

Table of Contents

Preface, Committees and Acknowledgements

Chapter 1: Assembly

Tolerances and Measuring Strategies in the Virtual Process Chain for Spot Welded Structures; Substitute Modeling and Automating the Calibration Procedure P. Ackert, C. Schwarz, R. Mauermann and D. Landgrebe	3
Electrolyte Filling of Large-Scale Lithium-Ion Batteries: Challenges for Production Technology and Possible Approaches T. Knoche and G. Reinhart	11
Process to Increase the Output of Z-Folded Separators for the Manufacturing of Lithium-Ion Batteries R. Schröder, A. Glodde, M. Aydemir and G. Bach	19
Analysis of the System Handling Using Methods of Structural Complexity Management J. Schmalz, L. Kiefer and F. Behncke	27
Cognitive Self-Optimization in Industrial Assembly E. Permin, M. Hoffmann, F. Bertelsmeier, S. Haag, T. Detert and R.H. Schmitt	35
Concept for Assessment of Manual-Assembly Technologies C.F. Herder and J.C. Aurich	43

Chapter 2: Forming

Evaluation of Different Influencing Factors in Dry Sheet Metal Forming with Vaporizing CO₂ Used as Lubricant M. Singer and M. Liewald	53
Analysis of Drawbead Behaviour for Sandwich Sheets in Sheet Forming Simulation S.P. Li, A. Güner and A.E. Tekkaya	59
Improvement of Formability in Single Point Incremental Forming of DP 1000 Steel by Induction Heating A. Al-Obaidi, V. Kräusel and D. Landgrebe	67
Validation of the FEA of a Sheet Metal Forming Process of Composite Material and Steel Foil in Sandwich Design N. Grbic, A. Bouguecha, M. Vucetic, A. Neumann, T. Osiecki and B.A. Behrens	75
Analysis of Effectiveness of Locally Adapted Tribological Conditions for Improving Product Quality in Sheet-Bulk Metal Forming M. Löffler, D. Groebel, U. Engel, K. Andreas and M. Merklein	81
Superimposed Oscillating and Non-Oscillating Ring Compression Tests for Sheet-Bulk Metal Forming Technology S. Koch, M. Vucetic, S. Hübner, A. Bouguecha and B.A. Behrens	89
Optimization of Cooling and Lubrication for Nitrided and Ceramic-Coated Hot Forging Dies J. Puppa and B.A. Behrens	97
Batch Fluctuations in Short Cycle Stretch Forming of Tinplate can Bodies M. Schneider and M. Liewald	105
Design Approach for Roll Forming of Profiles with Integrated Electrical Conductors A. Duschka and P. Groche	112
Evaluation of Modular Roll-Setup to Roll Grooves into Steel Sheets S. Senge and G. Hirt	120
Development and Experimental Verification of a New Roller-Coining Setup to Texture Flat and Curved Surfaces A. Szurdak and G. Hirt	128
Measurement of Rings via Image Processing during and after Radial-Axial Ring Rolling S. Husmann, T. Husmann and H. Meier	136

New Process Strategies to Manufacture Tailored Blanks out of DP600 by Orbital Forming P. Hildenbrand, R. Schulte and M. Merklein	144
Severe Plastic Deformation and Incremental Forming for Magnetic Hardening L. Wießner, T. Gröb, E. Bruder, P. Groche and C. Müller	152
Hollow Lateral Extrusion of Tubular Billets – Further Development of the Cold Forging Process J. Wälder and M. Liewald	160
Influencing the Gradient of Material Properties by Gradation Extrusion M. Bergmann, A. Sterzing and D. Landgrebe	166
2D-CFD Analysis of the Fluid Pressure and Velocity Distribution of Experimentally Machine Hammer Peened Surface Structures in Hydrodynamic Applications D. Trauth, M. Terhorst, P. Mattfeld and F. Klocke	174
Process Window for the Embedding of Eccentric Steel-Reinforcing Elements in the Discontinuous Composite Extrusion Process C. Dahnke, A. Foydl, E. Levin, M. Haase and A.E. Tekkaya	182
Determination of Forming Limit Diagrams for Thin Foil Materials Based on Scaled Nakajima Test S. Veenaas, G. Behrens, K. Kröger and F. Vollertsen	190

Chapter 3: Cutting and Finishing Operations

Influence on Surface Quality in Milling of Green Stage Zirconia for Dental Products V. Dejkun, S. Dietz and E. Abele	201
Process Forces and Groove Development in Single Grain Scratch Tests of Concrete and Reinforced Concrete M. Kansteiner, M. Kipp, S. Herbrandt, M. Ferreira and D. Biermann	207
Analysis of the Influence of Superfinishing on the Surface Topography of Ground Cemented Carbide Rods T. Bathe and D. Biermann	215
Blanking of Unidirectional Carbon Fibre Reinforced Plastics A. Shirobokov, S. Kerchnawe, M. Terhorst, P. Mattfeld and F. Klocke	223
Influence of Tool Specification and Machining Parameters on the Wear Behaviour at Generating Gear Grinding M. Ophey, C. Löpenhaus and F. Klocke	231
Component Distortion due to a Broaching Process F. Bejnoud, F. Zanger and V. Schulze	239
Simulation of Cylinder Deformations during Honing of Thermally Coated Running Surfaces in Crankcases S. Kreter, S. Schweickert and B. Karpuschewski	247
Characterization of CO₂ Snow Generation to Increase the Blasting Performance M. Kretzschmar, E.M. Baira and E. Uhlmann	255
Electrolytes for Sustainable Laser-Chemical Machining of Titanium, Stellite 21 and Tool Steel X110CrMoV8-2 O. Hauser, S. Mehrafsun and F. Vollertsen	262
Force Controlled Grinding of Ceramic Materials T. Dörgeloh, L. Schönnemann, C. Flosky and E. Brinksmeier	270
Comparison of Conventional and Dry Electrical Discharge Machining T.M. Schimmelpfennig, I. Perfilov, J. Streckenbach and E. Uhlmann	278
The Lubrication Properties of Microbial Cells and their Biopolymers M. Redetzky, A. Rabenstein, B. Seidel and E. Brinksmeier	285

