

Table of Contents

Preface and Conference Organization

Chapter 1: Road and Railway Engineering

The Load Carrying Mechanism of Plate-Chair Type Retaining Structure Q. Su, J. Zhang, W.H. Zhao and L.C. Zhang	3
PFC's Application on the Dynamic Response Analysis of High Speed Railway Ballastless Subgrade L.J.W. He and Q.M. Gong	9
Characteristic Analysis of Dynamic Modulus for High Modulus Asphalt Concrete X.L. Zou, A.M. Sha, W. Jiang and X.Y. Huang	15
Influence Factors Analysis of CFG Piles Treatment in Highway Soft Foundation Settlement H. Wang and X.C. Wang	19
Application of Impact-Echo Method in Grouting Inspection in Ducts inside Prefabricated Box Girder C.Z. Kong, X.F. Xu, J.L. Sun, G.Z. Qi and Y. Cao	24
Management Research on Treatment Measures for Differential Settlement of Tianjin-Binhai Expressway's Widened Subgrade Y.G. Wei, W.F. Zhou and Y.Y. Li	28
Research on Basalt Fiber Asphalt Concrete's Low Temperature Performance C.M. Gao, S. Han, S. Chen and H. Li	35
Research on Basalt Fiber Asphalt Concrete's High Temperature Performance C.M. Gao, S. Han, K.X. Zhu and Z.Y. Wang	39
Research on High Speed Railway Evaluation of the Sustainable Competitive Advantage Z.Y. Lv and K.N. Zheng	43
Research on Red Sandstone Area Expressway Subgrade Drainage System Design H. Zhao, M.J. Lei and S.G. Peng	49
Research on a W-Beam Barrier Heighten Method N.N. Zhao, Y.G. Tai and B. Deng	53
Influence Analysis of Cell Plate Length to Slab Track Vertical Dynamic Response X.C. Ma, W. Luo, P. Wang and B.R. Guo	58
Seismic Stability Analysis of High-Fill Embankment Q. Su, J. Zhang, B. Liu and L.C. Zhang	64
Development of Portable Inspection Car for Measuring Rail Wear L. Wang, P. Wang, J.H. Xu and J. Wang	68
Influence of Heavy Axle Load on Dynamic Response of Semi-Rigid Base of Asphalt Pavement Q.R. Li, D.Z. Liu, J.S. Sun and J.R. Lu	72
Research a Model of the Dynamic Stiffness in Granular Packs H.Y. Jiang, L.L. Song and J.B. Lu	77
Study on the Settlement of Soft Soil Subgrade with a Crust Layer D.Z. Wu and Z.Y. Zhang	82
The Quantitative Assessment of Objective Security about Two-Lane Highway's Intersection in Mountainous Area L. Yang, Q. Xu, F. Shao and J. You	89
Geological Disasters Prevention and Control in the Road of the Urbanization Process B. Xiao, J. Li and Y.H. Fan	97
Analysis Interlayer Shear Stress of Ultra-Thin Wearing Course Considering Temperature and Different Interlayer Contact Conditions Y.H. Yang, Y. Shen and X.X. Gao	102
Research on Stability Strengthening Scheme of Continuous Welded Rail on Bridge in the Small Radius Curve Section B. Wang, J.H. Xu, L. Wang and P. Wang	106

