

Preface

The International Conference on Science, Engineering and Built Environment (ICSEBS) 2014 was held on 24th – 27th December 2014 at Sanur Paradise Hotel, Bali, Indonesia. ICSEBS 2014 was initially formed by a network of researchers, academicians, professionals and practitioners from academia and industry in the areas of Engineering, Science and Built Environment. These 3 disciplines are very related and important to the development of the green construction in the built environment.

In ecology, green development is how biological systems endure and remain diverse and productive. The idea of having this conference is to have conversation and knowledge sharing between Science, Engineering and Built Environment to produce an impactful contribution to the environment and community. These fields of knowledge should accommodate the environment and people's needs rather than purely academic or professional exercise.

With the context of engineering, science, green technology, political, economic, and socio-culture consideration, it is expected that researches and findings in the area of Science, Engineering and Built Environment can be more meaningful for the environment, community and profession they're serving.

Hence, the conference will be a venue to gather all expert, academician, practitioner, and researcher to enhance integration on the correlation between research, academics, people and cultural interaction. This conference should enhance the interaction between Universities, Government, Private Sectors and Non-Government Agencies to empower their contribution to the environment and communities for better world

ICSEBS 2014 includes a total of 148 high quality papers related to Green Science, Green Engineering and Green Built Environments fields. Last but not least, I would like to thank the members of the scientific committee of ICSEBS 2014 who did a wonderful work in reviewing the submitted papers, the members of the organizing committee and the authors for their contribution to the success of this international conference.
