## Preface

## Chapter 1: Materials Science and Processing Technologies, Chemical Processes and Biotechnologies

|                                                                                                                                                                                                                         |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Dyeing Process of PSA/MPIA Blended Fiber</b><br>C.S. Ling                                                                                                                                                            | 3  |
| <b>The Irradiation Crosslinking of Poly(vinylidene fluoride-chlorotrifluoroethylene)</b><br>J. Chen                                                                                                                     | 7  |
| <b>Study on the Preparation of Oil-Coal-Water Slurry</b><br>H.L. Qi, K. Gai, D.P. Ma and B. Zheng                                                                                                                       | 11 |
| <b>Performance Study of Coal Water Slurry</b><br>K. Gai, H.L. Qi, D.P. Ma and W.L. Liang                                                                                                                                | 16 |
| <b>Electronic Structure and Optical Properties of Cu-Doped SnO<sub>2</sub></b><br>M. Xu                                                                                                                                 | 20 |
| <b>Effect of Ferulic Acid and its Oxide on Qualities of Soy Protein-Isolate/Chitosan Composite Films</b><br>C. Zhang, X.F. Guo, Y. Ma and X.Y. Zhao                                                                     | 24 |
| <b>Ferulic Acid and its Oxide Enhance Performance of Soy Protein-Isolate/Chitosan Composite Films</b><br>C. Zhang, X.F. Guo, Y. Ma and X.Y. Zhao                                                                        | 28 |
| <b>Preparation and Luminescent Properties of the La<sup>3+</sup> Doped Tb<sup>3+</sup>-Hydroxyapatite</b><br>W.B. Liu, Adu, Y.G. Lv, L.L. Yu, Y.X. Du, W.E. Wang, C.X. Wang, J.H. Zheng, H.B. Gao, L. Zhang and D. Song | 32 |
| <b>A Novel Compound Machining of AISI 321 Stainless Steel Using Small Diameter Electrodes</b><br>Y. Shen, Y.H. Liu, H. Dong and R.J. Ji                                                                                 | 36 |
| <b>Fabrication of Fe<sub>3</sub>O<sub>4</sub> Nanoparticles Decorated Multi-Walled Carbon Nanotubes Magnetic Nanocomposite</b><br>L.L. Chen                                                                             | 41 |
| <b>Modification of PLA with Chain Extender</b><br>A.S.M. Elhassan, H.A.M. Saeed, Y.A. Eltahir, Y.M. Xia and Y.P. Wang                                                                                                   | 44 |
| <b>Development of New Microalloyed Steel by Alloying with Tungsten</b><br>J.W. Zhao and Z.Y. Jiang                                                                                                                      | 48 |
| <b>Effect of Cr Addition on Microstructure and Mechanical Property of Cu-17Ni-3Al-1.2Fe Alloy</b><br>W. Wu, C. Zhao, Y.H. Weng, Z.Q. Luo and W.W. Zhang                                                                 | 52 |
| <b>Application of ANOVA into the Evaluation of Homogeneity of Materials</b><br>R.B. Ning, Q. Li and S.N. Xu                                                                                                             | 57 |
| <b>Yellowish-White Emission from Sol-Gel Mediated Lithium and Aluminium Co-Doped Zinc Oxide Thin Films</b><br>X.L. Tan, W.H. Zhang and J.W. Wang                                                                        | 63 |
| <b>The Research of Grading Dehydration Technology on Slurry Pipeline Grade Conveyor</b><br>H.W. Liu, H.T. Chen, G.Y. Pu and C.L. Pan                                                                                    | 67 |
| <b>Damping Performance of CB Filled NR/ENR, NR/BR and NR/IIR Compounds</b><br>Y.Q. Wang, Z. Peng, J.P. Zhong, K. Xu, C.J. Yang, Y.Y. Luo and P.W. Li                                                                    | 70 |
| <b>Microstructure and Mechanical Properties of Low-Si Spring Steels Produced by Quenching- Isothermal-Quenching-Tempering Process</b><br>F. Zhao, H. Zhang and Y.L. Liang                                               | 74 |
| <b>Determination of Competitive Adsorption Isotherm of the Etodolac Enantiomers Using Inverse Method</b><br>S. Qi, L. Hui and W.F. Yu                                                                                   | 79 |
| <b>Research on the Thermal Conductivity and Thermal Diffusivity of Magnesium Alloy</b><br>R.H. Guo, J.Y. Zhang, L.M. Wang, Y. Fan and Y.J. Guo                                                                          | 84 |

