

Table of Contents

Preface and Conference Organization

Chapter 1: Advanced Materials Research

An Environmentally Friendly Composite Composed of Short-Cut Grass and Starch C.B. Wu and X.H. Zeng	3
Effects of Mg₁₇Al₁₂ Precipitate on Corrosion Resistance of Al Ion Implanted AZ31 Magnesium Alloys P. Li, W.M. Liu and M.Q. Wang	7
Environmental Friendly Conversion Coating Formed on Magnesium Alloys and its Anti-Corrosion Performance W.Q. Zhou, S.W. Wu, L. Sheng and X. Li	11
Comprehensive Research into the Influence of Resin on Properties of Environmentally Friendly Water-Based Ink Y. Gong, B.Q. Huang and X.F. Wei	15
Enhanced Photocatalytic Activity of H-C-TiO₂/Graphene Based on the Synergistic Effect between Surface Defects and Ti-C Bond L. Zeng, M.H. Li and W.L. Song	23
Passivation Effect of Rare Earth Lanthanum on Galvanized Steel X.F. Liu	31
Research on Controllable Synthesis of Magnesium Carbonate Tri-Hydrate D. Wu, B.J. Luo, Y.Q. Wang, S.Y. Lu, Q. Zhang and X.P. Huang	35
Influence of Alloying Element on Corrosion Behavior of Hastelloy C-276 in Supercritical Water X.Y. Tang, S.Z. Wang, Y.H. Li and L.L. Qian	40
Self-Propagating High-Temperature Synthesis of Simulated ⁹⁰SrO-Contained Radioactive Graphite in N₂ Atmosphere X.R. Lu, S.J. Su and M.J. Chen	45
Study on Microcrystalline Chitin Cinnamon Nanoemulsion X.Q. Peng, M.J. Wei, L. Wang and L.P. Gu	53
Preparation of Ni-Co Alloy by Electrodeposition Y. Marita, Ridwan, S. Nanda and Nurdin	58
Progress of High Purity Magnesium Oxide Preparation B.J. Luo, D. Wu, L.C. Wang and X.P. Huang	62
The Preparation of Ordered Mesoporous Al₂O₃ and its Application in Ni-Based Catalysts for CH₄/CO₂ Reforming W.L. Mo, F.Y. Ma, H.X. Liu and S.H. Hao	66
Research on the Grinding Crack Causes and the Preventive Measures of the Solid Carbide End Milling Cutter X.J. Chen and H.Y. Zhu	73
Influences of Tennis Shoe Sole with Different Materials on Athletes' Movement Z.X. Zhu	77
Promote the Development of Tennis through Applied New Macromolecule Polymer Material in Tennis Racket Design Y. Zhang and M.L. Li	81
Comparative Study on the Composites with Chopped Different Parts of Rice Straw as Raw Materials C.B. Wu and J.M. Yin	85
The Sensitive Fluorimetric Method for the Determination of Curcumin Using the Enhancement of Mixing Micelle W. Huang, F. Wang and H.L. Zhu	89
Eco-Friendly Synthesis of Sulphonic Acid Oxime Esters Catalyzed by 2-(1<i>H</i>-Benzotriazole-1-yl)-1,1,3,3-Tetramethyluronium Tetrafluoroborate W. Shi, J.M. Zhang, J.H. Zhou, J.H. Zhou and S.S. Ding	93

