

Table of Contents

Preface, Committee and Sponsors

Chapter 1: Practice of Design Engineering and Researches for Industry

A Dynamical Coefficient Mechanics Model for Fatigue Crack Growth under Variable Amplitude Loading L.X. Gu, Z.F. Liu and Z.Y. Xu	3
A Method of Generating High-Precision Offset Frequency Based on Quadrature Phase Shift G.Y. Wang, W.L. Wang, X.H. Li and F. Zhu	8
A Research on the Relationship of Screw Speed and Extrusion Pressure Y.L. Gao, L.X. Liu and J.L. Zheng	13
A Study of the Form Design of Household Medical Care Bed on Kansei Engineering Theory W. Zheng, Q.S. Xie and Y. Jiang	17
A Theoretical Model and Construction of Equipment Spot-Inspection Maintenance System for Coal Mining Z.L. Tan and Y.F. Fang	22
An Exploration on the Innovation Methods of the Printing and Packaging Machinery Based on Simulation B. Gao, X.G. Zhang and J.F. Cai	26
An HCI Spatial Layout and Planning Technique for Ship Curved Block Construction J. Zhou, A.M. Wang and Z.B. Lu	31
Analysis and Research of the Winch System C.P. Zhang, Q.Y. Wang, P. Zhang, P. Yu and W. Lin	36
Analysis of Coppery Gasket in Water-Saving Valve Stamping Processing and Mold Design Z. Wang	41
Analysis of Helicopter Engine Crankshaft Torsional Vibration Based on ADAMS K. Huang and K.L. Wang	45
Analysis of Non-Linear Dynamic on Unsteady Oil-Film Force Rotor-Stator-Bearing System with Rub-Impact Fault G.Z. Liu, Y. Yu and B.C. Wen	49
Analysis of the Screw Thread Connection Strength Based on Nonlinear Finite Element Method F. Sun	55
Analysis of Thermal-Mechanism Coupled Stress Field of a Diesel Engine Cylinder Head Q. Liu, G.Y. Ouyang and P. Zhang	59
Analysis on Fracture Accident of the Roll and Universal Joint X. Wang and C.L. Xu	65
Based on Abaqus of Simulating and Analyzing the Incremental Forming Method of Water Jet L.Y. Zhang and D.H. Li	69
Based on the Cimatron Plastic Shell Mold Design and Processing Q. Guo	73
Based on Workbench Analysis of Load Bearing Properties for the WPC Pallet Z.G. Wei and Z.W. Wang	77
CAD/CAE Integration System of the Excavator Boom K. Zhu, X. Yin and A.M. Ji	81
Cooperative Satisfaction of the Research and Development Team - An Empirical Research on the Green Manufacturing R. Shang, W.C. Yang, Z.J. Fu and X.Y. Tang	85
Co-Simulation of Radar Antenna Azimuth Based on Adams and Simulink H. Zhao, G.H. Wu and W. Zong	89
Crankshaft Fatigue Test and Statistical Distribution of Fatigue Experimental Data Z.M. Wang and P.M. Lv	93

Deflection Computations of the Double Composite Cantilever Beam J. Wei and W.P. Shi	97
Design of 42V Alternator on Automobile Y.Y. Wu	102
Design of Self-Propelled Mobile Stage Vehicle H.Y. Jin and Z.W. Zhu	106
Designing and Simulating of a Spherical Robot Based on Three-Dimensional Technology Z.J. Sun, J.L. Yan, Y.J. Li, C.Q. Li and C. Di	110
Detect Phase Shifter Module of Array Antenna Using the Solar P. Xu, G. Quan, W.Z. Jiang, G.H. Zhang and L.P. Su	116
Dynamic Characteristics of a Rigid Spindle Supported by Water-Lubricated Bearings H.H. Feng	121
Dynamic Research on Vibration-Impact Crushing System of a Unilateral Single-Mass S.H. Ni and Q.G. Chen	125
Dynamics Performance of the Front Drive Shaft with Clearances Y.X. Luo and J. Liu	129
Error Model of the Tangent Method CNC Aspheric Machine Tool Based on Multi-Body System Theory Z.L. Yu, H.T. Yang, B. Yu and L.D. Gu	135
Experimental Analysis of Axial Load Internal Circulation Ball Screw Pair of Friction Torque and the Impact X.M. Kang and L. Wang	139
Experimental Research of Photovoltaic/Thermal (PV/T) Solar Systems Y.T. He, R.M. Liu and J.H. Liu	146
Fatigue Analysis of Vibration Device with 4 Eccentric Axis for Billet Caster J.L. Shi, C.L. Xu, G.Y. Meng and D.D. Ma	151
Five-Axis Machining and Impeller Vericut Simulation Optimization S.H. Xiao, W.C. Zhou and G.X. Fu	155
Flexible Parallel Robot and its Experiment Models Used in FAST W.L. Wang and H.J. Cao	159
Fracture Analysis on the Faucet Valve of HPb59-1 M.Z. Mo, Y. Tan, B. Cao and M. Chen	163
Helicopter Flying Qualities Sensitivity Analysis with Respect to Aerodynamic Configuration S.J. Lv, Y.H. Cao and G.Z. Li	167
High-Performance Power-Driven Design of the Permanent Magnet Direct Drive Wind Turbine P. Wang, Z.T. Wang, S.W. Fan, C.X. Wen, H.F. Zhang and H.Z. Chen	171
HPSO Algorithm of Actuator Placement for Vibration Suppression of Large Flexible Space Structure X.Y. Zhou and J. Zhang	175
Image Transformation for Digital Printing Machine F.L. Yin and B.Q. Huo	180
Improved Analysis on Main Beam of the Double-Beam Crane Y.H. Luo and Y.P. Lou	184
Integral Impeller Multi-Objective Parameter Optimization of High Speed Cutting Based on the Genetic Algorithm Y.L. Huang and J.T. Yuan	188
Kansei Quantitative Analysis and its Application to Drum Washing Machine Apperence Design S. He and J.M. Che	193
Kinematics Analysis of Slice Shearing Machine Work Process J. Wei and W.P. Shi	197
Meshing Stiffness Analysis of Gear Using the Ishikawa Method J.L. Shi, X.G. Ma, C.L. Xu and S.J. Zang	203
Modular Design of Small Marine Aquatic Cutting Machine S.L. Wu, L.Z. Zhang and Y. Zhao	207
Numerical Investigation of Aero Engine Afterburner Fuel Manifold P. Wang, X.S. Liu, Y.J. Lv, B. Xie and G.Q. Liu	210

Numerical Investigation of Primary Combustion Zone of Aeroengine Combustor P. Wang, Y.Z. Li, B. Sun, H. Guo and Y. Chen	214
Numerical Simulation of the Effects of the Nozzle Parameters on In-Cylinder Fuel and Air Mixing Process Q. Liu, G.Y. Ouyang, S.J. An and Y.P. Sun	218
Optimal Design and Experimental Investigation on Air Conditioner Piping System K.L. Su, Z.Y. Zheng, J.H. Wan, Z.M. Wan, C.Q. Huang, J. Liu and Y.D. Wang	222
Parallel Manipulators' Analysis by Transmission Angle J.P. Mei and L.H. Hu	226
Principle and Experiment of Electrostatic Circular Sensor on Turbojet Engine Y. Fu, H.F. Zuo, J. Cai and J.Q. Liu	231
Research on Mechanical Gearbox Transmission Efficiency Test J. Tong and J.J. Zheng	235
Research on Characteristic of Electromagnetic Force of Magnetic Suspension Device with Large Air-Gap X.G. Wang, Q. Liu, Y.J. Zhang and H.H. Chen	239
Research on Grasping Force of New Type Pneumatic Flexible Finger Y.W. Zhao, D.X. Geng, X.M. Liu and J.T. Zhang	245
Research on Mechanism of Overland Flow Losses of Direct-Current Conduction Electromagnetic Pump for Casting X.F. Deng, J.B. Hou, L. Cheng and R.N. Tian	250
Research on Pitting Corrosion Fault Model of Vibrating Screens Rolling Element Bearing X.M. Zhao, B.L. Guo and Z.S. Duan	254
Research on Structure and Kinematics of Hexapod Robot Based on the Pneumatic Flexible Joint D.X. Geng, H. Peng, J.T. Zhang, Y.W. Zhao and G.B. Wu	267
Robust Design Based on Grey Correlation Analysis L. Xue and L.L. Dong	272
Sensibility Analysis and Structural Optimization Design of Vehicle Frame X.L. Deng	276
Study of the Suitability between Artificial Cavity and Traffic Vessel J.S. Li, W.C. Dong and Y.P. Ou	282
Study on High-Temperature Heat Harm Control Technology in Deep Mine X.F. Wang, M.Z. Gao, Q. Wang and Y. Li	287
Study on the Abrasive Wear in a Ball Type Joint of Automotive Drive Shaft J. Liu and Y.X. Luo	291
Study on the Relation between Bore Diameter of the Hollow Screw and Static Stiffness of the Dual-Drive System L. Jin, B. Yan, X.H. Zheng, Y.W. Wang and L.M. Xie	295
Study the Distance and Flow Direction Effect on Air Control between Two Air Curtains C.H. Zhong, X.J. Zhu, W.S. Liu and Z.Q. Yang	300
Tennis Transmitter Design and Parameter Optimization X.H. Gong	304
The Boot Method Analysis of Three-Phase Asynchronous Motor M. Shang, G.M. Lin, Q.H. Guo and Y.T. Sun	308
The Efficiency Analysis of Steam Turbine-Driven Feed Water Pump M.F. Liu and G.L. Lu	312
The Optimization of Process Parameters of Large-Scale SAG Mill X.B. Huang, Y.Y. Huang and D.F. Sun	316
The Simulation Research of Dual Clutch Transmission's Starting Process Based on Dynamic Friction Coefficient M.M. Qiu, H. Zhao and F.M. Sha	320
The Stress Analysis of the Sediment of Screw Conveyor of Decanter Centrifuge R.F. Song, F. Fang, Y.T. Yang and L. Zhao	326
The Testing Data Analysis and Research from Disturbances by Conduction and Coupling of Beidou Navigational Terminal Z.G. Li, X. Chen and K. Zhang	330

