Preface, Committees and Partners

Chapter 1: Theoretical Modeling in Damage Mechanics

Complex Damage Variables in Continuum Damage Mechanics	3
G.Z. Voyatzidis and P.I. Kattan	
Using of Anisotropic Continuum Damage Mechanics to Describe Yield Surface Distortion	11
A. Nayebi and H. Rokhgireh	
A Creep Damage Model for Rock Mass Based on Internal Variable Theory	19
Y.R. Liu, L. Zhang and Q. Yang	
Phenomenological Modelling of Impact Toughness Transition Behaviour	27
S. Münstermann, P. Kucharczyk, G. Golisch and B. Döbereiner	
Modeling of Stress-State-Dependent Damage and Failure of Ductile Metals	35
M. Brünig, D. Brenner and S. Gerke	
Radiation Induced Damage in Ductile Materials Subjected to Time-Dependent Stresses	43
B. Skoczeń and A. Ustrzycka	
Damage Theory Based Fatigue Simulation of Concrete Structure	51
J.S. Liang and J. Li	
On the Use of the Generalized Eigenstrain Method in the Modeling of Coupling between Damage and Corrosion	59
B. Panicaud	
Elastoplastic and Damage Analysis of Trusses Subjected to Cyclic Loading	68
D. Šumarac and Z. Perović	
Elastostatic Fields of an Embedded Circular Rigid Nano/Micro-Fiber with Interfacial Damage in Anti-Plane Couple Stress Elasticity	80
B. Hashemian, H.M. Shodja and A. Goodarzi	
Multi-Phase Modelling of Concrete Affected by Sulfate Attack	86
N. Cefis and C. Comi	
Analysis of Casting Materials under Thermal Fatigue	95
H. Altenbach, F. Laengler, K. Naumenko and M. Ievdokymov	
Numerical Analysis of Laminated Veneer Lumber Panels in Fire	104
V.D. Thi, M. Khelifa, M. El Ganaoui and Y. Rogaume	
Cohesive Zone Damage-Healing Model for Self-Healing Materials	111
R.K. Abu Al-Rub and A. Alsheghri	
Microstructural Modeling of Dual Phase Steel Using a Higher-Order Gradient Plasticity-Damage Model	119
R.K. Abu Al-Rub, N.H. Abid, M. Ettehad and A.N. Palazotto	
Comparison of Crack-Width Prediction Models for Steel-Reinforced Concrete Structures	129
H. Tran, C.Q. Li and S. Setunge	
Constitutive Model for Timber Fracture under Tensile and Shear Loads	137
E. Smidova and P. Kabele	
Asymptotic Self-Similar Solution of the Creep Crack Problems in Damaged Materials under Mixed Mode Loading	145
L. Stepanova, E. Yakovleva and E. Mironova	
Advanced Anisotropic Damage Model Fully Coupled with Anisotropic Plasticity	153
H. Badreddine and K. Saanouni	
Continuum Model of Deformation of Piezoelectric Materials with Cracks	161
D. Babich, O. Bezverkhyy and T. Dorodnykh	
Brittle Damage in Initially Anisotropic Materials: A Model Accounting for the Induced Anisotropy and Unilateral Effects	173
H. Welemane, C. Goidescu, D. Kondo, O. Pantalé and M. Karama	
Damage Accumulation and Fracture of Weld Joints under Low-Cyclic Loading Conditions	179
V.M. Kornev	

Chapter 2: Numerical Simulations in Damage Mechanics

Recent Advances in Simulating Failure Evolution with the Material Point Method	193
Z. Chen and X. Zhang	
A Micro-Cell Size Dependent Damage Law of Concrete	200
S.X. Liang, X.D. Ren and J. Li	
Damage Index Proposals Applied to Quasi-Fragile Materials Simulated Using the Lattice Discrete Element Method	209
R.S. Rodrigues, G. Birck and I. Iturrioz	
Different Numerical Time Integration Schemes for Elastoplasticity Coupled to Anisotropic Damage	217
M. Fassin, S. Wulffinghoff and S. Reese	
Failure Surface Variation Obtained with the Truss-Like Discrete Element Method	225
G. Schumacher da Silva, F. Goulart Fernandes, A. Bordin Colpo, V.B. Puglia and L.E. Kosteski	
Micromechanical Damage Simulation to Obtain Effect of Coarse Grains Distribution on Mechanical Properties of Bimodal AL Using 2D XFEM	233
H. Hosseini-Toudeshky and M. Jamalian	
Mathematical and Numerical Modelling of Large Axisymmetric Creep Strains and Damage	241
K. Szuwalski and A. Ustrzycka	
Heterogeneous Lattice Model Based Simulation of Concrete under Uniaxial Loading	249
X.H. Yan, X.D. Ren and J. Li	
Impact Failure Analysis of RC Beam Using ASPH Method Based on Damage Theory	258
Y. Sonoda	
Coupled Damage-Plasticity Modelling of Ductile Failure in an Aluminium Alloy	266
G.D. Nguyen, A.M. Korsunsky and J. Belnoue	
Recent Developments in Modelling of Progressive Damage in Fibre-Reinforced Composites	274
B.Y. Chen and T.E. Tay	
Adaptive Zooming Method for the Simulation of Quasi-Brittle Materials	284
A. Llau, L. Jason, J. Baroth and F. Dufour	
Comparison of Two Time-Integration Algorithms for an Anisotropic Damage Model Coupled with Plasticity	292
S. Wulffinghoff, M. Fassin and S. Reese	
Parameter Identification of a Damage Model for the Lifetime Prediction of Adhesively Bonded Joints	300
U. Kroll and A. Matzenmiller	
Prediction of Low Cycle Fatigue Life Using Cycles Jumping Integration Scheme	308
C. Labergere, K. Saanouni, Z.D. Sun, M.A. Dhifallah, Y. Li and J.L. Duval	
Nonlocal Continuum Damage Mechanics Approach of a Discrete Axial Chain under Non-Uniform Axial Load	317
B. Herisson, V. Picandet, N. Challamel and A. Perrot	
From Damage to Fracture, a Modelization Based on Moving Discontinuities and Layers	325
C. Stolz	
Variational Approach to Dynamic Brittle Fracture via Gradient Damage Models	334
T.Y. Li, J.J. Marigo, D. Guilbaud and S. Potapov	
Fast Plastic Integration Algorithm for Damage Prediction in Forming Process Simulations	342
A. Halouani, Y.M. Li, B. Abbès and Y.Q. Guo	
Stochastic Continuum Damage Mechanics Using Spring Lattice Models	350
S. Kale, S. Koric and M. Ostoja-Starzewski	

