ISBN(softcover): 978-3-03835-362-1 ISBN(eBook): 978-3-03826-747-8

Table of Contents

Preface, Committees and Sponsors

Chapter 1: Designing and Researching of Machines and Equipments for Manufacture

A New Fixture for Automobile Belt Tensioner Brace
L. Gao, T.G. Xu, J.J. Zhu and P.C. Huo 3

Key Technology Research on Dynamic Design of a Large Vibrating Screen
Y.L. Zhang, X.P. Liu and C.L. Hou 9

Effect of Expansion Tube Structure on Regeneration of Diesel Particulate Filter
J.C. Zhang, J.Y. Du and D.W. Ding 15

Effect of Temperature Distribution on Critical Speeds of a Dual-Rotor System
G.Y. Xin, K.M. Wang, M.J. Qu and T.Y. Wang 21

Finite Element Analysis about Push Plates of Dismounting Coupler and Buffer from Passenger Train Base on ANSYS
X.B. Li 25

Structural Principle of Hydraulic Engine
H.X. Zhang, Y.Q. Jiao, T.Z. Zhang and L.J. Cheng 28

The Mechanical Structure of a New Energy-Saving Pumping Unit Analysis by Pro/E
V.M. Pham, J.C. Song, K. Zhang and T.H.T. Vu 32

The Research of Stemming Making Jam Machine
Y. Li, J. Xu and Y.L. Lei 36

The Strength Analysis of Francis Turbine Runner Based on the Fluid-Solid Coupling
K. Kan, Y. Zheng, X. Zhang, B. Sun and H.W. Liu 41

Influence of Diversion Tunnels on Insulation Design of the High Temperature Pneumatic Duct
H.X. Wang, Y.L. Jiang and H. Shi 46

Vertical Assembled Sprayer for Supplying Water and Liquid Fertilizer
P. Jamjareegulgarn, U. Phonhirun, A. Jareonroop and S. Suthirak 52

Rotating Detonation Instabilities in Hydrogen-Oxygen Mixture
Y.H. Wang and J.P. Wang 56

Dynamic Characteristics Optimization of Joint Interface of Machine Tool Based on Porous Oily Materials
J.F. Ma, Q. Li, J.K. Feng and L.S. Wu 63

Modeling Analysis and Experiment Research on Rotary Motor Buffer Overflow Valve
Y.S. Zhang, X.P. Xian and J. Yin 68

Numerical Simulation for Premixed Combustion of Multiple Ejection/ Tangential Burner
J.R. Xu, X.X. Chen and G.Q. Wang 74

Simulation Research of the Effect of Compression Ratios on Combustion and Emission for Methanol/Diesel Dual Fuel Engine
X.D. Zhang, Y.N. Yuan and J.Y. Du 78

Experimental Research on Premixed Porous Media Combustion in Multiple Ejection/Tangential Burner
J.R. Xu, X.X. Chen and G.Q. Wang 83

Design of Pocket Dies for Metal Extrusion Using the Finite Element Method
K. Sena and S. Piyasin 87

Chapter 2: Theory and Practice of Computational Mechanics

About Experience of Determining Stiffness and Strength Characteristics of Structural Joints for Modeling Nonlinear Processes of Deformation and Failure of Long Span Structures
A.S. Pavlov and A.M. Belostotsky 97

Boundary Element Method with Runge-Kutta Convolution Quadrature for Three-Dimensional Dynamic Poroelasticity
L.A. Igumnov, I.V. Vorobtsov and S. Litvinchuk 101

About Verification of Wavelet-Based Discrete-Continual Finite Element Method for Three-Dimensional Problems of Structural Analysis Part 1: Structures with Constant Physical and Geometrical Parameters along Basic Direction
M.L. Mozgaleva and P.A. Akimov 105

About Verification of Wavelet-Based Discrete-Continual Finite Element Method for Three-Dimensional Problems of Structural Analysis Part 2: Structures with Piecewise Constant Physical and Geometrical Parameters along Basic Direction
M.L. Mozgaleva and P.A. Akimov 109

Direct BEM for Three-Dimensional Transient Dynamic Piezoelectric Analysis
L.A. Igumnov, I.P. Markov and A.A. Belov 113

Laplace Domain Boundary Element Method for 3D Poroelastodynamics
L.A. Igumnov, A. Petrov and A.V. Amenitskiy 117

Generalized Multiquadrics with Optimal Shape Parameter and Exponent for Deflection and Stress of Functionally Graded Plates
Y.T. Chen, S. Xiang and W.P. Zhao 121