The Vibrating Failure Research for One Aero-Engine Z.B. Xie, H.W. Li and J. Xie	335
Thermal Analysis of Edge Illumination Type LED Backlight with Heat Pipe W.H. Guan, Y. Tang, X.R. Ding, B. Liu and L.S. Lu	339
Tooth Surface Contact Stress Analysis of the Straight Bevel Gear Axial Practice J.J. Lou, X.M. Cao and J.S. Jiao	345
Analysis on Lightning Electromagnetic Fields P.C. Zhang, W. He, L.L. Wang and L.F. Ma	350
Analysis on Torsional Vibration Characteristics of Tracked Vehicle Gearbox Y.C. Xu, F.L. Cao, G.Z. Li and J.T. Zhou	354
DBR-Ag Micro-Cavity Organic Solid-State Lasers X.K. Zhao	358
Analysis on Heat-Insulating Property of the New-Type Water Transporting Vehicle Based on ANSYS C.Q. Xu, G.Z. Jia, R.L. Gao, X.B. Ma and X. Wang	362
Design of Ultrasonic De-Burring Machine for Soft Magnetic Ferrite W.T. Qi, H.F. Zheng, C. Wang and H.S. Ma	367
Function Innovation Design Model and its Application in Heating Equipment H. Jin, H.X. Guo, G.Z. Cao and S.N. Wei	371
Heat Transfer Characteristics of O₂/CO₂ Pulverized Coal Boiler Furnace J.Q. Gao, N.N. Xue, X. Sun and H.K. Xing	375
Numerical Research on the Change Regularity of S Series Airfoil Tip Vortex W.M. Wu and Y.J. Dai	379
Relation Formula of Study and Application in the Iproduct Parameterization Design of Pro/E H.J. Zhou	383
Reliability Analysis of a Track Vehicle Gearbox under Mixed Operating Condition P.B. Mou, F.H. Tao, C.Z. Jia and W.L. Ma	387
Reliability Failure Analysis of PCB and its Technological Improvement L.F. Zhu	391
The Effects of Induction Motor Parameters on its Low Voltage Ride through Capability X.N. Li and Y.W. Wang	395
The Modeling and Dynamic Simulation of U-Tube Steam Generator J.Q. Gao, H.K. Xing, X. Sun and N.N. Xue	400
The Research of Demulsifiers's Influence on Oil Emulsion's Rheological Property W.L. Cui, S.X. Li, L.J. Song and Y.S. Li	404
The Research and Application of Piston Hydro-Pulse Test Machine P.J. Wang, X.J. Fang, H.M. Fan and J.H. Chen	409
Numerical Simulation of Random Vibration for Electrical Connectors B. Huang, X.B. Li, Z. Zeng, X. Li and W.H. Fang	416
Static Strength Analysis of Components of Flap Control System for a Certain Type of Aircraft F.Z. Zheng, W.M. Cui and H.J. Li	422
The Feature-Based Parametrized Solid Module and the Dynamic Simulated Research of Medical Chest Z.J. Du, W.Y. Gao, H.H. Kang, C.J. Liu, J. Yang, S.J. Liu, X.J. Sun and F. Tian	427
Dynamics Analysis and Simulation on Load-Unload Bagged Materials Robot K.Y. Zhou	431
Simulation and Calculation of 10.6μm Laser Time Broadening and Space Broadening Characteristics in Near-Earth Dust N.C. Yang, H.X. Wang and Y.Z. Zhu	437
Spudcan-Soil Interaction Analysis of a Jack-up Based on Elastic-Plastic Model J. Zhang, W.X. Tang, H. Qian and J. Cao	441
Squeeze Oil-Film Fluid-Structure Interaction Analysis by the Finite Element Method J. Chen, N. Xi, J.J. Yang and M.L. Zhao	446
Thermal Analysis of Li-ion Battery G.H. Fofana and Y.T. Zhang	450

The Development of Triaxial Seepage Equipment for Negative Pressure at Exit M. Yuan, F. Li, J. Xu, Y.Q. Du, K.W. Ma and B.B. Li	456
Analysis of Friction Effect on Dynamic Characteristics of Artificial Feel System H.J. Xue, H.G. Wu and X.Y. Zhang	460
Design of LED Light Source for Uniform Illumination in Large Area J. Sun and J.W. Zhang	465
Design and Analysis of Hydraulic System of Balancing Device on Top Drive H.W. Wang, Q.Y. Wang, P. Yu, C.P. Zhang and P. Zhang	469
Mass and Stiffness Modifications with Unmodified Eigenstructure Preserving J. Yang, X.S. Lu, J.F. Zhang and H.J. Ouyang	475
Parallel Resonant Power Supply Based on Chip UC3863 N.P. Jiang, Z.J. Ma and P.H. Yin	479
Pre-Processing Techniques of Information Extraction of a Dielectric Sandwich Radome K. Deng, Y. Sheng and Y.Y. Qiu	483
Redesign and Optimization of Structure Using Special Shaped Connection L. Liu, W.J. Li, T. Liu, R.J. Li and W.Y. Jia	487
Research on Entity Model Directly Layering Software Design Based on the Secondary Development of AutoCAD L.R. Fan, Y.Q. Cao and C. Ren	491
A High Efficiency Solar PV Micro-Power Supply Integrated with Wireless Sensor Nodes Y.T. He and L.X. Xiao	495
The Method of Equipment Maintenance Accessibility Evaluation Based on Index Correlation Degree D. Xu, B.Q. Wang, C. Li and X. Wu	500
The Flow Analysis and Numerical Simulation of the Time-Pressure Dispensing System L.H. Deng, Z.L. Chen, X.M. Yang and Z.Y. Chen	504
Research on the Algorithm for Capacitance of Charged Plane Conductors Based on MoM G.Y. Li, J.B. Liu, X.Z. Yu and H.M. Gao	509
Study on a New Modeling Method of Equipment Support Base on Ontology Y.Q. Bai, W.H. Sun and T. Wang	514
Study on Cloud Design Mode and Key Technology for Emergency Equipment J. Chen, G. Guo and Y.G. Zuo	518
Study on the Control Law for Water Trajectory of Unpowered Carrier under Wave Force G. Pan, Y. Shi, P. Wang and X.X. Du	525
The Double Power Flows the Difference Transmit Immediately to the System Development Research Q.Z. Liu	531
The Generation of Three-Phase SPWM Wave Based on FPGA Y. Lu, F.T. Liu and X. Song	535
The Rigid-Flexible Coupling Dynamic Condition Analysis of New Type of Pipe Racking Manipulator Q.Y. Wang, X.P. Wan, Y.B. Sha and C. Piao	539
Visual Fatigue Caused by Tablet PC Based on Critical Fusion Frequency and Eye Blink Frequency C.M. Chen, H. Wang, Y. Tang and X. Zhang	544
Based on the Particle Swarm Optimization of Truck Crane Telescopic Jib Optimization and Implementation G.N. Xu, X.Y. Hou and Q. Dong	548
Optimal Design on Seedling Slot of Industrialized Notoginseng Seedling L. Wang, W.C. Yang, Q. Xi and H. Yang	554

Chapter 2: Applied Materials Engineering

A Study of the Nitrogen-Containing Heterocycles on Copolyimide Properties for Proton Exchange Membranes Y.H. Li, W.J. Wang, Y.F. Chen and L. Wang	563
Absorption and Emission Properties of Bismuth-Doped Silicate Glass B. Xu, X.J. Xu, H.M. Dai, Z.W. Deng and X.Q. Lv	567