The Research on Emergency and Rescue Capability of High-Speed Railway in Perilous Mountains Based on Complex Element Model Y.H. Yao and Y.F. Li	111
Research on Basalt Fiber Asphalt Concrete's Water Stability C.M. Gao, Q. Zhang and H.Z. Zhang	117
Analysis of High-Speed Railway Roadbed Deformation in Seasonally Frozen Region Y.Z. Zhang, Y.L. Du, B.C. Sun and G.J. Hao	121
Analysis of Displacement Filed of Asphalt Airport Pavement W. Zhang, Z.C. Sun, X.M. Zhang and H.X. Xue	125
Study on the Dynamic-Static Mechanical Parameters of Fly Ash Soil Improved by Polypropylene Fiber Y. He, J.B. Tian and Q. Ge	129
Optimization Analysis of Different Excavation Offsets in Railway Pilot Tunnel by CRD Method C.K. Li	134
Effects of Framed Embankment for High-Grade Expressway in Permafrost Regions W.S. Pei, Y.M. Lai, M.Y. Zhang, W.B. Yu, S.Y. Li and W. Chen	139
Analysis on Genesis of Frost Damage to Taiyuan-Zhongwei-Yinchuan Railway Subgrade in Seasonal Permafrost Region Q. Su, W. Jiang, J.K. Yao, W. Sun and L.L. Yang	149
A New Method to Measure the Gross Volume Density of the Asphalt Mixture Specimen - Brush Wax Method L.S. Peng, M. Gong and L. Qiao	154
Key Issues of Heavy Haul Railway CWR Design in Large Temperature Difference Alpine Region F. Han and B.C. Wang	163
The Numerical Analysis of Roadside Water Effects on Qinghai-Tibet Highway Sub-Grade Longitudinal Cracks N. Wang, Q.M. Meng and J.F. Yang	168
Rheological Characteristics of Epoxidized Natural Rubber Modified Bitumen R.A. Al-Mansob, A. Ismail, N.I. Md Yusoff, C.H. Azhari, M.R. Karim, A. Alduri and M.S. Baghini	174
Pavement Roughness Indices Related to Riding Comfort Z.T. Zhang, Q.M. Zhao and W.Q. Yang	180
Research of the Properties of Basalt Fiber Reinforced Polymer Bar for Continuously Reinforced Concrete Pavement Q.Y. Liu and M. He	184
Experimental Research of High Efficiency Water Reducing Agent in Improving Crack Resistance of Thin Layer Concrete J.F. Liang, C. Zhang and Y.H. Zhang	188
Research on the Application of Fiber Bragg Grating Sensor in Pavement Monitoring Y. Hu, J.H. Yu, S. Zhang and J.G. Xie	192
Analysis on Bearing Capacity of Heavy-Load Cement Concrete Pavement W. Yu, Y.N. Zhang, X.C. Wang and Z.A. Feng	200
Testing Study on Fatigue Damage of Asphalt Mixture with Considering the Restoration Time B. Ding, C.C. Zheng and H.N. Wang	204
Comparative Research on Pavement Performance of Cement Stabilized Macadam Base in Different Molding Methods B. Li, J.X. Liu and X.H. Li	210
Research on Designing Optimum Asphalt Aggregate Ratio of Asphalt Mixture by Direct Shear Method H.M. Li and W.F. Liu	215
Influence of Moisture Content to the Freeze-Thaw Performance of Roadbed in High-Cold Areas Q.L. Wu, Y. Sheng and F. Xie	219
The Treatment Technology of Banbidian Goaf in Qinhuangdao H.S. Mu and L. Gao	223

Research on the Performance of Asphalt Mixtures of Polymer Fibers H. Zhang and L. Li	228
Stability Analysis on High Slope Based on Strength Reduction Method B.J. Ge, L.J. Wang, D.F. Li and Y. Li	234
Viscoelastic Properties Research of Sisal Fibre Asphalt Concrete Z.Y. He, F.X. Liu and F. Lv	239
Analysis on Mechanical Response for Asphalt Pavement Based on Thickness Variation for Transition Layer of Graded Crushed Rock H.Y. Wei, W.F. Zhou and J.Y. Sun	244
The Effect of Asphalt and Aggregate Gradation on the Low-Temperature Performance of Asphalt Mixtures for Intermediate and Underlying Course Z.H. Sun, Q.B. Yu, T.B. Wang, B.Y. Yu, G.Q. Zhu and J. Ma	251
Influence of SBS Dosage on the Performance of Modified Asphalt C.Y. Ye, W.Y. Yang, X. Zhang and W.G. Li	255
Influence of Modifier Dosage and Aging Time on the SBS Modified Asphalt B.L. Wang, M.N. Zheng, J. Zhang and J.G. Geng	260
Early Strength Evaluation of High-Performance Emulsified Asphalt Cold Recycled Mixture D.C. Wang, X.G. Hu and Y.X. Song	265
Experimental Study of Sulfate Attack Resistance Performance on Cement Concrete Pavement J.F. Liang, C. Zhang and X.Y.F. Wang	270
BP Neural Network Model on Choice of Project Manager for Highway Slope Treatment B. Wang and Y.T. Gao	274

