N.X. Gao and Q.G. Cao	1563
Research on RFID Application in the Food Supply Chain X. Lin and W.L. Gao	1567
The Analysis of Vulnerability in Low-Carbon Delivery System Using Analytical Hierarchy Process Y.K. Huang, C.H. Hsieh and J.M. Zhao	1571

Chapter 11: Traffic Control and Information Technology

Asymmetric Effect on Jamming Transition in Biham-Middleton-Levine Traffic Model G.X. Zhang, H. Kuang, Y.H. Fan, L.J. Kong and X.L. Li	1577
Estimating of the Distribution Rate of Passenger Flow on Shenyang-Dalian Railway after Operation of Passenger Dedicated Line C. Wang, B.M. Han, F. Lu and H. Li	1581
The Application of Road Safety Audit to Expressway in China H.B. Wu	1586
The Evaluation of Highway Collapse Hazard Based on the Fuzzy Comprehensive Evaluation Method J.L. Yan, Y. Cheng, A.H. Zhang and Y.G. Zhao	1593
Evaluation of Regional Anti-Disaster Ability of Highway Natural Disasters H.L. Qi, W.P. Tian and J.C. Li	1598
Traffic Carrying Capacity and Improving Measures of Shenzhen L.S. Wu	1605
Road Traffic Crash Accident Distribution Law Analysis in China Y.P. Li, Z. Cao, L. Feng and Z.G. Yang	1611

Modification of Traffic Wave Theory and the Development of a New Stop-Wave Model Y.H. Jia, J.P. Wu and Y.M. Du	1615
Effect of Multi-Slowdown Sections on Traffic Flow Y.H. Fan, H. Kuang, G.X. Zhang, L.J. Kong and X.L. Li	1619
Research of Signalized Intersection Delay Problem by Time Series and Queuing Theory L. Xue	1623
Study of Travel Time Prediction by Using Online ATIS and Probe Vehicle in Beijing B.Y. Song, J.P. Wu and Y.M. Du	1627
Heterogeneous Drivers Car-Following Model and Stability Analysis J.S. Pan and L.D. Zhang	1631
A Study of Matching of Driver's Ability with Task in Traffic System B. Chen, C. He and J.B. Wang	1637
Predicting Pedestrian Conflict Avoidance Behavior during School Commute Time M.W. Liu, S.Q. Cao, L.Z. Zhang and T. Sumi	1641
Feasibility Study of Traffic Signals at Intersections in Peshawar, Pakistan R. Khan, G. Dastagir, O. Shahid, Z. Ahmed and B. Alam	1645
The Assessment Index System for Traffic Simulation Study in China H.S. Ru and D.P. Peng	1650
Vehicle Travel Time Prediction in Spatio-Temporal Space Q. Li, W.H.K. Lam and M.L. Tam	1662
Identify Intersections, Curves and Bifurcation Junctions from GPS Traces K.H. Su, H.F. Wang, Y. Zhang and H. Cheng	1666
Traffic Incident Duration Prediction Based on K-Nearest Neighbor Y. Wen, S.Y. Chen, Q.Y. Xiong, R.B. Han and S.Y. Chen	1675
Simulation and Analysis of Highway Traffic Accident Based on VISSIM J.Q. Shi and L. Cheng	1682
Asymptotic Tracking Control of Freeway Traffic Density via Ramp Metering X.H. Fan and Y.F. Ju	1686
Traffic Accident Detection of Optimal Sensor Placement Algorithms M. Yang, Q.S. Wu, L. Bai, L.X. Wei, B. Li and R. Gao	1691
An Evaluation Model for Traffic Guidance Measures of the Urban Central Commercial District and its Application M. Cui, T.X. Cheng and J.Z. Chen	1695
System Safety Analysis and Strategy Research on Truck Rear-End Accidents Q.G. Cao, L.H. Zhao, N.X. Gao and P. Chen	1700
Level of Safety on Two-Lane Undivided Rural Highways G. Guido, A. Vitale, V. Gallelli and G. Figliomeni	1705
Evaluation Model and Method for Comprehensive Benefit of Water Transport X.B. Fan, D. Wang, C.F. Shi and D. Zhang	1711
Research and Evaluation on the Coordinated Control System in Urban Trunk Road Contained Pedestrian Crossing H.T. Chang and J. Bi	1716
Optimization of Variable Guiding Lanes'Function at Signalized Intersections H. Lin, N. Zhang and J. Chen	1721
Optimization of Signal Timing for the Mixed Traffic Flow in Vissim Simulation Environment J.G. Qiao, P. Hu and D. Yu	1726
An Improved Method of Traffic Control Period Division for Intersection Based on Signal Cycle Calculation L.L. Dai, Z.L. Sun, D.B. Liu and Y. Li	1731
Study of Transit Priority Strategies on Intersection under Multi-Restrictions L.Y. Wei, R.H. Wu, L.L. Zhang, J. Sun and Z.L. Wang	1736
Road Accident Analysis Factors H. Esmaeeli, I. Abbaszadehfallah, O. Bin Chepuan and S.H. Hosseini	1741
Research on Traffic Flow Redistribution Algorithm under the Traffic Accident Y.C. Zhu, W.Y. Li, Y. Zhang and T. Wang	1747
Equilibrium Assignment Model with Uncertainties in Traffic Demands A.W. Kuang and Z.X. Huang	1751

