ISBN(softcover): 978-3-03785-983-4 ISBN(eBook): 978-3-03826-364-7

Table of Contents

Preface and Committees

Chapter 1: Materials Science and Technology

Numerical Simulation of High Speed Single-Grain Cutting Using a Coupled FE-SPH Approach
R.D. Shen, X.M. Wang and C.H. Yang 3

A New Method of Parallel Projective Galvanometer Scanning for Laser Material Processing on Freeform Surfaces
Y. Cao, T.T. Yu, X.L. Hu and F.P. Li 9

Application of Normal Forms to a Laminated Composite Piezoelectric Rectangular Plate with One-to-Three Internal Resonance
S.P. Chen 14

Research on the Technology for DC CMT Welding of AZ31B Magnesium Alloy
R.Y. Zhang, Y.Y. Hu and J. Wang 18

A Three-Dimensional Numerical Analysis on the Effective Permittivity of Composites Including Ellipsoids
D.Y. Zhang, L.M. Yuan, Y.G. Xu and J. Cai 23

Effect of the Process Parameters of Laser Cladding on Microstructure of Ni-Based Titanium Carbide
C.L. He, G. Zhang, Y.P. Wang, L. Zheng, X.S. Chen, S.K. Chen, Z.H. Zhou and W. Feng 28

Research on the Activity of Calcium Oxides under Various Calcination Temperatures
Y.L. Wang, S.P. Cui, Y. Yao and M.M. Hou 34

Catalytic Synthesis of Benzyl Acetate by Diatomite Supported Waugh-Type $(NH_4)_6[MnMo_9O_{32}] \cdot 8H_2O$
S.H. Liu 38

The New Technology of Preparation Activated Carbon from Lignite
Y. Yuan, Z. Chen, H.L. Qin and Z.W. Han 42

Inductively Coupled Plasma Modified Silica Material Technology Research
L. Li, Y.Q. Jia, J.L. Zhao and Y.Y. Gao 47

A Simple and Practicable PCR-Microchip with Bubble-Free Stationary Chamber
J. Luo, W.P. Zhang, W. Liu, F. Cui, W.Y. Chen, X.S. Wu and J.T. Cao 51

Synthesis and Evalution of Enteric Aqueous Polymethacrylate Coating Material
X.Q. Chen, C. Liu, H.J. Zhou, X.L. Zhang, F. Wang and Y.T. Li 56

The New Technology of Precision Grinding High Performance Ceramic Materials
F.H. Kang 61

Synthesis of $CuIn_{0.7}Ga_{0.3}Se_2$ Nanoparticles and its Quarternary Sputtering Target
J. Zhou, F.Q. Zhang and L.H. Xia 65

DWT-SVM on Near-Infrared Spectra for Moisture and Volatile Determination of Coal
X.L. Yang, F. Wang, J.S. Chen and S.H. Zhang 71

Investigation on Work Hardening Effect Generated during Dynamic Formation of Al-Based Coating on Magnesium Alloy
X.M. Wang, S. Zhu, X.Q. Feng and Y.X. Liu 75

Synthesis of d4T- 5′-glycosyl-1″-phosphoramidates from *H*-Phosphonates via an Oxidative Coupling Strategy
S.S. Gong, G.D. Liu, Q.K. Yang and Q. Sun 79

A Brief Review of Cardanol-Based Surfactants
X.H. Yang, Z.M. Wang, F. Jing, L.H. Hu and Y.H. Zhou 83

A Novel *H*-Phosphonate Method for the Synthesis of D-Mannose-1-Phosphate
X.J. Li, S.S. Gong and Q. Sun 88

Efficient Synthesis of *O*-glycosyl-5′-*H*-Phosphonate Diesters of d4T
G.D. Liu, S.S. Gong, S. Liu and Q. Sun 92

Synthesis of 4-Hydroxyl Pyrazolo[3,4-*d*]pyrimidines from the Corresponding 4-Chloride Precusors with Acetic Acid
J. Sun, S.S. Gong and Q. Sun 96

Preparation of Magnetic Nanoparticles from Byproduct of Titanium Dioxide-Copperas
S.J. Bai, S.M. Wen and C. Lv 100

Research on and Applications of Au/Pt Thermocouples
G.C. Zhao, C.L. Zhao, L.P. Song and X.Y. Tong 105