Effects of Heat Treatment on the Properties of Polyurethane/Clay Nanocomposites Paint T. Rihayat, S. Suryani and Z. Zaimahwati	97
The Effect of pH and Heat Treatment on the Porous TiO₂ Nanostructures Derived from Triblock Copolymer Templating-Precipitation Technique of TiOSO₄ Solution A.H. Yuwono, H.S.F. Daulay, H. Latifa and A. Sholehah	101
The Effect of Precursor Mixing Temperature during Precipitation Process on the Size of ZnO Nanoparticles and the Dispersion of ZnO@SiO₂ Core-Shell Nanostructure A.H. Yuwono, N. Sofyan, V. Hamdani, A. Sholehah and M. Arief	108
Lightweight Study on Axial Crushing Thin Cylindrical Tubes of Steel and Aluminum Alloy Based on Equal Energy Absorption C.Q. Wang, D.F. Wang, W.M. Zhuang and M.X. Zhang	117
Hydrothermal Synthesis Nano-SrTiO₃ Powder and the Factors Control N.Z. Wang, J. Liu, S.F. Liu and S.L. Rong	123
Femtosecond Laser Machining of Silica and Transparent Materials M.Y. Babiy, S.S. Golik, A.V. Kolesnikov and F.G. Bystrov	128
Heat Capacities and Standard Molar Enthalpy of Formation of Butyl 4-Hydroxybenzoate (C₁₁H₁₄O₃) Q.F. Meng, D.H. Zhu, Z.C. Tan, Y.P. Dong and W. Li	133
Low-Temperature Heat Capacities and Thermodynamic Properties of a New Complex [Na(H₂O)₂]₆[MoCo₆O₁₂(H₂O)₁₂]•4.3H₂O(s) Q.F. Meng and X.S. Xia	141
Studies on the Sorption of Benzene over DX 09 Carbon X.M. Wang, H.R. Tang, X.Z. Zhou, N. Wang and F.H. Yang	146
Nano-Gold Particles on Cerium Oxide for Catalytic Combustion of Formaldehyde Y. Qin, H. Ye, F.Z. Li, X.Z. Kong and J. Mei	150
Effects of Yttrium on Cyclic Oxidation Resistance of Co-10Cr-5Si Alloy at 700 °C J.H. Xiang, X.C. Xu, L.Y. Bai, Y.X. Zheng and H.S. Zhang	154
Analysis Flue Gas DeNO_x Technology for Float Glass Furnace S.H. Ling, C.Y. Jing and X.L. Li	158
Fourrier Transform Infrared and Gel Permeation Chromatography Evaluation to Prepared Polyurethane Paint from Polyol Palm Oil Based S. Suryani and Z. Zaimahwati	162
Effect of the Amount of Water Medium on Short-Cut Rice Straw Based Composite C.B. Wu and Y. Bo	166
Intersubband Transitions in Asymmetric Quantum Wells with External Electric Field Z.X. Liu, J. Zhu and S.H. Ha	170
Liquefaction Properties of Alanine Hydrosulfate Ionic Liquid on Pine J.H. Huang, H.L. Xie and G.F. Zou	177
The Research of the Water Tank Compound Inhibitor for Vehicle L. Lu, E.Y. Zou, Z.R. Lian, H. Xu and Y. Wei	181
Tribology Behaviors of LaF₃ Nano Particles in 500SN Base Oil H.G. Wu, H.F. Li and G.X. Yu	185

Chapter 2: Design and Research of Machinery and Equipments

Influence of Hydraulic Retarder on Commercial Vehicle's Rear Axle Sideslip S.M. Li, W.D. Luo and H.P. Liu	193
Study on Intake Performance of Camless Engine M.H. Xu, L. Liu and S.Q. Chang	198
The Application of Analytic Hierarchy Process in the Evaluation of Simulation Models of Marine Diesel Engine Y.Q. Wang, G. Ren, Z. Yan and Y.H. Tan	203
Dynamic Analysis on the Principle and General Research Situation of Band Conveyor M. Wang	210
Lateral Stiffness Simplified Calculation for Flexicoil Spring with Rubber Pad on One End of Railway Locomotive and Rolling Stock Y.P. Jiang	214

