## Chapter 1: Ceramics, Semiconductors and Composites

|                                                                                                                                                                                                                                                 |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>BaSO<sub>4</sub>/Polyvinyl Alcohol Composites for Radiation Shielding</b><br>V. Thongpool, A. Phunpueok, N. Barnthip and S. Jaiyen                                                                                                           | 3  |
| <b>Characterization and Optical Properties of Zinc Oxide Films Prepared by Microwave Technique</b><br>S. Narksitipan and T. Awirut                                                                                                              | 7  |
| <b>Design of Experiments for (100) Si Vertical Wall Wet Etching Using Sonicated NaOH Solution</b><br>C. Pakpum and N. Pussadee                                                                                                                  | 12 |
| <b>Dielectric Properties of Y<sub>2</sub>NiMnO<sub>6</sub> Ceramics at Various Sintering Times and Temperatures</b><br>P. Deeyai, T. Sareein, B. Putasaeng and N. Chathirat                                                                     | 16 |
| <b>Effect of Barium Titanate Additives on Dielectric Property of PLZT Ceramics</b><br>L. Chumprasert, N. Funsueb, A. Limpichaipanit and A. Ngamjarurojana                                                                                       | 21 |
| <b>Effect of Blowing Agent on Cell Morphology and Acoustic Absorption of Natural Rubber Foam</b><br>W. Harnnarongchai and K. Chaochanchaikul                                                                                                    | 25 |
| <b>Effect of Electric Field and Temperature in Electrochemical Dissolution and Deposition Process on Morphologies of ZnO Nanostructures</b><br>B. Toboonsung                                                                                    | 30 |
| <b>Effect of Sintering Parameter on Ferroelectric Properties in PZT Based Ceramics</b><br>T. Promjun, Y. Manjit, S. Sukprasong and A. Ngamjarurojana                                                                                            | 34 |
| <b>Effect of Temperature on the Structural and Magnetic Properties of Co<sub>0.7</sub>Zn<sub>0.3</sub>Fe<sub>2</sub>O<sub>4</sub> Ceramic Prepared from Solid State Reaction</b><br>P. Klumdoung and P. Pankaew                                 | 38 |
| <b>Effect of Zr/Ti Ratio on Electrical Properties of Pb<sub>0.91</sub>La<sub>0.09</sub>(Zr<sub>x</sub>Ti<sub>1-x</sub>)O<sub>3</sub> Ceramics</b><br>N. Funsueb, S. Somwan, L. Chumprasert, T. Promjun, A. Limpichaipanit and A. Ngamjarurojana | 42 |
| <b>Effects of Catalyst on Carbon Nanotubes Synthesized by Thermal Chemical Vapor Deposition Method</b><br>U. Pakdee, S. Srabua, A. Phongphala and C. Pawong                                                                                     | 47 |
| <b>Effects of Milling Technique on Physical and Mechanical Properties of Lead-Free Ba(Zr<sub>0.3</sub>Ti<sub>0.7</sub>)O<sub>3</sub> Ceramics</b><br>C. Kruae-In and W. Leenakul                                                                | 51 |
| <b>Electrical Properties of Y<sub>2</sub>NiMnO<sub>6</sub> Ceramics Sintered at High Temperature</b><br>T. Sareein, P. Deeyai, B. Putasaeng and N. Chathirat                                                                                    | 55 |
| <b>Influence of Multifunctional Monomers on Gamma Irradiated Polylactic Acid</b><br>K. Chaochanchaikul and W. Harnnarongchai                                                                                                                    | 59 |
| <b>Investigation on Structural and Electrical Property of (1-x) PLZT - x PZN Ceramics</b><br>L. Chumprasert, N. Funsueb, S. Somwan, A. Limpichaipanit and A. Ngamjarurojana                                                                     | 63 |
| <b>Local Structure and Phase Formation of Lead Zinc Niobate Powders by X-Ray Absorption Spectroscopy</b><br>N. Funsueb, T. Promjun and A. Ngamjarurojana                                                                                        | 67 |
| <b>Magnetic Field Dependent Dielectric Properties in Ba(Ti<sub>0.99-x</sub>Mn<sub>0.01</sub>Ta<sub>x</sub>)O<sub>3</sub> Ceramics</b><br>T. Sareein, A. Ngamjarurojana and R. Yimnirun                                                          | 71 |
| <b>Optical Analysis of Bismuth-Based Glasses Doped Potassium Chromate</b><br>J. Dutchanephet, S. Sukprasong, N. Sirikulrat and A. Ngamjarurojana                                                                                                | 75 |
| <b>Preparation and Electrical Properties of Ba<sub>0.85</sub>Sr<sub>0.15</sub>Ti<sub>0.90</sub>Zr<sub>0.10</sub>O<sub>3</sub> Ceramics Doped Sn by Seed-Induced Method</b><br>K. Sutjarittangtham, S. Eitssayeam, U. Intatha and W. Leenakul    | 80 |
| <b>Preparation of Poly(Vinylidene Fluoride)/Silica Composite Nanofiber by Electrospinning Technique</b><br>M. Buddhakala and A. Muakngam                                                                                                        | 84 |

