## Preface and Committee

## Chapter 1: Metal and Alloy Materials and Technologies

|                                                                                                                                                                                                                                  |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Study of Surface Segregation Defect of 7075 Aluminum Alloy in Semi-Solid Squeeze Casting</b><br>N. Umudee, J. Wannasin, S. Janudom, R. Canyook, T. Plookphol and S. Wisutmethangoon                                           | 3  |
| <b>Effects of Solid Fractions in a Slurry Die Casting Process on Defects of 7075 Aluminum Alloy</b><br>W. Jumpol, J. Wannasin, S. Janudom, R. Canyook, T. Plookphol and S. Wisutmethangoon                                       | 7  |
| <b>Deposition and Characterization of CoCrAlY Coatings by Multi-Chamber Detonation Sprayer</b><br>M.G. Kovaleva, Y.N. Tyurin, N.J. Vasilik, O.V. Kolisnichenko, M.S. Prozorova, M.Y. Arsenenko, V.V. Sirota and I.A. Pavlenko    | 11 |
| <b>Properties and Peculiarities of WCCoCr Coatings Formed by Multi-Chamber Detonation Sprayer</b><br>Y.N. Tyurin, M.G. Kovaleva, N.J. Vasilik, O.V. Kolisnichenko, M.S. Prozorova, M.Y. Arsenenko, V.V. Sirota and I.A. Pavlenko | 17 |
| <b>Corrosion of Fe-2.25Cr-1.6W-0.1Mo Steels in Na<sub>2</sub>SO<sub>4</sub> Salts at 800 and 900°C</b><br>P. Yadav, S.H. Bak and D.B. Lee                                                                                        | 22 |
| <b>Corrosion of T92 Steels in Na<sub>2</sub>SO<sub>4</sub> Salts at 800 and 900°C</b><br>D.B. Lee                                                                                                                                | 26 |
| <b>The Simulation of the Electrolyte Temperature Effect on the Value Change of the Microhardness of Anodic Alumina Oxide Layers</b><br>L. Sobotova, M. Badida, J. Kmec, M. Gombar and D. Kucerka                                 | 30 |
| <b>Corrosion of SUS 310 Steels at 600-800°C in N<sub>2</sub>/H<sub>2</sub>O/H<sub>2</sub>S Gases</b><br>M.J. Kim and D.B. Lee                                                                                                    | 35 |
| <b>Stress Distribution Surrounding Endodontic Prefabricated Parallel Post</b><br>W.M.K. Helal and D.Y. Shi                                                                                                                       | 39 |
| <b>Effects of Magnesium Content on Ballistic Performance of Al-8Zn-SiC Composite after Heat Treatment Process</b><br>B.T. Sofyan, L. Aksari, A. Septiani and D. Rahmalina                                                        | 44 |
| <b>Mechanical Response of Aluminium Alloy AA6061 Butt-Welded Joints Subjected to Two Initial Tempers and Different Heat Treatments</b><br>A. Alisibramulisi, O.G. Lademo, O.R. Myhr and P.K. Larsen                              | 51 |
| <b>Finite Element Analysis of Stress and Strain Distribution in Gold Thin Film Deposited on Polycarbonate Substrate Subjected to Tension and Cooling</b><br>N. Tada and Y.F. Hu                                                  | 55 |
| <b>Improved Surface Integrity during End Milling AISI 316L Stainless Steel Using Heat Assisted Machining</b><br>A.U. Alkali, T.L. Ginta, A.M. Abdul-Rani and H. Fawad                                                            | 62 |

## Chapter 2: Advanced Materials Engineering, Technologies and Applications

|                                                                                                                                                                                  |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Effect of Physicochemical Parameters on Methylene Blue Adsorption by Sulfuric Acid Treated Spent Grated Coconut</b><br>K. Khalid, M.A.K.M. Hanafiah and W.K.A. Wan Mat Khalir | 71 |
| <b>Synthesis and Characterization of Gold Nanoparticles Grafted on Nanoporous Anodic Aluminum Oxide (AAO) Membrane</b><br>H. Yazid, N.Z. Nekhia, R. Adnan and A.M. Md Jani       | 77 |
| <b>Preparation and Characterization of Temperature-Sensitive 2-Hydroxy-3-Allyloxy Propyl Starch Ether</b><br>B.Z. Ju, W. Ma, H.L. Yuan and S.F. Zhang                            | 81 |