The Performance Comparison Analysis on Hydraulic Muffler of Quality Room with Parallel Line
C.J. Shan, Y.D. Bian and N. Xu 125

Fiber Orientation Angles Optimization for Maximum Fundamental Frequency of Laminated Composite Plates by the Genetic Algorithm and Meshless Method
F. Wang, W.P. Zhao and S. Xiang 130

Fiber Orientation Angle Optimization for Minimum Stress of Laminated Composite Plates
Y.T. Chen, S. Xiang and W.P. Zhao 135

Layer Thickness Optimization of Laminated Composite Plates to Maximize the First-Order Natural Frequency
L.G. Zhang, K. Yang, W.P. Zhao and S. Xiang 139

Minimize the Deflection of Laminated Composite Plates under the External Load Using Fiber Orientation Angle
Y.T. Chen, S. Xiang and W.P. Zhao 144

Natural Frequency of Laminated Composite Plates Using a Sinusoidal Theory
G.Q. Zhou, J. Wang and S. Xiang 148

Shape Parameter Optimization of Gaussian Radial Basis Function Using Genetic Algorithm for Natural Frequencies of Laminated Composite Plates
G.Q. Zhou, W.P. Zhao and S. Xiang 153

Tailoring the Fundamental Frequency of Laminated Composite Panels Using Material Properties
L.G. Zhang, K. Yang, W.P. Zhao and S. Xiang 157

Surface Fitting and Finite Element Inverse Analysis of Residual Stress in a Weldment by the Contour Method
H. Zhou, J.G. Yang, Y.M. He, J. Lei, H.L. Dong and Z.L. Gao 162

Dynamics Analysis of Orientation Distribution of Fiber Suspensions in Shear-Extensional Flow
P.F. Luo 168

A Method Combined with the Genetic Algorithm for Design of High Efficiency Propeller
S. Xiang, W.P. Zhao, L.G. Zhang and G. Tong 172

Ship Performance Research Based on BP Neural Network
H. Liu, F.Z. Song, M.M. Li and B. Song 176

Application of Improved Extended Kalman Filter for Adaptive Model of Aircraft Engine
G.T. Zhou and S.M. Su 180

Comparative Analysis of 3D Viscoelastic and Poroelastic Dynamic Boundary-Element Modelling
L.A. Igumnov, A. Ipatov and E.A. Lebedeva 186

Finite Element Simulation of Stability and Resistance to Extreme Loads of Braced Shell with Elastomeric Bearings
A.M. Belostotsky and A.S. Pavlov 190

Numerical Simulation Method of Leakage for Lip Seal
Q. Zhou, Z.M. Li and Y. Wu 196

The Modeling and Performance Analysis of the Three Degrees Spring-Mass System
L.C. Zuo and Z.H. Yin 200

The Aerodynamic Configuration Design and 3D Modeling of Horizontal Axis Wind Turbine Blade
L.G. Qu, W. Ji and G.H. Wang 205

Study on Lubrication Simulation and Capability of Three-Lobe Journal Bearing
K. Qian and W.G. Guo 210

Single Objective Optimization Research of a Bulk Carrier Structure
H. Liu, F.Z. Song, M.M. Li and B. Song 215

Review of Finite Element Simulation of Granular Materials
B. Ghadimi and U. Hasan 219

A Method to Avoid Singularity of the Planar Four-Bar Linkage by Means of Self-Adaptive Structure
R.Q. Guo, W. Hu, J. Liu and S. Lin 227

Chapter 3: Mechatronics, Robotics and Control

Controller Optimization of Quadrotor UAV
X. Zhao, W.P. Zhao and S. Xiang 237

Design of Experimental System of Variable Pump Performance Based on LabWindows/CVI
Y. Han, X.Y. Qi and Y. Pan 241

Effects of Phase Relation between Forewing and Hindwing on Aerodynamic Performance in Dragonfly Flight
J.Z. Yan, M.Z. Zheng, Z.P. Li and Q.S. Li 245

Longitudinal Nonlinear PID Controller Parameter Optimization of Autopilot Using Genetic Algorithm
X. Zhao, W.P. Zhao and S. Xiang 252

New Guidance Law Design with Multiple Object Constraints for Guided Rocket-Propelled Missile
X.J. Duan, X.Z. Xue and P.Y. Liu 256

Steering Torque Optimization of an In-Wheel Motor Vehicle with Double Pivot Suspension Based on Response Surface and Genetic Algorithm
T.Z. Shi, D.F. Wang, Y.K. Zhang and H.L. Dong 263