|                                                                                                                                                                                         |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Properties of Mg Doped ZnO Films Prepared by Ultrasonic Spray Pyrolysis</b><br>S. Thonglem, S. Sirisoonthorn, K. Pengpat, G. Rujijanagul, S. Eitssayeam, U. Intatha and T. Tunkasiri | 88  |
| <b>Scintillation Properties of Ce-Doped LuYAP Crystal for Gamma Ray Detection</b><br>A. Phunpueok, V. Thongpool and W. Chewpraditkul                                                    | 93  |
| <b>Study Behavior of XPS Spectra of Ni, Mn, Y and O in Y<sub>2</sub>NiMnO<sub>6</sub> Ceramics</b><br>P. Deeyai, T. Sareein, B. Putasaeng and N. Chathirat                              | 97  |
| <b>Surface Investigation of Laser Glazed Mullite Thin Films on Yttria-Stabilized Zirconia Coatings</b><br>N. Sanpo, J. Tharajak, J. Wang and C.C. Berndt                                | 104 |
| <b>The Dielectric Property of Y<sub>2</sub>NiMnO<sub>6</sub> Ceramics Sintered at High Temperature</b><br>T. Sareein, P. Deeyai, B. Putasaeng and N. Chathirat                          | 108 |

## Chapter 2: Recent Building Materials

|                                                                                                                                                                  |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Effect of Nano-TiO<sub>2</sub> on Mechanical and Thermal Properties of Cement Composites for Thermal Energy Storage Materials</b><br>P. Jittabut              | 115 |
| <b>Microstructure and Dielectric Properties of 0-3 Cement/Rice Husk Ash-Lead Niobate Zirconate Titanate Ceramic Composites</b><br>N. Jaitanong and A. Chaipanich | 119 |
| <b>Physical and Mechanical Properties of Cement/Natural Rubber Latex/Rice Husk Ash Composites</b><br>N. Jaitanong and T. Chaipunti                               | 124 |
| <b>Physical Properties of Cement Mortar Containing Waste Ash</b><br>S. Rukzon and P. Chindaprasit                                                                | 129 |
| <b>Preparation and Characterization of Cement-TiO<sub>2</sub> Composites</b><br>N. Kaewgabkam, N. Jaitanong and S. Narksitipan                                   | 133 |

## Chapter 3: Biomaterials and Biomedical Engineering

|                                                                                                                                                                                                                                             |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Effect of Titanium Nitride on Properties of Hydroxyapatite-Based Composites for Biomedical Applications</b><br>K. Chokethawai, G. Rujijanagul and T. Tunkasiri                                                                           | 139 |
| <b>Effects of Calcium Carbonate Synthesized from Cockle Shell on Characteristics of Calcium Phosphate Biphasic</b><br>N. Lertcumfu, P. Jarupoom, P. Arkornsakul, T. Tunkasiri, D.R. Sweatman and G. Rujijanagul                             | 143 |
| <b>Effects of the Sintering Temperature on Structural and Bioactivity in BaFe<sub>12</sub>O<sub>19</sub>-P<sub>2</sub>O<sub>5</sub>-CaO-Na<sub>2</sub>O Bioactive Glass Ceramic</b><br>P. Intawin, K. Pengpat, W. Leenakul and T. Tunkasiri | 147 |
| <b>Fabrication of Polycaprolactone/<i>Centella asiatica</i> Extract Biopolymer Nanofiber by Electrospinning</b><br>S. Manotham, K. Pengpat, S. Eitssayeam, G. Rujijanagul, D.R. Sweatman and T. Tunkasiri                                   | 151 |
| <b>Optical Microarray Grating Biosensors</b><br>N. Chathirat, C. Hruanun and A. Poyai                                                                                                                                                       | 155 |
| <b>Photolithographic Process for Creating Micro-Grating on Silicon Substrate for Biosensor Application</b><br>N. Chathirat, C. Hruanun and A. Poyai                                                                                         | 159 |
| <b>Predicting the UV Spectrum of Single Stranded DNA</b><br>N. Chathirat                                                                                                                                                                    | 163 |
| <b>Preparation of 2 wt% ZnFe<sub>2</sub>O<sub>4</sub>/HAp Ceramic for Future Biomedical Applications</b><br>P. Klumdoung and P. Pankaew                                                                                                     | 167 |
| <b>Processing of Elastic Silk Sericin/Gelatin Composite Film for Future Cosmetic Applications</b><br>P. Pankaew, P. Klumdoung and K. Naemchanthara                                                                                          | 171 |
| <b>Synthesis of Diamond-Like-Carbon Films as the Coating Prototype for Biomedical Materials</b><br>N. Barnthip and A. Muakngam                                                                                                              | 175 |

