## Preface and Conference Organization

## Chapter 1: Materials and Processing Technology

|                                                                                                                                                                                                     |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>A Two-Step Method Synthesis and Microwave Absorption Properties of Double-Shell Ni@BN@BaTiO<sub>3</sub> Nanocapsules</b><br>G.M. Shi and Y. Zhu                                                  | 3  |
| <b>CO<sub>2</sub> Absorption/Release Properties of Lithium Silicate (Li<sub>2</sub>SiO<sub>3</sub>) Powders Prepared by the Sol-Gel Process</b><br>F. Wang, S. Wakou, S. Hirai, T. Kuzuya and T. Li | 7  |
| <b>Properties of Resistance Spot Welded Joint between Mild Steel and Aluminum Alloy with an Interlayer of AlCu<sub>28</sub></b><br>L.L. Hou, R.F. Qiu, H.X. Shi and J.Q. Guo                        | 15 |
| <b>Resistance Spot Welding between Copper Coated Steel and Aluminum Alloy</b><br>L.H. Cui, R.F. Qiu, H.X. Shi and Y.M. Zhu                                                                          | 19 |
| <b>Resistance Spot Welding between Mild Steel and Stainless Steel</b><br>N.N. Wang, R.F. Qiu, W.J. Peng and H.X. Shi                                                                                | 23 |
| <b>Solvothermal Synthesis of Size-Controlled Lead Zirconate Titanate Particles</b><br>F. Zhang and Z.J. Wang                                                                                        | 27 |
| <b>Surface Wettability of the Contaminative Silicone Rubber</b><br>Y.Y. Hu, X. Yu, G.G. Wang and M. Lu                                                                                              | 31 |
| <b>The Formation of Coesite under Minimum Static Pressure</b><br>D.J. Wang, R.R. Liu and L. Jing                                                                                                    | 38 |
| <b>Measurement System Research on Micro-Arc Oxidation Load Feature</b><br>H.Y. Liu, W. Yang, J.Y. Han and S.Y. Yang                                                                                 | 42 |
| <b>Mechanical Behavior of a Dissimilar Metal Weld Used for Nuclear Power Plants</b><br>G.F. Li, G.J. Li, J. Peng, M.L. Zhang and Z.Y. Sun                                                           | 47 |
| <b>Research on the Impact Mechanic Property of the Silicon Carbide with Tungsten (SiC-W) Composite Material</b><br>H.C. Sun, B. Hu, H. Zhang, L.N. Zhang and X.G. Wang                              | 52 |

## Chapter 2: Environmental Chemistry and Microbiology in Environmental Engineering

|                                                                                                                                                                                                         |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Advances in Stress Factors of Aquatic Macrophytes in Polluted Water</b><br>C.Y. Zhang and L.P. Wang                                                                                                  | 61 |
| <b>Effect of Roxithromycin on the Morphology of Tissues in the Liver of <i>Cipangopaludina chinensis</i></b><br>H.W. Wang, L.K. Yang, J. Zhang, D.Y. Dou, Y.N. Wang, H.Q. Gao, X. Liu and D.B. Cai      | 67 |
| <b>Nitrification and Denitrification Potentials of Soil in Liaohe Estuary Wetland</b><br>Y. Xiao and J.S. Yang                                                                                          | 71 |
| <b>Nucleophilic/Oxidizing Degradation of Paraoxon and Thioanisole Using NH<sub>3</sub> Modified Aqueous H<sub>2</sub>O<sub>2</sub> Solution</b><br>S.P. Zhao, H.L. Xi, Q. Wang and Y.J. Zuo             | 75 |
| <b>Soil Microbial Community Structure in Tree Peony (<i>Paeonia suffruticosa</i>) Garden Based on PLFA Analysis</b><br>D. Xue, X.D. Huang and L. Xue                                                    | 82 |
| <b>Study on Light Intensity Attenuation Characteristics of <i>Chlorella</i> Sp. Culture and the Growth of <i>Chlorella</i> Sp. with the Gradient Light Illuminate Culture</b><br>L.H. Yue and Y.P. Yang | 86 |
| <b>The Effects of Static Magnetic Field in Leaching Cadmium and Arsenic by <i>Acidithiobacillus ferrooxidans</i></b><br>L.L. Lu, D.W. Li, X.D. Wei, C.J. Liao, J.L. Jiang and L. Su                     | 90 |