Aeroelastic Tailoring of Blended Composite Panels with Lamination Parameters P. Jin, B.F. Song and X.P. Zhong	571
Analytical Model for Strength of Clinched Joint in Aluminium Alloy Sheet H.Y. Yang, X.C. He and Y.Q. Wang	578
Based on Pro/E Design and Assembly of Stamping Flip Composite Mold M.Q. Wu	582
Bipolar Resistive Switching Characteristics of CeO₂ Film Based ReRAM Y.D. Zhu, H.H. Liao and J.J. Tan	586
Characterization of Phthalate Plasticizer from Bottled Beverages by GC-MS Q.J. Sun, L. Li, Z.L. Jiang, S.G. Xin, S.W. Wu and L. Yu	590
Effect of Calcium Addition on the Cast Microstructure of a Kind of HSLA Steel Y. Liu, J.M. Wang, C.L. He and L.Q. Chen	594
Effect of Hydrogen on Size of Cu-Ag Alloy Nanopowders M.M. Zou, K.W. Tian, H.Y. Zhao, W. Huang, Y. Liu, F.J. Shang and H.G. Shi	598
Effect of Matrix Properties on Shear Stress in Composite Reinforced with W Fiber under Loading L.J. Zhu, K.W. Tian, W.L. Shi, C. Yang, Z.M. Wang and H.G. Shi	602
Effect of Nanometer Calcium and Magnesium Oxides Addition on the Inclusions in the Cast Microstructure of X80 Pipeline Steel J.M. Wang, Y. Liu, C.L. He and Y. Liu	606
Effect of Nanometer Magnesium Oxide Addition on the Cast Microstructure of X80 Pipeline Steel J.M. Wang, Y. Liu, Y. Liu and Q.H. Ma	610
Electromagnetic Wave Absorbing Properties of Glass Fiber Reinforced Cement Composites with Special-Shaped Structure Surfaces Y.F. Zhang, W.J. Hao, B.Y. Li, Y.P. Duan and S.H. Liu	614
Failure Analysis and Welding Repair for Reheater Tube Crack of 12Cr1MoV Steel X.F. Zheng, N. Wu, R.G. Xue, W.B. Li, G.Z. Dong, J.F. Zhao, E.S. Chen, P. Sun and Q. Wang	619
Finite Element Analysis of Zirconate Titanate Ceramics Piezoelectric Effect X.X. Qiao, F. Yu and Z.H. Liu	623
Fluorescence Spectrophotometric Determination of Bisphenol A in Plastic Food Packing Materials J.Y. Sun, Q.G. Xu and Q.M. Di	627
High Temperature Annealing Amorphous Hydrogenated SiC Films for the Application as Window Layers in Si-Based Solar Cell R.D. Hong, X.P. Chen, Q. Huang, Y.N. Xie, S.X. Wu, Z.F. Zhang and Z. Wu	631
<i>In Situ</i> Synthesis of TiC-TiB₂ Composites via High Energy Ball Milling and Pressureless Sintering P. Luo, S.J. Dong, Z.X. Xie, W. Yang and A.Z. Yangli	635
Influence of Different Material of Penetrator on Micro-Hardness of Steel Target K.W. Tian, L.J. Zhu, Z.M. Wang, W.L. Shi, M.M. Zou and H.G. Shi	639
Influencing Factors of Flow Rate of Electromagnetic Pump Used to Aluminum Alloy Quantitative Pouring J.B. Hou, X.F. Deng, R.N. Tian and J.B. Hou	643
<i>In Situ</i> Growth of TiB₂ Whiskers in TiB₂-TiC_x Matrix Powder L. Xu, C.Z. Huang, H.L. Liu, B. Zou, H.T. Zhu and J. Wang	647
Microstructure of Spray-Deposited CuCr25 Alloys Preform and its Development during Subsequent Processing H.W. Liu, F. Wang, X.W. Li, Z.H. Li, Y.A. Zhang and B.Q. Xiong	651
Numerical Simulation of Grinding-Hardened Layer's Depth in the Reciprocating Grinding of 45 Steel J.D. Liu, W. Yuan, Z.L. Xu and D.M. Yu	656
Phase Transition and Thermodynamic Properties of OsN₂ under High Pressure Z.J. Fu, L.J. Jia and W.L. Quan	660
Preparation and Characterization of Polyaniline Nanotubes Doped with Different Acid X.L. Bai, J.T. Mei, Z.G. Mu and Y. Bai	663
Preparation of Ferrocene Functionalized Multiwall Carbon Nanotube Nanocomposites and its Electrochemical Behavior Q.X. Ren, T.H. Chi, Y.Y. Sun, L. Feng and M.Y. Ma	667

Preparation of High-Elasticity and High-Modulus Tennis Rubber B.Q. Shi and Y.T. Cai	671
Preparation of Nanosized Fe₃O₄ Powders by Solvothermal Method Z.F. Cui and D.H. Sun	675
Preparation and Character of Inorganic Polymeric Coagulates from Fly Ash by Activation Method C.H. Yuan	679
Process Optimization and Preparation of Ferric Oxide Nanoparticles by Homogeneous Precipitation Method J.F. Ding, J.F. Li, W.Y. Dan, Q.S. Wang and H.F. Zhou	683
Properties of Kevlar Fibers by Surface Modification Z. Jia	688
Research and Develop Intelligent Temperature-Controlled Fabric Starting from the Internal Structure of Textile Fibers T. Zhang	692
Research on the Hole Shape Distortions Near the Bending Plastic Deformation Area L.Y. Zhang and R.C. Huang	696
Research on the Influence of Reinforced Rib Thin-Walled Casing Structure Stiffness J. Tian, W. Wu and Y.T. Ai	700
Research on the Thermodynamics and Kinetics of Chromium Ore Smelting Reduction Process for Producing Stainless Steel Y. Liu, M.F. Jiang and D.Y. Wang	704
Simulations of Structural Transition of Ti₇₅Al₂₅ under High Pressure J.H. Xia, X.M. Gao, Z.F. Cheng and X.Y. Xiao	708
Studies on Mechanical and Thermal Properties of Epoxy Resin Modified by Fluorine-Containing Silicone C. Fang, D.B. Guan, W.G. Yao, S.J. Wang and H. An	713
Study of Crystallizer 3D Modelling Based on Fluent and its Application in Production of Gypsum B.J. Luo, H.H. Wu, Y.Q. Wang, X.P. Huang and Q. Zhang	717
Study on Carbon Fiber Composite Materials Cutting Tools M.Y. Wu, M.L. Tong, Y.W. Wang, W. Ji and Y. Wang	721
Study on Seismic Performance of Reinforced Concrete Multi-Span Cantilever Girder Bridge after Reinforcement X.F. Li and R.F. Wu	728
Synthesis of Al₂O₃-TiB₂ Composite Powder by Planetary Milling from Al-TiO₂-B₂O₃-Ni Mixture W. Yang, S.J. Dong, A.Z. Yangli and Z.X. Xie	734
Test on Cement Deep Mixing Soil Strength J.F. Hou and M.Y. Li	738
The Application of Raw Dolomite in Converter W. Sun, H.Y. Li, Y.J. Kong, W.J. Yang, Q. Peng and W. Shen	743
The Resonant Modes in One-Dimensional Photonic Crystal Parallel Quantum Wells Composed of Negative Index Materials X.Y. Xiao, R.P. Chen and Z.F. Cheng	748
Usability Analysis of Diesel Engine Oil Based on Properties of Mineral Materials Z.Y. Li, F.S. Meng and W.W. Huang	754
Yellow Upconversion Luminescence in Ho³⁺/Yb³⁺ Co-Doped La₂(WO₄)₃ Phosphor J.Y. Sun, B. Xue, G.C. Sun and D.P. Cui	758
Design and Optimization of Surface Properties for Diamond-Like Carbon Films by Sputtering Depositions M.D. Jean, C.D. Liu, S.F. Wang, C.H. Li and K.H. Kao	762
Effect of Sample Width on Characteristics of Flame Spread across Eucalyptus Wood Surface G.H. Wu, Y.Q. Wu, Y.C. Hu and X.D. Zhu	767
Effective Photocatalytic Disinfection of <i>Escherichia coli</i> by One-Dimensional Ag₂V₄O₁₁ Nanowires under Solar Light Irradiation P. Ju, P. Wang and D. Zhang	771

Electrocatalysis and Sensitive Determination of Sudan I at Fe₃O₄/Graphene Modified Glassy Carbon Electrodes S.X. Luo, Y.H. Wu and H. Gou	775
Electrochemical Behaviors of Pb–0.3%Ag-0.06%Ca Rolled Alloy Anode during and after Zinc Electrowinning - Tafel Investigations H.T. Yang, H.R. Liu, Z.C. Guo, B.M. Chen, Y.C. Zhang and R.D. Xu	779
Experimental Study on Microhardness and Microstructure for 7050-T7451 Aluminum Alloy of High Speed Milling Z.L. Zhong and X. Ai	783
Fast Synthesis of Ag₃PO₄ Cube Microcrystals and its High Visible-Light-Driven Photocatalytic Activities L. Guo, L.L. Yue, D.J. Wang and F. Fu	787
Investigating the Use of Nanoscale Bilayers Assembly on Stainless Steel Plate for Surface Hydrophilic Modification S.C. Wu, D. Wang, S.J. Lin, P.W. Ciou, C.Y. Chung, S.J. Su and Y.M. Chen	792
Photoluminescence and Energy Transfer of Ce³⁺ and Tb³⁺ Co-Doped Ba₅(PO₄)₃Cl Phosphor for Light-Emitting Diodes J.Y. Sun, D.P. Cui, B. Xue and G.C. Sun	796
Preparation and Characterization of Al₂O₃ Nanoparticles with Dodecyl Trimethyl Ammonium Bromide as Surfactant M. Wang, W.Y. Dan, J.F. Li, J.F. Ding, G.Q. Zhou and Q.S. Wang	800
Research on Mechanical Properties of High Boron Alloyed Stainless Steel Composite Plate Containing Titanium L.L. Yuan, J.T. Han, J. Liu and Y.L. Liu	804
Research on Multi-Parameters Estimation Models of Cement Concrete Compressive Strength Z.J. Wang, J.B. Liang and J. Zhong	809
Research on the Performance Change by Adding Graphene to Copper T.T. Fan	813
Studies on Temperature Dependent Ionic Liquid Solid-Liquid Extraction Behavior of Rare Earth Z.W. Pan, W.T. Weng, H.B. Yan, Y.L. Yu, T.C. Wu and J.D. Pan	817
Study of Magnetic Fields of Magnetron Sputtering Affecting CrN Films M.D. Jean, M.T. Sheen, C.F. Wu, F.M. Chen and S.J. Lee	822
Study of Microstructure and Magnetic Properties on High-Silicon Steel Composite Sheet X.W. Yang, J. Liu, J.T. Han and S. Ji	828
Synthesis and Electron Trapping Luminescence Property of SrSO₄:Eu²⁺ Phosphor by a Hydrothermal Process J.Y. Sun, G.C. Sun, D.P. Cui and B. Xue	832
Temporary Resistive Switching Effect in Cu₂O Based Heterostructure C.K. Wu, Y.D. Zhu, H.H. Liao and J.J. Tan	836
The Flow Stress and Microstructures of Fe-1.6%Si Silicon Steel Y.M. Yu, D.S. Du and Y.B. Xu	840
Failure Analysis of Q345 Steel Structures on Port Cranes H.W. Wang, W.T. Li, H. Bai, H.Q. Xiao and H.M. Yu	844
Injection Molding Process Parameters Analysis and Optimization Depending on Moldflow N. Li and H.B. Liu	848
Modeling the Phonon Transport in Nanowire with Different Cross-Section G.H. Su, Z.C. Yang and F.R. Sun	852
New Technology of Ecological Textile Printing H.M. Li	856
Numerical Simulation for the Cold Extrusion Process of the Worm Wheel Blank Y.H. Yuan, W.G. Zheng, C.H. Yin and Z.M. Pan	859
Optimization Analysis of the Injection Molding Process Based on Orthogonal Test Method and Uniform Design W.H. Cao, H.B. Liu and X.F. Li	863
Optimization on Deep Drawing and Ironing Process of Compressed Natural Gas Containers W.J. Xu, C.H. Zhai and W.H. Li	867