Effect of Near β Heat Treatment Process on Microstructure of TC18 Alloy
H. Quan, K.H. Qiu, D.M. Huang, J.Y. Liu and R. Chen 110

Effects of the Preparation Parameters on the Properties of Graphite/Carbon Fiber/Copper/Phenolic Resin Composites
M.D. Li, H. Niu and H. Yang 115

Extraction Study of Nitro Humic Acid from Lignite by Dry and Wet Process
Y. Yuan, J.P. Liu, Z. Chen and H.C. Li 119

Pseudopotential Calculation for the Electronic Properties of $TbFeO_3$ with Perovskite Structure
J. Li 124

Giant Electroresistance Induced by Electric Currents in Epitaxial Thin Films of $Pr_{0.7}Sr_{0.3}MnO_3$
H.Y. Liu, L. Zhou, Y. Li and G.D. Liu 130

Study on Mesoporous PW/SBA-15 for Isomerization of α-Pinene
C.H. Wu, H.Q. Liu, C.F. Zhuang and G.B. Du 134

Effect of Particle Size of BNT Filler on Dielectric and Mechanical Properties of LCP Based Composite
M.P. Chun 138

Research on the Rationality of the Combined Application of Bamboo and Wood in Outdoor Furniture
J.S. Gao and Z.F. Zhang 142

Chapter 2: Mechanics, Energy, Thermal and Dynamic Systems

A 3-Dimentional Numerical Analysis of Solar-Panel-Chimney for House Ventilation
S.H. Wang, C. Sheng, H.M. Chou and S.C. Yu 149

Numerical Simulation on the Effect of Mist on Impingement Cooling of Double Chamber Model
G.J. Liu, T. Xu, H.C. Ge, Z.L. Yu and T. Yoshino 154

Simulation and Experimental Study of Oscillator for Permanent Magnet Vibration-to-Electrical Power Generator
Z.H. Wang, M. Zhang, N. Li and L. Wang 158

Numerical Simulation of Liquefied Natural Gas in Rib-Tube
S.H. De, Z.Y. Fu, J.Y. Che and X.L. Wen 162

Research on the V/H Inspection of Spiral Bevel Gear before Heat Treatment
J.L. Qiu, R.R. Zhao, Y.J. Wang, W. Zhao and J.C. Li 166

Energy Spectra of the Low-Lying State in N-Layer Quantum Dots
A.M. Wang 170

Study on an Intelligent Teaching Dynamic Balance Technology
S.P. Cai and T. Zhao 174

A Surface Roughness Model in Radial-Mode Abrasive Waterjet Turning for High-Tensile Steels
W.Y. Li, H.T. Zhu, J. Wang and C.Z. Huang 177

Dynamic Characteristics Analysis of Spiral Bevel Gearbox Used in Ship Lift Synchronization System
T.J. Lin, Z.Y. He, F.Y. Geng and H.J. Que 182

The Effects of Stack Parameters on the Performances of Acoustic-Refrigeration Thermoacoustic Conversion System
X.H. Li, C. Li and Y.X. Cai 186

Study on the Equivalent Thermal Conductivity of Superalloy Honeycomb Core Structures
Z.H. Xie, J.F. Sun, W. Li, J. Zhao and X.S. Yue 194

Parametric FEM Analysis of Disc Brake
D.F. Chen, L. Ma, X.X. Guo and Q. Zhang 199

Thermal Stress and Modal Analysis of Engine Exhaust Manifold
C. Chen, L. Ma and Z.W. Tian 203

Energy Consumption Modelling for Air-Cushion Vehicles
S. Xu, J. Sun and J.X. Shen 208

Research on Energy Efficiency Evaluation Algorithm Based on Database System
H.J. Zhu, H.F. Gao, C.B. Wei and Z.Y. Wang 214

Numerical Simulation and Comparison on the Inner-Flow Field in Hydraulic Feedback Pump
S.Q. Xiao, D.Y. Zhu and S.Q. Liu 219

Analysis of Hydrodynamic Model of Wave Energy Converter of Inverse Pendulum
S.Q. Cao, S.M. Fu and Z.Y. Wu 223

The Modeling and Locating Technology of Assembly\Disassembly Tools in Virtual Environment
Y. Liu, S.Q. Li and J.F. Wang 229

