

Table of Contents

Preface, Committees and Sponsors

Chapter 1: Advanced Materials Engineering and Materials Processing

Research on the Properties and Processing of 6Z63 Aluminium Alloy Tubular Busbar G.M. Yu and H.M. Fan	3
Important Matters of Non-Isothermal Crystallization Method X.C. Zhang, L. Zhou, Q. Liu, Q. Zhou and K.L. Singfield	9
The Optical Properties of Doped Silicon Nanotubes C.Y. Luo, Z.G. Lan, J. Feng, M.Z. Hu and Z.X. Fu	14
Study on Processing of a Collophane Reverse Flotation in Yunnan B.W. Yang, P. Zhou and W.C. Jin	18
The Inhibitor Exploration Test of Collophane Reverse Flotation in Yunnan B.W. Yang, P. Zhou and W.C. Jin	22
Effect of Coating on the Thermal Conductivities of Diamond/Cu Composites Prepared by Spark Plasma Sintering (SPS) Q.L. Che, X.K. Chen, Y.Q. Ji, Y.W. Li, L.X. Wang, S.Z. Cao, Y.G. Jiang and Z. Wang	25
Study of Organic Fluorine Modified Epoxy Acrylic Cathodic Electrodeposition Coatings T.X. Li and F. Chen	30
The Application of Materials in Green Packaging Q.Y. Jiang, J. Xu and W.D. Bai	34
Surfactant Assisted Hydrothermal Synthesis of Nano-Microsphere Titania Y.F. Zhuang, Y.L. Bian and L.J. Zhang	38
Synthesis of Nano-Microsphere Titania with CTAB Assisted by Hydrothermal Method Y.F. Zhuang and Y.L. Bian	42
Synthesis of High Molecular Weight Cationic Polyacrylamide T.X. Li and F. Chen	46
Research on Superplastic Gas Bulging Forming of 5A06 Aluminium Alloy Sheet B.P. Bi, Y. Wang, R.R. Mulyukov and M.V. Markushev	50
Ensure Laser Fluence of Laser Ablated Copper Nanowire D.Z. Hu	56
Effect of Processing Parameters on Surface Roughness in Ultrasonic Deep Rolling 6061-T6 Aluminum Alloy with Longitudinal-Torsional Vibration Y.L. Hou, C.S. Liu and S.Q. Liu	60
FEA of Double Metal Composite Seamless Steel Tube with Cross-Rolling X. Gu, X. Ma and D.Y. Jin	64

Chapter 2: Applied Mechanics and Mechanical Engineering

Development of Dynamic Load Strength Test Machine Based on Automotive BIW Z.M. Wang and W.B. Jiang	71
Simulation Study of Jet Formation and Depth of Penetration against Steel Targets at Different Cone Angles Using Autodyn-2D Hydrocode A. Mukhtar, Z.X. Huang, A.Q. Malik, X.D. Zu and Q.Q. Xiao	76
Study on the Design of Composite Transmission System for Crawler Type Full-Feeding Combine Harvester X.Y. Lou	80
Multi-Objective Fuzzy Optimization Design of Truck Differential E.Z. An and Y.C. Wang	84
Analysis of Structure Dynamic Characteristics of ATV Frame with Engine F. Ye, Z.M. Xu and X.C. Zhai	89
Wing Flutter Analysis Parameters during Flight W. Long, Y. Liu and J.M. Cao	93

The Change of Velocity and Pressure of Micro Bubble in Multi-Phases Flow in Mesoscopic Scale	
Z.S. Ling, W. Long and Z.Y. Wu	97
A Research of Uranium Ion Exchanging Tower Stress Calculation under Earthquake Based on ANSYS	
L. Li, G.Z. Chen and H.M. Cheng	101
Based on ANSYS Analysis of the Carbon Fiber Structure Equivalent Method with Bending Fatigue Properties	
T.C. Yang, Y.Q. Sun and H.M. Cheng	106
Parametric Design and Kinematics Simulation of the Roller Gear Indexing Cam Mechanism	
Q.S. Gong, Y.M. Wu, S.S. Liu and H.X. Zhou	112
Research on the Mechanical Reliability of the Pneumatic Pushing Rod in the Citrus Roll Peeling Mechanism	
W.G. Lin, W.Y. Zong, B. Li and C. Zhou	116
The Finite Element Analysis of Tension and Compression Condition of Diesel Engine Connecting Rod	
G. Chen, L. Wu, L. Wu and P.Q. Xie	120
Iterative Genetic-Algorithm-Based Surface Reconstruction Method for Repair of Twisted Blade	
H.D. Wu and J.D. Chen	125
The Matrix Method for Solving the Finite Differential Form Euler Equation of Column Stability	
Z.Y. Hu and Q. Liu	131
Summarization on Deterministic Seismic Response Analysis of Soil Deposits	
M.Z. Guo and Q. Zhang	136
Numerical Simulation and Parameter Optimization on Forming Process of Automobile Torque Box	
W.J. Zhang, L. Wu and G. Chen	140

