## Preface and Organizing Committees

## Chapter 1: Advanced Material Science and Engineering, Material Processing and Manufacturing Technology

|                                                                                                                                                                                                                                           |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Application of Pico-Second Laser on Low-K Wafer Dicing</b><br>S.J. Wu and W.V. Chao                                                                                                                                                    | 3   |
| <b>PZT Thin Films Deposited by RF Magnetron Sputtering</b><br>S.F. Hwang and W.B. Li                                                                                                                                                      | 8   |
| <b>Study on Impact Protection Properties of Titanium Alloy Using Modified SHPB</b><br>J. Liu, J.X. Liu, H.S. Ding, S.K. Li and Y.M. Luo                                                                                                   | 14  |
| <b>Mathematical Simulation of Membrane-Absorption for H<sub>2</sub>S Capture from Nature Gas</b><br>L. Ma, S.L. Wang, J. Wang, E.T. Li and X. Cao                                                                                         | 20  |
| <b>Histomorphometric Analysis: Effects of Simvastatin on Bone Mass, Microarchitecture and Turnover in Normal Rat</b><br>F.M. Tian, L. Zhang, H. Zhang, J. Zheng, D.C. Han and F. Yang                                                     | 26  |
| <b>Fabrication of TiO<sub>2</sub> Nanotube Arrays in Ethylene Glycol Electrolyte by the Electrochemical Anodization Method</b><br>R. Liu, L.S. Qiang, W.D. Yang and H.Y. Liu                                                              | 31  |
| <b>Investigations of Oxy-Fuel Combustion Characteristics and Oxygen Permeation Process in a Stagnation Flow ITM Reactor</b><br>M. Nemitallah, M.A. Habib and R. Ben-Mansour                                                               | 35  |
| <b>Fluid to Fluid Modeling for Post Dry Out Using Dimensional Analysis and Energy Scaling</b><br>M. Nemitallah and M. El-Nakla                                                                                                            | 42  |
| <b>The Effect of Radiation on Oxy-Fuel Combustion Characteristics in Microchannels</b><br>R. Ben-Mansour, M.A. Habib and P. Ahmed                                                                                                         | 49  |
| <b>Analytical Evaluation of Al 6082-T6 Weld Zone Using Randomised Mixing Material Model</b><br>D.Y. Kim, W.J. Kang, H.M. Cho and S.S. Cheon                                                                                               | 55  |
| <b>Additional Aging Effect after Carbonation Process of Fly Ash Based Eco-Materials</b><br>Y.T. Kim and J.Y. Park                                                                                                                         | 61  |
| <b>Effect of Pulsed Electron Beam Treatment and Hydrogen on Properties of Zirconium Alloy</b><br>N.S. Pushilina, E.N. Stepanova, E.V. Berezneeva, A.M. Lider, I.P. Chernov and S.V. Ivanova                                               | 66  |
| <b>Design Optimization of Composite-Insulated Telescopic Aerial Boom</b><br>D.P. Hong, B.K. Lee, C.G. Park, S.H. Wang, S.J. You and Y. Hong                                                                                               | 72  |
| <b>Effect of Minor V Addition on Al<sub>88</sub>Y<sub>7</sub>Fe<sub>5</sub> Amorphous Alloys</b><br>H.W. Yang, M.J. Tan, R.D. Li and J.Q. Wang                                                                                            | 76  |
| <b>Structure and Properties of Zirconium Alloy after Modification by Pulse Ion Beam</b><br>E.V. Berezneeva, N.S. Pushilina, D.V. Berezneev, I.P. Chernov, A.M. Lider and M. Kreoning                                                      | 82  |
| <b>Effect of Sintering Conditions on the Bloating Property of Artificial Aggregates Made from Dredged Soil</b><br>S.G. Kang and S.N. Jo                                                                                                   | 86  |
| <b>Investigation of Hydrogen Distribution from the Surface to the Depth in Technically Pure Titanium Alloy with the Help of Glow Discharge Optical Emission Spectroscopy</b><br>A.M. Lider, N.S. Pushilina, V.N. Kudiarov and M. Kroening | 92  |
| <b>Experimental Investigation of CO<sub>2</sub> Separation from Hard Coal Flue Gases by 100 cm<sup>2</sup> Molten Carbonate Fuel Cell</b><br>J. Milewski, W. Bujalski, M. Wołowicz, K. Futyma, J. Kucowski and R. Bernat                  | 97  |
| <b>Oxidic Composite for Dental Purposes: Effect of the Laminin 1 Adsorption on Cells Growth</b><br>M.G. Faga, F. Mussano, S. Carossa, A. Vallée, G. Martra and S. Coluccia                                                                | 104 |
| <b>Effects of Substituting Ni with Mn on Structure and Hydrogen Storage Characteristics of as-Spun Mg<sub>2</sub>Ni-Type Alloys</b><br>Y.H. Zhang, C. Xu, C. Zhao, H.T. Wang, T. Yang and D.L. Zhao                                       | 109 |

