## Chapter 1: Materials Science

|                                                                                                                                                                                                         |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>The Assessment of Material Characteristic Using Vibration Signal Analysis during Drilling Process</b>                                                                                                |    |
| O. Inayatullah, F. Hamid, H.W. Hon, N. Jamaludin and S. Abdullah                                                                                                                                        | 3  |
| <b>3D MC Simulation of Grain Growth Kinetics and the Zener Limit in Polycrystals</b>                                                                                                                    |    |
| K.R. Phaneesh, A. Bhat, G. Mukherjee and K.T. Kashyap                                                                                                                                                   | 8  |
| <b>Characterization and Corrosion Behavior of Multilayer [TiN/TiCN]<sub>n</sub> Growth on AISI 316LVM Steel</b>                                                                                         |    |
| W. Aperador, M.P. Torres and E. Ruiz                                                                                                                                                                    | 13 |
| <b>A Method of Fabricating T Shape Nanochannel on Silicon Substrate</b>                                                                                                                                 |    |
| Z.C. Lin, H.Y. Jheng and H.Y. Ding                                                                                                                                                                      | 18 |
| <b>Experimental and Numerical Study on Surface Damage of Dual-Phase Steel Sheet during Stamping</b>                                                                                                     |    |
| Z.Q. Yu, L. Sun and J. Gao                                                                                                                                                                              | 23 |
| <b>A Study of TMF Characteristics of Ni-Base Superalloy IN738LC</b>                                                                                                                                     |    |
| D.K. Lee, J.M. Lee, J.M. Koo, C.S. Seok and J.W. Kim                                                                                                                                                    | 28 |
| <b>The Viability of Composite Membrane in Treating Produced Water from Oil and Gas Field in Malaysia</b>                                                                                                |    |
| M.Z. Shahrudin, A. Adnan, T.A. Tengku Mohd, N.H. Alias and N.A. Ghazali                                                                                                                                 | 33 |
| <b>Iterative Taguchi Analysis: Optimizing the Grain Boundary Carbide in Hadfield Steel</b>                                                                                                              |    |
| S. Hosseini and M.B. Limoei                                                                                                                                                                             | 38 |
| <b>Optimization of Heat Treatment in Manganese Steel by Taguchi Method</b>                                                                                                                              |    |
| M.B. Limoei and S. Hosseini                                                                                                                                                                             | 43 |
| <b>Effects of Continue Compressing Deformation on Texture of AZ31 Magnesium Alloy</b>                                                                                                                   |    |
| G. Wan and B.L. Wu                                                                                                                                                                                      | 47 |
| <b>Oxidation Behavior of Fe-15Cu-10Al Ternary Alloys at 700°C</b>                                                                                                                                       |    |
| J.H. Xiang, X.C. Xu and W. Wang                                                                                                                                                                         | 51 |
| <b>Summary of the Application of Vanadium</b>                                                                                                                                                           |    |
| Q.Q. Yang, Y.W. Fang, Y.W. Mu, S.H. Zhang, Y.S. Zhao, Y.G. Li, J.T. Liu and Z.J. Wu                                                                                                                     | 55 |
| <b>Summary of Progress in Extracting Vanadium</b>                                                                                                                                                       |    |
| Y.W. Mu, S.H. Zhang, Y.S. Zhao, Q.Q. Yang, Y.W. Fang, Y.G. Li, J.T. Liu and Z.J. Wu                                                                                                                     | 60 |
| <b>Effect of Functional Groups on Interfacial Adhesion Properties of PEEK/Carbon Fiber Composites</b>                                                                                                   |    |
| U. Yapiçi, L. Pan, F. Xu and J.M. Cao                                                                                                                                                                   | 66 |
| <b>Experimental Investigations to Evaluate the Mechanical Properties and Behavior of Raw and Alkali Treated King's Crown (Calotropis Gigantea) Fiber to be Employed for Fabricating Fiber Composite</b> |    |
| K. Velusamy, P. Navaneethakrishnan, V.S. Arungalai and K.K. Saravana                                                                                                                                    | 73 |
| <b>Tunable Nanostructures and Sers Activities of Sputtered Thin Silver Films</b>                                                                                                                        |    |
| C.Y. Yin, L.N. Xu and N. Gu                                                                                                                                                                             | 78 |
| <b>Synthesis of Semi-Aromatic Copolyester with High Molecular Weight</b>                                                                                                                                |    |
| J.W. Wang, H.J. Xu, X.M. Bai, F. Hong, Y.P. Wang and Y.M. Wang                                                                                                                                          | 82 |
| <b>The Pyrolysis Behavior of Alkali Lignin Oxygenized by Hydrogen Peroxide in Ionic Liquid 1-Butyl-3-Methylimidazolium Chloride ([BMIm]Cl)</b>                                                          |    |
| Z.L. Yang, M.Q. Chen, Z.Y. Luan and W.T. Zhang                                                                                                                                                          | 86 |
| <b>Effect of Carburizing Atmosphere Proportion on Low Temperature Plasma Carburizing of Austenitic Stainless Steel</b>                                                                                  |    |
| X.S. Tong, T. Zhang and W. Ye                                                                                                                                                                           | 90 |
| <b>Effect of Laser Power on Microstructure and Properties of CBN Coating by Laser Cladding on TC11 Titanium Alloy</b>                                                                                   |    |
| J. Gao, D.Y. Song and J.W. Feng                                                                                                                                                                         | 94 |