Chapter 12: Urban Transportation Planning and Management

Financing Strategies of China's Indemnificatory Housing Construction Based on REITs Mode	
Y. Zhang and Q. Zhang	1761
Service Area Delimitation of Regional Highway Passenger Transport Hub Using Random-Utility-Based Weighted Voronoi Diagram	
X.C. Du, X.C. Guo, X.H. Zhang and Q.Y. Ma	1765
Research on Pedestrian Simulation for Distribution Space below Rail Lines of High-Speed Railway Station - Take Hefei South Railway Station for Example	
Y.D. Zhu, J. Shan, P. Yan and W.J. Chang	1771
Study on the Optimal Improvement of the Bus Station	
W.H. Jiang, X.X. Wang and H.F. Lin	1776
A Learning Model of Passenger's Path Choice in Urban Rail Network Based on Bayesian Method	
S.M. Du, Q. Luo, Y. Zheng and L.Y. Kong	1782
Speculation of the Barrier-Free Design about Humanization and Generalization in Urban Transportation Hubs	
X. Zhang and C.Y. Li	1787
Simulation Model of Passenger Transfer Behavior in Metro Station	
Q. Zhang and B.M. Han	1791
Study on the Secondary Starting Model Used in a Large Y-Shaped Intersection	
J.G. Guo, M.H. Qiu and B.T. Chen	1797
Safeguard System of Henggang Depot and Cover Property of Shenzhen Metro	
K.D. Liu, J. Cao and J. Hu	1803
The Innovative Financing Model for Electronic Bus Development	
Z.W. Zhu and S.M. Ou	1808
Study on Urban Rail Transit Platform Aggregation Passenger	
F.F. Wang, X.Y. Zhang and G. Wang	1812
The Analysis of Urban Residential Activities Based on Taxi GPS Data	
C. Li	1816
Automatic Toll Collection System of Parking Based on Internet of Things	
R.C. Sun, Y. Piao, Y. Wang and H. Wang	1820
Through the Analysis of the First Stage Project of Shenyang Subway Line One, Summarizing Effective Measures of Reducing Cost of Subway	
L.X. Li and P. Wang	1824
Study on the Reasonable Scale of the Urban Rail Transit Network: A Case of Xi'an City	
X. Xin, Y. Wu, Y.Y. Guo and T. Song	1829
Taxi Operation and Management System Based on Distributed Only Taxi Stations Solving Strategy	
L. Zhao and J.P. Xing	1833
Countermeasure Analysis of the Resident Travel Characteristics in Large Scale Community in China - Taking Tiantongyuan as an Example	
Z.F. Yang, L.S. Sun, S.W. Wang and J. Rong	1837
Development an Urban Rail Transit Network Scale Model	
X. Xin, Y.Y. Guo, Y. Wu and T. Song	1843
The Evaluation of Public Transport Development in Fuzhou City	
A.X. He	1847
The Optimal Designs in Time and Space of Signalized Intersection under Traffic Tide Phenomenon	
P. Wang, Y.Y. Wu, X.D. Wang and J. Chen	1851
The Research of Public Traffic Safety Evaluation System	
P. Chen, X. Liu and J.G. Qiao	1855
Integration of Public Transport and Bus Rapid Transit System	
D.W. Wang, X.N. Zhu and H.Y. Wu	1860
Study on Urban Tunnel CO Control Criteria Based on Human Capacity	
Y. Liu, J.P. Gao and M. Tang	1864

