# **Preface**

2013 2nd International Conference on Chemical, Mechanical and Materials Engineering (CMME 2013) will be held on January 20-21, 2013, Melbourne, Australia. CMME 2013 will be the most comprehensive conference focused on the various aspects of advances in Chemical, Mechanical and Materials Engineering. This Conference provides a chance for academic and industry professionals to discuss recent progress in the area of Chemical, Mechanical and Materials Engineering.

Chemical engineering is the branch of engineering that applies the physical sciences (e.g., chemistry and physics) and/or life sciences (e.g., biology, microbiology and biochemistry) together with mathematics and economics to processes that convert raw materials or chemicals into more useful or valuable forms. In addition, modern chemical engineers are also concerned with pioneering valuable materials and related techniques – which are often essential to related fields such as nanotechnology, fuel cells and biomedical engineering. Within chemical engineering, two broad subgroups include 1) design, manufacture, and operation of plants and machinery in industrial chemical and related processes ("chemical process engineers"); and 2) development of new or adapted substances for products ranging from foods and beverages to cosmetics to cleaners to pharmaceutical ingredients, among many other products ("chemical product engineers").

Mechanical engineering is a discipline of engineering that applies the principles of physics and materials science for analysis, design, manufacturing, and maintenance of mechanical systems. It is the branch of engineering that involves the production and usage of heat and mechanical power for the design, production, and operation of machines and tools. It is one of the oldest and broadest engineering disciplines. The engineering field requires an understanding of core concepts including mechanics, kinematics, thermodynamics, materials science, structural analysis, and electricity. Mechanical engineers use these core principles along with tools like computer-aided engineering and product lifecycle management to design and analyze manufacturing plants, industrial equipment and machinery, heating and cooling systems, transport systems, aircraft, watercraft, robotics, medical devices, and others.

Materials science is an interdisciplinary field applying the properties of matter to various areas of science and engineering. This scientific field investigates the relationship between the structure of materials at atomic or molecular scales and their macroscopic properties. It incorporates elements of applied physics and chemistry. With significant media attention focused on nanoscience and nanotechnology in recent years, materials science has been propelled to the forefront at many universities. It is also an important part of forensic engineering and failure analysis. Materials science also deals with fundamental properties and characteristics of materials.

The Organizing Committee thanks the sponsors, government agencies and sponsors that contributed definitely to the conference success.

Jun Zhang and Qi Luo

# **CMME 2013 Organizing Committee**

## **Honorary Chair**

Wei Lee, Melbourne ACM Chapter Chair, Australia

#### **General Chairs**

Jun Zhang, Huazhong University of Science and Technology, China Minli Dai, Suzhou University, China

#### **Publication Chair**

Jun Zhang, Huazhong University of Science and Technology, China Qi Luo, Wuhan Insitute of Technology, China

## **Organizing Chairs**

Khine Soe Thaung , Maldives College of Higher Education, Maldives Biswanath Vokkarane, Society on Social Implications of Technology and Engineering , Maldives

#### **Program Chair**

Dehuai Yang, Huazhong Normal University, China

#### **International Committee**

Minli Dai, Suzhou University, China
Ying Zhang, Wuhan Uniersity, China
Zhenghong Wu, East China Normal University
Tatsuya Akutsu, ACM NUS Singapore Chapter, Singapore
Aijun An, National University of Singapore, Singapore
Yuanzhi Wang, Anqing Teachers' University, China
Yiyi Zhouzhou, Azerbaijan State Oil Academy, Azerbaijan
Khine Soe Thaung, Maldives College of Higher Education, Maldives
Biswanath Vokkarane, Society on Social Implications of Technology and Engineering
Wu Min, Nanchang University, China
Wu Yijin, Huazhong Normal University, China
Yiyi Zhouzhou, Azerbaijan State Oil Academy, Azerbaijan
