Preface and Committees

Chapter 1: Robotic Research and Application of Robots

A Plea for the Cognitive Solution Attempt: Cognitive Robotics, Cognitive Factory and Cognitive Solutions. Cognitive Robotics as a Model for the Development of Cognitive Solutions M. Haun	3
Mechanisms for Small and Micro Robotic Devices Š. Havlík and J. Hricko	11
Prototype Model of Walking Robot T. Mikolajczyk, T. Fas, T. Malinowski and Ł. Romanowski	21
Development of Robotic Vehicle in the Intermediate Category Suitable for Deployment in Rough Terrain L. Vargovčík, J. Jezný, F. Šofránek, J. Šarloši and R. Surovec	29
Development of Motion Control of Legs in Six-Legged Robotic Vehicle J. Fetyko, J. Jezný, R. Úveges and V. Fedák	36
Concept of the Model Robotized Cell for Plasma-GMAW Hybrid Welding Z. Pilat and J. Szulc	43
Motion Coordination of Two Robots in Cartesian Space Based on Mechanical Impedance A. Slota	53
Proposal of Multi Robotic Cells for Production Lines M. Hajduk, V. Baláž, L. Koukolová and J. Zubrzycki	60
Simple Image Processing Algorithms for Robot Navigation in Unknown Environment F. Duchoň, M. Králík, A. Babinec and P. Hubinský	66
Development of CyberFish – Polish Biomimetic Unmanned Underwater Vehicle BUUV M. Morawski, M. Malec and J. Zajac	76
Smart House - The Building Management System A. Piotrowski and T. Nieszporek	83
Straight-Line Mechanisms as One Building Element of Small Precise Robotic Devices J. Hricko	96
Multi-Devices Application with Industrial Robot M. Sukop	102
Harmonic Drive Products in Robotic A. Buss and V. Trhoň	112
Optimal Design of Robot Gripper Mechanism Using Force and Displacement Transmission Ratio S. Krenich	117
New Generation of Mobile Platform of Service Robot for Motion along Vertical Walls M. Horák, F. Novotný, M. Starý and J. Černohorský	126
Support of the Implementation of Modern Automation and Robotics Solutions through the Application of Innovative Training Methods and Techniques M. Smater and J. Zieliński	132
Construction of a Rescue Robot: Robotic Arm Module F. Orság and M. Drahansky	139
Observation as Learning Methods in Simple Visual System of Vehicle Control K. Wójcik	144
Automatic Detection of the Connected Module and its Orientation Z. Bobovský	151
Autonomous Parking of Small Vehicle V. Šlapák, J. Bačík, M. Pajkoš and M. Lacko	157
Insect Pheromone Strategy for the Robots Coordination J. Zelenka and T. Kasanický	163

Computer-Aided Design of Human Knee Implant J. Zubrzycki and N. Smidova	172
Robotic Cell Control System Standardization M. Mudrak, P. Hubinsky and T. Mudrakova	182
Connecting Interface for Construction of Modular Structures J. Svetlık	190
Research and Development of Rehabilitation Robotics in Poland Z. Pilat, W.J. Klimasara, . Juszynski and A. Michnik	196
Robotic System Design with CA System Support A. Javorova and M. Kusa	208
Solution Collision Relations in Multirobotic Systems J. Semjon	214
Materials Having a High Degree of Adhesion for Gripping Elements Designing M. Horak and F. Novotny	220
Application Area of Multiagent Systems – Modular Robotics R. Janos	226
Optimization Trajectory in Handling with the Same Object M. Vagas	230
Mathematical Model Design of Small Helicopter - Unmanned Aerial Vehicle Development J. Bacık, R. Sivy and V. Slapak	236
Proposal of Multirobotic System with Two Robots V. Balaz, M. Vagas, J. Semjon and J. Zubrzycki	243
Measurement of Transmission Nonlinearities in Servodrives M. Pajkos, V. Slapak, R. Sivy and F. Durovsky	248
Robust Rubik’s Cube Detection Using Hough Transform and Advanced Clustering Functions F. Durovsky	253
Design of Pneumatical Rubik’s Cube Solver J. Varga, F. Durovsky and J. Kovac	265
Utilization of Virtual Reality Connected with Robotized System J. Kovac, F. Durovsky and M. Hajduk	273
The Chosen Aspects of Self-Reconfigurable Robots M. Vagas, V. Balaz, J. Semjon and L. Koukolova	279
Analysis of Power Relations in the Design of Effector for Unilateral Gripping with Active Vacuum Suction Cup P. Tuleja and E. Sidlovska	286
Palette - Assembly Cell with Robot SCARA V. Balaz	292
Variability of Workplace Structures with SCARA Robot for Palletizing and Sorting Objects L. Koukolova	299
Analysis of Flow Rates in the Design of Effector for Unilateral Gripping with Active Vacuum Suction Cup E. Sidlovska and P. Tuleja	304
Design of Module for Robots Preliminary Calculation R. Janos	310
Modular Approach for Design of Technology Units with Rotary Positioning Modules J. Semjon, J. Varga, M. Sukop, V. Cop and M. Popcak	314
Analysis of Design Today Exoskeletons in the Health Field P. Hořvova	320
Simulation of Collision Situations in RobotStudio L. Balockova, E. Prada, A. Titka and T. Liptak	325

Chapter 2: Automation of Production Processes

Modelling of Dynamic System Characteristics of Deep Hole Drilling Process with Tools about Flexible Stiffness J. Zubrzycki, A. Swic and M. Opielak	333
--	-----

The Solar Tracker – A Control System and a Frame Construction A. Piotrowski and T. Nieszporek	340
On Line Videooptical System for Weld Groove Analysis T. Mikołajczyk, M. Mikołajczyk and A. Skibicki	350
Accuracy Control in the Machining of Low Rigidity Shafts A. Świć, D. Wołos, J. Zubrzycki, M. Opielak, A. Gola and V. Taranenko	357
Some Aspects of Interoperability of Enterprise and Manufacturing Systems J. Pękala	368
New Standard in Scanning of Welding Electrodes by Using Visualization M. Tolnay, M. Hajduk, M. Bachratý and M. Králík	379
Application of Hot Gas Powder Sintering in Robotics S. Ondrej, E. Gondár, M. Martančík and M. Buranský	386
Accuracy of Rapid Prototyped Models with Using of FDM Technology J. Beniak, P. Križan and M. Matúš	390
New Tendency of Machine Tool Study Based on Virtual Machining Software Applied at University of Oradea C. Bungău, M. Ganea and R. Pancu	396
Simplified Calculation of the Eccentric Press Stiffness P. Demeč and D. Palaščáková	402
A Prototype of a Bitmap CNC Engraver M. Batmend, D. Perdukova and P. Fedor	408
Implementation of Computer System for Support of Technological Preparation of Production for Technologies of Surface Processing J. Svetlík, P. Baron, J. Dobránsky and M. Kočíško	418
Characterization of the Positioning Accuracy and Precision of MEMS Die Servoing Using Model-Based Visual Tracking O. Matúšek, V. Hotař, G.J. Laurent, B. Tamadazte and C. Clevy	426
The Structural of the Basic Module for Construction of Modular Machines R. Turisová and J. Svetlík	434
Industry as a Key Factor for Economic Recovery and Competitiveness of the Europe V. Kyseľová	441
Integration of Complex Maintenance System in Operation A. Žilinský	446
2D-Shape Analysis Using Shape Invariants T. Stejskal	452
