

Preface

In order to promote the academic exchanges and technical communication of the research in the field of fluid power transmission and control, fluid control engineering specialized committee of the Chinese Society of Theoretical and Applied Mechanics held the 17th Conference of Hydrodynamic and Electromechanical Control Engineering on July 27 – 29, 2014 in Tibet, Lhasa city. The meeting was undertaken by the Chongqing University of Technology, and jointly organized by Harbin Institute of Technology, Yanshan University, Kunming University of Science and Technology, etc.. It aims to provide a platform for researchers, engineers and scholars to exchange new technique and new research of fluid power transmission and control field.