|                                                                                                                                                                 |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>The Evaluation of Water Quality and Survey of Benthic Diversity in the Sha River and Xiangshui River of Dongjiang (China)</b>                                |     |
| H.W. Wang, L. Liu, Z. Fu, C.L. Zhao, Q.C. Xing, W.B. Zhao and D.B. Cai                                                                                          | 94  |
| <b>The Indices of Diversity of Benthic Macroinvertebrates in the Danshui River of Dongjiang (China)</b>                                                         |     |
| H.W. Wang, J.X. Wang, J. Zhang, A. Hasan, Y.W. Liu, Q.C. Xing and D.B. Cai                                                                                      | 98  |
| <b>The Influence of Ecological Remediation Process on Bacterial Community Composition in Beishi River Sediment Determined by PCR-DGGE Analysis</b>              |     |
| J.H. Wang, J.F. Guan, X.C. Yang, M. Wang, S.S. Zhang and W.T. Gu                                                                                                | 102 |
| <b>The Mechanism of Activated Sludge Flocculation under <math>Al^{3+}</math> Dosing</b>                                                                         |     |
| W.L. Zheng, A.S. Cao, Y. Wen, H.R. Chen and Q. Zhou                                                                                                             | 106 |
| <b>Thyroid Hormone Levels Alteration in Sole (<i>Cymoglossus robustus</i>) Exposed to Polybrominated Diphenyl Ethers</b>                                        |     |
| S.Y. Tian, C.Z. Song and Y.N. Gao                                                                                                                               | 111 |
| <b>Wettability Determination of the <math>CO_2</math>-Reservoir Brine-Reservoir Rock System at High Pressures and High Temperature for Different Salinities</b> |     |
| H.T. Wang                                                                                                                                                       | 115 |
| <b>Acute Toxicological Effects of Suspended Solids on the <i>Nitzschia closterium</i></b>                                                                       |     |
| Y. Yuan, L. Zheng and C.Y. Zhou                                                                                                                                 | 120 |
| <b>Effects of Smoking on Serum SOD and GSH-PX Activities and MDA Contents in Rats with Gastric Ulcer</b>                                                        |     |
| S. Jing, W.H. Jiang and W. Sun                                                                                                                                  | 126 |
| <b>Extraction of Plant Activator Protein from Botrytis Strain and Activity Detection</b>                                                                        |     |
| Y.W. Cheng, Y.Z. Zhang, H.Y. Ya, C.J. He, L. Yi, L. Tang, X.N. Du, B.Y. Wu and D.X. Ding                                                                        | 130 |
| <b>Inactivation of <i>Giardia intestinalis</i> by <math>H_2O_2/O_3</math></b>                                                                                   |     |
| S.F. Li and Z.L. Ran                                                                                                                                            | 134 |
| <b>The Analysis of Morphology Characteristics of Iron Plaque on the Roots of <i>Carex cinerascens</i></b>                                                       |     |
| C.Y. Liu, X.F. Gong and J.Y. Yang                                                                                                                               | 140 |
| <b>CSR-deNO<sub>x</sub> with CO over Supported Pd Catalysts under Lean Conditions</b>                                                                           |     |
| Y.H. Li, L. Bai, F. Zhao, J.Y. Zou, H. Liu and Y. Zhang                                                                                                         | 145 |
| <b>Influence of TiO<sub>2</sub> on Noble Metal Based Catalysts for Lean NO<sub>x</sub> Reduction with CO</b>                                                    |     |
| Y.H. Li, C.X. Dong, J.Y. Zou, H. Liu, J.H. Guo and W.L. Lu                                                                                                      | 149 |
| <b>Preparation and Photocatalytic Properties of the Chrome Doped Nano-TiO<sub>2</sub> Emulsion</b>                                                              |     |
| L. Li, H.Y. Zhang, X.W. Li and W.M. Zhang                                                                                                                       | 154 |
| <b>Synthesis and Adsorption Properties of Salicylic Acid Modified Hypercrosslinked Polymer Toward 4-Chloro-Phenol and Heavy Metals</b>                          |     |
| G.H. Meng, B.H. Liu, Y.L. Wu and J. Zhang                                                                                                                       | 158 |
| <b>Structural Characteristics of Intracellular and Extracellular Organic Matter from <i>Microcystis aeruginosa</i></b>                                          |     |
| H. Wang, D.M. Liu, P. Wang and F.Y. Cui                                                                                                                         | 163 |
| <b>Effect of Bap on the Expression of Cx43 in Leydig Cells</b>                                                                                                  |     |
| H. Li, Y. Zhang and S.G. Jin                                                                                                                                    | 167 |
| <b>Genotoxicity of Organic Extracts in Water from Jilin City Section of the Second Songhua River</b>                                                            |     |
| J. Zhang, H. Li and S.G. Jin                                                                                                                                    | 171 |
| <b>Leaching Behavior of Chlorpyrifos and its Main Metabolite TCP through 5 Types of Soil Columns in Laboratory Conditions</b>                                   |     |
| B.L. Sun, H. Shan, Y.W. Dong, J.L. Huang and C.F. Tong                                                                                                          | 175 |
| <b>Simultaneous Determination of Four Plant Hormones in Soil by Ultrasound-Assisted Ionic Liquid Based Dispersive Liquid-Liquid Microextraction</b>             |     |
| G.Q. Huang, S.Y. Dong, Z. Yang and T.L. Huang                                                                                                                   | 181 |

