

Table of Contents

Preface

Study and Development of CAPP Template Customization System Z.M. Feng and G.F. Yin	1
Research on the Influence of Noise to Weak Signal Detection Based on Duffing Equation D.H. Wu and X. Wu	5
Time-Varying Delay Global Stability of Neural Networks D.M. Huang and L. Sun	9
The Application Research of Detecting Weak Random Binary Code Based on Stochastic Resonance D.H. Wu	13
Effect of the Content of Air Bubble in Oil on Forces of Vane in High Pressure Vane Pump S.N. Li, L.J. Wei, Z.R. Wang and H. Ji	17
Ontology Mapping Based on Domain Framework S.X. Li and L.J. Shi	21
The Absorption Factor of the Wafer for Normal Incidence D.B. Luo and J.K. Liu	25
Vibration Measurement Based on the Michelson Interferometer D.B. Luo and J.K. Liu	29
The Analysis and Discussion about Green Supply Chain Management of Oil Industry in China M.M. Deng and L.J. Liu	32
An Intelligent Remote Controller for Household Appliances H.M. Liu and P. Cheng	36
Cost Forecast Model Research Based on Trend Extrapolation X. Zhao and X.F. Liu	40
A Signal Processing Circuit for Shock Wave Pressure Sensor B. Feng, X.H. Shi and Z.Q. Kang	44
Grid-Based Method and Wavelet Transform Fusion of Rapid Detection of Fabric Defects Z.Q. Kang, X.H. Shi, Q. Li and B. Feng	48
Vibration Isolation Failure Analysis and Dynamic Characteristic Optimization of NVD Mecha Based on ALGOR X.M. Liu and Y.Y. Luo	52
Analysis and Research on Structural Dynamics of Three-Axis Flight Simulator X.M. Liu and X.J. Hu	57
Application of the Predictive and Inferential Control to Pulp Washing Process W. Tang and W.J. Shan	62
Axial and Circumferential Automatic Chromatographic Control System of Gravure Printing Machine L. Zhang, M.Y. Zhang and Y.Y. Wu	66
Numerical Simulation of Inner Flow Yield of Turbulence Generator of Papermachine Headbox and Structure Optimal Design S.L. Hou and X.B. Su	70
Research on Fuzzy Control Algorithm with Double Parameters Detection of Micro-EDM Y. Liu and W.L. Zeng	75
Sensitivity Analysis of DVG850 High-Speed Vertical Machining Center Headstock G.X. Zhang, B.B. Han, C.F. Liu, Y.F. Gu and X.K. Shen	79
Machining Center Worktable Static Stiffness Spectrum Drawing and Analysis G.X. Zhang, Y.F. Gu, B.B. Han and X.K. Shen	84
Research on Servo Controller for High Speed Tracking System M. Li and H.B. Gao	88
A Concise Method of Characteristic Analysis for Sciences Universal Machine H. Hu	92
A Simple Magnetizing Characteristic Model for the Transformer H. Hu	96

