

# Preface

On the successful basis of MIMT 2010, 2011, 2012 and 2013, the 2014 5th International Conference on Mechanical, Industrial, and Manufacturing Technologies (MIMT 2014) will be held in Penang, Malaysia, during March 10-11, 2014. The conference is an international forum for the presentation of technological advances and research results in the fields of Mechanical, Industrial, and Manufacturing Technologies. The conference will bring together leading researchers, engineers and scientists in the domain of interest from around the world. We warmly welcome previous and prospected authors submit your new research papers to MIMT 2014, and share the valuable experiences with the scientist and scholars around the world.

In the past twenty years, Mechanical, Industrial, and Manufacturing Technologies has become involved in many varied applications throughout the world, with multiple products and rapid market services. It has not only provided industries with new methods, new tools and new products from design, material processing to operation and management process, but also is changing the manners, thinking styles and working environments of people in the manufacturing field.

In this conference, we received more than 520 submissions from email and electronic submission system, which were reviewed by international experts, and about 291 papers have been selected for presentation, representing more than 100 national and international organizations. I think MIMT 2014 will be the most comprehensive Conference focused on the Mechanical, Industrial, and Manufacturing Technologies. We believe the proceedings will provide the readers a broad overview of the latest advances in the field of Mechanical, Industrial, and Manufacturing Technologies.

On behalf of the guest editors for this conference proceeding, we would like to thank the sponsoring organizations and universities. We also thank the conference organization staff, and the members of International Technological Committees for their hard work. Dr. Thomas Wohlbier, Managing Editor of Journal of Applied Mechanics and Materials, is greatly acknowledged.

We hope that MIMT 2014 will be successful and enjoyable to all participants. We look forward to seeing all of you next year at the MIMT 2015.