### Chapter 3: Environmental Safety and Health

|                                                                               |     |
|-------------------------------------------------------------------------------|-----|
| <b>Analysis on Instability of a High Fill and Deep Excavation Loess Slope</b> |     |
| S.L. Tang, B.B. Han, Z.B. Li and L.H. Sun                                     | 187 |

|                                                                                                                                                                  |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Health Risk Analysis for Pb Exposure of Human from Indoor Dust in Shenyang</b><br>D. Jin, D.M. Zheng and L.N. Sun                                             | 191 |
| <b>Influence of Natural Ventilation on Indoor PM<sub>2.5</sub> Concentration in Residential Building</b><br>L. Zhao, C. Chen and G.Q. Cao                        | 194 |
| <b>Model of Gas Transport in Underground Detonation Based on Dual Porosity and Dual Permeability</b>                                                             | 199 |
| <b>Research on Emergency Aid Decision-Making Model for Environmental Emergency Based on Case-Based Reasoning</b><br>Y.J. Zhang                                   | 206 |
| <b>Risk Analysis of Environmental Pollution by Secondary Hydrogen Chloride from Leakage of Phosphorus Trichloride</b><br>L. Zhang, X.Q. Liu, Y.Y. Li and H. Yuan | 213 |
| <b>Simulation and Analysis of Noise Control Scheme for Hangzhou Cigarette Factory New Packing Workshop</b><br>Y.P. Wang, X.Z. Li, Y.C. Wu and J. Hao             | 217 |
| <b>Study on the Hazardous Factors Analysis of Welding in Ship Repairing and Building</b><br>K.L. Xu                                                              | 225 |
| <b>Study on the Purification Effect of Chlorophytum Comosum on Indoor Formaldehyde</b><br>X.G. Zhao, N. Zhang, H. Shu and N. Liu                                 | 229 |
| <b>Survey and Analysis of the Cognition of Urban Residents on the Food Hygiene and Safety in Natural Disasters</b><br>H.C. Hong and M. Xu                        | 233 |
| <b>The Influence of Environment Air Pollution on the Respiratory Health among Pre-School Children</b><br>C.S. Zhao, M. Xu and C.G. Li                            | 237 |
| <b>Analysis and Study on Effects of Family Environment Improvement on Children with Asthma</b><br>J.H. Wang and H.J. Jiang                                       | 241 |
| <b>Comparative Analysis on Family Environment Factors in Children with Asthma and Healthy Children</b><br>J.H. Wang and C.X. Wang                                | 245 |
| <b>Indoor Environmental Tobacco Smoke Impact on Respiratory System Health among Pre-School Children</b><br>C.S. Zhao, J.H. Wang and C.G. Li                      | 249 |
| <b>New Method of Determiner of the Position of Lightning Stroke Point by Using Dynamic Analysis</b><br>H. Wu, Y. Huang, Y.S. Quan and P.X. Shi                   | 253 |