Research on the Machining Ability for Rough Machining of Large Hydrogenated Cylindrical Shell Forging	871
M.Y. Wu, S.H. Sun, F.G. Yan, Y.N. Cheng, Q. Hu and L. Liu	
Simulation and Experiment of Temperature Field in Catalytic Combustion Furnace of Natural Gas	877
L.F. Yan and S.H. Zhang	
Solving Task of Multi-Intelligence Agents on Energy Model with Spline Finite Strip Method in Cold Forming	882
J.C. Zhang	
Structural Optimization of Composite Wing Based on Different Blending Models Using Genetic Algorithm	886
X.P. Zhong and P. Jin	
Study of Wax Deposition Rate in Waxy Crude Oil Pipeline	891
Q.L. Cheng, X.X. Wang, X.L. Li, W. Sun and L.D. Meng	
Study on Weld Seam Modeling for Remote Welding	895
S. Gao and Y. Wang	
The Forming Reasons of Polymers of EO/EG Plant's Decarbonation System	899
L.C. Shi, X.L. Yang, J.H. Wang, L. Liang and L.H. Cheng	
The Optimizing Processes and Integrated System Structure of the Pipe Fitting	904
Y. Xu, Y.X. Yuan, J. Chen, X.B. Long and L. Wang	
The Study of How to Extrude the Special Shaft Parts into Form	908
X.P. Bai	
Key Protective Techniques Study for Strain Gauges in the Oil-Water Mixture and Pressurization Environment	912
J. Zuo, J.F. Zhang and S.K. Teng	
Study on the Heat-Treatment of Clad Plate for Cutting Tools	916
L.L. Yuan, J.T. Han and J. Liu	
Prediction Methodology of Creep Performance from Stress Relaxation Measurements	920
J.Q. Guo, H.C. Shi and W.Z. Meng	
The Double-Layer Matching Design of Broad-Band Foam Cement Absorbing Panel for Electromagnetic Pollution Control	924
F. Wu, W.J. Hao, Y.F. Zhang, M.M. Wang, D.W. Chen, Y.Y. Yi, H.C. Zhao, Y.F. Dong and X.H. Yu	
Analysis of Position-Dependent Extraordinary Optical Properties in Near-Zero-Permittivity Range for a One-Dimensional Superconducting Photonic Crystal	929
J.J. Wu and J.X. Gao	
Preparation Optimization Design of Tennis Ball Adhesive Formula	933
Y.T. Cai and B.Q. Shi	
Research on Application of SLA Technology in the 3D Printing Technology	938
X.L. Ma	
The Planarization Technology of Optical Element Surface	942
C.J. Guo, N. Pei, D.S. Wang, F.M. Nie, G.P. Zhang and Y.P. Li	
The Numerical Simulation Analysis of the Rectangular Box Straight Springback Law	946
L.Y. Zhang and S. Xie	

Chapter 3: Measuring Technologies, Signal and Data Processing

A Fast Solution to the Kiln Support Reactions Based on Axis Monitoring	953
X.M. Lei, Y.G. Xiao, A.L. Ning, W.H. Yuan and Z.G. Chen	
A New Similarity Measure between Vague Sets Based on Information Similarity Coefficient and its Application	959
W. Wang and J.Y. Peng	
A New Tracking System Overall Structure Designed Based on Laser Scanning	964
Q. Zhang and G.H. Cao	
An Analysis of the Effects on Calibration Parameters of FDR for Moisture Sensor Caused by Different Kinds of Soils	968
H.B. Chen, L.M. Ye and L.K. Shi	

Application of Infrared Imaging Technology in Fault Diagnosis of Electrical Equipment B.S. Li, X.T. Xu, K.B. Cui and W.L. Wei	974
Application of the Roof Leakage Infrared Detection Technology X.W. Zeng and Y.M. Zhang	978
Applied Research on Three-Dimensional Measurement Based Digitized Clothes System Platform L.N. Yang and Y. Chen	982
Automatic Frozen Soil and Dry Soil Observation System Based on GPRS Transmission L.Q. Xue, L.M. Ye, H.B. Chen and L.K. Shi	987
Automatic Monitoring Technology for Surface Settlement of Underwater Foundation A.M. Liu, Z.F. Yu and J.S. Li	992
Calculation and Fitting Methods of Variogram H.R. Liu, Y.F. Yan, H.T. Yang and L.Y. Duan	997
Center Wavelength Detection Algorithm of FBG Based on Neural Network C.Q. Yin, D. Lu and Y.J. He	1001
Coherence Analysis and Control of Multi-Exciter Vibration Test System Z.T. Yan and S.C. Ding	1005
Composite Fuzzy Control Method for Temperature in Intelligent Moisture Analyzer J. Ling, J. Che and D.M. Liu	1010
Design and Development of Embedded Grinding Initiative Meter G.Q. Ren, L.N. Zhang and P. Zheng	1014
Design and Implementation of Remote Measurement and Control System Based on ARM with RL-RTX J. Sun, A.B. Zhao, M. Bai and J. Zhang	1019
Design and Research of a Distributed Network Spectrometer J. Sun, J. Zhang and A.B. Zhao	1023
Detection and Extraction of Moving Object in Intelligent Surveillance System W.H. Qiu, Z.Z. Qiu and L. Wang	1027
Dynamics Analysis of the Spindle System in a Precision Multi-Shafting Friction Torque Measuring Instrument Based on ANSYS Workbench X.Z. Li, L. Zhang, J.D. Wang, H.D. Yu and J.K. Xu	1031
Electrical Performance Test System of Mobile Power Station Based on LabWindows/CVI Y.H. Li and H.W. Liu	1036
Experiment on Water-Gas Two-Phase Flow Measurement by an Electromagnetic Flow Meter X.Z. Zhang, L.R. Zhao and J. Liu	1040
Experimental Measurements Research on Internal Micro-Environment of Individually Ventilated Cage System D. Xie and S.Q. Mo	1044
Explore of the Smart Meter's Security Protection Function Realization Method Based on Q/GDW1365-2012 W. Cen, Y.J. Lv, Z.Q. Sun, B.F. Li and Y.L. Fu	1048
Improved BP Neural Network in Diagnosis of Nonlinear Fault B. Xu, X.J. Shen and W.N. Xue	1055
Infrared Image Denoising Based on Peer Groups with Median Filtering and Wiener Filtering B.S. Li, K.B. Cui, X.T. Xu and W.L. Wei	1059
Laser Shearing-Interferometry for Measurement of Rail Straightness Accuracy and Error Analysis S. Li	1063
Measurement Error of Left-Turn Vehicle Trajectory by Video Detection B.H. Liu, X.X. Liu and S.J. Zhang	1068
Measurement of the Derivatives of Surface Displacements by Using a DSSI Method H. Zhang, H.Z. Li and J.F. Yin	1074
Measurement of the Position and Shape Error for Macro-Axis Base on MCGS and MATLAB X.Y. Luo, P.H. Fu, C.P. Yu and X. Zhu	1078