The Optimization Method to Transfer Bus Routes for Rail Transit Terminal Station S. Zhang and W.S. Liu	1869
Merging Gap Acceptance at Midblock U-Turn Facility (A Case Study on Multilane Divided Highway in Malaysia) I. Abbaszadehfallah, H. Esmaeeli, O. Bin Chepuan and S.H. Hosseini	1876
A Design Principle Analysis of Harmonious City Bus Station J. Li	1880
An Optimized Design Scheme for Roundabout Traffic Management Q. Xia and L. Shi	1884
AHP-Based Fuzzy Evaluation System of Municipal Transportation Efficiency J. Zhang and H.L. Liu	1890
Model of Urban Road Congestion Pricing Based on Game Theory L.L. Ding, Z.W. Wang and L.Y. Li	1895
Evaluation on Urban Public Transit Operational Level of Service Based on Public Transportation Priority Strategy Y. Bian, L. Zhao, J. Rong and J.C. Weng	1900
Transit Station Service Level Research Based on Fuzzy Comprehensive Evaluation S.W. Wang, L.S. Sun, J. Rong and Z.F. Yang	1906
Comprehensive Pricing Model of Urban Traffic Air Pollution Based on Bi-Level Programming Z.B. Zhao	1913
Algorithm of Estimating Alighting Bus Stops of Smart Card Passengers Based on Trip-Chain J. Chen and Z.F. Wang	1918
Influence Models of Urban Road Network Operation Performance Base on Spatial Autocorrelation Theory J.C. Weng, W.J. Zou and J. Rong	1922
Fuzzy Comprehensive Evaluation for Development Status of Urban Bus Rapid Transit (BRT) in China L. Chi and L. Lei	1930
Method to Determine Pedestrians Level of Service for Unsignalized Intersections Y. Bian, L. Jian and L. Zhao	1936
City Intersection Waiting Area Example Analysis and Simulation Z. Liu and S.P. Jia	1944
Study on the Interaction of Urban Planning Factors and Traffic Mobility in Gifu City by Using Historical Map, Statistics and Person Trip Survey Data M. Guo and F. Kurauchi	1950
Methodological Approach for Evaluation of Roundabout Performances through Microsimulation R. Vaiana, V. Gallelli and T. Iuele	1956
Study on Vehicles Speed Discreteness on the Road of Urban-Rural Ecotone Y. Li	1967
Research on the Improvement Schemes of Irregular Intersection W.B. Zhang, B. Wang and H. Genesis	1971
Research on the Influence of Last Digit Restriction to the Traffic Flow Characteristics H.H. Du and M. Pan	1976
Traffic Behaviors Simulation under Congestion Pricing Revenue Redistribution Strategy Z.B. Zhao and Y. Tian	1982
Study of the Effectiveness of Metro Transfer System in Beijing Based on the Result of SP Survey X. Ji, C.F. Shao, X.P. Shen and Y. Zhao	1988
Operation Organization at Urban Rail Transit Station under Large Passenger Flow Q.M. Tang, L.P. Shen and X.Y. Tang	1995
On Building Low-Carbon Public Transport System Y.F. Li	2001
Multi-Agent Simulation of Emergency Evacuation on the Sidewalk P. Chen, S.Y. Zhu, L.J. Xu, X.F. Ma and Z.G. Du	2005