|                                                                                                                                                                                                                                                   |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Chemical Changes of Cement Caused by Aggressive Environment</b><br>R. Pernicová and D. Dobiáš                                                                                                                                                  | 86  |
| <b>Synthesis and Performances of Crosslinking Polymeric Dyes</b><br>B.T. Tang, W.T. Wang, J.J. Qiu, J. Huang and S.F. Zhang                                                                                                                       | 90  |
| <b>Synthesis of Ettringite</b><br>J. Gemrich, K. Jiroušková, K. Kulisek and R. Magrla                                                                                                                                                             | 98  |
| <b>Computational Study of Bone Tissue Mechanical Properties Dependence on Nanoscale Morphological Characteristics</b><br>A.S. Semenov, A.I. Grishchenko and B.E. Melnikov                                                                         | 103 |
| <b>Sintering Behavior and Microstructure Character of Magnesia Partially Stabilized Zirconia Ceramics</b><br>L. Jiang, S.Q. Guo, Y.Y. Bian, S. Chen, Y.L. Xu, Y.H. Liu and W.Z. Ding                                                              | 109 |
| <b>Study on Microstructural Properties of PAN/MnO<sub>2</sub> Nanofibers via Electrospinning Method</b><br>N. Yusof, I.E. Affandi, N. Abdullah, A.F. Ismail and J. Jaafar                                                                         | 113 |
| <b>Study about Stress-Strain Properties with Mini Specimen and Microstructure of Nuclear Fuel Element Cladding of Al-Alloy (98% Al + 1% Fe + 1% Ni) after Being Tempered at Temperatures between (100 – 650) °C</b><br>U. Sudjadi and M.H.A. Hasa | 119 |
| <b>Application of Finite Element Analysis to the Interface Decohesion of CFRP/SMA Composite</b><br>N.Y. Kim and S. Young                                                                                                                          | 125 |
| <b>Influence of Irradiation Doses on Mechanical Properties of Glass Fiber Filled PBT</b><br>P. Kratky, D. Manas, M. Manas, M. Stanek, M. Ovsik, V. Senkerik and J. Navratil                                                                       | 130 |
| <b>Influence of Irradiation Doses on Mechanical Properties of PA6</b><br>P. Kratky, D. Manas, M. Manas, M. Stanek, M. Ovsik, A. Skrobak and M. Reznicek                                                                                           | 136 |
| <b>Formulation of Nanofiltration Flat Sheet Membrane Using Cellulose from Kenaf Core</b><br>S. Abdullah, N.M. Abdullah and R. Mohd Tajuddin                                                                                                       | 142 |
| <b>Morphology-Controlled CaCO<sub>3</sub> Nanostructures by Modified Co-Precipitation in Pulsed Mode</b><br>M.M. Nassar, T.E. Farrag, M.S. Mahmoud and S. Abdelmonem                                                                              | 148 |
| <b>Formation of High Aspect Ratio Nanostructures Using Focused Ion Beam Induced Deposition of Carbon</b><br>O.A. Ageev, O.I. Ilin, A.S. Kolomyitsev, S.A. Lisitsyn, V.A. Smirnov and E.G. Zamburg                                                 | 154 |
| <b>Improvement of Surface Properties of Micro-Mold via SAM Coating for Fabrication of Microfluidic Device</b><br>B. Saha and J.H. Lee                                                                                                             | 159 |
| <b>Modelling of the Influence of a Pointed Field Emission Cathode Design from the Silicon Carbide with Graphene Film on the Electric Field Strength</b><br>A.M. Svetlichnyi, O.A. Ageev, E.Y. Volkov, I.L. Jityaev and M.V. Dem'yanenko           | 163 |
| <b>Anisotropic Wetting Behavior on Injection Molded Polypropylene Parts Inspired by Surface Structure of Moss</b><br>M. Boruvka                                                                                                                   | 168 |
| <b>Synthesis of Superhard Coatings Using Pulsed Beams of High-Energy Gas Molecules</b><br>S.N. Grigoriev and A.E. Seleznev                                                                                                                        | 172 |
| <b>Investigation of Optimal Silk Film Thickness in Silk Microneedle Fabrication</b><br>S. Jiruedee, W. Luangweera, B. Sookyu, K. Patoomvasna, A. Pimpin, C. Rattanasumawong, T. Palaga, S. Damrongsakkul and W. Srituravanich                     | 177 |
| <b>Strength Development of Fine Grained Mortar Containing Fly Ash and Rice Husk Ash</b><br>Z. Jamellodin, M.S. Hamidah, S.H. Adnan, N.S. Mohammad and W.Y. Wan Yusof                                                                              | 182 |
| <b>Microstructural Stability and Creep Behavior of Directionally Solidified MgAl<sub>2</sub>O<sub>4</sub>/Y<sub>3</sub>Al<sub>5</sub>O<sub>12</sub> Eutectic Composite</b><br>S. Abali                                                            | 189 |
| <b>Rutting Performance of Hot Mix Asphalt Mixture Using Nanopolyacrylate Polymer Modifier</b><br>E. Shaffie, J. Ahmad and D. Kamarun                                                                                                              | 194 |
| <b>The Liquid Condensation Conditions in the Dry Gas Seal System</b><br>A.L. Ma and P.Y. Song                                                                                                                                                     | 199 |
| <b>Effect of Si on the Thermal Stability of Ferritic Heat-Resistant Ductile Iron</b><br>K.H. Choe, K.W. Lee and M.H. Kim                                                                                                                          | 205 |