|                                                                                                  |     |
|--------------------------------------------------------------------------------------------------|-----|
| <b>Effects of Texture on the Fracture Mechanism of AZ31 Magnesium Alloy under Dynamic Impact</b> |     |
| G. Wan and B.L. Wu                                                                               | 98  |
| <b>Dynamic Mechanical Property Anisotropy of ZA31 Alloy by Equal Channel Angular Pressing</b>    |     |
| G. Wan and B.L. Wu                                                                               | 102 |

## **Chapter 2: Applied Mechanics, Mechanical Engineering and Processing Technologies**

|                                                                                                                               |     |
|-------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Orthosis for Surgery Procedures</b>                                                                                        |     |
| M.P. Torres and W. Aperador                                                                                                   | 109 |
| <b>Implementation of Boundary Conditions in Discrete Element Modeling of Rock Cutting under Pressure</b>                      |     |
| N.M. Tropin, A.V. Manakov and O.B. Bocharov                                                                                   | 114 |
| <b>The Research of the Dynamics of the Manipulator of the Parallel Structure with the Flexible Links</b>                      |     |
| N.N. Prokopenko, Y.A. Valiukevich and A.V. Alepko                                                                             | 119 |
| <b>Determination of Cutting Disc Deformation Using Axial Forces Produced during the Cutting Process</b>                       |     |
| E. Akarslan, F.O. Hocaoglu and I. Ucun                                                                                        | 124 |
| <b>Performance Improvement on Axial-Flow Fan by Imposing Proper Frame Ribs</b>                                                |     |
| S.C. Lin, F.Y. Wang, C.J. Chang, H.C. Yen and Y.J. Cheng                                                                      | 129 |
| <b>Acoustic-Emission Wave Response to a Dislocation Source in Layered Media</b>                                               |     |

| Z.B. Yang and J. Zu                                                                                           | 322 |
| <b>Efficiency Enhancement of Organic Solar Cells with Process-Optimized Silver Nanoprisms</b>                 |     |
| Q. Zhang, W.J. Qin, H.Q. Cao, L.Y. Yang and S.G. Yin                                                          | 327 |
| <b>Development of a Radioisotope Heated Hollow Cathode</b>                                                    |     |
| K. Mboyi, J.X. Ren and Y. Liu                                                                                 | 331 |
| <b>Application of MMAE to the Fault Detection of Lithium-Ion Battery</b>                                      |     |
| Z. Liu and A. Sohel                                                                                           | 342 |
| <b>Collector Design of Tracking System Based on PLC</b>                                                       |     |
| Y.Q. Lu, E.D. Hu and Z.X. Yuan                                                                                | 347 |