Chapter 2: Vehicle Engineering and Carrier Operation Engineering

Design of Road Test and Evaluation System for Vehicle Handling and Stability M.Q. Gao, R.Q. Guo and R.L. Liang	281
Four-Rotor Autonomous Vehicle S.Y. Wu and X.H. Lv	286
Improvement in Design and Manufacture of Automobile Based on Ergonomics Theory Y.Z. Chen, Y.Q. Feng, Y. Yin and X.R. Zhang	292
Design and Experiment on Premixing Burner Y. Wan and H. Wu	297
The Effects of Tire Nonlinearity on Vehicle Steering Stability at High Speed H.D. Xu	301
Research on the Methods of Accident Vehicle Safety Performance Technological Identification H.H. Xu and G.F. Li	310
Design and Development of 6DOF Hydraulic Motion Platform for Vehicle Driving Simulator J.G. Zeng, J.Y. Liu and Q. Yu	315
Fatigue Life Analysis of Compressor Bracket of Car Air Conditioner W.S. Wang, H.J. Wu, Z.X. Zheng and J. Xu	319
The Study on Crash Worthiness of Cab-over-Engine Medium Bus with Dummy Restrains System H. Qi and F. Chao	323
Energy Consumption and Emission of Pollutants from Electric Bicycles T.Z. Li, F. Qian and C. Su	327
Study on Emitting Device Improvement and Experiment Based on Reducing Emission Freeze Y. Bao, F. Tian, Y.D. An and W. Wang	334
Test and Analysis about one Kind of HEV H.S. Xie and Y.X. Wang	338
Reliability Test of Taxis Based on Typical User Road S.X. Wang, L. Zhang, C.B. Zhang, W.L. Li and W. Zhou	343

Integrated LQR Control of Automobile Anti-Rollover System and Electrical Power Steering System	
C. Liao, X.Y. Wu, H.W. Huang and Q. Fang	349
Study on Ride Comfort of Automobile Active Suspension	
X. Chen and L.Y. Zhang	356
Contrast Test Research on Application of Dry Friction Isolators to Vibration Isolation of Vehicle Electronic Devices	
J.F. Hou, R.L. Li, G.C. Yu, T. Luo and H.W. He	360
Emission Characteristics of CNG/Gasoline Dual-Fuel Taxi	
F. Qian and T.Z. Li	365
A Optimization Algorithm of Obstacle Limit Takeoff Weight	
H.Y. Chen and W.T. Luo	370
Analysis of Sight Conditions from Driver Position	
D. Cihlářová, T. Seidler, M. Řezáč and T. Slonka	375
Simulation and Optimization of B-Pillar Crashworthiness Based on Virtual Test	
W.G. Qiao and W.Y. Shi	380
The Study of Vehicle Load Monitoring System	
Y.D. Zhao and X.L. Liu	384
The Experimental and Simulation Analysis of Steel Piston Temperature Field and Deformation Based on Finite Element Method	
Y. Zhang and T.X. Su	388

Chapter 3: Transport and Transportation Networks, Planning, Construction and Operation