|                                                                                                                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Complex Formation of Polyacrylic Acid with Surfactants of Different Hydrophobicity</b><br>S. Tazhibayeva, K. Musabekov, Z. Kusainova, A. Sapieva and N. Musabekov                                       | 212 |
| <b>Polymer-Based Fluidic Devices Integrated with Perforated Conical Nanopores in Freestanding Polymer Membranes</b><br>J.S. Choi and S.G. Park                                                             | 217 |
| <b>Luminescence and Morphology Control of Phosphor Materials Synthesized by Melt Synthesis Method</b><br>K. Toda, T. Ishigaki, S. Kamei, S.W. Kim, K. Uematsu, M. Sato and M. Yoshimura                    | 221 |
| <b>Electret State in Composite Polymer Materials Based on Low Density Polyethylene and Polypropylene</b><br>Y. Gorokhovatsky and D. Temnov                                                                 | 225 |
| <b>Removal of Ammonia Nitrogen from Domestic Wastewater Using Vertical Aerated Limestone Filter</b><br>R. binti Hamdan, I.I. Ibrahim and A.N. Abdul Talib                                                  | 232 |
| <b>Magnetic Condition Flat Core/Shell Nanoparticles</b><br>L. Afremov and A. Elovskii                                                                                                                      | 238 |
| <b>“Average Spin” Approximation in the Heisenberg Model</b><br>L.L. Afremov and A.A. Petrov                                                                                                                | 243 |
| <b>Formation of Tobermorite at Different Materials Composition of Aerated Concrete</b><br>E. Venhodová, R. Janovský and R. Drochytka                                                                       | 247 |
| <b>Methylene Blue Adsorption onto NaOH Treated <i>Leucaena leucocephala</i> Leaf Power</b><br>M.A.K.M. Hanafiah, N.F. Mansur, W.M.N. Wan Ab Rahman and M. Ismail                                           | 251 |
| <b>Modified Vermiculites Study by Various Physicochemical Methods</b><br>N.P. Shapkin, V.I. Razov, I.G. Khalchenko, V.I. Mayorov, A.L. Shkuratov, V.O. Trukhin and V.V. Kotochentsev                       | 257 |
| <b>Residual Stress Effects on Fatigue Crack Growth in Directionally Solidified YAG/Spinel Eutectics</b><br>S. Abali                                                                                        | 263 |
| <b>Designing of Details Taking into Account Degradation of Structural Ceramics at Exploitation</b><br>V.V. Kuzin, S.N. Grigoriev, M. Volosova and M. Fedorov                                               | 268 |
| <b>Structural and Optical Analysis of Eu<sup>3+</sup> Doped BiVO<sub>4</sub> Nanophosphor by Combustion Method</b><br>R.S. Yadav, Y. Dwivedi and S.B. Rai                                                  | 272 |
| <b>Study of the pH Effects on the Phosphorus Removal Mechanism in Lab-Scale Electric Arc Furnace Slag and Limestone Filters in Synthetic Wastewater</b><br>W.A. Wan-Mohamed, R. binti Hamdan and N. Othman | 277 |