| <b><i>In Situ</i> Measurement of Algae Concentration Based on Pseudorandom Sequence Modulation</b><br>C.Y. Shi, Y.J. Zhang, G.F. Yin, N.J. Zhao, J.B. Duan, L. Fang and X. Xiao | 271 |
| <b>Analysis of Bifenthrin and its Enantiomer Using High Performance Liquid Chromatography</b><br>S.S. Fan, J. Shi, L. Zhou and Y.W. Hang                                        | 275 |
| <b>Cleaning Waste Sulfuric Acid from PVC Gas Analysis Scheme Design and Composition Analysis</b><br>X.L. Chen, K.Y. Gao and C. Li                                               | 280 |

|                                                                                                                                                                                                                              |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Determination of Dihydroxybenzene Isomers in Wastewater Samples at Poly(Glutamic Acid) Modified Glassy Carbon Electrode</b><br>C.Y. Wang, Y.X. Qi and X.Q. Liu                                                            | 284 |
| <b>Development of a SPE-HPLC-PDA Method for the Determination of Tetracyclines in Soils</b><br>B.L. Sun, Y.W. Dong, H. Shan, J.L. Huang and C.F. Tong                                                                        | 288 |
| <b>Evaluation and Content of Various Heavy Metals in the Bohai Bay (China) during the Autumn</b><br>H.W. Wang, D.B. Cai, Z. Fu, C.L. Zhao, N. Zhu, W.B. Zhao and S.S. Lu                                                     | 295 |
| <b>Heavy Metals (Fe, Zn, Mn, Cr, As) Speciation Analysis and Ecological Risk Assessment in the Surface Sediments of WuHe Wetland</b><br>R.J. Liang, X.T. Ma and J.C. Qiu                                                     | 299 |
| <b>Management of Ecological Real Estate - A Method of Biodiversity Analysis in Water</b><br>K. Shi and L.L. Zhou                                                                                                             | 305 |
| <b>Rapid Determination of Sulfide in Tannery Wastewater by Flow Injection Spectrophotometry</b><br>D. Yuan and D.Y. Fu                                                                                                       | 310 |
| <b>Relationship between Air Pollutants and Visibility in Shanghai during 2006-2010</b><br>D. Xue and Q. Liu                                                                                                                  | 314 |
| <b>Study of China's Highway Environmental Monitoring Network Planning</b><br>F. Zhang, S.Y. Cheng, P. Zhong, R. Wu, M.J. Ma and W.W. Gong                                                                                    | 318 |
| <b>Study on the Risk Analysis and Emergency Measures to the PX Projects of Dalian Dagushan which Impact on the Marine Environment</b><br>J. Zhang, J.G. Lin and H. Zhang                                                     | 325 |