|                                                                                                                                           |     |
|-------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>A Study of the Preparation of Silk Sericin/Chitosan Composite Film for Future Wound Dressing Applications</b>                          |     |
| P. Pankaew, P. Klumdoung and K. Naemchanthara                                                                                             | 179 |
| <b>The Fabrication of Titanium Dioxide (TiO<sub>2</sub>) Thin Film via Deposited Spray Pyrolysis Using for Antibacterial Applications</b> |     |
| P. Lertloypanyachai, E. Kaewnuam and K. Sreebunpeng                                                                                       | 183 |
| <b>Characterization and Gel Properties of Gelatin Extracted from Waste Fish Scales</b>                                                    |     |
| N. Nuamsrinuan, N. Suttisiri, E. Hoonnivathana, P. Limsuwan and K. Naemchanthara                                                          | 187 |
| <b>Antimicrobial Effect of Squid Ink on Common Microbial Causing Biofilm Attaching to Silicone</b>                                        |     |
| D. Nicomrat and J. Tharajak                                                                                                               | 191 |
| <b>Antioxidant Activity in the Petal Extract of PAP1 Transgenic Tobacco</b>                                                               |     |
| S. Kanthang and K. Sompornpailin                                                                                                          | 195 |
| <b>DNA Biosensor on Optical Nanograting Structure</b>                                                                                     |     |
| N. Chathirat, C. Hruanun and A. Poyai                                                                                                     | 199 |
| <b>Heat Effect on Antimicrobial Properties of Plasticizer PEG Blended Chitosan</b>                                                        |     |
| D. Nicomrat, J. Tharajak and P. Soongsombat                                                                                               | 203 |

## **Chapter 4: Materials and Technologies in Textile Industry**

|                                                                                                                                                |     |
|------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Colour Fastness Property of Printed Cotton Fabric Using Warp Yarn Printing Technique</b>                                                    |     |
| K. Ariyakware, C. Klaichoi, N. Phaisarntantiwong and S. Senatham                                                                               | 209 |
| <b>Needleless Electrospinning of Silk Fibroin/Gelatin Blend Nanofibres</b>                                                                     |     |
| N. Sasithorn and L. Martinová                                                                                                                  | 213 |
| <b>UV-Protection Property of Silk Fabric Dyed with Natural Indigo by Using Padding Technique: A Focus on Effect of Ferrous Sulfate Mordant</b> |     |
| R. Mongkholrattanasit, C. Saiwan, C. Klaichoi, N. Rungruangkitkrai and P. Sasivatchutikool                                                     | 217 |

## **Chapter 5: Advanced Technologies in Agriculture, Environmental Engineering and Waste Treatment and Recycling**

|                                                                                                                         |     |
|-------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Assessment of Heavy Metal Content in PM<sub>10</sub> at Amphoe Mueang Pathum Thani Province in Thailand</b>          |     |
| W. Deelaman and C. Choomchuay                                                                                           | 223 |
| <b>A Reliable Homemade Tissue Culture Protocol for <i>Dendrobium</i> Orchid Cultivation</b>                             |     |
| D. Nicomrat and J. Anantasaran                                                                                          | 227 |
| <b>Environmental Survey on Physicochemical Parameters in Surface Water: A Case of Klong Prem Prachakorn, Thailand</b>   |     |
| V. Boonyaroj, P. Peansawang, N. Sonchan and A. Sukrasorn                                                                | 231 |
| <b>Heavy Rain and Drought Conditions in Thailand under Global Warming</b>                                               |     |
| S. Saiuparad                                                                                                            | 235 |
| <b>Practical Homemade Copper Filter by Banana Peels, Sand and Charcoal for Wastewater Treatment</b>                     |     |
| D. Nicomrat and J. Tharajak                                                                                             | 239 |
| <b>Predictability of the Northeast Monsoon Forecasts by the Educational Global Climate Model</b>                        |     |
| S. Saiuparad and D. Sukawat                                                                                             | 243 |
| <b>Structure and Mechanical Properties of Water Buffalo Horns</b>                                                       |     |
| P. Surakamhang and C. Sangsubun                                                                                         | 247 |
| <b>Study of Moisture of Rice by Using Reflection Spectroscopy</b>                                                       |     |
| T. Wittinanon and K. Chirapatpimol                                                                                      | 251 |
| <b>Synergistic Effects of Cellulase-Producing Microorganisms for Future Bioconversion of Lignocellulosic Biomass</b>    |     |
| D. Nicomrat and J. Tharajak                                                                                             | 255 |
| <b>The Effects of Cytokinins on Plant Regeneration of Vetiver Grass (<i>Vetiveria nemoralis</i> A. Camus cv. Roiet)</b> |     |
| C. Khunchuay and K. Sompornpailin                                                                                       | 259 |