Traffic Survey and Characters Analysis of Slow Traffic in Xi'an Q.P. Wang and Q. Hao	2009
The Impact Analysis of Signal Intersection Right-Turn Motor Vehicles on Straight Bicycles L. Wang and S.P. Jia	2014
Optimal Train Size and Headway for Urban Rail Transit System X.J. Liu, C.M. Mi, Y.Y. Wang and W.V. Shi	2020
Study on the Public Transport Routes under the Principle of Public Transport Priority H.Y. Cao and Q.L. Liang	2024

Chapter 13: Vehicle Engineering

The Exploration and Research of CRTS I Slab Ballastless Track Used in the Freight Lines D.H. Peng, Z.S. Wei and J.F. Liu	2031
Aerodynamic Simulation of the Air Flow beneath the High Speed Train Y.B. Liu and Z.M. Liu	2035
A Multi-Input FFFB Control Algorithm for Railway Rapid Transit Vehicle Speed Regulation C.F. Lin and C.C. Cheng	2041
Coupling Dynamic Analysis of Floating Slab Track in the Urban Rail Transit K. Huang, H.B. Bai, D.W. Li and Y.L. Li	2047
A Comprehensive Analysis and Solution for Traction Motor Speed Measurement in High Speed Train J.Q. Ren, Y.H. Li, Q.X. Ge, X. Ma and L. Zhao	2052
Study on Lane Changing Characteristics of Double-Articulated Bus Based on ADAMS K. Zhao, Q. Li, C. Yang and J.N. Liu	2058
Safe Speed in Bridge Area and Impact Determination for Pier N.Y. Fan and X.P. Liu	2064
Design and Calculation of Double Buoys Mooring System in Estuary of Yalu River G.Y. Shi, J.X. Yang and W.F. Li	2071
Simulation Analysis of W-Beam and Highway Bus Based on ADAMS Y. Zhang, W.Y. Li and Y.C. Zhu	2076
CGSA Control Methodology Applied to Ship Integrated Rudder and Fin Stabilization System W. Guan, Z.J. Su and G.Q. Zhang	2080
Research and Design of Network System for LIM Rail Transit Vehicle N.Z. Cheng, Y.H. Li, Q.X. Ge, R.H. Zhang and K. Wang	2086
Reliability Analysis of Vehicle Equipment Based on Bayesian Method Y.F. Tang, H.M. Li, X.K. Liu and S.Q. Liu	2091
Parameter Design of Powertrain and Experimental Verification of Pure Electric Vehicle J.H. Zhang, F.L. Yue, N.H. Zhou and C.M. Zhao	2097
Dynamic Modeling of the Torsional Vibration of the Slewing Mechanism of a Hydraulic Excavator X.J. Yang, Z.H. Wu, Z.J. Li and G.W. Cai	2102
Multi-Body Dynamics Simulation and Finite Element Analysis of the Car's Sub-Frame J.M. Li, C.Y. Sun, Z.C. Yang and Z.X. Yi	2107
LVQ Neural Network Based Driving Cycles Recognition for Hybrid Electric Vehicles S.J. Xu	2113
Control Strategy of Vehicle Suspension Damping System Based on MATLAB Y.Z. Men, H.B. Yu, X.S. Li and Y.W. Li	2117
Structural Optimization of a Heavy-Duty Truck Based on a Virtual Prototype Model S.H. Li, C.S. Jiang and J.Y. Wu	2121
Study on Optimization of the Diesel Engine Controlling Parameters Based on Genetic Algorithm Q.G. Luo, H.B. Liu and Q. Ma	2125
New Online Detection Method of State of Charge of Car Batteries L. Bei, Z. Di and L.L. Du	2130