Dynamic Reliability of Stochastic Truss Structures under Random Load M. Liu and H.M. Zhang	218
Optimize Selected of Anti-Attrition Ridge Parameters through Numerical Simulation in CFB Boiler Blended with Waste Sludge B. Lou, H.L. Diao and S.K. Wu	222
Simulation Research on Combustion Process in a Natural Gas-Diesel Dual-Fuel Marine Engine M. Xiao and C.L. Feng	227
Frequency Characteristics of the Valveless Self-Excited Pulse Combustor of Bend Tailpipe Helmholtz Type Y.Y. Xu, J. Chen and R.J. Wang	232
Study of the Phenomenon of Water Hammer Based on Sliding Mesh Method L.L. Guo, J. Geng, S. Shi and G.S. Du	236
A Simplified Design Method of Horizontal Axis Tidal Energy Turbine Blade X.H. Wang, L. Zhang and L. Zhang	240
Solver Development for Three-Dimensional Magnetohydrodynamic Flow on a Collocated Structured Grid System Based on SIMPLE Method J. Mao, K. Liu and H.C. Pan	247
Study on Numerical Simulation of Internal Flow Field for the Multi Blade Centrifugal Fan S.L. Zhang and H.X. Li	251
Characterization of Two-Phase Flow Patterns in Small Round Tubes W.P. Hong, G.Q. Niu and M.L. Jin	256
Theory Analysis of Microparticle with an Acoustic-Gavity Field H.Y. Yin, C.C. Zuo, Y.X. Cao and D.Y. Yang	260
Design and Analysis of Hermetic Single Chip Packaging for Large Format Thermistor B. Jiang and T. Dong	264
Study on the Compensated Capacitance for the Wireless Power Transmission System X.Q. Liu and Y.H. Li	270
Study on the Wireless Power Transmission Technology for the Implantable Cardiac Pacemaker Y.H. Li and X.Q. Liu	276
Design of Plane Magnetic Field Image Drawing System Based on PLC Motion Control J.X. You, H.M. Liang, K. Zhang and G.F. Zhai	282
Research on Characteristics of the Photovoltaic Cells Integrated on Chip L.X. Xiao, Y.T. He, Y.H. Peng and J.H. Liu	287
Research on Leakage Permeance Calculation of Bar Permanent Magnet in Open Magnetic Circuit H.M. Liang, J.X. You, Y. Xie and G.F. Zhai	292
Improving the Reliability of RFID Interrogator by an Inclined Contact Surface Design in Vehicle Infrastructure Cooperation Systems X. Xu and Y. Zhang	297
Analysis the Noise Sources and Control Measures of High Speed Railway H.Y. Zhu, P.B. Wu, J. Zeng and W.X. Teng	301
An Equipment of Separating Fish Flesh from Steaks Efficiently J.Z. Wu, M. Li, H. Zhou, C. Zhang and X.X. Hu	305
Numerical Study on Cross-Flow around Three Cylinders Using Lattice Boltzmann Method X.C. Lv, W. Zhang and D.X. Zhang	311
Research on Two-Dimensional MHD Simulations of X-Pinch Implosion and its Physical Aspects T.X. Xia, T. Zhao, L. Zou, L. Zhang and F. Zhu	316
Piezoelectric Performance Analysis of the Single-Sided Trapezoidal Loop Shaped Piezoelectric Cantilever Beam B. Jiang, H. Chen, L.J. Chen, K. Cao, S. Yuan and Q. Wang	320
Research on Field Simulation Application in Warship Cabin Performance-Based Fire Protection Design S. Zhang, J.Y. Pu and D.Z. Li	325

Chapter 3: Electric Vehicles

Research on Control Strategy and Simulation of Electric Power Steering System for Electric Power Bus	
C.X. Xu, J.G. Han, D.J. Feng and R.W. Shen	333
Research on Electronic Differential Speed Control for In-Wheel Motor Drive Electric Vehicle	
C.Q. Zhu, S. Wu and Y.Z. Yang	337
The Structural Properties Research of Piezoelectric Cantilever Beam Based on Vehicular Environment	
Y. Zhao, S.S. Liu and Y.F. Li	342
Study on Electronic Differential Control for a Mini Electric Vehicle with Dual In-Wheel-Motor Rear Drive	
S.Y. Hou, Z.Y. Li, T. Wang, L.L. Pang and Z.Y. Feng	346
HIL Simulation of 7 Tons Pure Electric Midibus ESP Based on Dspace	
L.Q. Jin, G. He and F. Deng	351
Study on Development Path of Electric Vehicle in China from a View of Energy Conservation and Emission Reduction	
W.Z. Kong, B.B. Huang, Q.H. Li and X.L. Wang	355

Chapter 4: Building Materials and Construction Technologies

Analysis of Rigid Pile Composite Foundation under Horizontal Load	
J. Ma	363
Construction and Development of a New Ecological Facade	
F. Wang, F.D. Hou and X.Q. Liu	367
Explore the Structure of the Building Envelope Energy	
Z.N. Tong	371
Influence Study of Energy Consumption in Different Flats of a High Residential Building in North Part of China	
H.M. Qu, H. Wang and L.J. Zhang	375
Research on Aesthetics and Energy Efficiency Design of Architecture	
S. Chen	380
The Evaluation of Energy Consumption and CO₂ Emission on Green Building Certification Apartments in Korea	
J.H. Park, G.W. Cha and W.H. Hong	384
A Study on Design Improvement for Application of Sandwich Insulation System	
H.Y. Lee, Y. Kim, Y.J. Lee, G.S. Choi and J.S. Kang	388
A Study of Cooling and Heating Energy Reduction Effects for Applying of Blind-Integrated Window System in Buildings	
B.H. Choi, G.S. Choi, J.S. Kang and S.Y. Song	392
Wind Load Characteristics of a Long-Span Retractable Roof Structure	
J.G. Zhang and H.M. Zhuang	397
Design of the Envelope System to Implement the Zero-Energy on High Rise Multi-Unit Dwelling in Korea	
B.H. Choi, G.S. Choi, J.S. Kang and S.Y. Song	403
The Effects of Window Film on the Performance of Window System	
M.S. Jang, G.S. Choi, J.S. Kang and Y. Kim	408
Flexural Behaviors of Double Reinforced Beam with High-Performance Cement Composite and Steel Bar	
S.J. Jang, S.J. Han, Z.J. Yu and H.D. Yun	412
Influence of Insulation Type on In-Plane Shear Behavior of Insulated Concrete Sandwich Panels (ICSP) with GFRP Grid Shear Connectors	
H.R. Kim, D.H. Kang and H.D. Yun	416
Research of Window's Discharge Coefficient in the Natural Ventilation Room	
Q.H. Liao, Y.L. Guan and Q.N. Wang	420