|                                                                                                                                                                                            |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>A Study on the Cool Charge Characteristics of Ice Storage Plate Filled with Eutectic Salt</b><br>C.F. Ji, X.Y. Yu and G. Liu                                                            | 88  |
| <b>Modeling of Single Flow Zinc-Nickel Battery for System Efficiency Improvement</b><br>Y.X. Li, M.C. Dong, P.C. Zhao and Y.D. Han                                                         | 94  |
| <b>Study Status of Giant Magnetostrictive Material Applied in Measurement Field</b><br>H.F. Liu, J.C. Zhang, K.R. Li and Y. Li                                                             | 98  |
| <b>Study of Ozone Decomposition Using TiO<sub>2</sub>-Graphene Composites</b><br>X. Tan, Q.Q. Shang and S.Y. Wang                                                                          | 102 |
| <b>Fractional Extraction and Structural Characterization of Coconut Shell Hemicellulose</b><br>F.H. Zhao, Y. Chen, R.L. Chen, M. Liu, Y.Q. Guo and G.L. Fu                                 | 108 |
| <b>Preparation of Al-MCM-48 and Ti-MCM-48</b><br>Z.X. Zhao, L.M. Zhang and P. Chen                                                                                                         | 114 |
| <b>Influence of Inorganic Salts on the Refraction Index of Water</b><br>X.Y. Zhao, Y.F. Peng, C.C. Zhai, X.Y. Han and Y. Zhang                                                             | 118 |
| <b>Study on Heat Stability of Polyphenol Oxidase from Purple Sweet Potato</b><br>L. Gao, L. Lin, L.C. Zhao and F. Wu                                                                       | 122 |
| <b>Synthesis of Alkyl Polyglycoside and its Application in the Glyphosate</b><br>G.M. Xu and T.J. Shi                                                                                      | 126 |
| <b>Development of an Organic Acid Antifreeze Coolant</b><br>J.M. Chen, G.J. Leng, R.J. Yi and B. Gao                                                                                       | 130 |
| <b>Numerical Simulation of Dendrite Growth of Binary Alloy Using Phase-Field Method</b><br>F.H. Liu and M. Gao                                                                             | 133 |
| <b>Study of Secondary Electron Emission Depended on Surface Charge of Space Insulator Materials</b><br>N. Feng, D.T. Li, S.S. Yang, Y.F. Chen, D.T. Tang and C.X. Zhao                     | 137 |
| <b>Steam Gasification of Biomass Coupled with Lime-Based CO<sub>2</sub> Capture in a Dual Fluidized Bed: A Modeling Study</b><br>X.M. Wang, X.B. Xiao, X.J. Chen, J. Liu and W.Y. Li       | 142 |
| <b>Study on the Pathogens Carrier Rate of “Red Globe” Table Grape at Different Temperatures</b><br>L. Zhang, L. Gao, X.H. Li, P.Y. Zhao, F. Li, C.X. Shao, Y.Y. Li and H.Y. Ma             | 146 |
| <b>The Effects of the Post-Annealing Atmosphere on the Ultraviolet Responsivity of n-ZnO/p-Silicon Nanowire Heterojunction</b><br>H. Zhou, Y.D. Zhu, C. Hu and A.Y. Zuo                    | 150 |
| <b>Prediction of Mechanics Behaviors and Analysis on Dynamic Characteristics for Fiber Reinforced Metal Matrix Composites (MMC) Shafts</b><br>Y.D. Sha, L. Luo and Q.Y. Jia                | 154 |
| <b>Structural and Magnetic Properties of CoFe<sub>2</sub>O<sub>4</sub> Thin Films via Sol-Gel Method</b><br>S.H. Yang, D.G. Li, H.B. Yang and H.C. Yan                                     | 159 |
| <b>Synthesis, Spectroscopic Properties of Bis-Boc-L-alanine Modified 1,8-Naphthyridine Ligand Induced by Cr<sup>3+</sup></b><br>G.Z. Gou, B. Zhou, L. Shi, N. Wu, X.L. Chen and W. Liu     | 163 |
| <b>Electronic Structures and Theoretical Electronic Spectra of <i>Meso</i>-Phenyl and 3,5-diaryl Substituted BODIPY Dyes</b><br>G.Z. Gou, L. Shi, B. Zhou, X.L. Chen, W. Liu and C.Y. Mang | 167 |
| <b>Grain Refinement Strengthening of Sm in AZ61 Alloy</b><br>Q. Zhang, Q.A. Li, J. Chen and X.Y. Zhang                                                                                     | 171 |
| <b>Controlled Synthesis and Optical Properties of CuInS<sub>2</sub> Nanocrystals</b><br>X.C. Guo and W.H. Zhou                                                                             | 175 |
| <b>The QSPR Study for the Net Heat of Combustion of Esters Based on Ant Colony Optimization</b><br>H.Y. Cao and R. Wang                                                                    | 180 |
| <b>Review the Effect of Welding Processes on the Comprehensive Mechanical Properties of Magnesium Alloy Joints</b><br>Z.J. Zhang, B.L. He, Z.M. Lv and K. Wei                              | 184 |
| <b>The Factors Impacting the Surface Quality of Machining and Modifying Measures</b><br>S.F. Peng and T.G. Liu                                                                             | 188 |