| <b>Study on the Vertical Distribution of Cr in Jiaozhou Bay</b><br>D.F. Yang, F.Y. Wang, H.Z. He, C. Yang and S.X. Zhu                                                                                                       | 329 |
| <b>The Analysis of Crude Oil Nature's Impact on Oil Pipeline Underground Divulging Pollutant Migration</b><br>G.Z. Wu, Y. Wang, H.B. Qi, Y.M. Zhou and D. Li                                                                 | 332 |
| <b>The Application of a High Sensitive Laser Frequency Modulation Absorption Spectroscopy</b><br>L.L. Liu, C.L. Li, Y.F. Wu, W.X. Shi, F.L. Wu, X.B. Qiu and J.L. Wei                                                        | 336 |
| <b>The Impact Analysis on Crude Oil Phase Change to the Migration of Buried Oil Pipelines Leakage Pollution</b><br>G.Z. Wu, E.Y. Guo, H.B. Qi, Y.M. Zhou and D. Li                                                           | 341 |
| <b>The Monitoring and Ecological Evaluation of Beng River Sediment for Heavy Metals (Hg,Pb,Cr)</b><br>J.C. Qiu                                                                                                               | 345 |
| <b>Detection and Evaluation of Heavy Metal in Edible Fungi of Liaoning Province</b><br>S.G. Xin, G.D. Li, F.L. Ren, N. Li and S.W. Wu                                                                                        | 350 |
| <b>Determination of Polycyclic Aromatic Hydrocarbons (PAHs) in Ginkgo Biloba Extracts by HPLC with Fluorescence Detection</b><br>S.R. Tang, H. Song, Q.D. Liu and Y. Chen                                                    | 354 |
| <b>Numerical Simulation of Multiphase Flow Pollutants during Migration Process in Buried Oil Pipeline Leakage</b><br>H.B. Qi, Y. Liu, G.Z. Wu, D. Li and J. Liu                                                              | 359 |
| <b>Study on Distribution and Source Apportionment of Heavy Metals in Atmospheric Particulate Matter in Gansu, Ningxia and Inner Mongolia Sections of the Yellow River of China</b><br>X.L. Ma, X.Q. Ren, J.J. Liu and Y. Liu | 363 |
| <b>Water-Quality Assessment on Butterfly Lake in Guangdong Ocean University, China</b><br>Y.Y. Liu, Z.K. Chen, K.J. Ren, Y. Jia, Y.X. Guo and J.H. Zhu                                                                       | 367 |
| <b>Heavy Metal Contamination from Sediment and Soil in the Riparian Zone of the Three Gorges Reservoir, China</b><br>Y.C. Wang, B. Lei, C.H. Yang, L. Ao, M. Yang, Y.F. You and Z. Sheng                                     | 371 |
| <b>Application of Cloud Theory and Set Pair Analysis Coupled Model for Evaluating Environmental Carrying Capacity in Tianjin</b><br>Q. Si and M.C. Li                                                                        | 377 |
| <b>Investigation on Air Quality in Strawberry Greenhouse under Natural Ventilation</b><br>W.H. Fu and S.J. You                                                                                                               | 382 |