Seismic Performance of Strain-Hardening Cement Composite (SHCC) Squat Shear Walls with vertical slits	
Z.J. Yu, S.J. Han, S.J. Jang and H.D. Yun	427
Seismic Performance of Steel Fiber Reinforced Concrete (SFRC) Infill Wall Element with Vertical Slits for Strengthening of Non-Ductile Frame	
W.G. Lim, Y.J. Yun, M.H. Lee and H.D. Yun	431
Present Glazing Classification under the Energy Efficiency Labeling Program of Window System in Korea, South	
K.S. Kim, Y.M. Kim, G.S. Choi and J.S. Kang	435
Study on the Problems and Solutions of Building Energy Efficiency	
L. Jiao	439
Heating Energy and Cost Evaluation of Sandwich Insulation Concrete System	
Y. Kim, H.Y. Lee, Y.J. Lee, G.S. Choi and J.S. Kang	443
Application to Envelope System Remodeling for Improving Energy of Public Building	
H.J. Choi, Y.M. Kim, M.S. Jang, G.S. Choi and J.S. Kang	447
Experimental Study on Performance of Phase Change Thermal Storage Kang	
G. Li, K. Pang, L. Chi, C.X. Liu, L. Jiang and L.Q. Mo	451
Void Prediction of Cement Concrete Overlay on Old Cement Pavement after Rubblization	
Y.P. Zhang and X.J. Meng	457
Thermal Characteristics of Mat Foundation with Different Lift Thickness of Mass Concrete Including Strontium-Based Latent Heat Binder	
K.L. Ahn, Q.B. Liang, B.S. Khil and H.D. Yun	461
The Research and Application of Airport Pavement Recycled Concrete	
X.J. Liu, C.F. Zhu, Y.G. Wu and Q.T. Liu	465
Effects of Steel Fiber Volume Fraction on Compressive and Flexural Behaviors of Alkali-Activated Slag (AAS) Concrete	
Y.J. Yun, K.L. Ahn, W.G. Lim and H.D. Yun	469
Tensile and Cracking Behaviors of Strain-Hardening Cement Composite (SHCC) with Fluosilicate Based Shrinkage-Reducing Agent (SRA)	
S.J. Han, S.J. Jang, Z.J. Yu and H.D. Yun	473
Influence of Casting Temperature on the Heat of Hydration in Mass Concrete Foundation with Ternary Cements	
M.H. Lee, Y.S. Chae, B.S. Khil and H.D. Yun	478
Modeling a Thermo-Stressed State of the Cast-in-Situ Low Carbon Footprint Alkali Activated Slag Cement Concrete Hardened under Hot Environment	
L.Q. Weng, H.L. Cao, P.V. Krivenko, Y. Guo, O.N. Petropavlovsky, V.I. Pushkar and A.Y. Kovalchuk	482
Effect of Steel Fiber Volume Fraction and Curing Conditions on the Compressive Behavior of Alkali-Activated Slag Concrete	
D.H. Kang, H.R. Kim and H.D. Yun	491
The Analysis of Residential Building Multi-Objective Optimization Model Based on Life Circle	
Y. Li, J.P. Jiang, J. Du and L.M. Cai	495
Advances of Monitoring Corrosion in Reinforced Concrete Based on UGW	
Z.P. Zheng	499
Sustainability Indicators for Concrete Formwork System	
M. Taher Ahmed, R. Zakaria, R. Mohamad Zin and R. Hussien Ahmed	504
Environmental Performance for Two Formwork System Types: Conventional Formwork & Steel Formwork System	
M. Taher Ahmed, R. Zakaria, R. Mohamad Zin and R. Hussien Ahmed	509
Application Research of the Efficient Detection for Permeability of the Large Marine Concrete Structures	
Y.F. Wang, G.H. Dong, F. Deng and Z.H. Fan	512
Enhanced Heat Transfer with Short Pin Fins in Hot-Air Anti-Icing System	
L. Peng, G.P. Lin, X.Q. Bu, L.Q. Liu and Y. Cai	518
Research on Innovative Design of Remanufacturing Products in the Field of Construction Machinery	
G.C. Ren, F.H. Yu and R.C. Lv	523