|                                                                                                                                    |     |
|------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Research on Curing Processes in RTM by FEM</b><br>Y.J. Yu                                                                       | 192 |
| <b>First-Principle Study on the Hexagonal Phase Properties for ZnO under High-Pressure</b><br>C. Yang                              | 196 |
| <b>Study on the Cutting Process for Remanufacture Deposited Materials</b><br>Z.Y. Wu, K. Zhang, X.J. Tang, X.L. Tian and S.H. Wang | 200 |
| <b>Split Tire Tread Rubber Processing Machinery and Fixture Design Exploration</b><br>Y.J. Gao                                     | 204 |
| <b>Study on the Structure of the Alloy Welding Mold and the Welding Specifications</b><br>K.L. Yu                                  | 208 |

## **Chapter 2: Construction and Structural Engineering, Materials and Technologies**

|                                                                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Design and Implementation of Green Design in Architectural Design System</b><br>J. Xi and X.J. Chu                                                    | 215 |
| <b>Study on Flow Characteristics inside a Spillway Tunnel of Hydropower Station</b><br>H.Q. Zhang, B. Cao, Y.L. Lou and W.K. Tan                         | 219 |
| <b>Research on Numerical Model for Earthquake Induced Progressive Collapse of High-Rise Buildings</b><br>Y.X. Wang and L. Huang                          | 223 |
| <b>Research on Optimum Design of Underground Diaphragm Wall with Interior Bracing</b><br>X.Z. Sui and X.C. Liu                                           | 227 |
| <b>The Exploration of the Design Principle of the Railway Station Square</b><br>J. Zhao                                                                  | 232 |
| <b>Experiment Study on Concrete Resistance to Chloride Ion Penetration</b><br>W.H. Li, Y.Y. Xu and Y.H. Wang                                             | 236 |
| <b>Research on Measures of Civil Engineering Construction to Achieve the Landscape Green Energy Saving</b><br>L. Ke, J.C. Chang and Q. Zheng             | 240 |
| <b>Pressure Distribution of Pressure and Non-Pressure Sections of a Hydropower Station Spillway Tunnel</b><br>H.Q. Zhang, W.K. Tan, Y.L. Lou and Q. Zhao | 244 |
| <b>Rational Research of Deep Concave Open-Pit Slope Angle of Lower Part</b><br>X.L. Ma, G. Zhang, Q.G. Ren and X.L. Jiang                                | 248 |
| <b>Calculating Stability Factor Using Linear Sliding Method is Not Suitable for all Sandy Soil Slopes</b><br>W.W. Zhu                                    | 252 |
| <b>Study on the Information System of Tunnel Stability in Arching Process of Surrounding Rock</b><br>X.D. Liang                                          | 256 |
| <b>Preliminary Exploration on Landscape Planning around Lake Zone in the City</b><br>H.G. Yang, C. Huang, Y. Wang, F.Y. Wang, H.L. Sun and Y.B. Huang    | 260 |
| <b>Research on the Application of Energy Saving Technology in Building Operations</b><br>Y.G. Zhang and X.H. He                                          | 265 |
| <b>Research on Green Public Building Construction Industry</b><br>Q. Liu                                                                                 | 269 |
| <b>Research on Decoration Engineering Design and its Application Based on Value Chain Analysis</b><br>X.N. Yu, Y. Wang and X.S. He                       | 273 |
| <b>Application on Green Building Energy Design Evaluation Based on Support Vector Machine Model</b><br>Y. Wang, X.N. Yu and L.F. Zhang                   | 276 |
| <b>Research on Spatial Coupling of the Urban Planning Based on Master and Main Functional Area</b><br>J. Zhao and J. Zhao                                | 280 |