## Chapter 5: Environmental Restoration Engineering

|                                                                                                                                                                                                                |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Aeration Settling Process on Treating ASP Produced Water of Oilfield</b><br>G.M. Liu, X. Jia, M.J. Liu and W. Zhi                                                                                           | 391 |
| <b>Assessment of the <math>\text{Fe}^{3+}</math>-EDTA Complex in UV-Fenton-Like Processes: The Degradation of Methylene Blue</b><br>C.S. Wei, W.Y. Huang, R.J. Zhang, Y.H. Wang, L.M. Luo, H. Mo and L.H. Xiao | 395 |
| <b>Criteria and Procedures for Regional Environmental Regeneration: A European Strategic Project</b><br>S. Miccoli, F. Finucci and R. Murro                                                                    | 401 |
| <b>Effect of SRT on the Denitrifying Dephosphorylation Process</b><br>Y.P. Jia, Q. Zong, L.H. Zhang and H.F. Zhang                                                                                             | 406 |
| <b>Effects of Butyrate on Autotrophic Anaerobic Ammonium Oxidation (Anammox)</b><br>H. Li, L. Zhang, Z.X. Li and X.B. Chen                                                                                     | 410 |
| <b>Enhanced Dissipation of POPs in Soils by Combined Plants Cultivation</b><br>J.H. Luo and Z.H. Lei                                                                                                           | 416 |
| <b>Experimental Study on Desulfurization Enhanced by Additive in Limestone-Gypsum FGD Process</b><br>J.X. Liu                                                                                                  | 422 |
| <b>Magnetic <math>\text{Nd}_2\text{Fe}_{14}\text{B}</math> Activated Carbon: Fabrication and Heterogeneous Fenton Oxidation of Congo Red</b><br>C.W. Yang, D. Wang and Q. Tang                                 | 426 |
| <b>Purification Efficiency of Compound Aquatic Plants for the Eutrophic Water Body</b><br>H. Wang, X. Wang, S.M. Wang and X.C. Ji                                                                              | 430 |
| <b>Removal of Phosphate Species from Solution by Adsorption onto Red and Grey Ceramic Clay Used as Adsorbent</b><br>Y.L. Yao, C.Y. Lu, W.S. Guan, H.G. Gou and W. Huang                                        | 434 |
| <b>Research on Application of Treating Beet Sugar Wastewater with IC Reactor</b><br>R.Y. Lei, Y. Wang and Y.F. Li                                                                                              | 440 |
| <b>Selection of Liaoning Ocean Observation Station Site in Baishawan and Impact Analysis of Shoreline Ecological Environment</b><br>H. Zhang, J.G. Lin and J. Zhang                                            | 444 |
| <b>Study on Photocatalytic Degradation of MG by <math>\text{PW}_{12}\text{-TiO}_2/\text{SiO}_2</math></b><br>X.Q. Wang, Q.Z. Yang, S.Y. Fan and Y. Li                                                          | 448 |
| <b>Determination of Retardation Factor of Perchloroethylene in Low Organic Carbon Aquifer</b><br>C.W. Ma, H.Y. Xie and Z.G. Sun                                                                                | 455 |
| <b>Study on Model of Organic Bentonite Adsorption for Phenol Based on Artificial Neural Network</b><br>S.C. Liu, J.X. Zhou and G.F. Xue                                                                        | 460 |
| <b>The Study of Organic Bentonite Competitive Adsorption Model for Phenol and <math>\text{Cr}^{6+}</math> Based on MATLAB</b><br>S.C. Liu, J.X. Zhou and G.F. Xue                                              | 466 |
| <b>Ecological Compensation Mechanism of Liaoning Seas</b><br>X. Ai, L.N. Zheng, J.N. Xiao, L. Zhang and L. Wang                                                                                                | 471 |

## Chapter 6: Pollution Control Engineering

|                                                                                                                                                                                  |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>A Reactive Nano-Fe/Cu Composite Supported on Expanded Graphite for Nitrate Reduction in Water</b><br>J.J. Yue, Y.T. Wang, Z.H. Shi, J. Liu and X. Feng                        | 479 |
| <b>Analysis of Degradation by Aerobic Recharge for Concentrated Leachate</b><br>J. Zhang, P. Xian, L.H. Yang, L.H. Zhan and G.H. Bu                                              | 483 |
| <b>Application of Bamboo Shoot Shell in Color Removal from Methylene Blue Solution</b><br>J.M. Zhang, Z.W. Zhong, D.P. Zhu, L.M. Lin, Q.J. Wang, Q.Y. Tang, Z.M. Luo and L.Y. Ye | 489 |

|                                                                                                                                                                                                                            |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Biodegradation of Major Pollutants in Yeast Wastewater by Using Immobilized Micro-Aerobic Microorganism Technology</b><br>J. Fu, X.F. Wang, C.B. Deng and P. Xian                                                       | 493 |
| <b>Biofilm Formation and Phosphorus Removal in Two Stage Biological Filters by Alternative Aeration</b><br>C.J. Sun, L.P. Qiu and L.X. Zhang                                                                               | 501 |
| <b>Bio-Treatment of APMP Effluent with Activated Sludge</b><br>T.Z. Liu, H.Y. Wang, S. Li and Y. Liu                                                                                                                       | 505 |
| <b>Distribution and Pollution Assessment of Heavy Metals and Petroleum Hydrocarbon in Surface Sediments from Chenglingji Port</b><br>H.X. Xiong, X.L. Liu, C.B. Liu and X.B. Liu                                           | 510 |
| <b>Effect of Matrixes and Plants on the Removal of Nitrogen and Phosphorus in Paddy Fields Drainage Ditch</b><br>X.D. Lv, H.B. Li, H. Wang, X. Wang, Y.H. Li, X.C. Ji and Y.Y. Yu                                          | 516 |