|                                                                                                                                                                                                                                                |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Abrasion Resistance of Alumina-Titanium Dioxide Coating at High Temperature</b><br>Z.F. Cheng, H.S. Ding, H. Rong and L.G. Zhao                                                                                                             | 115 |
| <b>The Study on the Removal of Ammonia Nitrogen in Wastewater by Thin Film Coating Photo-Catalytic Oxidation Process</b><br>H.J. Joo, J.S. Choi, D.W. Kwon and S.C. Hong                                                                       | 119 |
| <b>Modeling Wood Density of Larch Using Random Effects Models</b><br>Y.B. Liu and L.C. Jiang                                                                                                                                                   | 124 |
| <b>A Comparative Study on Electrochemical Behavior of (La,Sr)FeO<sub>3</sub> and (La,Sr)FeO<sub>3</sub>-(La,Sr)MnO<sub>3</sub> Anodes for Solid Oxide Electrolysis Cells</b><br>J. Wang, Y. Zhang, W.L. Guo, T.X. Liang, C.S. Deng and J.M. Xu | 128 |
| <b>Solid State Bonding of CuCrZr to Duplex Stainless Steel</b><br>H.S. Lee, J.H. Yoon, J.T. Yoo and J.U. Choi                                                                                                                                  | 136 |
| <b>The Limiting Dome Height Tests and Formability of Magnesium Alloy Sheet AZ31B</b><br>X.W. Ma, F. Wang and G.Q. Zhao                                                                                                                         | 140 |
| <b>Influence of Substrate on Structure and Magnetic Properties of Bi<sub>0.9</sub>Nd<sub>0.1</sub>FeO<sub>3</sub> Thin Films by Radio Frequency Magnetron Sputtering Method</b><br>L.L. Li, Q.X. Liu, Y. Zou, X.G. Tang and Y.P. Jiang         | 146 |
| <b>Reaction of Magnesium Hydride with Water to Produce Hydrogen</b><br>C.H. Chao and T.C. Jen                                                                                                                                                  | 151 |
| <b>Nitric Acid Activated Carbon Aerogels for Supercapacitors</b><br>Y.J. Li, X.Y. Ni, J. Shen, D. Liu and N.P. Liu                                                                                                                             | 158 |
| <b>Research on the Elastic Property of Three New Superhard Materials</b><br>F. Li, Q. Hui, J. Ao, J. Wang, C.M. Li and Z.Q. Chen                                                                                                               | 165 |
| <b>Optical Properties of Films of Graphite Oxide, Reduced Graphite Oxide and its Intercalated Compounds with Ammonium Dodecahydro-<i>closo</i>-Dodecaborate</b><br>A.A. Karpenko and V.I. Saldin                                               | 170 |
| <b>Enhanced Photocatalytic Activity of TiO<sub>2</sub>/Graphene Oxide Nanocomposites Prepared by the Sol-Gel Method</b><br>C.H. Cao                                                                                                            | 176 |
| <b>Composite Anisotropic Conductive Film</b><br>C.M. Lin                                                                                                                                                                                       | 182 |
| <b>Rapid Discrimination of Fermented Cordyceps Mycelium Powder by Near-Infrared Spectroscopy (NIRS)</b><br>N. Xu, W.Q. Luo and H.Q. Yang                                                                                                       | 189 |
| <b>Supercontinuum Generation in Nonperiodic Photonic Crystal Fibers and its Application in Frequency Metrology</b><br>W.J. Ling, K. Li and Y.Y. Zuo                                                                                            | 194 |
| <b>Nonlinear Oscillations of Functionally Graded Materials Rectangular Thin Plates with Parametrical and External Excitations</b><br>X.L. Bian and S.B. Li                                                                                     | 200 |
| <b>High Flux Nanofiltration Membranes Prepared by Dynamic Self-Assembly of PSS-<i>co</i>-MA and PAH for CuCl<sub>2</sub> Removal</b><br>H.Y. Deng, Q.C. Chen, Z.G. Le, B.K. Zhu and Y.Y. Xu                                                    | 204 |
| <b>Finite Element Analysis for the Influence of Nanoparticles on the Thermal Residual Stress in Fiber Reinforced Composite</b><br>X.L. Wang, Z. Luo, H.J. Jing and H.A. Wu                                                                     | 212 |
| <b>Study of the Effect of MoS<sub>2</sub> and PTFE Based Coatings on Adhesive Wear of Stainless Steel</b><br>T. Thana and K. Tuchinda                                                                                                          | 216 |
| <b>Graphene Oxide Oxidized by NaClO as a Highly Effective Adsorbent for Fast Removal of Dye Rhodamine B</b><br>J.Y. Chen, Y. Liu, J.J. Gou and Y.M. Hao                                                                                        | 223 |
| <b>Rare Earth Luminescent Materials in Landscape Lighting Application</b><br>L. Zhu, L. Chen and W.D. Tan                                                                                                                                      | 227 |
| <b>Effect of Electron Beam Welding on Microstructure and Mechanical Properties of Spray-Deposited Al-Zn-Mg-Cu Alloy</b><br>F. Wang, Y.T. Zuo, B.Q. Xiong, Y.A. Zhang, H.W. Liu, Z.H. Li and X.W. Li                                            | 230 |
| <b>Temperature Analysis for Circumferential Electric Discharge Milling and Mechanical Grinding Compound Machining of SiC Ceramic</b><br>R.J. Ji, Y.H. Liu, C. Zheng, Y.Z. Zhang and F. Wang                                                    | 236 |

