

Table of Contents

Editorial Dynamics and Control of Aerospace and Vertical Transportation Systems J.M. Balthazar, P.B. Gonçalves, S. Kaczmarczyk, A. Fenili, M. Silveira and I.H. Navarro	1
Chaotic Vibrations in Multi-Mass Discrete-Continuous Systems Torsionally Deformed with Local Nonlinearities A. Pielorz and D. Sado	6
Design of Satellite Attitude Control System Considering the Interaction between Fuel Slosh and Flexible Dynamics during the System Parameters Estimation A.G. de Souza and L.C.G. de Souza	14
Suppressing Chaos in a Nonideal Double-Well Oscillator Using an Based Electromechanical Damped Device G.F. Alişverişçi, H. Bayiroğlu, J.M. Balthazar and J.L.P. Felix	25
Nonlinear Analysis of Unbalanced Mass of Vertical Conveyerwith Non-Ideal Exciters H. Bayiroğlu	35
The Nonlinear Analysis of Vibrational Conveyers with Non-Ideal Crank-and-Rod Exciters G.F. Alişverişçi	44
The Effect of Internal Flowing Fluid on the Non-Linear Behavior of Orthotropic Circular Cylindrical Shells Z.J.G.N. del Prado, A.L.D.P. Argenta, F.M.A. da Silva and P.B. Gonçalves	54
Nonlinear Ball and Beam Control System Identification D. Colón, Á.M. Bueno, Y.S. Andrade, I.S. Diniz and J.M. Balthazar	69
Nonlinear Dynamics of Shrouded Turbine Blade System with Impact and Friction B. Santhosh, S. Narayanan and C. Padmanabhan	81
Mathematical Modelling of a Rotating Nonlinear Flexible Beam-Like Wing A. Fenili, C.P.F. Francisco and K.P. Burr	93
Investigation and Assessment of the Electromechanical Fatigue of Electronic Components of Forklift Trucks T. Müller, T. Schmidt, S. Weigelt and L. Overmeyer	100
Design of Semi-Active Roller Guides for High Speed Elevators R. Monge, J.M. Rodríguez-Fortún, A. Gómez, J.A. Roig and P. González	108
Modelling, Simulation and Experimental Validation of Nonlinear Dynamic Interactions in an Aramid Rope System S. Kaczmarczyk and S. Mirhadizadeh	117
Influence of the Load Occupancy Ratio on the Dynamic Response of an Elevator Car System I. Herrera, H. Su and S. Kaczmarczyk	128
Phase Characterization in Experimental Chaotic Systems R. Follmann, E. Rosa, E.E.N. Macau and J.R.C. Piqueira	137
On the Delayed van der Pol Oscillator with Time-Varying Feedback Gain M. Hamdi and M. Belhaq	149
Influence of Nonlinear Stiffness on the Dynamics of a Slender Elastic Beam under Torsional Oscillations M. Silveira, B.R. Pontes and J.M. Balthazar	159
Current and Speed Control Operating Modes of a Reaction Wheel V. Carrara and H.K. Kuga	170
Least Squares Method for Attitude Determination Using the Real Data of CBERS-2 Satellite W.R. Silva, H.K. Kuga, M.C. Zanardi and R.V. Garcia	181
High Order and Degree Geopotential and Derivatives Computation Based on the Clenshaw Summation M.C. Zanardi, H.K. Kuga, N.R. da Silveira and L. Morgan	191
Satellite Orbit Determination Using Short Arcs of GPS Data A.P.M. Chiaradia, H.K. Kuga and B.Y.P.L. Masago	206
The Rigid-Flexible Two Link Manipulator with Joint Friction and Different Number of Modes for the Flexible Link Discretization A. Fenili	222