Mixing Pile and Rotary Jet Grouting Pile New Monitoring Technology Research and Application	
X.C. Su, L. Zhu and Z.F. Liu	527
Dynamic Simulation of Thermal Environment of Solar Greenhouse Using State-Space Method	
J.J. Du, X.Y. Guo, J.W. Wu and B.Z. Yang	531
Development of the Hexagonal Structure in the Processes of Improving Vibration Insulating Properties of Products	
P. Cekan, K. Balog, R. Kuracina, Z. Szabova and J. Harangozó	536
Pile Groups Displacement Calculation Based on Mindlin Solution and Principle of Minimum Potential Energy	
X. Fei, Y.L. Zheng, W.W. Yang and S.X. Deng	541
Research on Road Performance of Desulfurized Rubber Asphalt and Mixture	
C.W. Wang, F. Wang and W.G. Zhang	546
The Critical State Constitutive Model and Strain Localization for Hostun Sand	
P. Hu, M.S. Huang and D.G. Wu	552
Design of Low Carbon Footprint Alkali Activated Slag Cement Concretes for Marine Engineering Application in China	
H.L. Cao, P.V. Krivenko, L.Q. Weng, Y. Guo, O.N. Petropavlovsky, V.I. Pushkar and A.Y. Kovalchuk	556
Welding Process Optimization for Orthotropic Compound Bridge Plates	
Y.Z. Li and F.Y. Yu	564
Outsourcing of Concrete Filled Steel Tube Strengthened CFST Axial Compression Short Columns Finite Element Analysis	
Y.F. Wu and H.M. Zhang	568
The Influence of Alcohol Amine Admixtures on the Macroscopic Properties of Portland Cement Paste	
T.Y. Huang, D.M. Wang and Z. Liu	573

Chapter 5: Heating, Air Conditioning and Refrigeration

Excitation Liquid-Cooled Retarder Control System Design Based on MC9SXS128	
B. Tu, W. Zhang and T.X. Zhan	583
Experimental Investigation of the Indoor Thermal Comfort of the Public Buildings in the Typical Subtropical Climatic Region	
Z.Y. Wang, X.M. Zhang and W.S. Yang	588
Research on the Optimization Helix Angle of Double-Helical Baffles Heat Exchangers	
Z.C. Zhao, H.J. Mi, H. Cheng and W.X. Feng	593
Research on Ratio Selection of Mixed LiBr-CaCl₂ Solution for Liquid Desiccant Cooling System	
X. Zhao, X.W. Li and F. Wang	598
Study on Characteristics of Ultrasonic Descaling and Heat Transfer Enhancement in Sewage Source Heat Pump System	
J.F. Qian, Y.Y. Liu, Y. Xu and Y.K. Tan	603
Study on Principle and Application of Heat Pump Technology	
J. Zhang, H.Y. Wang and J. Zhang	607
The Case Study on Optimization of Large Scale Heating and Cooling Network	
L.B. Liu, A.J. Zou, J.J. Liao and Y.F. Ma	611
The Optimization of Large Scale Heating and Cooling Network	
L.B. Liu, A.J. Zou, J.J. Liao and Y.M. Liu	616
Simulating Design of Central Air Conditioning Control System in Office Buildings Based on PLC	
X.J. Sun	621
Energy-Saving Analysis of Reversible Ventilation System	
Y. Ren, Z.Y. Mu, H.T. Zheng, S. Chen and L.J. Peng	625
Different Heating Methods of Rural Northern Indoor Thermal Environment Simulation Analysis	
H.X. Li, X.Z. Zheng, G.H. Feng and C.H. Cao	629

Questionnaire Survey on Boilers Adoption in Residential Sector in Korea A.N. Won and W.H. Hong	633
--	-----

Chapter 6: Control and Automation, Computer Applications and Computational Algorithms in Design and Research for Industry