Optimum Design of a Screw-In Venturi Flow Sensor Y. Xu, X.H. Zhang, T. Zhang and L. Gao	1082
Polymer Diaphragm Based Fiber Optic Fabry-Perot Acoustic Sensor Q.Y. Wang and Z.H. Ma	1087
Research on Calculation and Measurement Method of Hydraulic Excavator Load Force-Time Process X.L. Hu, Q. Xiang, H. Zhang, G. Zhao and L.M. Guo	1091
Research on Detection Performance of a Composite Bistatic Radars System F. Wang and Z.G. Wang	1095
Research on Self-Sensing Signal Identification and Extraction Technology of Giant Magnetostrictive Actuator S.W. Sun, T.T. Hu, G. Zheng and C.M. Ma	1102
Research on Technology of Gas Pipeline Leakage Detection Based on Infrasonic Wave Y.Q. Wang, S. Wan, Y.C. Zhou and H.G. Yang	1106
Research on the Vortex Mass Flow Meter of Dual Bluff Body Based on Differential Pressure Principle Q.S. Duan and L.C. Wang	1110
SCADA System of CNC System Reliability Testing and Implement Loading Conditions C.J. Li, D.P. Lv and H.Q. Su	1114
Study on Application of Stress Wave for Nondestructive Test of Wood Defects W.S. Lin and J.Z. Wu	1119
Non-Destructive Testing of Wood Defects Based on Ultrasonic Technology W.S. Lin and J.Z. Wu	1124
The Design of Moisture Content of Lubricating Oil Detecting System Based on AD5933 Q. Liao, W.D. Fan, J. Wu and T. Xu	1129
The Determination of Fluorescent Whitening Agent VBL by Fluorescence Spectroscopy J.Y. Sun, Q.M. Di and Q.G. Xu	1135
The Fault Diagnosis System of Measure and Control Radar Servo Motor Based on Ship in BP Neural Network H.S. Jin, J. Liu, Y.J. Sun and D.D. Qiu	1139
The Pressure Loss Alarm System of Circulating Water in Calcium Carbide Furnace F.S. Shi, Y. Zhou and Y. Wu	1144
The Research on Loading Effect of Energy Transfer Model-Based QCM Immunosensor Y. Chen and X.H. Huang	1149
The Simulation Research for Defect in Pipes Based on Time Reversal Ultrasonic Guided Wave J.B. Wang, Y.P. Du and X.S. Zhang	1153
The Study of Thread Parameter Based on Machine Vision for Automatic Measurement J. Chao, Z.F. Liu and Y.S. Liu	1158
The Analysis of Mechanism for Generating and Detecting Torsional Guided Wave J.H. Hu, Z.F. Tang and F.Z. Lv	1162
Uncertainty Evaluation of Measurement Results for the Determination of Selenium in Shiitake by Hydride-Atomic Fluorescence Spectrometry L.W. Chu, S.L. Wang and Y. Zhong	1166
A Bi-Parametric Clutter-Map CFAR Detection Method in Non-Gaussian Environment for Foreign Objects Debris on Runways J. Wu, H. Wang and X.L. Yu	1173
A Development of Detection System on Acid Value of Lubricating Oil Based on Impedance Method Q. Liao, T. Xu, X.W. Li and W.D. Fan	1177
A New Fiber Different Pressure Sensor Based on Intensity Modulation and Researched of Analytical Method H. Hu, L.Q. Zhong and D.B. Zhang	1183
A New Monitoring Technology on Arch Bridge G.Z. Tian	1187
A Novel Structured Light Pattern for One-Shot Shape Acquisition J. Chen, L.X. Tang and H.L. Chen	1191

Control System Design of Detection Device for Pipe Air Tightness Based on Water Test Method W. Wei	1195
Design of Multi-Point Wireless Pulse Measuring System Base on CC2530/Zigbee Network J.F. Su, S.H. Nie and S.C. Qu	1200
Detection Probability of Airborne AIS S.X. Ma, J. Sun and Y.Q. Guan	1204
Moving Target Classification in Road Monitoring Based on Multi-Feature Fusion L. Wu, X.P. Wu and J. Xu	1208
Research on the Application of Wavelet Entropy Theory in Detecting Metal Magnetic Memory Y.Q. Wang, J.P. Xu, Y. Shi, X.Y. Wang, J.B. Yu and Y. Liu	1212
Study on Condition Monitor Method for Tank Gun Recoil Mechanism H. Li, M.C. Zhong, J. Zhang, D. Xu and C.L. Zhang	1218
The Design on Speed Monitoring System of Ship's Main Engine Y.E. Feng, L.L. Li and J.Y. Liu	1222
Vibration Measurement and Fault Diagnosis System for Experimental Teaching X.Y. Yang, Y.G. Xiao and J.F. Huang	1226
Analysis and Exploration for Automotive Engine Vibration Signal C.H. Zhang and Y.Q. Chen	1230
Design and Implementation of a Heart Rate Detection Device Based on Ballistocardiogram Y.B. Cheng, L.Q. Zhu and D.C. Bi	1234
Design of Gun Comprehensive Performance Test System Based on LabWindows/CVI and Dynamic Recoil T. Li, L. Wang and R. Zhao	1239
Research on the NC Machine Fault Diagnosis and Repair System with Case-Based Reasoning J.B. Zhao	1243
Research on the Temperature Control Algorithm of VAV Air Conditioning System J.Z. Yan and N.P. Jiang	1247
MMM Identifying Damage for Recycled Pumping Rod Base on SVM H.Y. Xing, Y.T. Han, P. Qin and C.H. Liu	1251
Study and Realization of Test Bench for Electric Vehicle Drive System Based on HIL H.Z. Feng, Y.G. You, Z.Y. Huang and Z.L. Xian	1255
Design of Crane Strain Acquisition System Based on ZigBee X. Huang and F.Y. Xu	1260
A 2.4kb/s Speech Coder with Improved Analysis and Synthesis Based on MELP Q. Li, X.H. Zhang, X.J. Xia and H.R. Zhang	1264
A Contour Tracing Algorithm for Ginseng Shape B.Q. Huo and F.L. Yin	1268
A Design of Z-Stack Application Based on the IEEE Address W.W. Hua, Z.H. Yuan and X.Z. Yu	1272
A Kind of Statistics Data Processing with Indicators in an Autocorrelation Network H. Liu, L. Li and C.M. Wang	1278
A Low-Complexity 3.6kbps Speech Coding Algorithm Based on Mixed Excitation Q. Li, L.Z. Wang and X.J. Xia	1282
A New Approach for the Detection of Kiwifruit Maturity by Electrical Impedance Technology Q. Liao, L.L. Su and L.L. Chen	1287
A Rapid Monitoring System for the Determination of COD in Waters Based on Ultrasonic Assisted Digestion and Miniaturized Spectral Analytical System K.L. Wei, M. Chen, F. Wang and Q. Fang	1295
A Stochastic Resonance Phenomenon in Linear Models D.R. Zhou, J.C. Gong and F.L. Fan	1301
A Thin Blade Error Analysis Strategy Based on Model Matching J.X. Ren, S.S. Li, J.W. Zeng and Q. Lin	1305
A Review: Color Image Segmentation Based on Color Space M.X. Li, D.D. Hou, X.H. Xia, J.J. Fan and W.J. Xu	1310

Aerial Transmission Lines Image Restoration Technology Research Based on the Improved Maximum Entropy	1315
B.S. Li, W.L. Wei, K.B. Cui and X.T. Xu	
An Adaptive Image Binarization Method for Laser Direct Marking Data Matrix Symbols on Metal Surface	1319
J.R. Li, A.Q. Wang, J.M. Li and Y.S. Wu	
An Eye Localization Method Based on the Skin Color Feature and Otsu Algorithm	1324
X.F. Yang, Y.C. Qi and J. Yao	
An Improved Particle Swarm Optimization Algorithm	1328
Y.F. Yu, G. Li and C. Xu	
Application of Fault Diagnosis for Air Blower Based on Genetic Fuzzy Neural Network	1336
X.H. Li and H.Y. Yang	
Auto-Identification of Symmetrical Contours on ICT Image in Reverse Engineering	1341
G.S. Liu and B.L. Li	
Calculation of Optimized Movement Trajectories for the Human Forearm	1347
L.L. Yang	
Classification of Ship' Magnetic Field and Feature Selection Based on the Improved Weighted Fuzzy Clustering Algorithm	1353
W.D. Wen, Z.L. Liu and Z.Q. Zhang	
Cluster Hybrid Property Data Based on the Combination of K-Means and K-Prototypes	1358
H.Y. Zhou and Q.Y. Zhu	
Discrete Linear Canonical Feature Research of Chirp Signal	1362
J.J. Xu and T. Liu	
Study on Signal De-Noiseing for Vehicle Active Anti-Collision Warning Radar	1368
J.H. Wang, Y.C. Wang, F. Xie and H.F. Ding	
FMECA Method of Health Management-Oriented	1373
E.X. Du, W. Wang, L. Chang and J.J. Ren	
Gesture Recognition System Based on Wavelet Moment	1377
K.W. Chen, X. Guo and J.G. Wu	
Image Fusion Algorithm Based on Nonsubsampled Contourlet Transform	1381
Z.J. Luo and S. Ding	
Machining Parameters Optimization for WEDM Based on Grey Relational Analysis	1385
S.P. Zhang, Y.C. Ding and W.L. Zhang	
Magnetic Generator with Automatic Gain Regulation in a Wireless Tracking System for a Capsule Endoscope	1393
X.D. Guo, C. Ruan, B. Ge, R.G. Yan and Y. Liu	
Novel Iterative Truncated Total Least Squares Algorithm for Image Restoration	1397
L. Zhang, Y.Y. Cao and Z.C. Yang	
Prediction Research of Highway Traveling Passenger Volume Based on Wavelet Neural Network	1401
T.G. Li and L. Wang	
Projected Image Restoration Method Based on Genetic Algorithm for Cone-Beam CT	1406
K.D. Huang, L. Zhang, K. Bu and H. Zhang	
Real-Time Human Skeleton Extraction Based on Video Sequences	1410
Q. Ye, J.F. Dong and Y.M. Zhang	
Research and Design of Digital Signal Processing Virtual Experiment Platform	1415
X. Zhang	
Research of FMCW for Perfect Binary Sequences Pairs	1419
H.L. Jin	
Vibration Signal of Recoil Mechanism De-Noiseing Processing Based on Wavelet Analysis	1424
M.C. Zhong, C.L. Zhang, L. Cheng and H. Li	
Time Sequence Clustering Based on Edit Distance	1428
H.Y. Zhou and J.S. Shan	
Vehicle and Pedestrian Detection and Tracking	1432
Q. Tian, W.H. Zhao, L. Zhang and Y. Wei	
The Research on Real-Time Pulse Signal Collecting System Based on CC2430	1436
Y.X. Xing, Y. Cao and W. Zhang	