Simulation of Aerosol Sampling Inlet for Different Outlet Angle
B.Q. Wang, Z.B. Wang, Y.Y. Li, R.H. Chen and S. Yao 234

Numerical Simulation of the Effect of Spoiler Ribs on the Flow Field in Household Soymilk Maker
L.H. Zhu, Q. Song, G.P. Li and X.B. Ze 238

Precise Ultrasonic Motor Driver Design and Analysis
J.H. Wang, M.F. Chen, G. Han and B.M. Hou 243

Calculation of Thermal Analysis Kinetics Using Least Mean Square Method
X.P. Liu, Y. Cui, Y.W. Yao, G. Chen and Z.S. Liu 247

The Modified Iteration Method for Wet Cooling Towers to Calculate the Cooled Water Outlet Temperature
W. Wang, D.L. Zeng and Y. Hu 253

Environmental Analysis on Insulation Resistance Reduction Case
L. Qiao and J.F. Sheng 257

Selecting L and C of the Passive Dynamic Harmonic Filter
Y.L. Liang, J. Chen, K. Yang and Y.X. Yuan 262

The Mechanical Model of the Dynamic Characteristics of the Bituminous Concrete Compaction Mechanism
L.L. Zhu 266

Noise Analysis of Disc Brake for Automobile
D.P. Wang, J.S. Cao and W.Z. Liu 271

Research on Power Flow Interface Oriented Regional Wind Power Forecasting Method
Y. Yu, B. Yang and F.J. Ge 275

Influence Parameters Analysis of Forming Quality and System Dynamics Simulation of Vertical Steel Bar Benting
X.J. Zheng, X.Z. Wang, J.M. Zhang and Y.F. Zhu 280

Stability Analysis of Nonlinear Stiffness Rotor-Bearing System with Pedestal Looseness Fault
Y.G. Luo, S.H. Zhang, B. Wu and H.Y. Hu 285

Effect of Bolt Slippage and Joint Eccentricity on the Response of Lattice Structure with Non-Uniform Settlement
H.W. Zhang, P. Wang and H.B. Chen 289

The Finite Element Analysis Concerning the Slip Coat of Workover Rig
J.Q. Jin, Y. Yuan and X.R. Wang 297

Lightweight Design of Tanker of LPG Truck Based on Material Strength Equivalent Substitution
B. Zhou, L. Ma, Z. Wang and Z.Z. Zhang 301

Study on the Mechanical Properties and Seismic Performance of Beam-Column Joints of Wooden Structure Building
L.W. Luan and Z. Tao 305

Stress Analysis of Asymmetric Spur Face-Gear Pair Based on Finite Element Method
N. Zhao, M.Q. Zhang and H. Guo 309

Boosting the Efficiency of an 800 MW-Class Power Plant through Utilization of Low Temperature Heat of Flue Gases
M. Wołowicz, J. Milewski, K. Futyma and W. Bujalski 315

Identifying the Unit Area Dynamic Characteristic Parameters of Fixed Joint Based on Equivalent Single DOF System
Y.C. Xiao, L.S. Wu, J.F. Ma and H. Hong 322

Correlation between BMD & Radio Density of Human Bones for Strength Evaluation
S.N. Khan, R.M. Warkhedkar and A. Shyam 326

Effect of Height and Width of Road Humps on Deceleration Performance and Driving Safety
S. Lan, F. Gao, G.Y. Xu and N.G. Ding 330

Stability and Oscillation Phenomena Analysis in Microbial Continuous Fermentation Time-Delay System
Y. Wang, X.H. Li and X.M. Li 337

Research of Vibratory Feeder Activated by the Bimorph Vibrator
J. Su, Y.H. Shen and Z.G. Yang 342

Mechanical Efficiency Analysis of Animal Locomotion by Specific Resistance
S.H. Park and D.P. Hong 347

Chapter 3: Detection and Monitoring Systems

Successive Loop Closure Based Controller Design for an Autonomous Quadrotor Vehicle
A.M. Singh, D.J. Lee, D.P. Hong and K.T. Chong 361

Multi-Channel Detection System for Joint Position Based on Optical and Orthogonal Decoding
Q.X. Hu 368

The Design and Implementation of Data Sampling and Processing System of EUV Camera Based on FPGA
L. Huang, X.Z. Li, Q.L. Zhao and C.S. Han 374