The Simulation for Automobile Power Performance and Fuel Economy W. Chen	2135
Further Development of Exterior Design in Rail Transport Vehicle by Using New Materials T. Huang and H. Yang	2139
On the Dynamic Characteristics of Swinging Damaged Rectangular Vessels - An Analysis Employing Collaborative Simulation Based on MATLAB/FLUENT A. Li, J.Y. Pu and Y. Hou	2145
A Rectangular Energy Absorbing Box with Better Energy Absorption Effect and the Study of its Energy Absorption Factors C. Lin and X.H. Zhang	2152
A Numerical Method of the Electromagnetic Force for the Electromagnetic Track Brake S.L. Lu, Y.F. Gu, S. Chen and S. Wang	2159
Design and Finite Element Modal Analysis of Torque Feedback Subsystem in Automobile Steer by Wire System L.Y. Yu, W.Z. Zhao and J.B. Yi	2163
The Running Comparative Analysis of the LNG Bus and the Fuel Oil Automobile in Plateau Region Z. Cao, Y.P. Li, F.S. Sun, L. Feng and H. Gong	2168
Optimization of Large Vessels Principal Parameters Based on Hybrid Particle Swarm Optimization Algorithm W.Q. Wang, S. Huang, Y.H. Hou and Y.L. Hu	2172
Landing Performance Optimization Algorithm of Civil Aircrafts H.Y. Chen and W.T. Luo	2176
The Turning Radius Analysis for Pneumatic Beam Transport Trailer of Principal and Subordinated Vehicle Model with Combination of Four-Wheel Steering and Articulated Frame Z.J. Sun, X.F. Yan and L.J. Han	2181
Brake Performance Testing and Analyzing of Light Commercial Vehicle A. Xu and X.M. Qiao	2188
Design and Simulation on the Powertrain of Plug-in Hybrid Electric Vehicle D.R. Tan, C.Y. Dong and W. Jing	2192
The Effect of Icing of Sea Spray on Ship Structure in Ice Zone F.M. Yang and A.F. Zhang	2197
Flight Separation Research Based on the Aircraft Wake W.J. Pan and J.Y. Li	2201
Game Model Solution of Aircraft Deicing Operation Scheduling Based on Shapley Value Z.W. Xing, Z. Ren and G.Q. Tang	2208
Simulation and Analysis of Leveling and Lifting Electric Liquid Servo System of Tamp Train Based on MATLAB X.Y. Wang	2214
Preliminary Study on Maneuvering Motion Pattern of Unmanned Composite Trimaran Ship Model J. Cui, S.L. Yang and H.T. Xu	2218
Molding and Optical Performance Simulations of a New Plastic Grating Lens for an Asymmetric LED Fog Lamp Y.C. Chen, Y.C. Wang and S.C. Tseng	2223
Emission Characteristics of Ethanol Blending Fuels from a Laboratory Gasoline Engine T.N. Wu, C.P. Chang, T.S. Wu and Y.H. Shen	2227
Construction of Battery Swap Station for Electric Passenger Car R.Y. Niu, X.Y. Yin and M.Y. Zhao	2231
Research and Design of Electric Vehicle Operation Management System C. Liu, B. Li, Q.C. Chen and J.Y. Lin	2237
Improvement of Thermal Characteristic of Vehicle Cabin Roof for Energy Saving Purpose N.V. Lan, C.R. Chen and H.M. Chou	2242
Research on Pose Estimation for Electric Vehicle's Fast-Swap Battery Box Based on Visual Information Y.M. Wu, S. Liu, G.Y. Zhang, X.Y. Yin, M.Y. Zhao and Z.Y. Lu	2252