The Influence on Clustering Results of Electricity Load Curves Using Different Distances T.F. Zhang, F. Lv and R. Gu	1440
The Establishment of the Mode for Price Fluctuation of Financial Market and the Prediction of its Tendency Y.Y. Gao and N. Lv	1444
Study of Identify Authentication Based on Wavelet Decomposition X.M. Zhang, Z.G. Xiong and Z.D. Mu	1449
SOM and PSO Based Alerts Clustering in Intrusion Detection System Y.W. Jing and L.F. Li	1453
Sleep Analysis Based on Non-Load Detection Technique and Fuzzy Logic H.Q. Zhao, X.Q. Li and D.C. Bi	1458
Robust Digital Watermarking Algorithm on Combination of Fractal and Wavelet Y.H. Chang	1462
Research on Intelligent Monitoring and Fault Diagnosis System Based on Multi-Agent Model Y.D. Yang and C.G. Ma	1466
Research on Mining Method of Process Knowledge Based on Ontology C.F. Guo and L.C. Zhuang	1470
Research on Computer System Collecting the Vault Techniques L. Liu, J.H. Zhou and Z.L. Gao	1474
RMB Exchange Rate Forecasting Model Based on Exponential Smoothing and Gray Correlation B.X. Liu, Y. Wu and X. Cheng	1480
Rotated Image Matching and Correction Method Based on Improved Circular Projection L. Zhang and S.Z. Lin	1484
Speaker Identification in Total Variability Space Q. Li, M.B. Zhao and Y. Feng	1489
Structural Damage Identification by Detection Medium Technology Z.F. Chen, Z.Y. Wang and J. Liu	1493
Study on Reliability Assessment of Degradation Date Based on Pseudo Life Distribution A.L. Liu, F.Y. Kou and K.H. Kou	1499
Study on the Technology of Extracting Form Structure H. Ding, C. Zhao, M. Wang and Y. Zhang	1503
The Weld Image Acquisition and Preprocessing Based on FPGA Z.H. Yuan, W.T. Liu and X.W. Han	1507
The Design of the Vacuum Circuit Breaker Contact Quality Detection System Based on FPGA S.L. Yang, S.J. Bao and L.G. Zeng	1514
Altering Integral Time Method in Temperature Measurement Using Mid-Wavelength Infrared Imaging System Y.Y. Ji, W.H. Xu, D.B. Ma and Y. Li	1519
Analysis of Vibration Signals of Scroll Compressor Based on Information Entropy Z.X. Wu, Y.W. Wang and T. Liu	1523
Quantitative Analysis of Soft Soil Microstructure in Unloading Levels Q.Z. Hu, J.X. Wang and G.L. Tao	1529
Research of Infrared Thermal Imagery Segmentation Technology Based on Visible Light Image D.H. Ding, K. Fang, H.X. Yu, K.J. Qian and D.J. Cui	1534
Research on Knowledge Acquisition Based on Improved Particle Swarm Optimization X.H. Chen, J.B. Jia, X.Y. Li, S.K. Wang and Y. Zhao	1539
Corrected Background-weighted Histogram Mean Shift Tracking Algorithm Based on Adaptive Bandwidth F. Liu, C. Zhang and X.P. Wu	1543
Design and Implementation on Printed Circuit Board Quality Inspection Integration Platform L.P. Luo, J. Zhang, L.F. Zhu, C.S. Liu and X.L. Hu	1547
Envelope Extraction Algorithms and the Application in Motor Imagery X.X. Gong, X.P. Wu, X.J. Guo and L. Zhang	1551

Local Spatiotemporal Coding and Sparse Representation Based Human Action Recognition B. Wang, Y. Liu, W. Wang, W. Xu and M.J. Zhang	1555
Medical Volume Data Zero-Watermarking Algorithm Using 3D-DCT and Chaotic Neural Network B.R. Han and J.B. Li	1561
Neural Networks Calibration Model Optimizing of Wheat Protein Based on Successive Projections Algorithm X.D. Mao, L.J. Sun, G. Hao, L.L. Xu and G.Y. Hui	1565
The Study of the Digital Three-Phase Phase-Locked Loop in the Photovoltaic Grid System Y. Lu, X.O. Song and X.L. Lu	1571

Chapter 4: Control, Automation, Communication and Information Technologies

Application of Self-Tuning PID Control with Feed-Forward Compensator Based on LS SVM Inverse Model in Nonlinear System Q.L. Dai	1577
Permanent Magnet Synchronous Motor Control Research Based on Improved Sliding Mode Algorithm L.L. Yi, F.C. Zhang, Y.Z. Hao and X.X. Chen	1581
Automatic Programming Based on the Feature of the Parts M.L. Bao	1586
Analysis of Construction Machinery Hydraulic Control System L. Zhang	1590
Analysis and Control of Chaos in Sheppard-Taylor DC-DC Converter C. Bi, Z.H. Fan, Y. Xiang and J.G. Hu	1596
Analysis and Compare of Two Control Modes in Physical Human-Robot Interaction G.H. Xie, M.N. Jin and M. Hashimoto	1600
Information Delay Protocol Using the Bell State Measurement D.X. Zhang and X.Y. Li	1605
Mathematical Model for Assembly Tolerance Consistence Evaluation J. Mao and M. Zhao	1610
Multi-Model Predictive Control with Kalman Filter on DC/DC Converter C. Zeng, L.Y. Zhang and L.H. Zeng	1614
Research of Stepper Motor Control Based on SCM Q.H. Gong and T.G. Li	1619
Research on Double Laser Sources Location System Based on Incremental PID Algorithm Y.H. Luo, P. Jiang and W.W. Hu	1623
Research on Pulse Jet Action Angle Optimization Z.K. Tian, S.C. Yang, D.L. Feng and Y.Z. Yao	1628
The Application of Wireless Sensor Network in Ocean Fishing Vessel C.M. Chen, L.J. Yu, S.Q. Cao, P.L. Ling and J.S. Yang	1632
The Design and Realization of Intelligent Control System in Temperature and Humidity of Tea Intelligent Fixation J. Zhang, Y.T. Lan and Y. Wan	1636
The Energy-Saving Analysis of Cascade Speed Control and Frequency Control about Chopper Inner Feedback Z.F. Wang	1641
The Linkage Mechanism with Clearance Modeling Based on Neural Network and its Intelligent Control T.G. Li and S.W. Xue	1644
The Research of Flight Control Algorithm of Flight-Sliding Type Inspection Robot P. Yu and H. Zhang	1649
Visual Monitoring of Network Devices Based on Google Maps H. He, C.Y. Gong and F.J. Wang	1653
An Adaptive Chaos Synchronization with Controller and Secure Communication B. Zhou, X. Wang, Y. Gao and S.C. Qu	1657

An Improved PID Control for Wheeled Line-Tracking Robot J. Chen and J. Qiang	1661
Boiler Make-up Water Treatment System Based on KingSCADA D.S. Zhu, C.Y. Wang and X.H. Lv	1666
Construction and Simulation of Fuzzy-PID Controller on Stepping Motor Q.H. Gong and A.M. Zhang	1670
Discussig of Electricity Embedded Software Testing Technology W. Zhang, C.X. Ma and S.X. Niu	1674
The Development and Application of Electricity Embedded Software Testing W. Zhang, C.X. Ma and J.S. Mo	1680
Modeling and Analysis of a MEMS-Based Thermal Emissivity Variable Thermal Control Device D.H. Ren and J.F. Tian	1686
Application of Self-Adaptive Smith Algorithm in Evaporator System X. Zhu and J.Z. He	1691
Electromagnetic Identification Intelligent Vehicle System Design Y.G. Ji, H.M. Zheng and Y.P. Zhang	1695
N-C Lathe Processing Factor and Precision Machining Techniques W. Huang	1699
Program-Controlled Driving Power Supply for Single-Chamber and Single-Vibrator Piezoelectric Pump Y.M. Sun, G.M. Cheng and P. Zeng	1703
Research on Profiling Electro-Hydraulic Control System of Hydraulic Excavator J. Liang, Z.G. Guan and Z.Q. Lv	1707
State Assessment of the Hydraulic Subsystem of the Launch Site Based on Cloud Model J.Z. Li and G.X. Lu	1711
The Applications of Industrial Robots in the Field of Industrial Automation and Control Y.D. Wang	1716
The Design and Realization of Intelligent Glass Climbing-Cleaning Robot Y.T. Gou, M.Y. Zhang and D.X. Zhang	1720
The Embedded Soft PLC Development System Research of Numerical Control Machine S.J. Hu, H.X. Zhang, Y.J. Chang, J. Li, C.J. Li and L.L. Zhang	1724
The Unmanned Aerial Vehicle Vector Tracking System S.M. Shen, J. Cui and W.Y. Liu	1728
A Design of Boot over SRIO X. Song	1734
An Object-Oriented Model of Simulation for Internet-Based Multi-Operator Multi-Robot System S. Gao, Y. Zhang and D.D. Chen	1738
Outside Light Based Shooting Training Evaluation System Design and Implementation Z.S. Zhang, D.S. Qiu, G. Liu, C.J. Huang and J.J. Wang	1742
Research on the Intelligent and Strong High-Voltage Power Supply System of Hu Sheng Coal Mine Z.J. Li, Y.W. Wang, N. Song, Z.J. Wang and B. Li	1747
PSO-Based Trust QoS Routing Algorithm for Wireless Sensor Networks J.W. Wang and Y.T. Wei	1751
Studies on Web Game Interface Design Y. Chen	1756
A MPTCP Congestion Control Algorithm Based on Packet Loss L. Kou, R. Wang and S.R. Chen	1760
A MPTCP Path Selection Strategy Based on Improved Grey Relational Analysis L. Kou, S.R. Chen and R. Wang	1766
A New Fragile Watermarking Based on Chaos H.F. Huang	1772
A Non-Invasive Hardware Trojan Detection Approach Based on Side-Channel Analysis X. Xu, X.W. Li, Y. Zhang and F.F. Xie	1776

