

Table of Contents

Preface & Editorial Board

Chapter 1: Architectural Design

Performance-Based Generative Design and Fabrication T. Tholt, R. Löffler, J. Pernecký and V. Šimkovič	3
Mixed Reality in Architecture R. Löffler, T. Tholt and V. Šimkovič	9
Selected Aspects of Slovak Republic Territorial Development Visions J. Husenicova and Z. Dohnanska	15
The Progressive Constructions in the Work of Architects of the Classical Modernism, Slovakia 1919-1939 E. Borecká and D. Mellner	21
Window Today – Still an Important Architectural Element of Exterior and Interior K. Minarovičová	27
The Process of Hybridization in Sustainable Urban Residential Environment E. Selcová	33
Load Bearing Structures of Glass Single-Storey Buildings E. Vojtekova	39
The Design Principle Cladding of Internal and External Walls and the Architectural Design Analysis A. Pernišová	45
Requirements and Solution of Barrier-Free Measures upon Architectonic – Construction Solution of Kitchen and Bathroom in a Flat of Special Determination A. Pernišová	51
Proposal of Architectonic – Construction Solution of Barrier-Free Measures of Entry Premises in Non-Residential Buildings Specified for Use by the Public A. Pernišová	57
Drainage Systems for Sloping Roofs and Possibilities of Rain Water Use A. Pernišová	63
Reflection on Modernization of Historic Religious Architecture - Case Study: The Roman Catholic Parish Church, Rajec in Slovakia B. Polomová and A. Vargová	69
Glass Fibre Reinforced Concrete Products for Construction Industry and Architecture E. Jakeš	75
Geometric Tolerance Verification - Innovative Evaluation of Facade Surface Flatness Using TLS (Terrestrial Laser Scanning) T. Funtik, M. Ďubek and J. Erdelyi	81
Adaptation of the Ruin of Outbuilding next to Classicist Manor-House in Opatová - Lucenec T. Varga, P. Pauliny and R. Ingeli	90
The Optimization of Mechanized Earthwork Processes L. Paulovičová	96

Chapter 2: Energy Saving, Thermal Insulation and Ecological Buildings

Strategy for Cooling Green Buildings B. Bielek	105
External Climatic Conditions and Thermal-Humidity Internal Parameters Changes in Working Environment of Production Building D. Katunský, M. Kamenský, J. Katunská and M. Zozulák	115

The Impact of the Dynamic External Shading Structure on the Energy Balance of the Reference Building in Summer A. Moravčík and A. Puškár	121
BIM and Prediction of Thermal Stability in Underroof Spaces M. Jamnický	127
Analysis of the Influence of Thermal Characteristics of Simple Family House on Heat Use for Heating R. Mend'an and M. Pavčková	133
Thermal Bridges Impact on Energy Need for Heating in Low Energy Wooden House R. Ingeli, J. Podhorec and M. Čekon	139
Balcony Systems (Isokorb) Impact on Energy Need for Heating and Economic Valuation P. Buday and R. Ingeli	146
Earth Wall Heat Storage Impact on Indoor Air and Surface Temperature during an Extreme Summer Week M. Mikulasik and J. Zilinsky	152
Impact of Composition of Exterior Wall on the Temperature in the Room K. Binek and J. Žilinský	159
Selection of Material Base of External Wall in Term of Thermal Performance K. Binek and J. Žilinský	165
The most Significant Factor Affecting the Calculation of Specific Heat Consumption for Heating for Family Houses According to STN 73 0540 P. Buday	171
Optimal Localisation of Window in External Wall of Different Material and Construction Design Considering Linear Loss Coefficient R. Mend'an and B. Vavrovič	177
New Calculation Method for Determination of the Influence of Thermal Bridges on a Building R. Mend'an and M. Pavčková	183
Impact of Growing Conditions of Spruce Wood on Thermal Performance of Windows A. Puškár and P. Panáček	189
Sustainability of ETICS Maintenance Technologies K. Minarovičová and N. Antošová	194
The Methodology for the Selection of Technologies for the Removal of Microorganisms from ETICS N. Antošová and K. Minarovičová	200
Systems of Sensible Thermal Energy Storage M. Jurigová and I. Chmurný	206
Theoretical Calculation of Thermal Transmittance A. Palková and M. Palko	212
Preliminary Proposal of a Shading System Composed of Photovoltaic Modules and Phase Change Material R. Jedinák	218
Methods to Reduce the Operating Temperature of Photovoltaic Cells P. Hysek	224
An Optimal Window Position in External Walls, of Different Materials and Construction Designs, in Relation to Critical Surface Temperature B. Vavrovič and R. Mend'an	230
Window Structures in Building with Historical Building Preservation B. Vavrovič and A. Puškár	236
Triple or Quadruple Glazing? I. Chmurný	242
Thermotechnical Properties of Unburnt Clay Wall in Historical Family House and Wall Reconstruction R. Mend'an	248
The Algorithm of the Double-Skin Façade without the Effects of Wind M. Palko and A. Palková	254
Measurement of Lightweight Experimental Wall and Comparison with Different Simulation Programs P. Juras and R. Ponechal	262