An Air Wipe Based Grease Removing and Saving Device for Anti-Twist Rope
X.J. Wu, W.H. Cui, H. Wang, J.S. Lin and L. Tang 378

The Decontaminating Device in Steel Wire Rope Automatic Cleaning, Detection and Maintenance Integration System
J.J. Chen, H. Wang, J.S. Lin, C. Fu and L. Tang 382

Indentation Tests Based on Gelatin Phantom
L. Song, T. Su, L.Y. Gao and Q.H. Zhang 386

The Research and Application on Light Shape Detection of Car's Headlamp
X.D. Liu, S.G. Dai and P.A. Mu 391

Oil-Gas-Water Three-Phase Flow Monitoring Based on Image Fusion of ECT and ERT
L.F. Zhang 397

Research on Signal Acquisition Based on Wireless Sensor for Foot Compressive Characteristics on Basketball Movement
J.H. Wang and Q. Ji 401

The Application of ICA-SVM Method for Identifying Multiple Faults in Asynchronous Motors
H.Q. Zhu, R.M. Fang and C.Q. Peng 405

Optimal Control for Vibration of Restrained Cantilever Fluid-Conveying Pipe
R.D. Bao and J.F. Dong 409

Study on the Comparison of Two Metrics Used in the Fields of Object Tracking
Y.H. Xie and C.D. Wu 419

Chapter 4: Engineering Design, Optimization and Management

The Design Simulation and Parameter Matching Optimization of Electric Drive System for Heavy Off-Road Vehicle
X.J. Ren and L. Ma 425

Economic Analysis of Large-Scale Biogas Project Based on System Dynamics
L.L. Wang, L.J. Zhao, L. Ma, G.L. Yang and W.Z. Li 429

Design Optimization for the Robustness of Dimensional Tolerance by Using Evidence Theory
H.X. Guo 434

A Method of Optimal Module Partition in Green Product Configuration Design under Uncertainty
D.T. Liu and H.P. Hu 438

Optimization Calibration of Engine Ignition Advance Angle Based on Engine Model
S.K. Zhang, R.Y. Sun, H.M. Yan and K.R. Wang 446

Multivariant Optimization Algorithm for Multimodal Optimization
B.L. Li, X.L. Shi, C.X. Gou, T.S. Li, Y.J. Liu, L.J. Liu and Q.H. Zhang 453

Multivariant Optimization Algorithm with Absorption for Multimodal Optimization
C.X. Gou, X.L. Shi, B.L. Li, T.S. Li, Y.J. Liu, L.J. Liu, Q.H. Zhang and J.J. Li 458

Design of Onboard Device to Diagnose Track Fault Online
L. Qin, D. Wei and Y.B. Sun 465

Analysis on Game Behavior of Local Governments in Reverse Logistics of ELV
C.X. Bao and X.Z. Mu 471

Remaining Life Prediction Based on HOLT Algorithm for Civil Aero-Engine
F. Bai 479

Topology Optimization of Thin-Shell Frame with Surface Loads
Y.G. Ke, L. Ma and Y.Y. Du 484

Flow Field Analysis and Optimization Design of Fan Cover for the Duct System of the Split Air Conditioner's Outdoor Unit
J. Ma, W. Yang, L. Gao and H.L. Wang 489

Research on the Design and Extraction of Vehicle Brand Form Gene
X.L. Chen and X. Li 497

Survey of User Needs for Design Knowledge Management for Product Life Cycle
D.M. Zhang, Y.Q. Song and Y.C. Xu 502

Knowledge Tracing Modeling for Product Design Knowledge Management
D.M. Zhang, Z.C. Yin and Y.C. Xu 506

Topology Optimization for Eigenvalue Problems in Aerospace Structure Design with Rigid Links
J.H. Zhu, H.H. Gao and J. Hou 510

The Affection of Fasteners Load Constraint in Topology Optimization
J.H. Zhu, J. Hou and H.H. Gao 514

Use of Logistic Approach in Optimizing the Rotary Kiln Run
J. Lisuch and J. Gonos 518

Optimization of Distributed Systems' Fusion Based on Climb-Ant Algorithm
X.H. Hu, H.J. Wang, D.R. Ren and C. Gong 524

Design of PSO Based PI Controller for Wind Turbine Systems
J.W. Perng, G.Y. Chen, D.M. Tsay, J.H. Kuang, B.J. Lin and G.S. Hwang 529