### Chapter 3: Material Testing, Analysis and Processing Technology

|                                                                                                                                                                   |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Impact of Electrode Wire Feed Ways on Residual Stresses in Welded Joints</b><br>A.V. Kryukov and N. Pavlov                                                     | 285 |
| <b>Experimental Characterization of Multiaxial Glass Laminates for Front End Cab</b><br>L. Fojtl, S. Rusnáková, M. Žaludek and V. Rusnák                          | 291 |
| <b>The Effect of Alkali Silica Gel Formation from Alkali Silica Reaction in Mesoscopic Scale</b><br>M. Tabet and A. Guettala                                      | 295 |
| <b>Effect of Particle Size of Recycled Polyamide 6 to Impact Toughness and Hardness</b><br>V. Senkerik, M. Stanek, D. Manas, M. Manas, A. Skrobak and J. Navratil | 300 |
| <b>Influence of Recycled Particle Size to Tensile Properties of Polyamide 6</b><br>V. Senkerik, M. Stanek, D. Manas, M. Manas, A. Skrobak and J. Navratil         | 304 |

| <b>Enhancement the Maneuverability of Tele-Hydraulic System Using Fuzzy Friction Compensator</b><br>W. Po-Ngaen and J. Maka                                         | 995  |
| <b>The Design of Pneumatic Visual Servo Positioning System</b><br>L.K. Zhu, D. Zhao, W. Ji and Y. Chen                                                              | 1000 |
| <b>Automated Car Parking Authentication System Using NFC and Public Key Cryptography Based on Android Phone</b><br>P. Subpratatsavee, W. Sriboon and W. Issavasopon | 1006 |
| <b>Low Cost Mobile Robot Kits Design as a Teaching Tool for Education and Research</b><br>C. Chomyim, S. Chaisanit and A. Trangansri                                | 1010 |
| <b>Development of Foot Modules of an Exoskeleton Equipped with Multiple Sensors for Detecting Walking Phase and Intent</b><br>B.J. Son, Y.S. Baek and J.H. Kim      | 1016 |
| <b>Development of Exoskeleton 4-Bar Linkage Gripper for Front End Module (FEM) Assembly Process</b><br>M.H. Shim and J.H. Kim                                       | 1022 |

## **Chapter 7: Measurement, Monitoring and Detection, Identification and Advanced Systems**

|                                                                                                                                                                                                                |      |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>A Study on Structural System Identification and Damage Detection for Free Vibration Response Using the Wavelet Transform</b><br>A. Sahekhaini, P. Muhamad, M. Kohiyama, A. Abu, L. Kee Quen and H. Abdullah | 1029 |
| <b>Analysis of Ground Massif Temperatures with Slinky Horizontal Heat Exchanger</b><br>M. Šedřová, P. Neuberger and R. Adamovský                                                                               | 1035 |
| <b>Reliability of Identification Based on Fingerprints in Dual Biometric Identification Systems</b><br>V. Nídllová and J. Hart                                                                                 | 1040 |
| <b>Weld Detect Identification Using Texture Features and Dynamic Time Warping</b><br>H. Yazid, H. Arof, H. Yazid and N. Abd Razak                                                                              | 1045 |
| <b>A Co-Simulation Analysis of Hydraulic Pitch Control System in Large Wind Turbine</b><br>M.H. Chiang, C.S. Wang, C.C. Huang, W.N. Su and T.C. Tung                                                           | 1051 |