Chapter 3: Hygrothermal Performance of Building Materials and Constructions

Hygrothermal Initial Conditions - Case Studies M. Zozulák, M. Vertaľ and D. Katunský	273
Physical Analysis of Water Vapour in Function Gap M. Palko and A. Palková	279
Condensation of Water Vapour in the Functional Gap of Window - Experimental Measurement of Exfiltration at 15 Pa A. Palková, Ľ. Kamenický and M. Palko	285
Condensation on the Exterior Surface of Glass System A. Palková and M. Palko	293
Analysis and Evaluation of Moisture Factor, Reliability, Effectivity and Durability of Sanation Methods Used to Treat Damp Masonry M. Držka	299
Quality of Vapour-Proof Layer Concept in Roof Envelope in Residential Attics E. Jakeš	305

Chapter 4: Aerodynamic Characteristics of Buildings and Constructions

Interaction of Building Thermal Technics with Building Aerodynamics in Problem Solving of Physical Cavities of Double-Skin Transparent Facades B. Bielek	313
The Impact of Relative Position of the High-Rise Buildings on the Wind Flow D. Čechel'ová, M. Janák and B. Bielek	320
Impact Wind Turbines Implementation in Municipalities in the Context of Sustainable Urbanism with Focus on Dynamic Pedestrian Comfort M. Hépal and A. Puškár	326
Experimental Pressure Measurement on Elliptic Cylinder M. Franek, L. Konecna, O. Hubová and J. Žilinský	332
Atmospheric Boundary Layer A. Vranková and M. Palko	338
Engineering Standards of Wind A. Vranková and M. Palko	345
Atmospheric Boundary Layer Modelling A. Vranková and M. Palko	351
Development of Boundary Layer in CRIACIV in Florence (Prato) and Comparison with CFD M. Magát, I. Olekšáková and J. Žilinský	359
Influence of the Wind in Passages I. Oleksakova and M. Magát	365
Comparison of Pressure Coefficients of Cube Silsoe with the Results in the Wind Tunnel of Faculty of Civil Engineering in Bratislava P. Lobotka and J. Žilinský	371

Chapter 5: Fire Protection of Buildings and Constructions

Determination of Fire Resistance of Ceiling Structure Variant Design on the Basis of Timber Using Numerical Calculation Methods R. Leško and M. Lopusniak	379
Fire Safety of Buildings in the Protection Zone of the Electric Power Transmission System of the Czech Republic M. Trčka, J. Ondruch, A. Thomitzek and Š. Kavan	385

Water Supply for Cooling Tertiary Containments for High Storage Tanks Z. Kadlec, M. Kvarčák, A. Thomitzek and M. Trčka	391
Comparison of Requirements in Slovak and Selected Foreign Legislation on the Issue of Safe Distance of the Wooden Building Structures from the Flue Z. Lišková and J. Olbřímek	396
Escape Route Typology I. Mikolai and J. Tkáč	402

Chapter 6: Daylighting and Insolation

Inaccuracies Caused by Non-Uniform Luminance Distribution of Artificial Sky Dome at Scale Model Measurements K. Kondáš, S. Darula and M. Lopusniak	411
Daylighting for Buildings: Influence of the Solar Eclipse on its Spectral Characteristics P. Hartman, P. Hanuliak, M. Fabian and S. Darula	417

Chapter 7: Acoustics and Noise Protection

Solution of Own Window Pane Oscillation by Subspace Iteration Method M. Bagoňa, J. Šimiček and R. Baláž	425
Laboratory Experimental Verification of the Effectiveness of Acoustical Treatment of Façade Element Frame Profiles B. Bielek and D. Szabó	431
Theoretical Determination of Sound Reduction Index of Simple Walls on Various Material Bases M. Pavčeková and R. Mend'an	437
Modification of Watters' Formula for Simple Aerated Concrete Walls M. Pavčeková and R. Mend'an	443
The Use of Simulation Tools in the Assessment of External Stationary Sources in Terms of Noise D. Dlhý and P. Tomašovič	448
The Results of Experimental Measurements of the Effects of Floating Floor Washers D. Dlhý, P. Tomašovič and P. Petrák	454
The Effect of a Front Frame on the Increase in Sound Insulation of an Acoustically Simple Wall - Results of On-Site Measurements D. Dlhý, P. Tomašovič, P. Petrák and P. Zaťko	460
Experimental Measurements of Effects of Occupancy Class on Reverberation Time D. Dlhý and J. Zrneková	466
Effects of the Sound Insulation of the Outer Structure on the Price D. Dlhý and P. Tomašovič	472