| <b>A Study on Surface Evaporation in Liaoyang Based on Grey Theory</b><br>J.L. Chen                                                                                                                                                          | 875 |
| <b>An Integrated Model for Simulating and Evaluating Water Resources Sustainability at Laoshan Region</b><br>J.J. Yang and J. Zhou                                                                                                           | 880 |
| <b>Analysis on Distribution Trends of Affecting Red Tide Factors in the Beibu Gulf Inshore</b><br>X. Xie, L.H. Yang, P. Xian and Q.H. Jiang                                                                                                  | 886 |
| <b>Countermeasure Research of Urban Water Resources Protection and Tourism Development and Utilization of Wuhan</b><br>X.Z. Peng, Q. Yu and C. Yuan                                                                                          | 892 |
| <b>Research on Sustainable Exploitation of Groundwater Resource in the Riverside Well Field</b><br>C.Y. Zhang                                                                                                                                | 896 |
| <b>Research of the Underground Water Level Prediction Model in Deep Foundation Pit Engineering</b><br>H.P. Li                                                                                                                                | 901 |
| <b>Study on the Basin Water Pollution Control and Optimization of Network</b><br>L.K. Qi and H.W. Zhou                                                                                                                                       | 905 |
| <b>Study on Characteristics of Hydrodynamic and Pollutant Transport of the Tributary Estuary in the Three Gorges Reservoir Area</b><br>Z. Wang, Y. Liu, C.H. Qin and W. Zhang                                                                | 912 |
| <b>Effects of Different Organic Materials on Contents and Morphologic Changes of Mn in Black Soil</b><br>Z.Y. Yang, J.G. Wu, C. Chen and N.N. Feng                                                                                           | 918 |

## **Chapter 9: Water Supply and Drainage, Filtration**

|                                                                                                                                                                     |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Hydraulic Calculation Principle and Todini Formulation Algorithm Analysis</b><br>X. Zhao, Q.F. Li, J.J. Xu, L.F. Song, L.H. Zhao, J.L. Zhao and L. Zhang         | 927 |
| <b>Pollutants Removal Performance of Subsurface Wastewater Infiltration System under Different Hydraulic Loading Rates</b><br>S.Y. Song, J. Pan and Y. Zhang        | 934 |
| <b>Start-Up Characteristics of Biological Aerated Filter with Composite Steel Slag Media for Nitrogen and Phosphorus Removal</b><br>Z. Liu, L.P. Qiu and L.X. Zhang | 939 |
| <b>Study on Management System of Drainage Network</b><br>H.R. Li                                                                                                    | 943 |
| <b>Study on Production Process of New U-Shaped Canal</b><br>J.L. Sun, S.J. Zhang, B. Zhang and L.J. Liu                                                             | 947 |

|                                                                                                                                                                                                                          |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>The Influence of Bromate Formation by Chlorination in Drinking Water</b><br>L. Fang, Q. Zhu and J.H. Xu                                                                                                               | 951 |
| <b>The Research of Anti-Frost Technology of Rural Water Purification Construction in Severe Cold Regions - Taking the Example of Water Supply Plant of Wanfang of Zhaoyuan in Daqing</b><br>L. Bai, Y. Wang and X.L. Liu | 955 |
| <b>The Establishment of Principal Component Analysis Assessment Model for Drinking Water Quality of City Resource</b><br>L.F. Sun, Q.J. Qi, X.L. Zhao and R.F. Li                                                        | 960 |
| <b>Flocculation of Chitosan and the Application in Water Treatment</b><br>Y.Q. Xu, S.L. Liu and H.J. Zhao                                                                                                                | 964 |
| <b>Performance of Micro-Polluted Source Water Treatment by Biological Aerated Filter with Lava Media</b><br>B. Wang, L.P. Qiu, L.X. Zhang and K. Xie                                                                     | 968 |
| <b>Emergency Dispatch System Research and Development for Urban Water Supply</b><br>F.X. Chai, D.M. Chai and H.R. Dai                                                                                                    | 972 |
| <b>Research on Industrial Water Demand Forecasting Model and its Application in China</b><br>Q.R. Zou and X.L. Liu                                                                                                       | 976 |