Enterprise Coordination Transport Analysis	
Y.X. Yan and J.Q. Wang	395
Logistics Cost Control of Railway Construction Projects Based on Material Classification Management and Material Supply Plan	
A.M. Li, G.Q. Wang and J.J. Zhang	399
Thinking of Comprehensive Energy-Saving System Construction for Urban Rail Transit	
J.K. Liang, Z.G. Liu and Y.C. Huang	405
Research on the Key Issues of the Civil Communication Resource Management for Urban Rail Transit	
J.X. Zhang and B.M. Han	410
Research on Parking Demand Model of Colleges and Universities Based on Shared Parking	
K. Xie, J. Chen and J.H. Zheng	415
Rent Pricing in Urban Rail Transit SBOT Projects under Uncertainties	
J.N. Lv, W. Liu and Q. Zou	422
Study on Taxi Quantity Model Based on Dual-Satisfaction	
J. Ma, T. Jin and X.Q. Luo	427
Evaluation of Traffic Organization Scheme during the Construction of Urban Subway Station Based on TransCAD	
B. Zhang and B.J. Zhang	433
Real Option in Urban Rapid Rail Transit PPP Project	
C. Wang, W. Liang and S.Q. Wang	437
The Waterway Service Level Research of Xijiang Waterway in Zhaoqing Area	
J. Tan, W.L. Cao, W.C. Zhang and J.Y. Yang	443
Research on the Resorting Capacity Analysis and Strengthen Measures of Kunming East Station	
X.Y. Yu, Y. Wang and H.Y. Li	449
Study on Hub-and-Spoke Organization of Container Shipping in the Yangtze River	
L. Yu, P.L. Zhang, P. Guo and H.G. Liu	455
Research on the Decision-Making Model of Container Cranes' Renewal	
R. An, Y. Yang and N. Dong	460
Metro Operation Safety Evaluation	
L.Y. Wei, Y.B. Lv and Y. Ren	467

Optimal Allocation of High-Speed Railway Mobile Equipment Based on the Passenger Flow Q.J. Zheng, B.M. Han and H. Li	471
Roads Problems on Undermined Areas in the Moravian-Silesian Region D. Cihlářová, T. Seidler and M. Rezáč	477
Analysis of Non-Conventional Roundabouts Performances through Microscopic Traffic Simulation V. Astarita, G. Guido, A. Vitale and V. Gallelli	481
Survey on High-Speed Railway Train Plan Design Issues P.F. Zhou, B.M. Han and Q. Zhang	489
Effective Transportation Technology Transfer Operations for Economic Development in Botswana A.S. Oladele	493
Investigation on Entry Capacities of Single-Lane Roundabouts L. Ren, X.B. Qu, S.A. Wang and H. Guan	497
Comprehensive Cost-Benefit Analysis Based on the Performance of Drop and Pull Transport Z.Z. Wang and X.Y. Liu	501
Research on Airport Site Selection Based on Triangular Fuzzy Number Y. Liao and F. Bao	507
Empirical Analysis of New Urban Rail Transit System of Planning Convergence J.J. Zhang, S.R. Chen and Z.H. Jiang	512
Study on Layout Methods and Location-Selecting Model for Highway Service Area W.Q. Zheng, X.N. Sun and M.W. Wang	520
The Application of Stochastic Order to Stochastic Multiobjective Programming Problems M.F. Zheng, Q.H. He, Z.T. Wang and D.Q. Su	524
Study on Hub Location Models and Research Trends M.L. Li, X.F. Wang and Q.X. Sun	528
Time-Dependent Discrete Transportation Network Design Y. Wang, J.X. Cao, X.X. Li and R.D. Wang	533
Construction Strategy on Low-Carbon Transportation System in New District of Lanzhou K. Zhang and G.Q. Cai	537
Transfer Efficiency Evaluation Method of Urban Rail Transit Based on the Generalized Cost Function L. Xu, X.C. Zhang, J.H. Chen and J. Yu	542
The Study of Road Network Capacity Based on Unblocked Reliability G.B. Lin, R.G. Ma, H.Y. Deng and G.H. Liang	548
Research on the Benefit Evaluation of Energy Saving and Emission Reduction of Drop-and-Pull Transport W.J. Tao, B. Zhan and M. Wang	554
The Study of Feeder Bus Network Optimization Model X.L. Fang, D. Xiong, Z. Zhou, J.B. Wang, C. He and L. Chen	558
Research on the Problems of China's Railway Refrigerated Transport and Solutions H. He and D.W. Li	562
Simulation Study Based on OpenTrack on Carrying Capacity in District of Beijing-Shanghai High-Speed Railway Z. Chen and B.M. Han	567
Research of Railway Capacity Strengthening Scheme Decision Method Based on Game Theory X. Xu, X.C. Zhang and B. Xu	571
Optimization Model of Passenger Train Service Plan Based on the Degree of Passenger Satisfaction P. Liu, B.M. Han and Q. Zhang	577
Evaluation of Ship-Diversion Induced Emergency on Port Traffic Volumes G.L. Tang, R. Zhang, W.Y. Wang and Z.J. Guo	583
Managing Seasonable Differences in Passengers' Traffic Volume by Lhasa Railway Station G. Cheng, W. Xu and Y. Rong	592
Deployment Optimization of Rail Gantry Cranes in Railway Container Center Stations S.Y. Zhu, X.N. Zhu and Y. Liu	597