Failure Probability Calculation of Tower Crane Hoisting Mechanism
X.J. Zheng, Y.Y. Wang and Z.Y. Xie 533

Research on the Assembly Line Scheduling of Fixed Objects for the Large Complex Products
Y.L. Lin and J.F. Lu 538

A Method of the Green Product Configuration Design Based on Multi-Layer Generalized Operator and Genetic Algorithm
D.T. Liu and F.F. Jia 542

Multi-Objective Dynamic Optimum Design of Crane Gearbox
T.J. Lin, F.Y. Geng, Z.Y. He and G.M. Lan 550

The Design of Photoelectric Measuring System on Railway Track Parameters
G.W. Chen 555

Design of a High Force Voice Coil Motor
D.H. Ahn, D.P. Hong and D.G. Gweon 559

Design Optimization of BAW Micro-Piezoelectric Disk Gyroscope through Finite Element Method
Z.X. Xu, W.P. Zhang, Y.X. Cheng, G. Zhang, J. Tang, Y.H. Wang and W.Y. Chen 563

Chapter 5: Information Technology and Algorithms

Power Flow Calculation of Distribution Network with DG Based on Advanced Forward and Backward Substitution Algorithm
L.Y. Wang, Y.S. Zheng, J. Pan and Y. Liu 569

Industrial Cluster Development and Social Responsibility: From Circular Theory Perspective
Y. Cui and H. Jiao 574

Utilization of Improved RBF Network in Modeling of Wave Energy Absorption System
Y. Zhang, M.X. Li and R.R. Wang 578

Features Linear Fusion Based on AP Clustering and AASC Algorithm
L.M. Li and Z.S. Wang 583

Model and Algorithm for Thermal Performance Calculation of Power Station Boiler Based on Process Steady-State Simulation Theory
H.K. Liao, Y.X. Yu, Y.L. Wu and W. Zhong 587

Blind Image Quality Assessment Using Latent Dirichlet Allocation Model
W. Luo and T.B. Zhang 594

An Evaluation System of Pulsed GMAW Process
Y. Gao, J.H. Han, L.Y. Lou and H. Li 599

Ontology Representation of Online Shopping Customers Knowledge in Enterprise Information
Z. Li, S.S. Guo, Y.S. Yuan and L.B. Sun 603

Project Scheduling Problem with Stochastic Resource-Dependent Activity Duration
C.J. Zhong, Y. Yu and Y.L. Jia 607

An Improved Ant Colony System for Inspection Path Planning Problem and Convergence Analysis
W.B. Wang 611

Average Wage Prediction Based on Logistic Model
Z.X. Wei, J.M. Liang and P. Zhao 615

Chapter 6: Control System Design and Evaluation

A Data-Driven Modeling Approach to Multi-Source Information Fusion System
H.W. Quan, L. Zhang and L. Chen 621

Multi-Objective Control Method in Structural Stress Interval Reliability Based on Epsilon Algorithm
Z.Z. Sun, G.W. Meng, F. Li and K. Ma 625

Precision Power System Harmonic Analysis Algorithm Based on ABC-BPNN
S.C. Gan, L. Tang, L. Cao and Y.G. Yue 630

Numerical Simulation Research on Improving Effect of Steam Flooding by Using High Permeability Belt
Y. Zhao, S.T. Lu, H. Gao and Y. Gong 635

Urban Environment Monitoring and Control System Design
J. Xin and H. En 639

Alarm System for Ancient Tombs Based on ZigBee
T. Wang and W.B. Liu 643

The Novel Approach "One Drive for Multi-Plate " in Lifting Garage System Design
G.W. Chen 647

Control System Design of Ducted Fan Aerial Vehicle
Y. Zhou, Z.X. Hou, S.Q. Shan and B. Wang 652

Finite Element Analysis of Pressure Balance Work over Rig Platform
J.Q. Jin, Y.Z. Li and X.R. Wang 656

Run Risk Analysis of Solid Rocket Motor Waterjet Clearing System
Q.L. Han, Z.M. Zhu, X. Gao and Q.Y. Zhang 660

Valuing Wind Power Project on Renewable Electricity Whole-Sale Tariff in Power Market
J.N. Sheen 664

Research on Cooperative Scheduling and Design of Emergency Command System of Integrated Transport Hub
X.M. Gong 668