## **Chapter 5: Electrical Engineering**

|                                                                                                    |     |
|----------------------------------------------------------------------------------------------------|-----|
| <b>Effect of Electrode Length on the Performance of EHD Gas Pump</b>                               |     |
| Y.T. Birhane, S.C. Lin and F.C. Lai                                                                | 355 |
| <b>The Dependence of Carrier Distribution on Gate Capacitance of <math>\alpha</math>-IGZO TFTs</b> |     |
| C.C. Hsu and C.H. Wu                                                                               | 361 |
| <b>An Improved Low-Offset and Low-Power Design of Comparator for Flash ADC</b>                     |     |
| S. Zhang, Z.M. Wang and L. Zhou                                                                    | 365 |
| <b>The Research of a Variable-Focus Ultrasonic Liquid Lens</b>                                     |     |
| Y. Wang, W. Wang, X. Zhou and F.L. Zhai                                                            | 371 |

## **Chapter 6: Algorithms, Signal and Data Processing, Monitoring and Identification**

|                                                                                                                        |     |
|------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Development of the Multimethod Genetic Algorithm for the Strip Packing Problem</b>                                  |     |
| V.A. Chekanin and A.V. Chekanin                                                                                        | 377 |
| <b>Automatic Discovery Approach of Digital Image Topic</b>                                                             |     |
| C. Jin and S.W. Jin                                                                                                    | 382 |
| <b>Multilevel Linked Data Structure for the Multidimensional Orthogonal Packing Problem</b>                            |     |
| V.A. Chekanin and A.V. Chekanin                                                                                        | 387 |
| <b>Fuzzy Classification Maximum Likelihood Clustering with T-Distributions</b>                                         |     |
| M.S. Yang, C.Y. Lin and Y.C. Tian                                                                                      | 392 |
| <b>A Simplified Branch-and-Price Mechanism for a Three-Machine Dynamic PCB Assembly</b>                                |     |
| M.T. Yazdani Sabouni and R. Logendran                                                                                  | 398 |
| <b>Fast Calculation of Bayesian Unconditional Cramer-Rao Bounds in Case the State-Vector is Constant</b>               |     |
| N.A. Berkovskii and D.G. Arsenjev                                                                                      | 404 |
| <b>The Coupling of RBF and FDM for Solving Higher Order Fractional Partial Differential Equations</b>                  |     |
| Z. Avazzadeh, W. Chen and V. Reza Hosseini                                                                             | 409 |
| <b>Equating Heteroclinic Orbits in Chen System by Using Scaling Logarithm Change Series (SLS) Method</b>               |     |
| S.U.D. Khan and S.U.D. Khan                                                                                            | 414 |
| <b>A Fractal Mutation Factor Modified Differential Evolution Algorithm</b>                                             |     |
| X.H. Qiu, B. Li, Z.Y. Cui and J. Li                                                                                    | 418 |
| <b>The Design of Sustainability Assessment Data Warehouse for Shanghai Airport</b>                                     |     |
| G.H. Yuan, C.J. Fan, Y.P. Yang, W.J. Liu and X.L. Ran                                                                  | 424 |
| <b>Classification Processing Method of Cotton Foreign Fibers Based on Probability Statistics and BP Neural Network</b> |     |
| J.F. Wang, Y.H. Du, X.M. Jiang, Y.H. Luo and X. Li                                                                     | 428 |
| <b>An Identification Method to Detect the Movement of Smoke in Video</b>                                               |     |
| S.J. Zhu, C.J. Liu and Q. Wang                                                                                         | 432 |