|                                                                                                                                       |     |
|---------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Effects of Cnoidal Wave-Induced Seepage on Vertical Breakwater Resting on Permeable Elastic Seabed</b>                             |     |
| J.K. Yang, H. Huang, L. Guo, J.R. Lin, Q.Y. Zhu and J.M. Zhan                                                                         | 284 |
| <b>Causations and Properties of Gate Pier Cracks of Concrete Dam in Northern Cold Region</b>                                          |     |
| L.Y. Zhou, C.D. Liu, X.G. Zhou and J. Yan                                                                                             | 289 |

## **Chapter 4: Measurements, Instrumentation, Testing, Monitoring, Analysis and Detection Technologies**

|                                                                                                                                                                                                  |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Coal-Rock Interface Identification Method Based on Dimensionless Parameters and Support Vector Machine</b><br>Y.M. Li, E.M. Liu, G.H. Xue and W. Miao                                         | 843 |
| <b>Research on Broken Filament Detection Method of Silk Product</b><br>C.N. Yang and X.B. Sun                                                                                                    | 848 |
| <b>Research on Jumper and Connector Detection of Silk Products</b><br>C.N. Yang and X.B. Sun                                                                                                     | 851 |
| <b>Detection of Demagnetization Fault in Interior Permanent Magnet Synchronous Motors for EV Based on UKF</b><br>T. Chen                                                                         | 854 |
| <b>Research on SVDD Network Intrusion Detection of the Optimal Feature Selection for Particle Swarm</b><br>X.Y. Zhang, Z.W. Wei and X. Lin                                                       | 860 |
| <b>A Study on the Key Technology of the Online Measurement Device for Joint Internal Thread</b><br>Q. Zhou and Z.Q. Shuang                                                                       | 864 |
| <b>The Research on the Target Tracking of Infrared and Wireless Temperature Measurement System</b><br>F. Liu, G. Wang and Y.Q. Wang                                                              | 871 |
| <b>Analysis of Influence on Seawater Electric Field Measurement by Sphericity Sensor</b><br>X.B. Wang, L. Xia, X.J. Wang and D. Ji                                                               | 876 |
| <b>Temperature Measurement System Design Based on LonWorks Power Line Communication Technology</b><br>K. Ma, W. Ling and X.R. Kong                                                               | 880 |
| <b>A Kind of Gas Density Monitor System Based on CC2530</b><br>Z.D. Li, Q. Guo, Y.X. He, K. Tu and Y. Wei                                                                                        | 884 |
| <b>Design of Gas Density Monitor System Based on Wireless Sensor Network</b><br>Z.D. Li, G.H. Feng, X. Feng, Q. Sun and S.L. Cheng                                                               | 888 |
| <b>Development of Defect Detection Algorithm in Cellular Denitration Catalyst</b><br>L.R. Chen and E.H. Zheng                                                                                    | 892 |
| <b>Design of the Embedded RLC Measurement Module</b><br>J. Chen, L.L. Bao, Y.Y. Yu and F. Ding                                                                                                   | 898 |
| <b>A Simple and Sensitive Method of Monitoring Crack and Load in Three-Point Bending Fracture Mechanics Specimens Using Strain Gages</b><br>X.P. Zhang, Y.Q. Chen, H.N. Xing, L.Q. Jin and D. Li | 902 |
| <b>Remote Rainfall Monitoring System Based on GPRS</b><br>W.B. Liu, T. Wang and Y. Liu                                                                                                           | 907 |
| <b>Research on Mine Water Quality Monitoring System Based on SOPC</b><br>R. Wang, K.Y. Zhang and L. Zhang                                                                                        | 911 |
| <b>The Design and Implementation of the Rice Lesion Identification System</b><br>S. Qiao                                                                                                         | 915 |
| <b>Passive Automotive Electronic Identity Pavement Covered Blind Area Problem Analysis</b><br>X.N. Li                                                                                            | 919 |
| <b>Fault Signal Detection System of Large Scale Integrated Circuit Based on Single Chip Microcomputer</b><br>X.Y. Li, C.P. Liu and R.F. Mei                                                      | 924 |

