

Preface

2014 the 4th International Conference on Frontiers of Manufacturing Science and Measuring Technology (ICFMM 2014) will be held in Guilin, China during June 19-20, 2014. The conference aims mainly at promoting the development of measuring, manufacturing and information science, strengthening the international academic cooperation and communications, and exchanging research ideas.

In this conference, we received more than 1000 submissions from email and electronic submission system, which were reviewed by international experts, and about 487 papers have been selected for presentation, representing 12 national and international organizations. I think ICFMM 2014 will be the most comprehensive Conference focused on the Frontiers of Manufacturing, Measuring and Information Science. This conference provides a comprehensive approach to product development, design, measure, manufacture and information engineering and attempts to fill the existing void. We believe the proceedings will provide the readers a broad overview of the latest advances in the field of measure, manufacture and information engineering.

On behalf of the guest editors for this conference proceeding, we would like to thank the National 863 Program of China, National Science Fund of China. We also thank the conference organization staff, and the members of International Technological Committees for their hard work. Dr. Thomas Wohlbier, Managing Editor of Journal of APPLIED MECHANICS AND MATERIALS, is greatly acknowledged.

We hope that ICFMM 2014 will be successful and enjoyable to all participants. We look forward to seeing all of you next year at the ICFMM 2015.