Vehicle Active Rear Wheel Steering Control Based on a Variable Transmission Ratio Control Strategy
Y.S. Tan, H. Shen, M.H. Huang and S.R. Zhang 267

Vehicle Robot Driver Research and Development Based on Servo Motor Control
Z.P. Zhu, A.M. Du, Z.X. Ma, W.Y. Zhang and C.G. Fan 272

Motion Law of Excavator Based on the Method of Ultrasonic Distance Measuring
Y.T. He, P.M. Lu and X.P. Niu 276

Hot Blast Stove Temperature Control System Based on Neural Network Predictive Control
Y.W. Tang and X. Liu 281

Test Bench Emulation of Slip Ratio during Anti-Lock Braking of Electric Vehicle
C.K. He, J.Z. Zhang and L.F. Wang 285

Study on Performance Simulation of Vehicle with EM-CVT
L.C. Zhang, X. Fan and W.X. Hang 290

Research and Application of Monitoring and Control Technology for District Heating System
H.B. Wang, D.D. Lou, Y.S. Wang and H.R. Sun 294

System Integration for the Environmental Friendly Electric Vehicle
K.S. Yang and C.M. Chang 300

An Analysis and Design of the Preparation Orbit for the Lunar Satellite
X.M. Zhang 304

Control System Design for Lattice Distortion Modification Test Equipment Based on Fuzzy Compensated Decoupling
H.L. Zhu, Z. Meng, W. Lu, Z.N. Zhu and D. Zhang 308

Design on the Control System of Ammonia Modification Production Equipment System
H.L. Zhu, Z. Meng, P.X. Li, W. Lu and Y.J. Zhang 312

Kinematics Analysis and Simulation of the Power-on-Live Manipulator
X. Dong, Z.C. Zheng, Y. Gao, Z.T. Jiang and H.Y. Xiao 316

Simulation on Improved Genetic Algorithm of the Ship's Superheated Steam Pressure
P. Wang, S. Zeng, R.H. Dai, H. Meng and G.L. Zhang 323

The Design of Product Packaging Transmission Line Control System Based on Siemens PLC
Z.Y. Zhong and H.L. Sun 327

Vehicle Direct Yaw Moment Control with Longitudinal Forces Distribution
M.H. Huang, H. Shen and Y.S. Tan 331

Simulation on Improved Genetic Algorithm of the Ship's Superheated Steam Pressure
P. Wang, S. Zeng, R.H. Dai, H. Meng and G.L. Zhang 335

Chapter 4: Advanced Materials Engineering and Processing Technologies

Influence of Ammonium in Zinc Oxide Nanostructures Hydrothermally Grown on Glass Substrate
C. Mejía-García, E. Díaz-Valdés, M.A. Ayala-Torres, A. Sánchez-Sánchez, A.M. Paniagua-Mercado and J. Romero-Ibarra 341

New Cr-Doped $SrTiO_3$ Ceramic Color Pigments
N. Yongvanich, K. Srithong, W. Kaewbudsa and P. Visuttipitukul 346

Photo- and Radioluminescence of Ce^{3+}-Doped Dense Oxide Glass
P. Lertloypanyachai, N. Pattanaboonmee, W. Chewpraditkul, D.P. Chen and M. Nikl 350

Study on Pavement Performance of Warm Mix Asphalt with DAT
K. Wang and X. Qu 354

Theoretical Study of Copper (II) Oxide Clusters and their Interaction with CO
E. Koblova, A.Y. Ustinov and O. Shcheka 358

Study of Biochar Pyrolysis Mechanism and Production Technology
Z.X. Zhang, J. Wu, J. Meng and W.F. Chen 364

Study of Waste Rubber Powder Blend Mechanical Properties of NR
C.J. Liu, W. Xu and J.Z. Song 370

The Applied Study Based on the Injection Molding Mechanism of Microcellular Foamed Plastics (MCFP)
Y.J. Huang 374

Development and Application of Fine Rubber Powder Production Technology
W. Xu, J. Kong and C.J. Liu 380

Effects of Purple Sweet Potato Extract Addition in Ascorbic Acid Inhibitor to Corrosion Rate of API 5L Steel in 3.5%NaCl Environment
Ayende, A. Rustandi, J.W. Soedarsono, D. Priadi, Sulistijono, D.N. Suprapta, G. Priyotomo and R. Bakri 384

Luminescence and Light Yield in Ce^{3+}-Doped $Y_1Gd_2Al_{5-x}Ga_xO_{12}$ (x=2,3,4) Single Crystal Scintillators
W. Chewpraditkul, N. Pattanaboonmee, W. Chewpraditkul, K. Kamada, A. Yoshikawa and M. Nikl 390