Chapter 4: Joining

Joining Aluminium Alloy and Mild Steel Sheets by Roller Clinching M. Hiller and W. Volk	295
---	-----

FE-Based Study of the Cutting Operation within Joining by Forming of Dissimilar Materials Using Shear-Clinching Technology M. Müller, R. Hörhold, G. Meschut and M. Merklein	304
The Hybrid RTM Process Chain: Automated Insertion of Load Introducing Elements during Subpreform Assembling F. Ballier, J. Schwennen, J. Berkmann and J. Fleischer	312
A Comprehensive Study on the Automation Potentials and Complexities of Advanced and Alternative Die-Attach Technologies for Power Electronic Applications A. Syed-Khaja, C. Kaestle, M. Mueller and J. Franke	320

Chapter 5: Machine Tools

Analysis of Chatter Vibration and Tool Deflection in Milling with a Novel Active Machine Tool Guide F. Flöter and B. Denkena	331
CNC Tool Path Generation on Multi-Core Processors B. Kaiser, M. Keinert, A. Lechler and A. Verl	339
Approach for Manufacturer Independent Automated Machine Tool Control Software Test K. Kübler, A. Neyrinck, J. Schlechtendahl, A. Lechler and A. Verl	347
Intelligent Configuration of Condition Monitoring Algorithms A. Laghmouchi, E. Hohwieler, C. Geisert and E. Uhlmann	355
Innovative Simulation Technology for Real-Time Calculation of the Thermo-Elastic Behaviour of Machine Tools in Motion M. Beitelschmidt, A. Galant, K. Großmann and B. Kauschinger	363
Variance-Based Sensitivity Analysis for the Design of Thermal Systems J. Regel, V. Wittstock and M. Putz	371
Uncertain Parameters in Thermal Machine-Tool Models and Methods to Design their Metrological Adjustment Process B. Kauschinger and S. Schroeder	379
Challenges in the Development of a Generalized Approach for the Structure Model Based Correction X. Thiem, B. Kauschinger, A. Mühl and K. Großmann	387
Compensation of Geometric Errors Using a Highly Integrated Hydraulic Feed Axis B. Klee, J. Bauer, D. Graule, D. Brenner and J. Fleischer	395
Media, Data and Energy Transmission in Machine Tool Spindles: An FE Analysis of Implementation Possibilities V. Slavov, M. Kimmelman and U. Heisel	403
Designing a High-Speed Press with a Six-Bar Linkage Mechanism T. Benkert, A. Krinner, T. Thümmel and W. Volk	411
Modelling of Kinematics and Dynamics of the IPAnema 3 Cable Robot for Simulative Analysis P. Tempel, P. Miermeister, A. Lechler and A. Pott	419
Tool System for Ultrasonic-Assisted Forming and Material Characterisation with 15 kHz Oscillation Frequency M. Michalski, U. Leicht, S. Engler and M. Merklein	427
Power-Split Press Drive for Economic Production T. Nitschke, R. Krimm and B.A. Behrens	435
Hybrid Clamping Technology for Flexible Micro Machining S. Pasternak, W. Maier, T. Stehle and U. Heisel	442

Chapter 6: Organisation of Manufacturing

Production Planning and Control in Complex, Autonomous Systems – Acceptance by the Planner as Factor of Success for the Cooperation with such Systems S. Vernim and G. Reinhart	453
Aggregation of Production Data for the Strategic Planning of Global Production Networks C. Reuter, J.P. Prote and M. Stöwer	461

OpenLabs - Collaborative Industrialization with Distributed and Open Source Microfactories	
T. Redlich, M. Moritz, S. Buxbaum-Conradi, P. Krenz, S. Heubischl and S.V. Basmer-Birkenfeld	470
Optimisation of Lean and Green Strategy Deployment in Manufacturing Systems	
S. Greinacher and G. Lanza	478
Process Planning and Decentralised Process Control for Cybertronic Production Systems	
C. Weidig, C. Sinnwell and J.C. Aurich	486
Concept for the Analysis of Disruption Consequences in a Complex Job Shop Manufacturing	
C. Reuter, A. Hauptvogel, F. Brambring and J. Hansen	494
Continuous Production Requirements Management	
J.F. Meis and G. Reinhart	500
A Concept for the Dynamic Adjustment of Maintenance Intervals by Analysing Heterogeneous Data	
M. Freitag, S. Oelker, M. Lewandowski and R. Murali	507
Approach to Calculating Lateness along Linear and Converging Material Flow Structures	
M. Grigutsch, J. Nywlt and C. Felix	516
Integrated Product and Tool Development	
J. Kantelberg, A. Aryobsei, S. Rudolf and G. Schuh	524
Highly Iterative Product Development Process for Engineering Projects	
F. Diels, S. Rudolf and G. Schuh	532
Discovering Product Innovation Potential within Existing Product Architectures	
S. Rudolf, C. Ortlieb, C. Tönnies and G. Schuh	540
Implementation of Additive Manufacturing Business Models	
M. Lutter-Günther, C. Seidel, T. Kamps and G. Reinhart	547
Three General Determinants of Support-Systems	
R. Weidner and A. Karafillidis	555
Operational Controlling Method for the Assembly of Large-Scale Products in Timed Assembly Cycles	
C. Reuter, T. Nuyken and P. Walendzik	563
