Preface and Conference Organization

Chapter 1: Structural Engineering and Materials, Civil Engineering

A Method of Multi-Failure Models Based on Response Surfaces Method-High Dimensional Model Representation on Structural Reliability Analysis L. Jia and F.C. Guan	3
A Symplectic Method for Dynamic Response of Structures W.H. Li and H.Y. Sun	7
Analysis of the Mechanical Properties of TC4-6061 Composite Plate Based on Classical Laminate Theory Q. Wang, L.L. Liang and C.N. Peng	12
Analysis on Segment Floating in the Construction of Large-Diameter Crossing-River Shield Tunnel R.L. Zhang, L.M. Tang and K. Tang	17
Damage Identification of Plane Truss Structure According to Square Difference in Elemental Modal Strain W.R. Liu, S.J. Du and L.M. Zhang	22
Existing Frame Structure Seismic Capability Based on the Theory of the Reliability Analysis Method for Basic Research L.T. Sun, Y. Bai, Y. Lu and T. Zhang	28
Failure Mode and Experimental Method Research for Bond-Slip of Cold-Formed Thin-Walled Steel and Foam Concrete Composite Member D.Z. Liu, F.Y. Wang, B. Li and Q. Wu	33
Features of Quality Control of Free of Cement Binder of Non-Hydration Type E.V. Voitovich, N.I. Kozhukhova, A.V. Cherevatova, I.V. Zhernovsky and M.S. Osadchaya	39
Finite Element Analysis of Larch Glum Columns Q. Wang, X. Feng and Z.Y. Liu	44
Full-Size Seismic Experiment Analysis on the Timber Structure in Rural Areas P.Q. Wang, Y.M. Dou, Y.T. Li and J.J. Zhang	48
Grouting Technique Applications during Housing Construction Q. Zhang, L. Li and Y. Mo	53
Instability of Sleeve Member with High and Ordinary Strength Steel Z.X. Bai, H.Y. Guan and M.F. Chen	57
Investigation into Corrosion Fatigue Life of Spherical-Headed Cylindrical Shell W.J. Xu, Q.X. Guo and X.T. Wang	63
Monolayer Cable-Stayed Steel Moment Resistant Frame and its Lateral Force Resisting Performance S.N. Lan and C.X. Li	68
Numerical Assessment on Edgewise Compressive Strength of Heavy Sandwich Fiberboard G.J. Hua, W.M. Fei, Z.S. Liao and Y. Xie	74
Numerical Simulation of Construction of Super-Large Deep Soft Soil Foundation Pits and Analysis of its Spatial and Temporal Effects X.Q. Wang and T.T. Sun	79
Pile Foundation <i>In Situ</i> Test in Seaside Soil-Squeezing Backfill Zone L.B. Liu, H.B. Li and Y.Q. Liu	84
Reinforced Concrete Tied Arch Hanging and Pull Synergistic Reinforcement Active Technology Research W. Duan, L.H. Chu and Y.C. Liu	88
Research on Lightweight Multi-Objective Optimization for Closed Body-in-White Structure C.Q. Wang, D.F. Wang and S. Zhang	93
Research on Stability of Overburden Structure around Longwall Mining Face in Steeply Dipping Seam Group S.G. Ren, Y.P. Wu and J.H. Yin	100

Research on the Deformation of the Steel Piles on the Soft Soil H.X. Zhou, P. Zhi and H.B. Zhou	111
Shear Wall Stability Computation and Analysis of Reinforced Concrete Frame-Shear Wall Structures J.F. Hou, S.Q. Su, B.B. Li and Y.X. Zou	117
Shearing Property Study on PC Box-Girder Bridge with Corrugated Webs L. Xie and G.J. He	121
Static and Dynamic Comparative Study on the Cardanic Transmission E. Avrigean	126
Story-Based Stability Analysis for Evaluating Story Buckling Load of Frames F.X. Jiao, X.Q. Gu and Z.W. Li	131
Study on the Impact of Crashworthiness Materials on the Crashworthiness Capacity of Double Hull Ship D. Li, H.B. Gui and J.H. Shi	139
The Influencing Factors' Identification and Analysis of Rockfill Dam Slope's Stability in Tailing Pond Based on RS and PCA F.L. Jiang, Z.G. Yang, G.H. Li, S.Y. Feng and B. Lei	144
The Key Issues and Considerations of Buckling Restrained Braces in Seismic Applications W.L. Wen, L.C. Zhou and Z. Tao	148
The Research of Similar Material and Dosage in Blasting Model Test H. Zhao, X.P. Li and Q. Dong	152
Theoretical and Experimental Model for the Analysis of a Cardan Cross E. Avrigean and M. Stetiu	156
Thermal Analysis of Concrete Structures with Pipe-Cooling System by a New Algorithm Y.P. Zhu, S.R. Feng, Q.C. Shi and J.A. Su	161
Wind Tunnel Experiment on the Wind Effects of Low-Rise Buildings in Rural Areas P.Q. Wang, Y.T. Li, Y.M. Dou and J.J. Zhang	166
Differential Settlement among Diaphragm Wall and Upright Column Piles Y.H. Chen, Y.C. Ma and H.Y. Ma	171
Analysis of Unsteady Seepage Behavior of Rumei High Core Wall Rockfill Dam by FEM Z.Z. Shen, L. Zhong and X.D. Chai	175
Optimization of Seepage Prevention Form of the Zhen'an Pumped Storage Power Station Z.Z. Shen, L. Zhang and L.Q. Xu	180
Research on Determination Loose Zone of Surrounding Rock in Highway Tunnel Y. Huang, J.S. Kou, H.B. Fang, M.L. Li and Y. Liang	185
Optimization Research on Geometric Parameters of Scallop-Shaped Lattice Shells N. Li, R.A. Chang, W. Zong and Q.H. Yu	192
An Evaluation System for Seismic Retrofitting Schemes of an Existing Building Using Energy Dissipation Device X.Q. Li and L. Liu	197