Chapter 3: Manufacturing Technologies and Automation

Application of TRIZ Contradiction Matrix in Equipment's Combat Resilience Design	
S.S. Ma, S.Y. Yang, Y.X. Xu and C.W. Zhang	149
Analysis and Design of New Drive System Based on Electromagnetic Dynamic	
Y.S. Zheng, T. Xie and J. Zhao	154
A Fine-Grained Access Control Approach for Parts Resource Sharing	
L. He and W.L. Sun	159
Research on Control System of Roll Forming Production Line with Fixed Mould and Moving Roll of Variable Cross-Section	
B.Y. Shi, Q. Li, Y.Z. Guan and S. Wang	164
The Application of Adaptive BP Neural Predictive Fuzzy Control in Cement Decomposing Furnace Temperature Control System	
S.W. Li, X. Duan and Z. Liu	173
Research on Automatic Detection System of Statistics in the Machining Error Analysis	
W.J. Li and M. Niu	178
Research on Control Strategy of Hydro-Viscous Driven Fan Cooling System	
L.G. Ma, C.L. Xiang, T.G. Zou and F.H. Mao	182
Research on Green Design Overall Technology of Electromechanical Products	
X.Y. Lou	190
Development and Application of Electromagnetic Module in Multi-Fields Automatic Simulation Platform for Integrated Circuit Devices	
R.F. Zhang, K. Zhang, R.C. Wang, J. Cheng and Y.J. Lu	194
The Design of Ultrasonic Ranging System Based on Single Chip Microcontroller and VB	
Y.K. Zu and M.J. Xu	198
Intelligent Fire-Fighting Robot	
H.M. Cheng, T.C. Yang and L. Li	204

Software Design and Implementation in Simulation of Manipulator Control System S.J. Jin and F. Yin	209
Based on a Microcontroller the Real-Time Control System Design of Manipulator of Multiple Degrees of Freedom R.Y. Duan and J.L. Yan	213
The Poultry Voice Classification Model Based on EMD and Support Vector Machine D.K. He, S.M. Zhang, G.H. Bi and R. Yu	217
Reliability Design of Control Circuit for Quartz Crystal Feeding System T. Yan, G.Q. Jin and Z.D. Wei	222
The Total Wave Force Sensor Design J.P. Qiao and N. Liu	226
Study on the Causes and Prevention Measures of Shrinkage Defects of Heavy V-Belt Pulley in the Production G.Q. Jin, T. Yan and C.F. Chen	231
Electric Effects on the Pre-Mixing Process in DBD Assisted Combustions C.H. Xu and L. Li	235
Study on the Efficiency of ISG Driving System for Hybrid Power Bus Y.C. Wang and D.A. Zhao	239
Design and Implementation of Software for Quartz Crystal Feeding System T. Yan, G.Q. Jin and Z.D. Wei	243
Research on Technologies about Fuzzy Environment Adaptability Design of Large Scale Wind Turbine T.Q. Ma, D.B. Sun, X.J. Yao and S.R. Wang	247
Application of Pro/Engineer in Mug Product Development and Mould Design F. Chen	254
Composite Controller Design for Rigid-Flexible Coupling Mechanical System S.Q. Liu, Q. Jia and H. Zhou	258
Model-Based Design of Line-of-Sight Control Systems K.F. Su, T.Q. Chang and L. Zhang	262
The Control System Design for a Feeding Machine in Farms J.J. Wang, H.F. Gao and L.Y. Cai	266
Transmission Ratio Optimization of Two-Speed Pure Electric Vehicle Z.Q. Tang, D.P. Ma and X.W. Gong	271
Study of Sub-Synchronous Interaction in Doubly-Fed Wind Power Systems T. Zhang, X.T. Wang and Y. Zhang	276
3d Geometric Model of Transparent Tower Equipment Display in OpenGL H.R. Yang, G.Z. Chen, H.Z. Wang and L. Li	281
Development of EDM Equipment for Machining Film Cooling Holes Z.Q. Wang, C.J. Li, H. Tong and Y. Li	285
Directional Transmission Based Optimization for the Hidden and Exposed Terminal Problems in Inter-Vehicular Communications Y.Q. Sun, T.C. Yang and Z. Qiao	291