An Investigation on the Microstructure Evolution of Al-5Ti Alloys during an ECAP-CASTEX Process
Y.L. Li and H. Ding 394

Influence of Pulsed Current on the Tensile Behaviors of the 5XXX Aluminum Alloy
J.H. Song and S.G. Choi 399

Surface Modification of High-Speed Steel by Plasma Nitriding
B. Rakhadilov, M. Skakov, E. Batyrbekov and M. Scheffler 403

The Current Situation and Production Thods of Vulcanized Rubber Powder
W. Xu, J. Kong and W.K. Jiang 410

Chapter 5: Biomedical Engineering and Environmental Science

Chemical Constituents and Antiamoebic of Methanolic Fraction from *Peperomia pellucida* (Linn.)Kunth
C. Sangsuwon, W. Jirujchariyakul and K. Roongruangchai 417

On the Adsorption Capability of Powder Activated Carbon for Phenol
S.F. Zhong, J.W. Mo and Y.P. Li 422

Studies on the Removal of Tetracycline by a Kind of Nano-Sized Amorphous Carbon
Y.X. Wu, W.H. Zhang and Y.Z. Lan 426

Stress Analysis of All Ceramic Fixed Partial Denture by Finite Element Method
S. Piyasin, K. Sena, N. Sukjai and W. Tipawan 430

Penetration Force in Biopsy under Condition of Biomimetic Vibration
L. Tan, X.M. Qin, H.C. Zhang, Q. Xin and Q.H. Zhang 436

Preparation and the Release Rate Studies of a New Gel Type Slow-Release Solid Chlorine Dioxide
Q. Li, Y. Han, X.W. Li, L.P. Wang, J.P. Wang, Q.Q. Liu and C. Zhang 441

Chapter 6: Methods and Systems of Measurement, Testing and Monitoring

Sonar Image Segmentation Based on an Improved Selection of Initial Contour of Active Contour Model
J.P. Wu and H.T. Guo 447

A Test to Measure the Rate of Adsorption Deformation of Flexible Assembly Tooling
L.G. Qu, G.T. Chen, C.Q. Su and Y.J. Xin 451

Comparison of Vibration Signal Analysis Methods for Effective Gear Fault Detection
W.Y. Lee, D.H. Lee and H.Y. Ji 456

Design of a Spherical Leak Detector for Submarine Oil Pipelines
S.X. Guo, S.L. Chen, X.J. Huang and T.S. Xu 460

The Application and Research of Terrestrial 3D Laser Scanning Technology in Tunnel Survey
X.Q. Han, F. Qin, Z. Zhang and S.Y. Yang 465

Development and Application of On-Line Monitor for the ZLW-1 Axis Cracks
J.G. Jin and Z.Z. Wang 469

A Study on Fault Detection Method of Redundant Inertial Navigation System on Micro AUV
K.P. He, Y.P. Shao, L. Zhang, S.L. Hu and Y. Li 473

Sensitive Structure Optimization and Verification of Cantilever Beam Gyroscope
Y. Liu and L.Q. Yu 480

Study on Optimization of the Number of DF Stations
X. Wu, J.J. Zong, X.X. Cui and C.X. Liu 485

Application of Three-Dimensional Seismic Exploration Technology in the Mining Area of Loess Plateau
X. Feng, N.Q. Wang, J. He, Q.T. Wang and X.C. Jiang 491

The Design of a Multi-Functional Force Loading Device
Y.Q. Li, Y.J. Li, H.Y. Cui, G.C. Wang and X.J. Tian 496

Chapter 7: Modern Tendency in Product Design and Industrial Engineering

Control and Optimization of Development Risk of the High-Tech Manufacturing and Measuring Product
Y.P. Liu, J.J. Ding, X.Y. Long, Z.D. Jiang and Y.R. Jiang 503

Exploration on Creative Product Customization Design Based on 3D Printing Technology Research
L. Liu and Y. Yang 509

Research on the Application Method of Intuitive Design
X.Y. Yang 513

The Analysis of Intuition in Industrial Design
X.Y. Yang 517

The Automobile Body Modelling Design Based on CATIA Surface Design Module
Y. Yu and J.J. Ren 521

The Application of Folding Structure in the Draw-Bar Box Design
H.L. Liu and M.Q. Zhou 526

The Statement of Optimal Design Problem with the Cusp Catastrophe Theory Application
A.V. Pitukhin and I. Skobtsov 530

Design Optimization to Reduce Variation in Manufacturing Process
H. Chen 534