|                                                                                                                                                                          |      |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>Parallel Measurement Based on Laue Effect</b><br>M.H. Yang                                                                                                            | 928  |
| <b>Infrared Image Simulation of Ground Maneuver Target and Scene Based on OGRE</b><br>C.P. Mu, M.S. Peng, Q.X. Dong, X. Gao and R.H. Zhang                               | 932  |
| <b>Fast Face Detection Based on AdaBoost and Canny Operators</b><br>L. Zhang                                                                                             | 936  |
| <b>The Design of Bearing Monitoring System Based on Acoustic Emission Signal</b><br>K. Huang, Z.K. Bu, C. Zhang and H.L. Xie                                             | 940  |
| <b>Characterization Method of Radar for Air Surveillance Coverage</b><br>W.Q. Wu, S.S. Tian and T. Liu                                                                   | 944  |
| <b>Fault Diagnosis Based on Vibration Signal of Rotating Machinery</b><br>W.W. Zhang, N. Li and Y.F. Ma                                                                  | 949  |
| <b>Research on Automatic Identification of MCS Based on Infrared Satellite Cloud Image of FY2D</b><br>L. Duan, J.J. Wu and F. Liu                                        | 954  |
| <b>A Kind of Multi-Functional Wall Surface Nondestructive Testing Device</b><br>J.W. Fan, Y.J. Liu, L. Chen, S. Ji and S. Yuan                                           | 958  |
| <b>Design and Development of a Resistive Grain Moisture Meter</b><br>W.P. Wang                                                                                           | 961  |
| <b>The Wireless Monitoring System of Shipbuilding Gantry Cranes Based on S3C6410</b><br>Y.P. Tang, H.B. Wu and H.L. Liu                                                  | 965  |
| <b>An Error-Detecting System of Books Based on Two-Dimensional Code Scanning</b><br>H.Z. Xu                                                                              | 970  |
| <b>Error Items Analysis of the Cantilever CMM with REVO Applied</b><br>H.T. Zhang and S.G. Liu                                                                           | 974  |
| <b>Research on Digital Baseband Converting Methods in Interference Measurement System</b><br>X.M. Hou, S.J. Wei and X. Lian                                              | 978  |
| <b>Aircraft Real-Time Measured Data Processing Method Based on Combined Filtering</b><br>Y. Li, H.J. Liu, G.L. Bian and M.H. Liu                                         | 983  |
| <b>Research and Design of Abnormal Sound Online Monitoring and Positioning System for Substation Equipment</b><br>X.H. Tang, F.Y. Zhu, X.F. Gao, J.W. Qian and X.X. Wang | 987  |
| <b>Design and Optimization of the Sensor Gear Set in EPS</b><br>J. Ma and J. Wang                                                                                        | 992  |
| <b>Calibration Error Analysis for Six-Axis Force Sensor Used in Docking System</b><br>S. Lin, L.X. Zhang, J.M. Shao and C.F. Zhang                                       | 998  |
| <b>An Indoor Air Quality Manager Based on the Smart Mini-Car</b><br>H. Luo, L. Gao, X.Y. Ye, T. Jing, N. Wang, N.J. Jin and X. Yue                                       | 1002 |
| <b>The Adjacent Vehicle Coordination System on the Expressway</b><br>F.Z. Zhang, H. Jiang and Y. Lv                                                                      | 1006 |
| <b>Development of Sensor and Application of Biologic Sensor</b><br>E.Y. Tang                                                                                             | 1012 |
| <b>Finite Element Modal Analysis and Size Optimization of Annular Piezoelectric Resonator</b><br>X.W. Liu and C.Y. Liu                                                   | 1016 |
| <b>Frequency Spectrum Estimate Based on FLOS in Various Radar Clutter Noises Environments</b><br>P. Li, H.C. Xie, H.B. Wang, J.B. Long and D.F. Zha                      | 1021 |
| <b>Force Acquisition for Impact Tester</b><br>G.H. Han and T.L. Shi                                                                                                      | 1026 |
| <b>Development of Portable NIR Spectrum Acquisition and Analysis Software</b><br>C.L. Liu, S.L. Dou and Y.J. Hu                                                          | 1034 |
| <b>RFLP Analysis of Soil Microbial Diversity Chromium Contaminated Soil Remediation Process</b><br>J.P. Yang, F. Lu, J.M. Luo and J. Chen                                | 1039 |
| <b>New Method of Optimal Deployment of Radar Network</b><br>Y.J. Cui                                                                                                     | 1043 |
| <b>A New Imaging Method for Circular Trace Scanning SAR with Wide Observation</b><br>H. Jiang, M. Han and H.C. Zhao                                                      | 1047 |