|                                                                                                                                                                                 |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Effect of Fast Prototyping Means on the Fatigue Strength of High Carbon Steels</b><br>R. Puff and R. Barbieri                                                                | 241 |
| <b>A Design Concept of an Orthopedic Bone Drilling Mechatronics System</b><br>V. Kotev, G. Boiadjev, T. Mouri, K. Delchev, H. Kawasaki and T. Boiadjev                          | 248 |
| <b>Creep Behavior of 409L and 436 Ferritic Stainless Steels Applied for Automotive Exhaust System</b><br>H.Y. Chiu, C.M. Kuo and H.S. Wang                                      | 252 |
| <b>Numerical Simulation on Temperature and Stress Field of Multi-Pass Welding of Thin Stainless Steel Plate</b><br>Y. Chen, J.M. Han, J. Tan, H.F. Du and J.Q. Wang             | 258 |
| <b>Effect of Heat Treatment on the Microstructure and Hardness of a Newly Developed Plastic Injection Mold Steel</b><br>Y.P. Zeng and W. Yang                                   | 263 |
| <b>The Research of the High Speed Steels Produced by Powder and Casting Metallurgy from the View of Tool Cutting Life</b><br>K. Monkova, P. Monka and D. Jakubčzyová            | 269 |
| <b>A New Model of Predicting the Hydrogen Element in Coal-Fired</b><br>X.Q. Wen and Z.M. Xu                                                                                     | 275 |
| <b>Thermodynamics Study on the Theophylline-Nicotinamide Cocrystal</b><br>J.J. Guo, L.P. Dang and H.Y. Wei                                                                      | 280 |
| <b>Effect of Grain Size and Annealing Condition on Grain Boundary Segregation of Carbon Atoms in ULC Steel</b><br>Y. Cui, A.M. Ji, Y.L. Feng, R.Z. Wang and Q.L. Yong           | 286 |
| <b>What Is the Optimum Cover Factor?</b><br>X.Y. Yang, L. Wang, G.P. Guan, Y.L. Li, L. Peng, Y. Guan, S.L. Zeng and W.M. King                                                   | 292 |
| <b>Effect of Coiling and Normalizing Annealing on the Microstructure of a Newly Developed Cold-Rolled Non-Oriented Electrical Steel</b><br>Y.P. Zeng and H.J. Cui               | 298 |
| <b>Influence of Porosity on the Mechanical Properties of Cu/LDPE Porous Composites for Intrauterine Contraceptive Devices</b><br>M. Ge, X.P. Xia, C. Xiao, L. Xiao and S.Z. Cai | 304 |
| <b>Hydrogen Permeation Behavior through HSLA Steels and its Implications on Hydrogen Embrittlement Susceptibility</b><br>T.M. Zhang, W.M. Zhao, W. Guo and W. Yong              | 310 |