Research on Passenger's Choice Behavior Based on Beijing-Guangzhou High-Speed Railway Ticket Data Y.T. Zou and L. Nie	601
---	-----

Chapter 3: Transport and Transportation Networks, Planning, Construction and Operation

Patent-Based Study on Rail Transit Development in China W.J. Yang, B.M. Han and Y.J. Lan	609
Research on Uncertain Network Design Problem Y. Wang, J.X. Cao, R.D. Wang and X.X. Li	613
The Study of Train Operation Plan of Night Train on Beijing-Guangzhou High-Speed Railway under Segmented Rectangular Maintenance Time Window H. Jia, B.M. Han and Q. Zhang	619
Research on Transportation Organization Schemes of Jinzhongnan Railway Passage Y.G. Wei, Y.Y. Bai and J.F. Wei	624
High-Speed Railway Passenger Node Classification Method and Train Stops Scheme P.F. Zhou, B.M. Han and Q. Zhang	632
Research on Post Evaluation System of Scenic Highway and Quantitative Evaluation with Interval Approximation Method C.Y. Yuan, W.Y. Li and L.Y. Zhao	637
PMP-Based Optimization Method for Determining Airline Fleet Composition Y. Wang	645
Research on Passenger Capacity of Escalator in the Hub B. Li and M. Li	650
The Research on the System of Level of Service of the City Commercial Pedestrian Street J.Q. Meng, Z.J. Zhu and J. Zeng	656
Study on Multi-Objective Greenness Planning Model for Liners J. Qi, L.Z. Wang and S.J. Su	666
Study on Transport Lines Configuration of Highway Passenger Station Y. Xie, B. Zhan and Q. Yin	671
Study on Transport Scheme for Easing Congestion in and around Port - Take Colombo Port as an Example X.M. Liu and S.B. Chen	675
Study on Wharf Accidents Based on the Grey Correlation Analysis X.L. Wang, X.X. Li, W.L. Guan and S.T. Peng	683
Study on the K-Shortest Paths Searching Algorithm of Urban Mass Transit Network Based on the Network Characteristics W.T. Zhou, B.M. Han and H.D. Yin	689
Dynamic Traffic Network Equilibrium System with Elastic Demands C.F. Shi and Y.R. Wang	698
A GFIC-I Data Fusion Model in the Field of Automobile Transport X.S. Cai and J.W. Wu	703
Research on Simulation of Evacuation in the Deep Buried Station of Urban Rail Transit D.W. Li, F.L. Liu, Y.X. Wang and W.T. Zhou	712
Research on Link Travel Time Reliability Model Based on Massive Expressway Toll Data T. Wen, C.C. Li, C.J. Che, L.D. Zhong and X. Xin	719
Maintenance Management and Analysis of Highway Tunnel Electromechanical System X. Jia, Z.P. Fang and C. Wang	727
Common Fault Analysis of Highway Toll Collection System X. Jia, J.H. Yu and K. Xia	731
A Clustering Algorithm Applying to Transportation Market Segment C.Y. jing, H. Sun and P.W. Zhang	735
Evaluation and Analysis of Botswana Gravel Road Condition for District Transportation Networks Monitoring A.S. Oladele	740