|                                                                                                                                           |     |
|-------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Study on the SVM Processing Model of the GPS Monitoring Data of Coal Mine Subsidence</b><br>J. Zhang                                   | 436 |
| <b>An Effective System Identification Method of Small-Scale Unmanned Helicopter</b><br>Y.Z. Liu and F. Hu                                 | 442 |
| <b>New Type of Takagi-Sugeno Fuzzy Inference System as Universal Approximator</b><br>I. Anikin and I. Zinoviev                            | 453 |
| <b>Study on a New Type of Automobile Exhaust Detecting System</b><br>R.H. Quan, W.J. Wang, J.F. Wu, L.F. Hou and G.F. Tang                | 459 |
| <b>Application of Remote Sensing Data on Dynamic Monitoring of Coastline in the Yellow River Delta</b><br>J. Chang, T. Li and W. Liu      | 463 |
| <b>Factors and Optimization Methods of Error in Reverse Engineering Practical Application</b><br>K. Li, Y.J. Cai and Y.S. Liu             | 467 |
| <b>Remove Mesh Self-Intersections Based on Light Projection Algorithm</b><br>Z.W. Huang, N. Dai, C.Y. Guo, C.Y. Wu, W. Yin and Y.H. Tang  | 471 |
| <b>Use Improved Gradient Descent in Irregular Boundary Conditions in Molecular Dynamics</b><br>F. Su, S. Tissera, T. Lukas and A. Munjiza | 476 |
| <b>Research on Recommendation System Selection Based on Fuzzy VIKOR with Multiple Distances</b><br>B.W. Sun, M. Li and W. Zhang           | 481 |
| <b>Eigenfunctions of Rayleigh Wave in Viscoelastic Halfspace</b><br>D.M. Chang and X.F. Liu                                               | 486 |

## Chapter 7: Control Systems

|                                                                                                                                                                                                                    |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Backward Difference Scheme for Simulating Unsteady Compressible Flow on Deforming Mesh in an Implicit Adaptive Solver</b><br>S.R. Ray and J. Ballmann                                                           | 493 |
| <b>Semi-Forward Adaptive Simulation Approach for Tube Hydroforming Loading Path Determination Using a Strain Trajectory Based Fuzzy Logic Control</b><br>R. Kesvarakul, T. Intarakumthornchai and S. Jirathearanat | 498 |
| <b>Prediction of Aeroacoustic and Control over a Cavity by Delayed Detached Eddy Simulation</b><br>Y. Liu and M.B. Tong                                                                                            | 505 |
| <b>Control of FES-Assisted Elliptical Stepping Exercise Using Fuzzy Logic Controller</b><br>S.Z. Yahaya, Z. Hussain, R. Boudville and M.N. Taib                                                                    | 510 |
| <b>Implementation of PID Controller with PSO Tuning for FES-Assisted Exercise</b><br>S.Z. Yahaya, Z. Hussain, R. Boudville and M.N. Taib                                                                           | 516 |
| <b>Modeling and Controller Comparison for Quarter Car Suspension System by Using PID and Type-1 Fuzzy Logic</b><br>A. Çakan, F.M. Botsalı and M. Tinkir                                                            | 524 |
| <b>Theoretical Investigation of a Structure for Active Vibration Control with Fuzzy Logic Approach</b><br>E. Gülbahçe, M. Çelik and M. Tinkir                                                                      | 529 |
| <b>Tuning Method of Fractional Order Controllers for Vibration Suppression in Smart Structures</b><br>C.I. Muresan, O. Prodan and S. Folea                                                                         | 534 |
| <b>CNC Routine for Manufacturing Spur Gear</b><br>O.M. Koura                                                                                                                                                       | 539 |
| <b>Force Feedback Control of Lower Extremity Exoskeleton Assisting of Load Carrying Human</b><br>Y. Şahin, F.M. Botsalı, M. Kalyoncu, M. Tinkir, Ü. Önen, N. Yılmaz, Ö.K. Baykan and A. Çakan                      | 546 |
| <b>Attitude Control of a Quadcopter Using Adaptive Control Technique</b><br>R. Ibarra, S. Florida, W. Rodríguez, G. Romero, D. Lara and I. Pérez                                                                   | 551 |
| <b>Some Kinds of Pseudo-Intelligent Control Systems for Selecting Trajectories of Flight Vehicles</b><br>A.V. Proletarsky, K.A. Neusipin and K. Shen                                                               | 557 |