## **Chapter 2: Applied Mechanics and Mechanical Engineering**

|                                                                                                                                                           |     |

| <b>Numerical Study on Aerodynamic Characteristics of NACA0015</b><br>S.J. Lee, E.C. Jeong and H.C. Lim                                                                                      | 640 |
| <b>Policy-Combination Oriented Optimization for Supply Chain Simulation</b><br>W.Z. Tan, X. Li and Y.T. Chai                                                                                | 646 |
| <b>Design and Implementation of the Simulation Information System of Marine Oil Spill</b><br>Z.D. Rong, B. Yang and H.P. Qu                                                                 | 652 |
| <b>Interface Design of the Location-Based M-Tourism Application</b><br>K.W. Su, C.H. Wang, P.H. Chen and Y.Y. Wu                                                                            | 658 |

## **Chapter 4: Control and Automation, Applications of Tracking and Information Technologies**

|                                                                                                                                                                   |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Tracking Control of an Uncertain MEMS Resonator via Adaptive Terminal Sliding Mode Control</b><br>C.C. Yang and R.H. Guo                                       | 665 |
| <b>Performances Analyzing of Parallel Inverter System Based on an Improved Fuzzy Control Method</b><br>H.L. Wang, J. Wang, M.Q. Wang, X.R. Cui, L. Lin and Z. Sun | 671 |
| <b>Energy Information Communication Technologies for Smart Home Applications</b><br>H.C. Sun, Y.C. Huang and H.F. Chen                                            | 679 |
| <b>A Method to Identify Bird Constitutive Model and its Parameters</b><br>Y.K. Zhang, Y.L. Li and H.B. Zhang                                                      | 686 |
| <b>Research and Development of Quality Traceability System Based on Intelligent Services for Bee Products</b><br>Y.G. Kong, X.F. Hu, T.J. Chen and Z.T. You       | 694 |
| <b>The Design of Bee Products Quality Tracking System Based on Android Smartphone</b><br>Y.G. Kong, T.J. Chen, X.F. Hu and Z.T. You                               | 700 |
| <b>Mean Shift Tracking with Advanced Background-Weighted Histogram</b><br>A.Y. Alemu, Z.J. Pei and J. Zhang                                                       | 706 |
| <b>Design and Implementation of Testing and Management System on Special Information Security Products</b><br>Z. Xu and H.P. Qu                                   | 711 |
| <b>Reliability of Duffing-van der Pol Oscillator with Delayed Feedback Control under Wide-Band Noise Excitation</b><br>T. Zhang, C.S. Feng and Q.Y. Wang          | 717 |
| <b>Integrated Design of Feedback Controller and UIO: An LMI Solution</b><br>Y. Liu, A. He, B. Wang and X. Wang                                                    | 723 |
| <b>The Design of Simultaneous Location and Mapping System for Intelligent Vehicle in Indoor Environment</b><br>L. Wang, X.L. Lu and Z.H. Cao                      | 729 |
| <b>Building Cyberinfrastructure for Data Management and Sensor Control in Ocean Observation</b><br>X. Li, M. Jin, Z.Y. Liu, R.S. Huang and Z.H. Guo               | 735 |
| <b>Design of Prototype System for Seafloor Observatory Network</b><br>X. Li, F.X. Gao, L.F. Zhou and T.X. Yan                                                     | 740 |

|                                                                                                                                                                  |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Development of an Omnidirectional AGV with Global Localization System</b><br>C.T. Leng, J.J. Du, Q.X. Cao, X.X. Zhu and Z. Huang                              | 746 |
| <b>Sensorless Vector Control System Design of Permanent Magnet Synchronous Motor</b><br>Z.L. Liu and H.B. Ao                                                     | 752 |
| <b>Linear-Matrix-Inequality-Based Fault Diagnosis for Gas Turbofan Engine Using Eigenstructure Assignment Principle</b><br>Y. Liu, D.L. Tan, B. Wang and X. Wang | 759 |
| <b>Automated FE Analysis for Heat Sink of LED Modules</b><br>J.S. Lee, D.K. Park and Y.J. Choi                                                                   | 765 |
| <b>Design of Bamboo Strip Detection System Based on Labview and Matlab Mixed Programming</b><br>L.P. He, S.X. Song, L. Liu and X.M. Jiang                        | 772 |
| <b>Research of Solar Photoelectric Micro-Power Supply on Chip</b><br>Y.T. He, L.X. Xiao and R.M. Liu                                                             | 776 |
| <b>Hybrid Differential Evolution for Power Economic Dispatch Problems Considering the Incorporated Cost Model</b><br>C.L. Chiang                                 | 782 |
| <b>An Overview of the Recommender System</b><br>L. Zhao, R.R. Yang, M. Zhai and F.M. Liu                                                                         | 787 |