Research on the Correlation of Transportation and Economic Development in Wuhan C. Zhang and L. Wang	745
The Road Network Density and Spatial Dependence Analysis Based on Basin Scale - A Case Study on Shiyang River Basin W. Wei, P.J. Shi, J.J. Zhou and B.B. Xie	750
Objectives and Views of Road Passenger Transport Transformation under the New Circumstances Q.F. Kong, L.Y. Gong and J.L. Jiang	755
Study on the Policy of Chinese Road Passenger Transport Intensification L.Y. Gong, Q. Shi, Q.F. Kong and B.L. Chen	759
Thai Consumers Satisfaction after Receiving Services from Thailand's Newest Low-Cost Airline S. Charoensettasilp and C. Wu	767
Co-Development of Nansha Port and Nansha District Analysis J. Peng	778
The Evaluation of Comprehensive Transportation System in Inner Mongolia Based on Principal Component Analysis C.M. Zhang, Z.X. Ma, L.L. Zhai, X.Y. Cui and X.B. Zhao	782
Urban Congestion Pricing: Practices and Future Development Z.Y. Liu, T.S. Wang, X.B. Qu and Y.D. Yan	787
Research on Hainan East Ring Railway Passenger Market Segmentation Based on Customer Loyalty Y.N. Jiang and Y. Zhao	794
Study on Transportation Development Mode Selection for the Growth of Employment in City Center - Case Study of the Expansion of Financial District in Beijing S.L. Wang, H. Zhao and C.F. Shao	798
Optimization and Simulation Evaluation of Small and Medium-Sized City Plane Intersection X.S. Qin	805
Evaluation Index System of Urban Rail and Bus Transfer Integration X.M. Xia and X.D. Ma	809
Experience and Reference of Implementing Public Transport Priority Strategy Dominated by Urban Rail Transit in Tokyo B.Y. Zhang, H. Yue and S. Wang	813
A Two-Step Method to Solve the Motor Train-Set Circulation Problem Y. Zhou, L.S. Zhou, Z.X. Bai and Y. Wang	820
The Relationship between Non-Motor Vehicle Lane's Utilization and Width and Other Factors Z. Zhou, J.B. Wang, C. He, X.L. Fang, D. Xiong and M.M. Wei	827
A Nonparametric Efficiency Analysis of Shanghai Public Transport Systems Z.T. Zheng, K.Z. Jiang, L. Zhou, N. Li and Z.C. Wu	832
Transit Network Design Model Based on Transport Efficiency S.Z. Zhao, H.S. Liu, X.L. Zhang and Q.F. Tian	840
The Optimal Design Project about Bus Station Spacing in the City H.N. Lan, L. Wang and Y.L. Tian	845
Reflections on the Development of Urban Bicycle Traffic X.J. Zhao, B.B. Zhan and Y.T. Luo	849
Study on the Work Specifications of Dangerous Goods' Safety Inspection in Bus Passenger Station J.L. Jiang and X.N. Sun	853
The Impact of Urban Structure and Building Typology on Transport Solutions M. Peřínková, J. Česelský and M. Řezáč	858
Urban Bicycling and its Contribution to Transportation Sustainability: Comparison between European and Chinese Cities M.T. Phan and R.C. Wang	863
The Researches on the Current Energy Consumption and Energy-Saving Potential of Beijing Subway Y.M. Wang, S. Pan, J.S. Wu, C.Q. Xu, L. Fan, X.R. Wang and Y. Niu	867