A Note on Vertex-Neighbor-Integrity of Sequential-Joined Graphs Z.T. Wei, A.C. Mai and Y. Liu	639
Ethernet Communication Interface Design Based on C8051F040 Y.X. Guo, G.H. Li, S. Li and M. Li	642
Robust H_2/H_∞ Control Strategy for Linear Markovian Jump Systems M. Bian and Q.Y. Guo	646
A Continuous Semigroup Approach to the Distributional Stability of Nonlinear Models X.P. Sun, M. Luo and K. Fang	653
A Study on the Application of Learning Vector Quantization Neural Network in Pattern Classification S. Ding, X.H. Chang and Q.H. Wu	657
Application of GQJS in Analysis of Bridge Structure M. Zhou, J.X. Chen and M.S. Yu	661
Based on Vari Combination Forecasting Model for Power Plant Flue Gas Oxygen Contentance-Covariance Method T.X. Zhan, J.L. Peng and B. Tu	665
Strong Consistency of Maximum Likelihood Estimators in Extreme-Maximum-Value Distribution Model C.M. Yin, B.H. Chen and S.H. Liu	671
Design and Implement of Equipment Resources Management Support System Based on ExtJS Integrated Framework J.J. Zhang, H. Liu and F.Y. Ni	677
What are the Resistances that Hamper the Application of BIM in China? H.M. Wei and W.J. Hu	681
Research on Mud Pulse Signal Starting Time Extracting Algorithm in MWD G.Y. Zhang, B. Tu and T.X. Zhan	685
Research on the Development Barriers of BIM in China H. Liu and Q. Liu	691
Application of Kalman Filter in AUV Acoustic Navigation C.L. Ji, N. Zhang, H.H. Wang and C.E. Zheng	695
Design of High Stability of DDS Signal Source for Laser Frequency Shift Y. Huang, Y.T. Chen, L. Cheng and C.J. Sun	702
Design and Implementation of the Software Testing Management System Based on Django Z. Li	707
Image Fusion Algorithm Based on Contrast Pyramid and its Performance Evaluation Y.B. Dong, M.J. Li and J. Li	711
Image Fusion Algorithm Based on Gradient Pyramid and its Performance Evaluation M.J. Li, Y.B. Dong and X.L. Wang	715
Evaluation Criterion for Threshold Segmentation Algorithms Y.B. Dong, M.J. Li and Y. Sun	719
Evaluation and Research on Block-Division Based Image Segmentation Algorithm Y.B. Dong, M.J. Li and Y. Sun	723
Dynamic Intelligence Scouting and Monitoring System R. Liu, Y.J. Liu and L.J. Zhang	727
Research of the FEM Mesh Generation Based on Patran Q.P. Han and B. Peng	731
SIWPSO-Based Controller Design for AUV J.W. Perng, Y.S. Huang, S.S. Huang, G.Y. Chen, C.Y. Chen and Y.C. Yang	736
ICE Fault Diagnosis Method Based on Mutual Information and WVD Time-Frequency Analysis X.J. Wang, Y.P. Cai and X.Z. Lin	741

The Research of Intelligent Fault Diagnostic System for Diesel Engine Based on Virtual Instrument	
D.F. Hu, M. Qian and L.L. Chen	746
An Improved Algorithm on Point Cloud Optimization for Unmanned Aerial Vehicles	
N. Yang, Z.F. Shao, B.X. Guo, Z. Peng and L. Huang	752
With Expander Three-Dimensional Model as an Expander, Application of 3DS Max Technology in Multimedia Teaching	
Q. Zhou and C. Liu	759

Chapter 7: Engineering Management

Mining Engineering Professionals Motivated to Improve their Proficiency in English	
H.Y. Shen, S.M. Wen and T.Z. Wang	765
Study on Tender Offers Decision-Making Based on the Sand Table Experiment	
H.Y. Liu, J. Chen and Y. Cao	770
Study on Cost Management of Engineering In-Construction of Highway Enterprise	
L.N. Cao and D.C. Fu	775
A Case Study on Coal Industry of Shanxi Province in China: Empirical Analyses of Holding Power of the Resource-Based Region-Leading Industry over Regional Employment	
W.H. Du	779
Employee Satisfaction of Oil Industry Evaluation Based on Fuzzy TOPSIS	
Y.J. Li and J.X. Wang	783
Sustainable Supplier Selection: An International Comparative Literature Review for Future Investigation	
D.W. Zhang, A.B. Abdul Hamid and A.C. Thoo	787
Fuzzy Logic Based Closed-End Questionnaire Design	
N.X. Peng	791
