

Table of Contents

Preface, Organizer, Editors and Editorial Board

Chapter 1: Novel Trends in Production Systems and Logistics

Laboratory of Flexible Manufacturing System for Drawingless Manufacturing P. Košťál, D.R. Delgado Sobrino, R. Holubek and R. Ružarovský	3
Specification of the Component Base for CNC Processing Centre EMCO Concept MILL 105 M. Bučányová and E. Riečičiarová	9
Algorithms and Evolution Diagrams Application for Determining the New Assembly Process Sequences N. Vetríková and M. Šimúnová	16
Layout Redesign and Material Flow Analysis at a Flexible Assembly Cell Supported by the Use of Simulation D.R. Delgado Sobrino, R. Holubek, P. Košťál and R. Ružarovský	22
Priority Index of Production Equipment: A DEA-Based Multi-Criteria Approach to Setting Investment Priorities for Industrial Production Processes R.A. Ledón and D.R. Delgado Sobrino	30
Methods of Storage Management in the System iCIM 3000 M. Matúšová and M. Kusa	38
The Methodical Procedure for Designing of Clamping Jaws J. Oravcova	44
Automated In-Process Inspection Method in the Flexible Production System iCIM 3000 R. Ružarovský, D.R. Delgado Sobrino, R. Holubek and P. Košťál	50
The Methodology for the Selection of the Appropriate Sensory Equipment for the Grasping End Effectors in the Assembly Workspace M. Šimúnová, N. Vetríková and K. Velíšek	56
Offline Programming of an ABB Robot Using Imported CAD Models in the RobotStudio Software Environment R. Holubek, D.R. Delgado Sobrino, P. Košťál and R. Ružarovský	62
Experiment Solution Velocity and Pressure Field in the Mixing Process Computer Simulation H. Kraváriková	68
Interval Censored Data Analysis with Weibull and Exponential Distribution T. Nánási	74
Influence of Random Components of the Sampling Period on the Combined Dynamic System G. Michalconok, M. Nemeth and M. Stremy	80
The Methodology Proposal for the Model-Oriented Safety Analysis of Dynamical Systems M. Strbo, P. Tanuska, A. Gese and L. Smolarik	86
The Dynamical Systems Safety Analysis by SQMD Method P. Tanuska, M. Strbo, A. Gese and B. Zahradnikova	92
Automation of Force Assessment Generated by Upper Limb for Ergonomic System EAWS L. Ondriga and G. Michalconok	98
The Use of Petri Nets in Safety-Critical Control Systems G. Michalconok, M. Korytar and P. Tanuska	104
Modeling and Control of Compression System L. Smolarik, D. Mudrončík and M. Strbo	110
Input Control in Production System by Simulation Optimization D. Jurovata, P. Važan, L. Hrecka and J. Kurnatova	117
The Options of Using Data Mining Methods in Process Control A. Kopceková, M. Kopcek and P. Tanuska	123
Synographical Approach to Dynamical Systems Analysis I. Markechová and H. Stúpalová	129

Optimization of Technical System by Using FTA and Genetic Algorithm A. Libošvárová and P. Schreiber	135
Improving the Sustainability and Effectiveness of the Inventory Management in Manufacturing Company J. Prachař, H. Fidlerová, P. Sakál and T. Zbojová	141
Improving the Quality of Manufacturing Process through Six Sigma Application in the Automotive Industry M. Kučerová and H. Fidlerová	147
Genetic Algorithms in Test Design Automation M. Sroka, R. Nagy and D. Fisch	153
Reflections on the Opportunities of Multicriteria Optimization within Simulation Studies V. Jerz	159
The Impact Analysis of a Tire Model Properties on Running Stability of a Vehicle in the Environment of ADAMS/Car A. Sapietova and M. Lukac	165
Application of Multi-Criteria Optimization to Large-Scale Structures Design M. Sága, P. Pecháč and L. Jakubovičová	171
Precision Analysis of Optical 3D Digitisation of Shaped Elements R. Mendřický	177
Precision Analysis of Part Manufacturing Using SLM Method R. Mendřický and P. Keller	183
Use of Reverse Engineering Methods in the Field of Fashion Design J. Šafka, R. Mendřický and P. Zelený	189
Prototype CNC Machine for Laser Cutting of Sheet Metal P. Zelený, P. Pokorný and M. Lachman	195
Application of Linear Programming Method on Selected Examples from the Enterprises E. Slaichová, E. Štichhauerová and L. Turčok	201
3D Printing of Fractal Deterministic Shapes into Polymer Matrix with Respect to Final Composite Mechanical Properties J. Bobek, J. Šafka, J. Habr and M. Seidl	207
Application of 3D Scanner for Transportation a CNC Machine Tools R. Havlik, A. Gottwaldova and J. Vavruška	213
Design of Simulation Experiments Using DOE F. Manlig and F. Koblasa	219
Dividing the Complicated General Shapes of the Surface into Partial Elements According to Curvature (Gauss and Maximal Curvature) and its Multi-Axis Machining J. Šafka, M. Lachman, P. Zelený and M. Seidl	225
Properties of Models Produced by Direct Selective Laser Melting Technology M. Ackermann, J. Šafka, P. Zelený, M. Lachman and P. Keller	231
Applying Group Decision Making and Multiple Attribute Decision Making Methods in Business Processes K. Kashi and J. Franek	237
Use of Relocation Device at Scanning of Polymeric Material Surface Quality V. Pata, M. Reznicek, L. Sýkorová, J. Knedlova and M. Malachova	243
Application of Theory of Hypothesis Testing in Process of Laser Micromachining V. Pata, L. Sýkorová, J. Knedlova and M. Reznicek	247
Scanning and Evaluation of Biological Surfaces Using the Technique of Rapid Prototyping V. Pata, J. Rahula, L. Sýkorová, A. Zapletalová and J. Knedlova	256
Optimization of the Mixing Process and Quality Evaluation of the Thirteen-Component Granular Mixture J.B. Krolezyk, M. Tukiendorf and R. Dawid	261
Industrial Conditions of the Granular Material Manufacturing Process J.B. Krolezyk	267
Finite Element Analysis of Laminating Tools for Automotive Interior Parts E.I. Croitoru, D. Măgurian and G. Oancea	273
Augmented Reality Applied in Machining Processes and Cutting Tools Management R.E. Petrusse and P.D. Brîndașu	279