|                                                                                                                                                                                |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Numerical Investigations of Synthetic Jet Control for TAU0015 Airfoil</b><br>X.P. Xu, Z. Zhou and R. Wang                                                                   | 562 |
| <b>Base on Real Time Temperature Monitoring and Sprinkler Cooling Control to Achieve Energy Conservation of Air-Conditioning Systems</b><br>S.S. Hung, H.C. Chang and H.H. Lee | 568 |
| <b>Numerical Control System Research and Development of Acrobatic Stage</b><br>P.X. Cao, H.B. Cui, X.Y. Liu, X.S. Yu and C.L. Liu                                              | 574 |
| <b>Design and Research on Control System of 200Kw Organic Working Fluid Turbine</b><br>J. Pan, Y. Huang, W. Gao and Y.P. Zhang                                                 | 578 |
| <b>The Design of an Intelligent EEG Monitoring and Control System</b><br>P. Wang, G.Z. Xu, L. Wang and C.L. Liu                                                                | 583 |
| <b>Boiler Flue Gas Treatment of Cooling Water Circulation Device Control System Based on PLC</b><br>Q.P. Wang, L. Han, M. Zhang and F. Li                                      | 587 |
| <b>Machining Feature-Based CAD/CAPP for STEP-NC</b><br>L.Y. Zhang                                                                                                              | 591 |
| <b>Knee-FES-Ergometer for Paretic Knee Swinging Exercise: Tuning of PID Controller Using PSO</b><br>R. Boudville, Z. Hussain, S.Z. Yahaya, M.N. Taib and F. Ahmad              | 595 |

## Chapter 8: Mechatronics and Robotics

|                                                                                                                                                                |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Robotic Impedance Control with Fuzzy Sliding Model Control Strategy</b><br>S.J. Huang, C.K. Yu and Y.M. Huang                                               | 605 |
| <b>Structure Design of Climbing Snake-Like Robot for Detection of Cable-Stayed Bridge</b><br>W. Wei, J.X. Yu, W.H. Lin, R.S. Mai, C.X. Chen, Z.Y. He and Z. Li | 610 |
| <b>Design and Control Architecture of a Small Mobile Robot with Hybrid Locomotion System</b><br>B. Aisham, Q. Bakhsh, K. Hasnan and A. Ahmed                   | 619 |
| <b>Palletizing Robot Dynamic Analysis and Simulation</b><br>L.J. Liang and X.G. Gao                                                                            | 623 |
| <b>Study and Discussion on Related Technologies of RoboCup Robots</b><br>D. Zhao, Y.H. Du, B.L. Wu, C. Wu and M. Li                                            | 627 |

## Chapter 9: Industrial Engineering and Information Technologies

|                                                                                                                                                                                  |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Optimal Combined Forecasting Method for Foreign Workers in Chiangmai</b><br>M. Rajchakit                                                                                      | 633 |
| <b>Flexible Job Shop Models for Solving Scheduling and Layout Problems Using Coloured Petri Nets</b><br>J. Eloundou, D. Baudry, M. Sahnoun, A. Bensrhair, A. Louis and B. Mazari | 638 |
| <b>Methodology of Developing Mathematical Models for Quality Indices Control</b><br>M. Polyakova and A. Korchunov                                                                | 643 |
| <b>Defects Reduction in Steering Gear Product Using Six Sigma Methodology</b><br>G.K. Nithyanandam, M. Raju and G. Srinivasan                                                    | 647 |
| <b>Energy Efficient Manufacturing and Supply Systems – Case Studies and Results</b><br>B. Wu and J. Abad                                                                         | 652 |
| <b>The Power Plant Bidding Strategy in Contract Market</b><br>F.G. Dong                                                                                                          | 656 |
| <b>Simulation Based Multi-Criteria Assessment of Lean Material Flow Design Alternatives</b><br>M.P. Roessler, E. Abele and J. Metternich                                         | 661 |
| <b>Research on Assessing Airport Sustainable Development Ability Based on Particle Swarm Optimization Algorithm</b><br>G.H. Yuan, C.J. Fan, Y.P. Yang and L.A. Huo               | 667 |
| <b>Differently Defined Flying Zone and State Approach in Case of Airborne Volcanic Ash: Impact on Flight Operations</b><br>R. Vujasinović, A. Kuenz and A.R. Schmitt             | 672 |