A Resource Allocation Scheme Based on Maximum Tolerate Delay in Satellite Communications	1781
H.S. Jin, Y.F. Yang, D.D. Qiu, Y.J. Sun and S.L. Liu	
A Survey on Information Credibility on Twitter	1788
J. An, W.J. Li, L.N. Ji and F. Wang	
A WSN-Oriented Key Agreement Protocol in Internet of Things	1792
T. Liu, Y.W. Guan, Y.Q. Yan, L. Liu and Q.C. Deng	
A High-Capacity Mobile Storage Device Data Protection Scheme	1796
M. Liu, P.F. Wang, H.Y. Wang and X.R. Meng	
An Enhanced Monte Carlo Localization Algorithm for Mobile Node in Wireless Sensor Networks	1800
S.P. Fan, Y.J. Wen and L. Zhou	
An Improved PSO Algorithm of Optimizing Selection for Multi-Objective Controller Parameter	1805
Y.J. Ren	
Application of the Standardization of the Relationship in the Database Design	1809
C.X. Ma and Y.M. Wang	
Application of Virtualization Emulator in Network Environment	1813
A.H. Tian, C.B. Fu and H.M. Xiao	
Construction of Integrated Logistics Resources Service Platform Based on Cloud Computing	1817
Z.Y. Zhou	
Control Strategy of Energy Saving Based on Intelligence-Fusion in Water Supply Engineering	1822
D.Q. Ren	
Decay Analysis of a 5kW PEMFC Stack in Sightseeing Bus	1826
J.M. Liang and Q.F. Jian	
Design and Implementation of Human Resource Management Information System Based on Visual C++	1830
Y.X. Liu, Z.H. Yuan and W. Shi	
Design of 3D-TV Horizontal Parallax Obtaining System Based on FPGA	1834
J.X. Yu and W.H. Zhang	
Design of Hot Issue Founding System Based on Tibetan Web	1839
H. Cao and X.B. Han	
Design of Receiving Wireless Network for the Application on Recovery of Rocket-Borne Memory	1845
Q.L. Tan, X.S. Zhang, L.Q. Ding, K. Hao and W.Y. Liu	
Electric System Security Programming Based on Fuzzy Set	1851
M.T. Gao and S. Yin	
Equipment MTTR Demonstration Method Based on Virtual Simulation	1855
X. Wu, D. Xu, B.Q. Wang and G. Mu	
Evaluation of Parallel Algorithms of Traffic Volume Statistics per Cell in Cellular Network Based on MapReduce Programming Model	1859
Q. Yang, J. Liu, H. Wang, W.L. Zhou and H. Yu	
Formal Analysis of an Efficient Handover Authentication Scheme for EAP-Based Wireless Networks with Extending BAN Logic	1864
L.L. Cao and W.C. Ge	
Formation of Real-Time Wireless Sensor Network Based on CC2530	1868
D. Zhou, F. Xu, L. Wu and S.S. Peng	
GPS Time System and its Application in Time Transfer Technology	1872
Y.R. Xue and X.H. Li	
H.264 Decoder SOC Architecture Based on Co-Processor	1879
Z.X. Zhang, J. Wang and Y.D. Wang	
Improved Bayesian-Based Spam Filtering Approach	1885
X. Jiang and J.K. Yi	
Information System Design on Innovative Methods Integrated by TRIZ	1892
Y.H. Luo, Y.F. Shao and T. Chen	

Intensive Equipment Management of Enterprise Group Based on Internet of Things X. Yin, B. Dan, X.M. Zhang and X.Y. Liu	1896
Intensive Management Mode of IT Resources of Enterprise Group Based on Cloud Services X.M. Zhang and Q.L. Fan	1900
Laser TV Color Gamut Transform Based on FPGA C. Xue and Y.Z. Yu	1904
MMSE Space-Time Multi-User Detection in OFDM Systems Based on a Variety of Modulation M. Qi and X.X. Wang	1908
Multi-Motor Agents Synchronous Control Based on Fuzzy PID J.D. Yang and H. Wang	1912
Multiple-Way 1-Wire Transmission System Design X.H. Wang, X.Y. Zhang, L. Wu and S.S. Peng	1918
Multi-Robot Teleoperation Based on Distributed Virtual Environment S. Gao and D.D. Chen	1923
Neonatal Nursing Information System Based on Internet of Things D. Wang, W.C. Ge, L.P. Sun and J.H. Li	1927
Optimized Design of Employment Management System with Webservice J.L. Meng and C. Li	1931
Research and Application of DDE Network Communication in Configuration Software Y.J. Zhang	1935
Research and Implementation of Web Control for PLC with PPI Protocol J.S. Sun and J.X. Wei	1939
Research of University Laboratory Equipment Remote Monitoring System Based on RFID and ZigBee X.J. Zhao, J.T. Shen, D.Y. Wen and G.Q. Zhang	1944
Research of Web Information Resources Sharing Mode S.Y. Chen and X.L. Wang	1951
Research on Application of Tunable Dispersion Compensation Technology in Optical Fiber Communication Systems W.X. Gai	1956
Research on DSP-Based Asynchronous Motor Control Technology X.X. Qiao and G. Li	1960
Research on Integrated Data Environment for Aviation Equipments Based on Extensive Interactivity of IETMs W.W. Jiang, J. Yan, H. Yin, X.Q. Hou and L. Zhang	1964
The Design of Management System of Intelligent Parking Based on RFSN J. Zhao, X.F. Bu, C. Qian, J.H. Wang, Q.P. Ma, H.F. Geng and J.F. Wan	1968
Study on Virtual Maintenance Training Effect Evaluation Based on Cognitive B. Yin, H. Liu and Y.J. Ruan	1972
Simulation of Street Light Pole Controller Routing with OMNeT++ C.G. Jing and J.W. Wang	1976
Simple Ant Routing Algorithm for WSNs Used in Power Line Monitoring L.F. Li	1981
Research on Security in EMM Sublayer in TD-LTE M.M. Li and J. Li	1986
Research on the General NC System of Quasi Flexible Production Line Y.J. Zhang	1990
Resource Registry and Management Framework Based on LDAP Y. Wang and S.Q. Zong	1994
Space-Time Block Coding Cooperation Improved Algorithm Based on LTE-Advanced S.J. Bao, S.L. Yang and L.G. Zeng	1998
Study of Reading and Rendering Method for 3DS File Based on DirectX11 Q.C. Cui, X.X. Li and J.P. Hao	2003
Study on Component Management Technology for Apparel Industry Chain Collaborative Work Platform Based on XML L.N. Yang and A.M. Zhang	2007

Successful Accessing Rate Based Routing Model in Peer-to-Peer Control Network T. Liu and J.J. Xu	2011
The Development of Warm Room Ills's Ozone Control Machine Based on Single Chip Computer J.H. Song	2016
The Ship Lean R&D Platform Based on Knowledge J.F. Huang and J.S. Zhou	2021
Virtualization Simulation Based on Routing Protocol C.B. Fu, A.H. Tian and H.M. Xiao	2025
Word Spacing and Character Encoding Based on a Combination of Text Features Digital Watermarking Algorithm Y.H. He	2029
A Buck Converter Design Based on Sliding Mode Control Strategy Y. Gao, C. Zhou, B. Zhou and S.C. Qu	2033
A Modified Adaptive Genetic Algorithm for the Flexible Job-Shop Scheduling Problem Y. Pan, D.J. Xue, T.Y. Gao, L.B. Zhou and X.Y. Xie	2037
A Probabilistic Routing Algorithm Based on Node Free Buffer-Utilization in Delay Tolerant Network H.C. Huang, X. Zhang and Y.D. Mao	2044
A Research on the Construction of China's Enterprise Accounting Informationalized Model in the ERP Environment Y.J. Liu	2048
Informatization Construction of Vegetable Quality Safety Supervision in Agriculture & Supermarket Interfacing and Traceability Model C. Ma and J. Li	2055
Sensor Scheduling for WSN D.M. Yan	2060

Chapter 5: Environmental Engineering, Urban Development, Transportation and Logistics