Chapter 3: Engineering Application

Influence of Residual Stresses on the Damage of Composite Laminates under Tensile Loading	361
Z.M. Wen and X.L. Gong	

Effect of Crack Closure Parameter and Negative Triaxiality on Damage Growth in Upsetting Problem	369
M. Kumar and P.M. Dixit	
Using Acoustic Emission Monitoring to Observe the De-Bonding Behavior of Rebar in Cyclic Pull-Out Tests	377
K.C. Pei and Y.C. Kan	
A Study on the Collapse Mechanism of High Strength Concrete Columns Apply to Fiber-Cocktail	385
K.S. Kwon, H.Y. Kim, S.U. Chae and B.Y. Cho	
Experimental Study on Horizontal Shear Crack Control of Prestressed Corrugated Composite Beams	391
S.U. Chae, B.Y. Cho, O.S. Kweon and H.Y. Kim	
A Study on the Microstructure of Welded Structural Steel Members at High Temperature	397
B.Y. Cho, H.Y. Kim, S.C. Yang and S.U. Chae	
Influence of the Stress State on the Predictability of the Failure Probability in the Beremin Model	403
G. Golisch, S. Münstermann and W. Bleck	
Modelling of Chip Breakage in Machining Process with Damage Mechanics Model	411
B. Wu, Y.L. Yan and S. Münstermann	
FE Analysis of Flexural Behavior of Externally Bonded CFRP Reinforced Timber Beams	419
M. Khelifa and V.D. Thi	
Development of Unified Viscoplastic-Damage Model for Crashworthiness Analysis of Boron Steel Safety Components with Tailored Microstructures	427
N. Li, J.G. Lin and T.A. Dean	
Validation of Micro-Meso Electrical Relations for Laminates with Varying Anisotropy	435
L. Selvakumaran and G. Lubineau	
Probabilistic Weibull Methodology for Fracture Prediction of Brittle and Ductile Materials	443
M. Muñiz-Calvente, A. Fernández Canteli, V. Shlyannikov and E. Castillo	
Comparison of Conventional Mechanical Testing with Innovative Techniques for Determination of Mechanical Properties of Nuclear Power Plant Components Materials	452
J. Štefan, R. Kopřiva, I. Eliášová and J. Siegl	
Strain-Based Continuum Damage Mechanics Model for Predicting FLC of AA5754 under Warm Forming Conditions	460
M. Mohamed, Z. Shi, J.G. Lin, T. Dean and J. Dear	
Statistical Laws of Dynamic Fragmentation of ZrO₂ Ceramics	468
M. Davydova, S. Uvarov and V. Chudinov	
In Situ Dynamic Experiments and Modeling in Multiscale Kinetics of Damage-Failure Transition	476
O. Naimark	
Application of a Local Continuum Damage Model to Porous TRIP-Steel	484
A. Seupel and M. Kuna	
On the Failure Mechanisms in Reactor Pressure Vessel with Austenitic Cladding	492
J. Štefan, J. Siegl, M. Kytká and M. Brumovský	
Evaluation of Cumulative Damage of RC Members under Repeated Impact Loading	500
H. Tamai and Y. Sonoda	
Effect of Freeze-Thaw Cycles on Mechanical Behaviors of Ceramsite Concrete under Impact Loading	508
J.Y. Chen, X. Qiu, G.Y. Shi, B.F. Chen and X.S. Huang	
Influence of Specimen Geometry on Strain Localization Phenomena in Steel Sheets	514
C. Bao, M. François and L. Le Joncour