Research on Integrated Scheduling Model of Automated High-Rise Warehouse and Traditional Flat Storehouse for Cigarette Distribution Center X.S. Tong and L.H. Yang	99
A Digital Watermarking Method by Double Encryption Based on Arnold and Chaos in DCT Domain J.H. Song and Y. Zhu	104
Multi-Resolution Analysis of the Acousto-Ultrasonic Testing Signal for Composite Material Detection B. Jing, C. Ai and Y. Liu	108
Implementation of Video Capture Based on DirectShow Technology Q. Li and Y.D. Zhang	113
Research on the Remote Monitoring and Control System for Heating Supply Pipeline Based on GPRS and ZigBee L.P. Wang, Q.R. Wei and H.X. Wei	117
A Design of High Smart Pressure Sensor Based on Microcontroller and BP Network Q. Li and X.J. Zhang	122
Study on the Present Condition and it'S Key Technique to Prospect of the High Frequency Resonance Transform Using in Electrostatic Dust Separator C.B. Gui, C. Guo and Y. Liu	126
Dual-Mode Solar Tracking Controller X.X. Wang, Z.Y. Wang, B. Wang and J.T. Wang	131
Fabrication of Super-Hydrophobic Textile Surface with Aminopolysiloxane and Nano-Silica via a Solution Immersion Process W. Xu, Q.F. An and W. Xu	136
The Design of High-Precision Pressure Transmitter Based on MSP430 Microcontroller Q. Li and S.Z. Bu	141
Negative Signed Domination in Digraphs W.S. Li	145
Development and Implementation of Subsystem of Direct Slicing on Three-Dimensional Model Based on Pro/E C.J. Chen, G.M. Fu and S. Gao	148
Study on an Adjustable Heat Pump for Paper Machine Dryers Y.Z. Yan and X.H. Ren	152
Research and Realization of the Algorithm for Rapid Display in 3-Axis NC Milling Simulation System P.Y. Wang, X.C. Geng and H.C. Hu	156
A Model for Cooperative Design Based on Multi-Agent System N. Li and Y. Guo	160
Simulations of the Anti-Torpedo Tactic of the Conventional Submarine Using Decoys and Jammers K. Zhan, B. Yu and J. Wang	165
Research on Internal Logistics System Transformation Based on Resource Integration for Large-Scale Manufacturing Enterprise Groups L.Y. Zhou, X.X. Yu and D. Mu	169
Medical Volumes Segmentation Approach Based on Level Set Method Z.W. Li, M.J. Ni and Z.K. Pan	173
Analysis on Vibration Response of Gear Transmission System J.H. Zheng and M. Li	177
Lossless Data Embedding in BTC Codes Based on Prediction and Histogram Shifting W. Hong, T.S. Chen, C.W. Shiu and M.C. Wu	182
Research and Implementation Project Management in ERP H.Y. Hao and Q.S. Ji	186
Application of Direct-Drive Technology in Marine Electric Propulsion Q.S. Ji and X.Q. Zhao	190
Construction the Rural Entrepreneurial Support System Y. Liu and Y.J. He	195
Application of WAVELET-SVM in Fault Diagnosis for the UV Control System S.W. Wang, X.H. Shi, H. Xu and Z.J. Tong	199

Structure of Mixture Kernel Function and its Application in Soft Measurement about Beating Degree	
W. Tang and Y.Z. Zhao	204
Distributed Robust Tracking Control of Multiple Mobile Robots Formation	
T.T. Yang, Z.B. Su, J. Liu and H. Meng	208
Accuracy Analysis of DEM Based on Coons Surface	
Y.G. Wang and P.Y. Wang	214
Aero-Engine Adaptive Model Using Recursive Reduced Least Squares Support Vector Regression	
L.P. Jiang	218
Simulation Analyses and Modeling Method of Time Averaging Principle-Based for Zero-Current-Switch Quasi Resonant Converters Boost Circuit	
W.S. Cao and L.H. Gong	224
The Study of Three-Dimensional Hairstyle Database System	
L.M. Wang and B. Liu	228
Research of the Big Pitch Rectangular Thread Processing Method	
T. Li and Y. Yang	232
Implementation an XML Multi-Signature Scheme for XML Data Authentication	
B.L. Liu, H. Chen and Y. Guo	236
Encrypted XML Data Query Processing with Range Query	
B.L. Liu, H. Chen and Y. Guo	241
Converting between Fractal Image Model and XML Data Format	
H. Chen and X.X. Jin	246
Communication Security in MAS with XML Security Specifications	
B. Sun and H. Chen	251
The Weighting Grey Relational Analysis of the Fault Diagnosis of Frame Cross's Fracture	
Y. Zhang, H. Song, G.J. Meng and Y. Wang	255
Skin Detection Model Research Based on Image Enhancement	
G.L. Yang, Z.L. Cheng and L. Zhang	260
Non-Probabilistic Structural Reliability Model Based on Ellipsoidal-Bound Model with Nonlinear Expansion	
K.F. Li, Z.C. Yang and W.C. Sun	264
Design and Research on Remote Monitoring System of CNC Equipments Based on Web	
M. Yue, W.S. Cheng and M.L. Zhang	268
Research on Rough Set Based Weighted Grey Fault Diagnosis Algorithm and Practical Application	
F. Yang and C.L. Zhang	272
Billet Continuous Casting Mold Oscillation System Oscillates Simulations and Swing Arm Strength Analysis	
Q.F. Fu, J.G. Liu and F.J. Du	276
Pressure Vessel Optimization Design Based on the Finite Element Analysis	
C.L. Zhang and F. Yang	281
CAD Secondary Development of Medium-Depth Hole Blasting Design System Based on Object/ARX	
L. Guo, C.W. Lu and Z. Yang	285
Test Method with Small Samples of Electro-Explosive Devices Based on Information Equivalence Principle	
Y.H. Wang, L. Wang, H.S. Yang and B.G. Zhu	291
A New Approach of Expanding Data Processing Ability for Configuration Monitoring Software MCGS Based on OLE	
F. Yang and C.L. Zhang	295
Data Acquisition and Processing of Weak Low-Frequency Magnetic Signals	
S.Q. Men and C. Resagk	299
Design of Master Platform of Half-Practicality Maintenance Training System Based on Bus-Mastering	
X.R. Li, G.H. Wang, T. Li and R.F. Peng	303
Event-Triggered Time Synchronization Algorithm in Medium and High Rate WSN	
Y.C. Wang and L.L. Cheng	307