An Analysis of the Advantages and Disadvantages of Constructing an Economically Strong City in Tangshan L.J. Tian, Y. Li and A.Q. Gao	2067
Phytoremediation of Chromium and Lead Using Water Lettuce <i>Pistia stratiotes</i> L.) Y.Q. Zhou, S.Y. Li, Y.D. Shi, W. Lv, T.B. Shen, Q.L. Huang, Y.K. Li and Z.L. Wu	2071
Analyses on the Current Status and Countermeasures of Equipment Manufacturing Industry in Jidong Economic Zone S.X. Yan, X.L. Wang and Y.L. Yan	2076
Choice of River Basin Ecological Compensation Standard Method for Determining Based on the Analytic Hierarchy Process L.X. Dai and X.Y. Wang	2080
The Influence Factors in Denitrifying Phosphorus Removal M.F. Niu, S. Li, H.J. Jiao, J. Wei, Y.Y. Sun and S. Shen	2084
The Removal of Heavy Metals by the Three Aquatic Macrophytes Y.Q. Zhou, S.Y. Li, W. Lv, Y. Chen, G.H. He, H. Xiao, T.B. Shen and Y.D. Shi	2088
Research on Calculation Method of the Urban Traffic Supply and Demand Disequilibrium Degree which is Based on Road Network Capacity Z.Y. Wang	2092
Application of Silica Aerogel-Shellac Wax Composite in Mango Preservation G.L. Fu, X.B. Tian, H. Xu, Y.Q. Guo, M. Liu, F.H. Zhao and Y. Chen	2096
Development of Environmental Intelligent Textile Fiber with the Support of Biotechnology T. Zhang and W.W. Tan	2101
Research on the Optimization and Adjustment for the Locomotive Overhaul Layout Z. Lv, W.D. Chen and X.L. Zou	2105
Research Progress of Magnesium Hydroxide Flame Retardant from Concentrated Seawater and Brine H.H. Wu, B.J. Luo, C.J. Gao, Y.C. Lu, Q. Zhang and X.P. Huang	2112

Soil Resistivity Lightning Current Model W. He, P.C. Zhang, L.L. Wang and L.F. Ma	2116
Study on Adjustment Evaluation of Locomotive Affair Productivity Layout J. Wu and H.F. Jia	2120
Study on the Internal Development Law of Supply-Demand Balance of Urban Road Traffic Z. Lv, J.L. Tian and X.L. Zou	2127
Study on the Model of Integrated Urban Rail Transit Hub Transfer Site Layout J. Wu	2133
The Life Cycle of CO₂ Emissions of Cellulose Ethanol Research in Tianjin X. Feng, A.Q. Mao, L.R. Chen, X.Y. Shi and Y.H. Xie	2139
The Establishment of Exergy Consumption Evaluation Index in Heated Oil Pipeline Transportation Q.L. Cheng, Z. Li, S. Shao, W. Sun and X.X. Wang	2143
Analysis of Water Environmental Quality Using BP Artificial Neural Network in Weihe River Baoji Segment H.X. Xie	2147
Public Transportation OD Calculation Based on Trip Chain L.P. Luo and J. Zhang	2151
The Prediction of the Water Yield which Flood from the Pit and the Trait of the Hydrogeology which Existed in the Mining Area of the Zhujiabaobao Mining in Panzhihua H.R. Liu, Y.F. Yan and H.T. Yang	2155
Simulation of Signalized Intersection Model L. Xue and Q.Y. Xie	2159
Application of Logistic Model in Container Throughput Prediction P. Zheng, S.J. Zhao and H. Fan	2163
Empirical Study of Factors for Implementing Reverse Logistics in Pharmaceutical Manufacturing Firms L. Liu, F. Xue and M. Tang	2166
Multi-Factor and Polymorphism Failure Probability Calculation for Natural Gas Pipelines Y.P. Yang, Y.M. Hao and Z.X. Xing	2170
Optimization Research of Logistics Distribution Routing Based on Heuristic Algorithm J. Lv and L. Zhao	2175
Predicting Model of Container Throughput of Fujian Province Based on Grey Model F.X. Li, Q.J. Liu and C.P. Chen	2179
The Study of the Regional Logistics Cooperation System Based on the Industrial Cluster X.F. Xiu	2183
The Real Estate Industry and Three Industry Correlation Empirical Analysis, Shan'xi Province S.R. Liu and Y. Zhang	2187

Chapter 6: Organization of Manufacture and Engineering Management

A Theory Model of the Existence Stable Measure for the Industrial Technology Innovation Strategy Alliance Z. Zhang, B. Qin and W.D. Hu	2193
Analysis of Spare Parts Demand Forecasting Considering Preventive Maintenance H. Liu, J.M. Zhao, J.S. Zhao and H.Z. Teng	2199
Arena-Based Modeling of the Maintenance Operation for a Wind Farm H.Z. Li, T. Jing and H. Zhang	2205
Based on PCA that Affect China's Energy Efficiency J.Y. Tian and N. Zhao	2209
Research on Task Allocation Model of Materiel Readiness Rate and the Talented Person Growing Law B. Chen, X.D. Zhu, Y.G. Wang and F. Ye	2213
Countermeasures Research on Legal Risk of Labor Service Employment in Retail Enterprises Q.R. Huang and Z.D. Xu	2217

Research on Supporting Countermeasure of B103W01 Transport Roadway in Shajihai Coal Mine S.J. Zhao	2221
Energy-Saving Method Analysis in Plastic Products Industry T.Y. Li, H. Wang, M. Zhong and C.H. Miao	2226
Enlightenment from the Characteristics of Domestic and International Equipment Manufacturing Industry to Jidong Economic Zone S.X. Yan, Y.L. Yan and X.L. Wang	2230
Equal-Risk Acceptance Sampling Plan R.Y. Jiang	2234
Study on Safety Status and Improvement Measures of Ship Construction L.M. Yu	2238
Evaluation and Decision-Making Method for Maintainability Design Based on Fuzzy Preference X. Luo, Y.M. Yang, Z.X. Ge and X.S. Wen	2242
Financial Quality Evaluation of Listed Companies Based on Factor Analysis Method Z.H. Lin and T.T. Guo	2247
Fuzzy Evaluation Method in the Application of the Engineering Bidding W.R. Wang, Y.X. Sai and X. Fang	2252
The Nature of Science and the Limitations of Science on Narrow Sense D.Z. Jin and J.M. Yang	2256
Reflection of Sustainable Development on Innovative Mechanical Products Design C. Xiao and J. Wang	2262
Remanufacturing and Benefits Analysis of Construction Machinery Hydraulic Valves C. Yan	2266
On the Effects of Collaborative Knowledge Innovation on Supply Chain Performance L. Liu, M. Tang and F. Xue	2271
Organizational Routine Affection in Supply Chain Management X. Zhang	2276
The Strategic Planning and System Analysis of Safety Supervision G.Y. Cheng, Y.F. Weng and Y. Cheng	2280
Research on the Service System of Wind Power Equipment Aftermarket X.M. Zhang, X.Z. Zhang, X.Y. Liu and B. Dan	2285
The Greening System Model of Old Industrial Removed Area Based on System Dynamics T.T. Wang and H.X. Xu	2289
Study on the Price Design of AGC Service in China G.X. He, X.S. Chen, Y.H. Zhou, L.M. Jiang, S. Yang and J. Feng	2293
Study on the Status and Development of Ship Management Company Based the Online Survey Technology Q. Wang and B. Xie	2298
The Evaluation of Electric Power Enterprises' Total Budget Management Based on Fuzzy Synthetic Evaluation Z.H. Lin and J.R. Yang	2302
The Evaluation Study of Supply Chain Financial Risk Based on the BP Neural Network L.S.H. Qiao and Z.H. Lin	2306
The Fuzzy Comprehensive Evaluation and Research of the Executive Ability in Power Supply Company Q.L. Wu, D.X. Niu, C.X. Liu and L.L. Fan	2310
The Intellectual Structure Analysis of Improvisation Studies Based on a Journal Co-Citation Analysis P.B. Gao, W.W. Wu and B. Yu	2315
The Research and Comparison of some Methods which were Used to Account how to Distribute the Load in the same Plate X. Liu	2319
The Comprehensive Assessment of Rural Power Enterprisesdevelopment Ability Based on FAHP Z.H. Lin and X.R. Chen	2323

Analysis on the Technology of Crop Straw Curing Molding for Energy-Oriented Using X.Y. Guo, J.W. Ruan, Z.S. Cai, J.W. Yu, J.Q. Ruan and J. Li	2328
Virtual Operation Strategy and IFOT Model Based on TSMC Z. Li and F. Hai	2333
Approach of Economical Efficiency of Scale for Raw Materials Inventory: A Case (MRP) in Manufacturing X. Miao and H.Q. Liu	2337
Location Choice of China's ODI: Evidence Based on Panel Data X.S. Gu and L.Y. Han	2341
Maintenance Cost Optimal Model for Failure Dependence H.F. Diao, J. Cai, Y. Fu, H.B. Lin and X. Zhang	2345
Research on Spare Part Requirement for Repairable System Based on the Quasi-Renewal Model T.B. Liu, J.S. Kang and Z.F. You	2349
Research on Construction of Supply Chain Knowledge Creation Theory Model X.F. An, X.M. Zhang and G.F. Zhu	2354
System Analysis Model for Industry Security System Elements Correlation L. Li, M.G. Li and X.F. Wang	2360
The Research on Modeling and Optimization of Comprehensive Maintenance H.J. Mao, J. Cai and H.F. Diao	2364
A Study on Supply Chain Management of Chinese Local Manufacturing Industry in the Context of FDI C.H. Kang and L.L. Yang	2368
Research of Relationships between Products and Customer Based on Data Mining Technology F. Ye and N. Li	2372