Chapter 4: Measurement and Instrumentation, Monitoring Technologies, Recognition, Evaluation and Algorithms

Wireless Bridge Strain Data Acquisition System X.P. Guo	299
A Classification Model of Identifying Weeds Based on Chaotic Neural Network and the Empirical Mode Decomposition R. Yu, S.M. Zhang, G.H. Bi and L. Si	303
A Method to Establish 3-D Finite Element Geological Model Based on DEM Data M.Z. Guo, F.X. Zhao and Y.K. Wang	308
Safety Monitoring System Design Based on WIA-PA C.H. Xu	312
A Map Matching Algorithm Based on Fuzzy Logic L. Ma	316

A Novel Method of Cone Fitting Based on 3D Point Cloud J. Deng, G.H. Liu and L. Yue	321
Multi-View Registration Based on Triangle Constraint and Global Optimization R.H. Wang, H. Zhang, F. Xu and L. Yue	327
Decorrelation-Based Data Association Algorithm for Heterogeneous Sensors System Y.B. Kong, H.B. Wang, X.X. Feng, C.G. Lu, R.B. Ke and G.S. Chen	334
Research of Automatic Drawing Scheduling Network Method Based on Force-Directed J. Wu and Q.Q. Wang	338
3D Modeling of the Tower Head Based on ObjectARX H.R. Yang, G.Z. Chen, H.Z. Wang and L. Li	344
Estimation of Optical Amplifiers with Limited Information Based on Optoelectronic Equivalent Model M. Wen	348
Intelligent Monitoring of Key Sections in Public Transportation Y.W. Wu, Y.F. Wu, Z.F. Fu and S.Q. Qian	353
Evaluation of Cylindricity Geometrical Error Based on Calculational Geometry C. Wang and B.S. Xu	359
Fault Diagnosis of Large Rotors Based on Wavelet Packet Neural Network Y.J. Zheng, P. Liao, C.L. Qin and Y. Li	363
Non-Contact Measurement of Yarn Tension in Spinning Process X.L. Chen, S.Q. Mei and X.B. Chen	367
The Calibration Method of Three-Axis Magnetometer Based on Genetic Algorithm X.L. Pang, P. Jiang and C.S. Lin	373

Chapter 5: Solutions in Industrial Engineering, Technology and Management

Arterial Velocity Planning Based on Traffic Light Conditions for Driver Assist Driving System W. Song, X. Zhang, Y. Tian, X. Zhang and J.F. Song	381
Uncertain Linguistic Multi-Attribute Group Decision Making Method with Multi-Granularity Based on Projection and Dominance Degree E.D. Han and P. Guo	386
Simulation Research of E-Business Distribution Center Operation Based on Intelligent Robot J.T. Li, J. Zhu, Y.Y. Geng and B.J. Li	390
Thoughts on Improving Evaluation of Enterprise Employees' Performances J.K. Zhou	396
A Research on the Strategy-Oriented Management Process System of Local Party and Government Leaders' Environmental-Protection Performances Y. Huang and J.K. Zhou	400
Reflections on Improving Emission Reduction of Key Pollutants in Jingdezhen J. Huang and J.K. Zhou	405
Numerical Simulation of Forward Green Supply Chain S.Y. Jiang	409
Application of Fuzzy Safety Evaluation Method in Automobile Enterprises L. Wu, G. Chen, L. Wu and W.J. Zhang	413
Landslide Formation Mechanism and its Control Measures in Dabaolang P. Lv, B.Y. Li, Y. Zhang and Y.X. Zhang	419
A Research of Electromechanical Products Green Design Based on Voice of Customer X.Y. Lou	423
Research on Green Manufacturing Technology for Electromechanical Products X.Y. Lou	426
A Research on Complex Event Processing Technology Based on Smart Logistic System B.B. Fu and J. Zhu	430
Research on Submerged Logistics Carrying AGV Used in E-Commerce Distribution Center J.T. Li, H. Yuan and H.B. Zhang	436