A Novel MPPT Method Combining CVT and Fuzzy Control Applied in PV Power System J.Y. Li and R.X. Gong	311
Experimental Investigation into High Speed FD-OCT Imaging Based on Orthogonally Polarized Light H.C. Cheng and M.S. Shiu	315
Delay-Dependent Robust Fault-Tolerant Control for Delta Operator Systems with D-Stability Q.H. Song, L. Ji, D.J. Zhang and S. Meng	319
Optical Code Division Access Application for Fiber Loop Vibration Sensor H.C. Cheng and R.S. Syu	324
Design of Half-Practicality Maintenance Training System Based on Bus-Mastering G.H. Wang, X.M. Qiao, X.R. Li and T. Li	328
Intelligent Control System for Home Security C.D. Chen	332
The Research of New Kind of Automatic Hydraulic Bar Binding Machine C.Q. Li, C.B. Yang and J.G. Li	336
The Design and Application of Pharmaceutical Factory Monitoring System Based on Ethernet Z.A. Yu, W.Q. Tan and Z.H. Xie	341
Designing of Solar Cell Panel Sun Chasing System on Basis of MSP430 Micropower Single Chip Microcomputer W. Chen	345
A Study on the Stability of Innovation Network in Tech-Typed Small and Medium-Sized Enterprises Based on Cooperative Game C.H. Wu, H. Li and Y. Liu	350
On-Machine Inspection Method for Superduty Lathe Based on Improved Laser Triangulation W.G. Zhang, X.Y. Lei, F.F. Zhang and Q. Li	354
Immune Single Neuron Control of Level in Spherical Vessel L. Zhang, B. Chen and S.Z. Hu	358
Design of Image Acquisition System Based on ARM&FPGA G.M. Li and Z.Q. He	363
Application of Information Point Inspection System in the Modern Coal Preparation Plant Y. Li, J.L. Wang, R.C. Ren and S.A. Han	367
Research for Raising Data Stability of the Digital Leather Thickness Gauge with Capacitive Sensor D. Ning, P.P. Wang and J.B. Huang	372
Effects of Substrate Temperature on ZAO Thin Film Prepared by DC Reactive Magnetron Sputtering F. Lu and C.H. Xu	376
Optimal Detection in Flank Array L.K. Ma and X.Y. Yu	381
Research of Digital Watermarking Algorithm Based on SVD and DWT P. Yang, L.Y. Yang and Y.J. Zhang	385
Research on Maximum Power Point Tracking Control System of Variable Speed Wind Turbine F.T. Li and E.R. Zheng	389
The Design and Implementation of Core Board of Handheld Device Based on PXA320 and Linux Q. Li and Y.D. Zhang	394
Study on the Sliding Mode Control of BLDC Motor for Battery Electric Vehicle F.J. Li, X. Li and C.Q. Li	398
Hardware Design and Driver Development of EPA Master Controller P. Wang, P. He and W. Fu	402
3D Model Skeleton Extraction Based on Poisson Equation X.Q. Feng	407
Design of Uniform Temperature Increases Control System of an Apparatus for Measuring Shrinkage Temperature of Leather D. Ning, Y.H. Liu and J.B. Huang	411