Remanufacturing of Damaged Parts Using Selective Laser Melting Technology G.R. Buican, G. Oancea and A. Manolescu	285
---	-----

Chapter 2: Novel Trends in Applied Mechanics and Materials

A Determination of Material Properties of Flexible Structures Using EMA and FEM Analysis R. Duris	293
The Effect of Real and Averaged Boundary Conditions on the Cooling Rate for the Simulation of Heat Treatment Processes Š. Hajdu and B. Taraba	299
The Dependence of the Friction Coefficient on the Size and Course of Sliding Speed E. Labašová	305
Vibration Analysis of Reinforced Beam Structure Using Partially Inserted Longitudinal Core M. Nad, L. Rolník and J. Steinhauser	311
Mechatronic Approach to the Modeling of Machine Aggregates M. Nad, J. Steinhauser and L. Rolník	317
Kinematical Analysis of Gearboxes with Spiroid Gears E. Riečiariarová and M. Bučányová	323
Identification of Surface Topography Scanned by Laser Scanning Confocal Microscope T. Bezak, M. Kusy, M. Elias, M. Kopcek, M. Kebisek and L. Spendla	329
Influence of the Position of Ignition Source on the Raw Materials Used to Produce Biofuel in Form of Wood Pellets J. Horváth, K. Balog and T. Chrebet	335
The Loss of Plastic Properties Stability of Thin Tinplates and its Influence on Change of Corrosive Resistance E. Spišák and J. Majerníková	340
The Loss of Plasticity Stability E. Spišák and J. Majerníková	346
The Combined Approach to the Evaluation of the Cutting Force Data when Ball End Milling J. Beňo, J. Stahovec, I. Maňková, M. Vrabel' and L. Kandrác	352
Statistical Analysis of Cutting Force, Temperature and Power of FEM Modeling when Machining Titanium Alloy L. Kandrác, I. Maňková, M. Vrabel', J. Beňo, J. Stahovec, N.M. Durakbasa and G. Bas	358
Verification of Tin Car Body Production by Unconventional Stamping Method M. Tomáš, J. Hudák, D. Draganovská and P. Ižol	364
An Investigation of Springback in Sheet Metal Forming of High Strength Steels J. Slota, M. Jurcisin, E. Spišák and T. Sleziač	370
Response of Fiber Reinforced Composite Structures to Ballistic Loads Z. Pelagić, M. Dudinský and M. Žmindák	376
Influence of Stress Mode on Failure Micromechanisms of Nodular Cast Iron A. Vaško and M. Vaško	382
Effect of Cutting Speed and Feed on Deep Drilling M. Letavay, J. Pilc and D. Stančeková	388
Design of Coaxial Needleless Electrospinning Electrode with Respect to the Distribution of Electric Field L. Vysloužilová, J. Valtera, K. Pejchar, J. Beran and D. Lukáš	394
Impact of Open Cell Bi-Component Structures on Distribution of Temperature Fields M. Seidl, J. Šafka and J. Bobek	400
Design of the Tool for Production of Ear Ventilation Tubes E. Hnátková, Z. Dvořák and V. Zlýnský	406
Investigation of the Topography of Machined Surfaces C. Felhő and J. Kundrák	412
The Characteristic Parameters of the Twist Structure on Cylindrical Surfaces Machined by Turning Procedures I. Sztankovics and J. Kundrák	418

Dynamic Balancing of the Threshing Drum in Combine Harvesters – The Process, Sources of Imbalance and Negative Impact of Mechanical Vibrations J.B. Krolczyk, S. Legutko and G.M. Krolczyk	424
Influence of Technological Cutting Parameters on Surface Texture of Austenitic Stainless Steel G.M. Krolczyk, S. Legutko and W.R. Maruda	430
Surface Morphology of Duplex Stainless Steel (DSS) in Dry Turning Process G. Królczyk	436

Chapter 3: Information Technology and Software Development Applications in the Contexts of Production Systems, Logistics, Applied Mechanics and Materials

Design of Portal for Improvement Controlling Sales Channel M. Peci, P. Važan and V. Surka	445
Rule Making Algorithms for Smart Home Control A. Strasiftak, D. Mudrončík and A. Peterková	451
Vectorization of Scanned Paper-Based Engineering Drawings – Contemporary Software Abilities M. Gramblička and J. Vaský	457
Design a Platform for Multi-Criteria Analysis of a Computer Simulation R. Havlik and A. Gottwaldova	463

Chapter 4: Modern Management and Teaching Approaches in the Context of Production Systems, Logistics, Applied Mechanics and Materials

Another View of the Product Life Cycle V. Pelantová	471
Education Company – An Experience from the Implementation of Problem Based Learning F. Manlig, F. Koblasa, E. Šlaichová, V. Pelantová and J. Vavruška	477
The Possibilities for Increasing Production Processes Efficiency by Utilizing the Lean Manufacturing Principles N. Klabusayová	483
Value Based Management (VBM) for Logistics Enterprises H. Kościelniak and M. Starostka-Patyk	489