|                                                                                                                             |      |
|-----------------------------------------------------------------------------------------------------------------------------|------|
| <b>A Design and Implementation of Attendance System Using Smallest Wireless Fingerprint with Arduino Yún Embedded Board</b> |      |
| P. Subpratatsavee and N. Pubpruankun                                                                                        | 1057 |
| <b>Home Patient Sensor and Monitor System Using iPhone</b>                                                                  |      |
| P. Subpratatsavee and T. Promjun                                                                                            | 1062 |
| <b>Employee Attendance Checker in Manufacturing Using Barcode and Mobile with Embedded Camera</b>                           |      |
| P. Subpratatsavee and T. Kongtrakul                                                                                         | 1066 |
| <b>HC2D Barcode for Handwritings Verification Using Embedded Camera on Tablet</b>                                           |      |
| P. Subpratatsavee and W. Sakulsaknimit                                                                                      | 1069 |
| <b>Design and Analysis of the Oxygen Regulator in the Aircraft</b>                                                          |      |
| Y.J. Zhao and H.X. Wu                                                                                                       | 1073 |

## **Chapter 8: Communication, Graphic and Image Processing, Information Technologies Applications**

|                                                                                                                      |      |
|----------------------------------------------------------------------------------------------------------------------|------|
| <b>3D Mosaic from Images</b>                                                                                         |      |
| J.H. Park                                                                                                            | 1081 |
| <b>Object Movement Computation from Two Images</b>                                                                   |      |
| J.H. Park and S.H. Park                                                                                              | 1085 |
| <b>The Pattern Based Visual Property Specification Language and Supporting System for Software Verifications</b>     |      |
| S.S. Chun                                                                                                            | 1090 |
| <b>Effective Extraction of State Invariant for Software Verification</b>                                             |      |
| S.S. Chun                                                                                                            | 1097 |
| <b>Management of Eastern Farmers Association Community Radio and Ban Huakrok Community Radio, Chon Buri Province</b> |      |
| P. Prompitak                                                                                                         | 1105 |
| <b>Hybrid Distributed Correlation Noise Model and Parameter Estimation</b>                                           |      |
| R. Cai and D.Y. Zhang                                                                                                | 1110 |
| <b>Raising Energy Awareness through 3D Computer Animation</b>                                                        |      |
| C. Prayoonrat                                                                                                        | 1116 |
| <b>Prediction of Indoor Millimeter Wave Propagation Characteristics Based on BP Neural Network</b>                   |      |
| Z.Y. Sun and H.H. Li                                                                                                 | 1121 |

## **Chapter 9: Energy Control and Power Systems, Electrical and Electronic Engineering**

|                                                                                                                                                |      |
|------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>An Outage of Overhead and Underground Distribution Network Evaluation Assessment</b>                                                        |      |
| P.U. Okorie                                                                                                                                    | 1127 |
| <b>The Measurement of the Voltage Distribution along High Voltage Suspension Porcelain (5-6-7 Insulator)/String in Case of Clean Condition</b> |      |
| N. Tonmitr, E. Kaneko, K. Tonmitr, A. Kaewrawang and A. Suksri                                                                                 | 1133 |
| <b>Research and Establishment of UHV AC Transmission Model</b>                                                                                 |      |
| H. Yang and F. Tang                                                                                                                            | 1139 |
| <b>Reliability Evaluation of Optical Fiber Protection Channels Based on Practical Coding and Logical Calculation</b>                           |      |
| B.W. Fang, D.C. Liu, B. Wang, X.L. Ye, J. Jia and C.Z. Bian                                                                                    | 1146 |
| <b>Thermodynamic Approach for Identifying Oxidative Processes Insulation Breakdown</b>                                                         |      |
| M.N. Dubyago, I.A. Poluyanovich and N.K. Poluyanovich                                                                                          | 1153 |
| <b>Performance Verification of Power Quality Signals Classification System</b>                                                                 |      |
| A.R. Abdullah, N.A. Abidullah, N.H. Shamsudin, N.H.H. Ahmad and M.H. Jopri                                                                     | 1158 |
| <b>Comparison of Open and Short-Circuit Switches Faults Voltage Source Inverter (VSI) Analysis Using Time-Frequency Distributions</b>          |      |
| M. Manap, N.S. Ahmad, A. Rahim Abdullah and N. Bahari                                                                                          | 1164 |