## **Chapter 10: Ecological Environment and Architectural Environment Protection**

|                                                                                                                                                                                 |      |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>A Logit Model Based Study on the Influencing Factors on Farm Household's Adoption of Soil Testing and Formula Fertilizing Technology: A Case of Four Towns</b><br>L.X. Yang  | 985  |
| <b>A Study on Topographic Differentiation of Small-Watershed Landscapes in the Loess Hilly Region Based on Ecological Restoration Measures</b><br>Y. Shi, S. Geng and W.B. Mi   | 989  |
| <b>Brief Analysis on Green New Deal of Iron &amp; Steel Industry and PM<sub>2.5</sub> Pollution Control Countermeasures in China</b><br>C.Y. Jiao, G. Ren, T.B. Xu and Q.H. Liu | 1001 |
| <b>Distribution Disciplines and Cause of Harmful Elements in Copper Tailing Sand</b><br>X.Q. Liu, S.B. Xia, H. Yuan and Z.L. Cai                                                | 1005 |
| <b>Phytoremediation on PAHs in Soils and Laboratorial Technics</b><br>Z.H. Lei and Y.X. Wu                                                                                      | 1012 |
| <b>The Formation of Iron Plaque on the Roots of <i>Carex cinerascens</i> in Poyang Lake and its Effect on the Lead Accumulation</b><br>C.Y. Liu, X.F. Gong and J.Y. Yang        | 1018 |
| <b>Space Effectiveness Analysis of Urban Natural Ecological Network</b><br>X.Y. Gu                                                                                              | 1024 |
| <b>Study on Information Needs for Promoting the Development of Circular Agriculture</b><br>H.Q. Wang, H. Li and X. Wu                                                           | 1028 |
| <b>Study on Interspecific Coordination Effect within the Entrepreneurship Ecosystem</b><br>X.L. Guan and B. Gao                                                                 | 1032 |
| <b>Study on New Urbanization Construction and Ecological Environmental Protection</b><br>S.B. Zhang                                                                             | 1036 |
| <b>Study on the Distribution of Land Value-Added Income Based on Ecological Compensation</b><br>L. Sun and S.F. Yuan                                                            | 1040 |
| <b>Study on the Ecological Environmental Problems of the Big Sport Events in China</b><br>X.J. Kou and K.Y. Shen                                                                | 1044 |
| <b>The Environmental View of Thoreau's Walden: The Interpretation of the Relationship between Human and Nature</b><br>L.L. Zhang                                                | 1048 |
| <b>The Invasive Species Risk Assessment and Prediction System Based on GIS</b><br>X.H. Wang, Y.J. Liu and L.N. Guo                                                              | 1052 |
| <b>Thoughts on Developing of Jujube Industry in Southern Xinjiang under Ecological Fragility</b><br>Y.P. Guo and Y. Luo                                                         | 1058 |

|                                                                                                                                                                                                |      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>Analysis on Cultivable Fungal Community Structures in Farmland Soil in Different Latitudes of Heilongjiang Province</b><br>J.H. Wang, M. Wang, J.F. Guan, W.T. Gu, X.Q. Zhou and X.P. Zhang | 1062 |
| <b>The Value Assessment of Ecosystem Service Function in Lingang Wetland Park</b><br>L.Y. Lv, H.Y. Li and J.N. Yang                                                                            | 1067 |
| <b>On the Water Ecological Civilization Construction and Strategic Measures of the Sustainable Utilization of Water Resources in Shiyang River Basin</b><br>S.W. Zhang, P.J. Shi and H. Li     | 1072 |

## Chapter 11: Forest Cultivation, Protection and Plant Engineering

|                                                                                                                                                                                                                 |      |