Chapter 2: Vibration Engineering and Noise, Analysis and Dynamics

Acceleration Data Acquisition and Analysis Method of Shaking Table Test S.F. Chai, P. Wang, Z.J. Wu, J. Wang and G.F. Che	205
Research on Characteristics of Special Nonlinear Vibration System S.Y. Liu, Q.C. Yang, S.J. Zhu and X.L. Wei	213
Research on Dynamic Characteristics of Bladed Disk System by Fixed Interface Prestressed-Free Interface CMS Super-Element Method L. Zhang, X. Li and T.J. Liu	218
Study on Spatial Nonlinear Vibration Characteristics of Cables with a Particular Constraint J.M. Liu and B.D. You	222
Study on Tower Vibration Characteristic of 3-Rotor HAWT System L.P. Lu, Y.P. Wang and Q.W. Huang	230
The Fault Diagnosis Method for Roller Bearing with Harmonic Wavelet Packet and DT-SVM R. Pan, T. Xu and Y. Liu	238

The Influence of Sag on Vibration Modal of Suspended Cable L.F. Zhang, X.H. Liu and B. Yan	242
The Mechanism of the Noise Transmission in the Carbody of High-Speed Trains J.Q. Guo, J.M. Ge, Z.J. Sun, X.J. Deng, S.Q. Liu and Y.J. Zhao	250
The Similar Relationship Research of the L-Type Eccentric Structure Model on Vibration Test A.J. Chen, X.M. Jiang and G.J. He	256
Using Multi-Agent System to Control the Radiation Noise in an Enclosure D.L. Chen and N. Chen	261
Vibration Characteristics of Non-Metal Flight Control Structures in Extremely High Temperature Environments D.F. Wu, Y. Pu, L. Shang, Y.W. Wang and J.L. Yang	265
Frequency Response Analysis of Damped Dual Mass Flywheel R. Zeng, Z.F. Jiang and X. Wan	271
Numerical Study on the Evolution of Force Chain inside Railway Ballast under Tamping Operation T.Y. Zhou, B. Hu, P. Xu and B. Yan	275
Research of the Vertical Vibrations of Tandem Mill Based on Wavelet Analysis C.H. Ren, X. Ma, Z.M. Li and Y.H. Ding	279
Research on Vibration Parameters of Tamping Operation T.Y. Zhou, B. Hu, Y.X. Peng and B. Yan	283
Application Analysis of Dynamic Pressure Damper in Hydraulic Systems X.Y. Mao, Y.F. Peng, C. Wu, J.H. Hu and H.Y. Ding	287

Chapter 3: Aerospace and Aircraft Engineering, Testing and Fault Diagnosis, Computational Methods

The Measure of Missile's Capture Performance Based on the Geometric Counts under HPM Damage L.S. Ran, S.H. He and D.W. Lu	297
Development of a Flight Simulation Test-Bed for a General Propeller-Driven Unmanned Aircraft B.M. Albaker, N.A. Rahim and A.H. Rasheed	303
Overall Solution of Comprehensive Evaluation for Missile Storage Life J. Gao, D.P. Huang and X.B. Li	307
The Method of Satellite Autonomous Orbit Determination Based on Star and Sun Sensor Wireless System J. Liu and X.G. Pan	312
Combination of Conflicting Evidence Based on Relative Entropy S. Wu and G.C. Chen	318
Hybrid Control for Markovian Neutral Systems with Distributed Delays Y.Z. Wang	323
A Test Method and Test Codes Generator for Improved HT Fault Model Based on NoC Y.Z. Zhang, Y.G. He, L.F. Yuan and M.X. Liu	327
A Instantaneous Availability Modelling Method for Repairable System D.Z. Kong and X.B. Li	334

Chapter 4: Disaster Prevention and Mitigation

Research of Influence Factors on Freeway Incident Detection Z.Y. Yang and G.Y. Yan	343
Risk Assessment of the Debris Flow Gully in Tibet Southeast J. Xu, Q. He, P.Q. Wang, L. Lu and D.D. Chen	347
Seismic Vulnerability Analysis of FRP Retrofitting Industrial Buildings J. Zhu, P. Tan and P.J. Chang	353
Strong Motion Observation from Recent Destructive Earthquakes in China Mainland D.W. Lu and Z.B. Yang	358

The Research of the Large Reservoirs Combined Forecasting and Scheduling System of Liaoning Province H. Liu and J.S. He	362
Construction of the Safety Risk Monitoring of Tailings Based on Big Data of Information Platform L.B. Zhao, W.D. Wang, A.S. Meng and B. Liang	368
Fuzzy Comprehensive Evaluation of Safety Culture in Coal Mining Enterprises C. Liu, J. Liu and J.X. Wang	373
Unmanned Aerial Vehicle Maritime Cruise Base Site Selection Strategy Research in the Bohai Sea L. Wei, Y.B. Li, J.H. Xu and X.X. Luo	378