|                                                                                                                                                                                                                |      |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>Transient Instantaneous Voltage Sag of Distributed Generation Bus in Muangxay Substation, Oudomxay Province, Laos</b><br>K. Phothilath, K. Tonmitr and P. Artrit                                            | 1170 |
| <b>Experimental Comparison between CAV Control and CO<sub>2</sub> Ventilation Control Approaches with Respect to Energy Saving of Air Conditioner</b><br>S. Panyavee, J. Khedari, S. Wisitsak and J. Hirunlabh | 1175 |
| <b>Long Term Accumulation Storages and their Structure</b><br>V. Sipkova, J. Labudek and S. Korbelova                                                                                                          | 1183 |
| <b>Experimental Measurement of the CO<sub>2</sub> Content in a Passive Home during a Simulated Air-Conditioning Power Outage</b><br>Z. Galda, J. Labudek and V. Sipkova                                        | 1187 |
| <b>The Designing of Data Acquisition Card through PIC18F4550 and an Interface Study</b><br>H. Terzioğlu, S. Herdem and G. Bal                                                                                  | 1191 |

## **Chapter 10: Disaster Prevention and Mitigation Technology, Environmental Protection and Safety Management**

|                                                                                                                                                                                         |      |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>Analyse of Agricultural Soil Heavy Metals Pollution</b><br>R. Kralikova and M. Andrejiová                                                                                            | 1201 |
| <b>Investigation and Analysis of International Roughness Index at National Freeway in Taiwan</b><br>J.D. Lin, P.H. Sung, M.C. Ho and C.J. Shen                                          | 1206 |
| <b>CO<sub>2</sub>-Brine Displacement in Geological CO<sub>2</sub> Sequestration: Microfluidic Flow Model Study</b><br>S.C. Cao, J.W. Jung and J.W. Hu                                   | 1210 |
| <b>Project Acquaponia - Designing Sustainable Equipment for Treating Gray School Waters for Irrigation and Food Growing</b><br>R.V. Uribe, R.V. León, A.S. Ortega and M.Á. Rubio Toledo | 1214 |
| <b>Revisiting the Reliability Assessment of Frame Constructions of Industrial Building</b><br>T. Zolina and P. Sadchikov                                                                | 1218 |
| <b>Analysis on Current State on Safety Education of Korean Construction Sites in Overseas</b><br>Y.S. Shin and G.H. Kim                                                                 | 1224 |
| <b>Study on Spending for Safety Management Cost in Korean Construction Sites</b><br>Y.S. Shin and G.H. Kim                                                                              | 1228 |
| <b>A Comparative Study on the Noise between Floors of Apartment and Multiplex Housing</b><br>J.H. Kim and Y.S. Shin                                                                     | 1232 |
| <b>The Experimental Research on Horizontal Underground Tank Magnetic Flux Leakage Testing</b><br>M.L. Zheng, Z.W. Ling, M. Wang, S. Kong and W.C. Guo                                   | 1236 |
| <b>A Safety Management Method Based on Job Stress Analysis for Foreign Construction Laborers in Korea</b><br>Y.S. Shin                                                                  | 1240 |
| <b>A Method of Section Replacement for Pile-Bent Pier Rehabilitation</b><br>A. Srikongsri and A. Sopapun                                                                                | 1244 |
| <b>RFID Tag Anti-Collision Security Study and Evaluation</b><br>L. Wang                                                                                                                 | 1250 |
| <b>Influence of Connection Lane on the Left of Running Lane on Intersection in Ostrava-Petrkovice</b><br>J. Petru, I. Mahdalova, V. Krivda and M. Kludka                                | 1257 |
| <b>Analysis of Baffle Effect for Measuring Transmission Loss</b><br>H. Abdullah, A. Abu, P. Muhamad, A. Sahekhaini and L.K. Quen                                                        | 1263 |
| <b>Simulation of Tsunami Wave Generated by Submarine Slide: Generation, Propagation, Run-Up and Impact</b><br>V.N.P. Huan and I.S.H. Harahap                                            | 1269 |
| <b>Simulating Migration Properties of Aquifer Disposal of CO<sub>2</sub> in Western Taiwan Basin</b><br>C.H. Tseng, W.C. Su, C.C. Kuo and C.L. Lai                                      | 1275 |

## Chapter 11: Industrial Engineering, Production Quality and Management

|                                                                                                                                                                                                |      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