Chapter 4: Modern Logistics System Planning and Optimization

Analysis of Cost-Benefit Ratio for Dual-Load Transportation Using Empty Container X.N. Li and P.J. Zheng	873
The Integrated Optimization of Container Port Logistics System Resources B. Li, C.J. Wu and J.X. Cao	878
A Simulation Based Analysis on Setting Pontoons in a Regional Container Hub Port B. Qiu and Z.H. Jin	884
Study on Locating a Master Station of Gas Station B. Su, N. Jia, Y. Xu and X.F. Cheng	894
Measuring the Performance of E-Commerce Logistics System Based on Fuzzy-AHP H.W. Wang, Y.S. Yan and H.W. Duan	898
The Choice of Different Logistics Policies Considering Transportation and Inventory Costs in a Two-Echelon Distribution System P. Lv and C.Z. Ma	902
Study of Logistics Park Planning and Design Based on E-Commerce Platform Y.J. Liu	907
Research on Aid Site Choice in Emergency Based on Traffic Preponderance R.H. Qian and X.B. Zhang	911
Freight Transport Demand Forecasting in Urban Logistics Planning: A Case Study of Yiwu City S.C. Sun, Z.Y. Duan and C. Chen	915
Integration and Optimization of Quay Cranes and Trucks at Container Terminal Q.Y. Zhao, J.X. Cao and Z.J. Gao	922
Tandem Lift Quay Cranes and Yard Trucks Scheduling Problem at Container Terminals L.H. Chen, J.X. Cao and Q.Y. Zhao	927
Optimization Research of Berth Allocation and Quay Crane Assignment at Container Terminal Based on the Genetic Algorithm Z.J. Gao, J.X. Cao and Q.Y. Zhao	931
Study on the Factors Influencing the Logistics Industry Agglomeration C. Chen, Y.H. Han and Y.C. Huang	935
An Integration Optimization for Berth Allocation and Quay Crane Scheduling Method Based on the Genetic and Ant Colony Algorithm R.D. Wang, J.X. Cao, Y. Wang and X.X. Li	940
The Dynamic Effect of Tax Revenue on Traffic Industry Growth in China Q. An, J.Y. Wang and D. Wang	945
Seasonality Analysis of Imported Iron Ore Throughput in China's Coastal Ports L. Wang and J.S. Zhu	950
Study on Economic Compensation for Owner of the Requisitioned Civilian Transportation in Emergency R.H. Qian	955
Routing Optimization of City Distribution Considering Access Restriction X. Jin, Y. Tang and Q. Xu	959
Urban Development Planning in Motorized and Non-Motorized Traffic Integration Studies D. Xiong, X.L. Fang, Z. Zhou, Z.L. Liu, J.B. Wang and C. He	967
Finding a Zoning Path Based on Anti-Block Ability in an Urban Traffic Network B. Su, C. Cheng and Y. Xu	972

Chapter 5: Traffic Control and Traffic Safety

An Identification Method of Traffic State Inequality for Urban Roads F.J. Fu, Q.F. Lou, B. Wang and D.H. Wang	979
The Influence of Future Vehicle Safety Network Impact on Traffic Flow J.Q. Wang, X.D. Li and Y.F. Xiong	985
Research on Quantification of Airline SMS Security Risk Assessment R. Shi and M.J. Li	990

Building Topological Structure of the Post-Disaster Road Network Based MapX X.R. Yin	995
Flow-Density Relationship for Discontinuous Flow on Urban Street Network F.J. Wang, W. Wei, D.F. Ma and D.H. Wang	999
Research on Fast KCSP Algorithms for Searching Connecting Paths in Airline Networks J.F. Li and T.J. Li	1005
Study on Performance Measurement of Beijing Urban Expressway Based on Microwave Data Y. Wang and C.Q. Shao	1014
Prediction of Urban Rail Transit Sectional Passenger Flow Based on Elman Neural Network Q. Li, Y. Qin, Z.Y. Wang, Z.X. Zhao, M.H. Zhan and Y. Liu	1023
A Study of an Adaptive Two-Phrase Signal Control Strategy for Resolving Conflicting Transit Signal Priority Calls L.Y. Gao, X.J. Hu, W. Wang and X.D. Hua	1028
Pedestrian Evacuation with a Improved Dynamic Parameters Model N. Zhu	1037
Foggy Image Enhancement Based on Filter Variable Multi-Scale Retinex F. Zeng, Q. Wu and J. Du	1041
Development and Evaluation of a Green Wave Control Algorithm Based on Two-Way Bandwidth Maximization for Transit Signal Priority L.Y. Gao, X.J. Hu, W. Wang and S.S. Yu	1046
Video Analysis of Conflict Situations and Parking Problem V. Krivda and I. Mahdalova	1055
LOSS Evaluation for Continuous Downgrades Segments Based on Accident Frequency Prediction Y.X. Sun, C.F. Shao, M. Meng and S.S. Ouyang	1061
Reach on Value of Crash Reduction Factor (CRF) in Safeguard Technology of Mountainous Rural Highway G.X. Zhou, X.W. Chen and Q.J. Xiang	1067
A Hybrid Algorithm for the Multi-Objective Time Dependent Vehicle Routing Problem Y. Sun, Y. Chen, C.C. Pan and G.K. Yang	1071
Research on Traffic Organization at the Access of Urban Tunnels X.D. Xu and L. Lin	1076
The Analysis of Emergency Rescue System for Urban Road Traffic Accidents B. Yang and F.M. Zhou	1080
Optimization Model of Airplane Data Communication Network for Air Traffic Management X.H. Zhu and Z.K. Tang	1084
Optical Research on Delivery of Departure Aircraft in Airspace Class D Y. Liao, F. Bao and H.Q. Chen	1089
Study of Characteristics of Phone Distraction on Drivers and its Influence on Traffic Safety Operation Y.L. Ma, X. Leng and L. Qi	1093
The Model and Algorithm of Using Shunting Locomotive for Marshalling Stations C. Cui, X.C. Zhang and J.H. Chen	1097
The Microscopic Simulation Based on Conflict of Pedestrian Crossing Street Q. Pu, L.Y. Sun and C. Gu	1102
The Correlation Analysis of Two Wheelers Accident Factors and Casualties Based on In-Depth Traffic Accident Investigation G. Li, W.X. Wang and F.J. Liu	1107
Two-Wheelers Users' Injury Analysis Based on Cars to Two-Wheelers Accidents Data F.J. Liu, D.J. Bu and Y. Mao	1114
A Study of Loop Detectors Based on Vehicular Trajectories H. Yang	1118
Evaluation of Signal Control Strategy Based on Hardware-in-the-Loop X.H. Zhao, C. Chen and J. Rong	1122