|                                                                                                                                                                      |      |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>Optimal Design of Sensitive Structure in Gas Pendulum Tilt Sensor</b><br>Y.H. Zheng, S.L. Peng and H.W. Wang                                                      | 1051 |
| <b>A Method for Designing Low Peak to Average Power Cognitive Radar Waveform</b><br>X.M. Wang, C.Y. Wang, Y. Chen, Y.X. Yu and H.Y. Sun                              | 1055 |
| <b>Study on the Design Method of Ocean Bottom Seismometer Based on Field Source Characteristics and Coupling Theory</b><br>P. Cui and Y.C. Wu                        | 1060 |
| <b>Soil Moisture Inversion Based on AMSR-E and MODIS Data Fusion: A Case Study of Huaihe River Basin</b><br>J.W. Xu, Y.P. Wang, J.F. Zhao, F.Y. Pu and P. Wang       | 1064 |
| <b>Temperature and Humidity Measuring System Based on ZigBee and GPRS</b><br>M.F. Gong, F.J. Yin, Q. Gu, B.Y. Song and Y.J. Yu                                       | 1068 |
| <b>Research on Miniature Bio-Mimetic Robot Detection System for Gastrointestinal Tract and Motion Compatibility</b><br>C.F. Zhang, H.W. Chen, B.Y. Wang and Y.Z. Fan | 1072 |
| <b>Research on the Temperature and Humidity Environmental Testing &amp; Analysis of Closed Breeding Plant System</b><br>W.X. Yang, B. Hu and C.W. Ma                 | 1076 |
| <b>A Finite Element Analysis on SAW Sensor for Torque Measuring</b><br>L.J. Wang and Y.T. Zhang                                                                      | 1080 |
| <b>Flight Tests Data Processing in Engineering for Light Aircrafts Take-Off Performance</b><br>X.M. Yu, H. Zhang and W.J. Zhao                                       | 1084 |
| <b>Research on Automatic Tracking of MCS Based on Infrared Satellite Cloud Image of FY2D</b><br>L. Duan, J.J. Wu and F. Liu                                          | 1089 |

## **Chapter 5: Electronics and Microelectronics, Embedded and Integrated Systems, Communications and Signal Processing, Power and Energy, Electric and Magnetic Systems**

|                                                                                                                                                                                              |      |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>Design of SVG Application in Microgrids</b><br>D. Ba, L. Feng and Y.Q. Li                                                                                                                 | 1095 |
| <b>8PSK Signals with 50% RZ Clock for Optical Access System Applications Using Phase Equalization Technique in MSPE</b><br>Y.F. Shao, S.K. Wang, A.R. Wang, S.L. Shen, L. Chen and F.P. Chen | 1099 |
