

Preface

Sustainable development and environmental problems have become ever increasing concerns worldwide. Reducing CO₂ and pollutant emissions in transport and energy consumption is one of the most important priorities for combating climate change and improving urban air quality. Environmental friendly renewable energy will be utilized more and more popularly. The 2014 International Conference on Green Transport, Renewable Energy and Environment (ICGTREE 2014) took place in Tianjin, China, August 23-24, 2014. This conference provides a forum for accessing to the up-to-date knowledge from both industrial and academic worlds and allows for the free exchange of ideas from different fields as well as encourages future collaboration.

Following evaluation and feedback by the International Scientific Committee, accepted papers are selected for publications in this volume. Studies presented in this book cover these topics: Green Transport, Alternative Fuels, Transport Emissions, New Vehicles, and Transport Safety & Management; Renewable Energy, Clean Energy Technologies, and Fuel Cell; Thermal Engineering, Kinetics, Heat Pump, and Energy-saving Technologies; Mining, Oil, Gas, and Petrochemical Engineering; Energy Analysis and Management; Mechanical and Fluid Engineering; Environmental Engineering and Wastewater Treatment Technologies; Environmental Protection, Environmental Materials, and Environmental Safety & Health; Environmental Pollution Control Technologies etc.

We want to thank the Organizing Committee, and the Sponsors supporting the Conference, and everyone who contributed to the organization of this meeting for their invaluable efforts in order to guarantee the complete success of this conference.

The editors

2014 International Conference on Green Transport, Renewable Energy and Environment (ICGTREE 2014)

Organized by:

Hebei University of Technology, China

The University of Leeds, UK

Tianjin University, China

Zhejiang University, China

Partially Sponsored by:

WUN (Worldwide University Network) international collaboration fund

Chairmen:

Prof. Jinxiang Wu, Graduate School, Hebei University of Technology, China. Dean of the Graduate School.

Dr. Hu Li, Energy Research Institute, School of Process, Environmental and Materials Engineering, the University of Leeds, UK.

Co-chairmen:

Prof. Chunde Yao, State Key Laboratory of Engines, Tianjin University, China. Vice Dean of the Laboratory.

Prof. Zhihua Wang, State Key Laboratory of Clean Energy Utilization, Zhejiang University, China.

International Scientific Committee:

Academician Prof. Wenquan Tao, Xi'an Jiaotong University, China

Prof. Paul Williams, the University of Leeds, UK

Prof. Jinxiang Wu, Hebei University of Technology, China

Dr. Hu Li, the University of Leeds, UK

Prof. Liansheng Liu, Hebei University of Technology, China

Prof. Chunde Yao, Tianjin University, China

Prof. Zhihua Wang, Zhejiang University, China

Prof. Jun Zhao, Tianjin University, China

Prof. Alison Tomlin, the University of Leeds, UK

Prof. Chengying Qi, Hebei University of Technology, China

Prof. Gordon Andrews, the University of Leeds, UK

Prof. Enyu Wang, Hebei University of Technology, China

Dr. James Tate, the University of Leeds, UK

Associate Prof. Huajun Wang, Hebei University of Technology, China

Associate Prof. Xiang Gou, Hebei University of Technology, China

Dr. Tim Foxon, the University of Leeds, UK

Associate Prof. Changping Zhang, Hebei University of Technology, China
Prof. Su Li, Hebei University of Technology, China
Prof. Qingping Zheng, Hebei University of Technology, China
Prof. Binlin Dou, Dalian University of Technology, China
Associate Prof. Guoliang Song, Institute of Engineering Thermophysics, Chinese Academy of Sciences
Prof. Chao Huang, Hebei University of Technology, China
Associate Prof. Yanchang Li, Liaoning Technical University, China
Prof. Hua Yang, Hebei University of Technology, China
Associate Prof. Haiping Xiao, North China Electric Power University, China
Prof. Qing Shao, Hebei University of Technology, China
Prof. Junhu Zhou, Zhejiang University, China
Prof. Jianzhong Liu, Zhejiang University, China
Prof. Xiuqin Ma, Hebei University of Technology, China
Prof. Li Yang, Hebei University of Technology, China
Prof. Chunhua Min, Hebei University of Technology, China
Prof. Bengt Sunden, Lund University, Sweden
Dr. Lande Liu, University of Huddersfield, UK

Local Organizing Committee:

Associate Prof. Xiang Gou, Hebei University of Technology, China
Prof. Enyu Wang, Hebei University of Technology, China
Associate Prof. Huajun Wang, Hebei University of Technology, China
Prof. Liansheng Liu, Hebei University of Technology, China
Prof. Chao Huang, Hebei University of Technology, China
Prof. Hua Yang, Hebei University of Technology, China
Prof. Chunhua, Min, Hebei University of Technology, China
Associate Prof. Changping Zhang, Hebei University of Technology, China
Associate Prof. Zhenghua Guo, Hebei University of Technology, China
Associate Prof. Tiechen Zhang, Hebei University of Technology, China
Associate Prof. Chunhua Sun, Hebei University of Technology, China
Dr. Zhanxiu Chen, Hebei University of Technology, China
Dr. Cong Du, Hebei University of Technology, China
Dr. Liting Tian, Hebei University of Technology, China
Dr. Jin Wang, Hebei University of Technology, China
Dr. Xiangfei Kong, Hebei University of Technology, China