Embedded Image Compression Algorithm and FPGA Implementation Based on BP Neural Networks G.M. Li and Z.Q. He	415
Based on the Medical Wavelet Transform Method of Eye Treatment Application C. Hong and X.H. Huang	419
The Design of Handheld Devices Based on PXA322 Processor Q. Li and S.Z. Bu	423
A New Proxy Server of CHIS Based on Caché G.M. Li, G.H. Lian and Z.Q. He	427
Application of Fuzzy Internal Model Control in Grinding System Q. Liu and X.Q. Liu	431
Design a FIR Filter Using Window Function M.G. Chen	435
Application of Field Modulation Magnetic Gear on Electric Power Steering System C.Q. Li, S.S. Bai and Z.C. Liu	439
Study of Predictive Method Based on SVM Optimal Model Selection L. Gu, Z. Ni and Z. Wu	443
A Novel Simulation Model to Measure the Performance of Network Traffic Utilization in Heterogeneous Network Environment L. Gu, Z. Ni and Z. Wu	447
The Research on the Framework of Cyber-Physical Systems for the Reliable Sensing and Optimization Scheduling Y.L. Lun and L.L. Cheng	451
Ladder Routing: a Reactive Source Routing Protocol for Multi-Hop Data Transmission in Mobile Wireless Sensor Networks J.H. Zhang and F.J. Shao	455
Numerical Simulation and Technology Research on the Precision Forging for M93 Guide Cylinder L. Li	461
Research on the Method to Improve the Performance of VoiceXML W.Y. Liu, J.L. Wang and X.N. Feng	467
Research of User Service Model Based on Cloud Computing in University Library X.N. Feng and L.Y. Bao	472
Research on Improving Rock Slope Fuzzy-Precise Evaluation Method J. Liu, J.L. Li, L.P. Wan and S.W. Luo	477
A New ISAR Imaging Method of Ballistic Midcourse Target T. Lei, J.M. Liu, G. Wang and S. Li	485
Object Classification Based on Fractional HoG Features Y. Liu and X.D. Shen	491
Medical Image Feature Matching Based on Wavelet Transform and SIFT Algorithm Y.W. Wang and H.L. Yu	497
Narrowband Emitter Identification by Exploiting Gaussian Mixture Model Y.Y. Liao, K.X. Jia, Z.S. He and S.F. Deng	503
A Bayesian Decision Method with Minimal Error Rate for SAR Image Segmentation L.J. Tian and D.H. Li	509
Complex Image Registration Method Based on Correlative Coefficient Interpolation R. Niu, X.T. Tang and Y. Wang	514
Research on the Application of Pattern Recognition in the Intelligent Identification of Wallpaper Labeling Y.Q. Wang, Y.Q. Wang and L.H. Chen	518
Research on the Method of Quality Detection of Duck Egg Based on Computer Vision Y.Q. Wang, Y.J. Chen and Y. Yang	524
The Research on Pan-Genes of an Object Boundary J.Y. Tian, J.H. Han and H.L. Chen	530
Research on License Plate Recognition System Based on Computer Vision Y.Q. Wang, L.H. Chen and L.Y. Zhuang	536
A New Image Quality Assessment Method Based on SSIM and TV Model L.L. Pang, C.L. Li, D.N. Qi and T. Zou	542

Application of Grey Model(1,1) in Road Traffic Accident Forecast X.K. Miao and M.Y. Li	551
Simulation of Goods Unloading Process Based on Queueing Network L.F. Du, B. Li and H. Xuan	557
Dynamic Hybrid Flowshop Scheduling with Batching Production Y. Cao, H. Xuan and J. Liu	562
National Technological Innovation Output Capacity Forecast and its Influence Factors Analyses in China X.H. Li	568
Hybrid Flowshop Scheduling with Finite Transportation Capacity H. Xuan	574
Research on the Relationship between Controlling Shareholder and Accounting Conservatism in China Y.L. Wu	579
The Application of Self-Organizing Map (SOM) to Assess Power Communication Network Reliability P. Wang, J.H. Shi, L. Zhao and R. Zong	585
Performance Evaluation of a Massively Parallel Decoder for CISC Microprocessors J.F. An, X.Y. Fan, J. Zhang and H.F. Yi	590
Application of Integrableware Information System in Orienteering Teaching X.Z. He	595
Research and Application of Fingerprint Electronic Timing System & Registering System in Orienteering Competitions X.Z. He	600
A Forecasting Model of RBF Neural Network Based on Particle Swarm Optimization Y.M. Pan, C.Y. Huang and Q.Z. Zhang	605
Study on the Stability and Structural Optimization of Self-Elevating Platform Pile Foundation X.J. Chu	613
A New Structure of the Washing Machine Clutch Research and Development A.X. He and R.C. Li	617
Large Forging Expert System of Diagnosis R.C. Li and A.X. He	621
Optimize Study of Pressure Die-Casting Technology for Producing Motor Rotator Y.Q. Yang	625