Empirical Analysis on Time to Collision at Urban Expressway C. Xu and Z.W. Qu	1127
Anticipation Driving Behavior in Car Following Theory F. Lv, C.H. Ye and H.X. Ge	1133
The Analysis and Research of Traffic Accident Velocity Based on C# L. Lin and T.T. Lv	1137
Modeling Highway Lane Changing Using Bayesian Networks J.Q. Wang, R. Chai and N. Cao	1143
Analysis of Driver's Characteristics Based on Internet of Vehicles J.Q. Wang, X.Q. Xue and N. Cao	1148
Framework for Dynamic OD Matrix Estimation Based on Multi-Source Traffic Data Fusion X. Zhou, Z. Liu, X.X. Zhao and J.H. Guo	1153
The Analysis of Driver's Behavior in Non-Signalized Intersection Based on the Game L. Zhang, X.W. huang and W.M. Wu	1157
Research on the Problems and Countermeasures of Urban Pedestrian Traffic System Z.J. Zhu, J.Q. Meng and J. Zeng	1163
Evaluation of Road Traffic Safety in Huai Yin District of Jinan City Based on AHP Y.F. Wang and D.X. Zhang	1167
A New Floor Field Model for Pedestrian Evacuation Considering Local Density S.N. Li and X.G. Li	1172
Research on the Feasibility of the Promotion of Carpool in Yichang J. Peng and X. Lan	1179
Influence Mechanism of Travel Information Service Level for Drivers' Travel Time Prediction Error N. Wan, J. Xiong and F.X. Guo	1183
Research on Traffic Flow Velocity Characteristic at Temporary Reversible Lane Y. Cao, Z.Y. Zuo and H.Z. Xu	1189
Study on Influencing Factors of Passenger Transfer and Transfer Volume in Comprehensive Passenger Transport Hub J.L. Jiang and C.G. Jing	1194
Passenger Waiting Time and Behavioral Adaption to Suburban Bus Timetable M.J. Zhang, C. Chen and M.X. Han	1199
Acceptability Analysis of Parking Charges Based on Structural Equation Model H.H. Xiao, J. Lu, Q. Ma, Y. Wu and Y.Q. Lin	1204
Estimation of OD Matrix in TIA Project with TransCAD L.C. Li and Y.G. Wang	1211
Study on the Application of the Urban Traffic Guide System in New Media Technology Y.T. Wang and C. Huang	1215
UC-Win/Road Simulation Systems Application to Domestic Simulation of Road Traffic Y.H. Li, C.Q. Zheng, C.F. Shao and H. Deng	1219
Construction and Application of 3D Traffic Environment Build Platform Based on UC-Win/Road H. Deng, C.Q. Zheng, C.F. Shao and Y.H. Li	1225
Numerical Simulation of Vehicle Crash into Reinforced Concrete Guardrail L. Yang, L.J. Kong and D.B. Liu	1230