|                                                                                                                                                                          |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Simulation Study for the Performance Impacts of Video Multicast Caused by In-Cast in Cloud Computing Environment</b><br>Y.W. Chen, Y.S. Ho and C.C. Sun               | 677 |
| <b>Implementation of Reconciliation Protocol Based on DSP</b><br>W.Y. Liu                                                                                                | 682 |
| <b>Construction of Cotton Seeds Quality Security Information System Based on RFID</b><br>B.X. Ma, J.C. Chen, W. Zhang, J. Yang and Y.X. Wang                             | 686 |
| <b>A Hybrid Encryption Scheme for Hadoop Based on Symmetric and Asymmetric Encryption</b><br>L. Song, J. Qin, S.X. Liang and X. Wang                                     | 691 |
| <b>Research on Innovation of Archives Management under Cloud Service Model</b><br>Z.H. Xia, G.H. Zhan, D.L. Zhang, M.L. Geng and B.F. Liu                                | 695 |
| <b>SWOT Strategic Optimization of Government Portal under the Background of Web 2.0</b><br>Y.H. Hua, G.H. Zhan, M.L. Geng, P.F. Li and B.F. Liu                          | 699 |
| <b>Conformance Testing for SGSF-064-1</b><br>I. Kim, T.W. Awan, A.M. Abed and H.S. Jang                                                                                  | 704 |
| <b>Simulation of Efficient Vehicle Dispatching and Routing for the Application in Intelligent Transportation System</b><br>Y.W. Chen, C.W. Chen, X.C. Chen and A.Y.S. Su | 709 |
| <b>Synchronization and Parameter Identification of General Uncertain Complex Networks via Discrete Control</b><br>S.Q. Jiang, G.L. Cai and S.M. Cai                      | 714 |
| <b>Delay-Dependent Stability of Cellular Neural Networks with Multiple Delays</b><br>G. Rajchakit                                                                        | 718 |
| <b>Evaluation of Guidance Laws Performance Sing Genetic Algorithm</b><br>M. Zakaria, T. Ibrahim, A.E.D.S. Hafez and H. Abdin                                             | 723 |
| <b>Research on Lane Departure Warning System</b><br>H.B. Yang                                                                                                            | 731 |
| <b>An Approach to the Construction of the Personalized Knowledge Map in Knowledge Management Systems</b><br>M. Li, B.W. Sun and W. Zhang                                 | 736 |

## **Chapter 10: Information Technologies in Civil Engineering**

|                                                                                                                                 |     |
|---------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Dynamic Experiments on a 1/4 Scale New-Styled Korean Traditional Wooden House</b><br>Y.M. Kim                                | 743 |
| <b>Spatial Structure of Land Use Based on Fractal Theory: Taking Shaoguan as an Example</b><br>W. Wei and X.Y. Chen             | 747 |
| <b>Research on ‘Three Zones’ of Goaf Spontaneous Combustion with U+L Ventilation</b><br>Y.X. Zhao, C.H. Chen, F. He and J.W. Li | 753 |
| <b>Firefighting Tactics during a Fire Event at a Nightclub</b><br>C.S. Lin and C.C. Lai                                         | 758 |