|                                                                                                                             |     |
|-----------------------------------------------------------------------------------------------------------------------------|-----|
| <b>The Removal Mechanisms of Organic Compounds in Household Wastewater by Soil Sediment</b>                                 |     |
| V. Boonyaroj, J. Jinasam and W. Nachailan                                                                                   | 263 |
| <b>The Study of Fluid Flows in Difference Hydroponics System Arrangements</b>                                               |     |
| A. Pramuanjaroenkij, S. Naiyanart, P. Hintong and A. Sanbun                                                                 | 267 |
| <b>Waste Management Education for Sustainable Islands</b>                                                                   |     |
| K. Navykarn and U. Muneenam                                                                                                 | 271 |
| <b>Odor Control in the Standard Thai Rubber 20 (STR 20) Industry by Using a Wet Scrubber</b>                                |     |
| W. Rattanapan                                                                                                               | 275 |
| <b>Variations of the Precipitation Water Vapor by Using GPS Data Triggered Raining in the Summer of Thailand</b>            |     |
| N. Choosakul                                                                                                                | 279 |
| <b>Heating Energy Briquettes from Cashew Nut Shell</b>                                                                      |     |
| S. Sawekwiharee, T. Boonchoo, A. Kuttiyawong and N. Chathirat                                                               | 283 |
| <b>Application of the Ensemble Kalman Filter to a One-Dimensional Linear Advection Model</b>                                |     |
| S. Payakkarak and D. Sukawat                                                                                                | 287 |
| <b>Fabrication of 2 wt% NiFe<sub>2</sub>O<sub>4</sub>/HAp Composite Ceramic for Future Heavy Metal Removal Applications</b> |     |
| P. Klumdoung, S. Pukjaroon and P. Pankaew                                                                                   | 291 |
| <b>The Difference of Si/Al Ratio on Organo-Zeolite in the Adsorption of Atrazine and Linuron</b>                            |     |
| S. Nucharin                                                                                                                 | 295 |
| <b>Surface Modification of Composite Membranes by Coating PVA/TiO<sub>2</sub> Layer</b>                                     |     |
| B. Yalcinkaya and J. Chaloupek                                                                                              | 299 |
| <b>A Comparison of Statistical Methods for Forecasting the Price of Jasmine Rice</b>                                        |     |
| Y. Atikankul                                                                                                                | 304 |

## **Chapter 6: Engineering Decisions in Designing of Machines and Power**

|                                                                                                                                                    |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Novel Optical Trapping Micro-Sensor from PANDA Ring Resonator for Quantum Computer Processing</b>                                               |     |
| C. Sripakdee and N. Sarapat                                                                                                                        | 311 |
| <b>Wigner Representation for Investigation of Entangled Photon Evolution in Four-Wave Mixing Process within a Fiber Ring Resonator</b>             |     |
| C. Sripakdee                                                                                                                                       | 316 |
| <b>Better Understanding Network of Electrical Terminal Stations by Topological Analysis</b>                                                        |     |
| S. Sodsee, M. Komkhao and W.A. Halang                                                                                                              | 321 |
| <b>NLARX Model Identification for Grid Tied Inverter Using Genetic Algorithm</b>                                                                   |     |
| V. Vacharapanich, N. Pratinthong and D. Chenvidhya                                                                                                 | 325 |
| <b>The New Design of Fish Cake Making Machine</b>                                                                                                  |     |
| P. Wirotcheewan and S. Peanprasit                                                                                                                  | 329 |
| <b>The Response of Optotune EL-10-30 Adaptive Lens at Various Frequency of Supplied Electric Current</b>                                           |     |
| T. Wittinanon and K. Chirapatpimol                                                                                                                 | 333 |
| <b>Improving the Evolutionary Computation for General Keyboard Arrangement Problem</b>                                                             |     |
| V. Janthanasub and P. Meesad                                                                                                                       | 337 |
| <b>A Mathematical Model for Determination of Electric Energy Performance of Small Solar Chimney System in Nakhon Ratchasima Province, Thailand</b> |     |
| P. Jittabut                                                                                                                                        | 341 |

## **Chapter 7: Innovative Technologies Education for Sustainable Development of Society**

|                                                                                    |     |
|------------------------------------------------------------------------------------|-----|
| <b>Application of Learning Management System for Online Learning Modules</b>       |     |
| V. Jakchaikul                                                                      | 347 |
| <b>The Construction and Evaluation of Instructional Package on Vector Quantity</b> |     |
| S. Sirathanakul                                                                    | 351 |
