

# Table of Contents

## Preface and Committees

## Chapter 1: Aeroelasticity, Hydroelasticity, Fluid Mechanics and Flow Analysis

<b>Fatigue Testing of Polymeric Hollow Fibre Heat Transfer Surfaces by Pulsating Pressure Loads</b>	
T. Brožová, T. Luks, I. Astrouski and M. Raudenský	3
<b>Validation Task for Solution of Optimal Slotted Flap Position Using Fluent Software</b>	
P. Doupník and T. Koutník	10
<b>Numerical Simulation of Flows through Labyrinth Seals</b>	
J. Fürst	16
<b>Unsteady Flow past a Circular Cylinder Using Advanced Turbulence Models</b>	
J. Holman	23
<b>Numerical Solution of Wet Steam Flow through Blade Cascade</b>	
V. Hric and J. Halama	31
<b>Void Fraction Based Two Phase Flow Model of Supersaturated Moist Air</b>	
T. Hyhlík	39
<b>Aerodynamic Characteristics of Steam Turbine Prismatic Blade Section</b>	
T. Jelinek, P. Straka and M. Kladrubský	48
<b>VVER-440 Steam Generator's Two-Phase Flow Analysis</b>	
L. Joch and R. Krautschneider	57
<b>Implementation of <math>k_L\text{-}\omega</math> Turbulence Model for Compressible Flow into OpenFOAM</b>	
M. Kožíšek, J. Fürst, J. Přihoda and P. Doerffer	63
<b>Analysis of the Boundary Problem with the Preference of Mass Flow</b>	
M. Kyncl and J. Pelant	70
<b>Numerical Calculation of the Force Coefficient for Cylindrical Shape Smokestack Covered with Corrugated Iron</b>	
V. Michalcova and L. Lausova	79
<b>Experimental Study of Gas Dispersion over Complex Terrain</b>	
P. Michálek and D. Zacho	85
<b>Influence of Working Parameters and Primary Breakup Conditions on the Quality of Twin-Fluid Atomizers Spray Quality</b>	
M. Milkvik, M. Zaremba, P. Stähle, H.P. Schuchmann, V. Gaukel and J. Jedelsky	91
<b>Modelling of the Influence of Vegetative Barrier on Concentration of PM10 and PM2.5 from Highway</b>	
H. Řezníček and L. Beneš	97
<b>Modelling the Effects of a Vegetation Barrier on Road Dust Dispersion</b>	
V. Šíp and L. Beneš	105
<b>Analytical Solution of Hydrostatic Pocket Tilting</b>	
E. Stach, J. Falta and M. Šulitka	113
<b>Influence of the Radial Gap under the Stator Blade on Flow Around the Hub-End of the Rotor Blade</b>	
P. Straka and M. Němec	120
<b>On the Finite Element Method Application for Approximation of Free-Surface Flows with Surface Tension and Contact Angles</b>	
P. Sváček	129
<b>Study of Scale Effect in a Starved Elastohydrodynamically Lubricated Contact</b>	
P. Svoboda, D. Kostal, I. Křupka and M. Hartl	138
<b>Innovation of the Experimental Facility for the Study of Flutter in the Institute of Thermomechanics AS CR and Some Results Obtained from Initial Experiments</b>	
V. Vlček, M. Štěpán, I. Zolotarev and J. Kozánek	144

<b>Study of Water Jet Collision of High Pressure Flat Jet Nozzles for Hydraulic Descaling</b> H. Votavová and M. Pohanka	152
<b>Numerical Solution of Micro-Lubrication in Internal Combustion Engine Journal Bearing</b> O. Maršálek, P. Novotný and J. Knotek	159
<b>Computer Simulation of the Behavior of the Piston Ring Pack of Internal Combustion Engines</b> P. Raffai, P. Novotný and J. Dlugoš	166
<b>Flutter Derivatives of the Kao-Pin Hsi Cable-Supported Bridge</b> A. Buljac, S. Pospíšil, H. Kozmar, S. Kuznetsov and R. Král	172

## **Chapter 2: Dynamics and Stability of Technical Systems, Computational Modeling and Testing**

<b>Modelling of Rotating Twisted Blades as 1D Continuum</b> J. Brůha and D. Rycheký	183
<b>Simulation of Nonlinear Characteristic of Aileron Attachment on Aeroelastic Demonstrator Using Active Electromagnetic Spring Concept</b> J. Čechrdle, J. Maleček, V. Hlavatý and P. Malínek	191
<b>Advanced Computational Analysis of Connecting Rod of an Aircraft Engine</b> J. Dlugoš, P. Novotný and P. Raffai	199
<b>Bifurcations in Mathematical Model of Nonlinear Vibration of the Nuclear Fuel Rod</b> Š. Dyk and V. Zeman	207
<b>Overview Study of the Analytical Analysis of the Internal Dynamics of Nonlinear Time Heteronomous Planetary Differential Systems</b> M. Hortel and A. Škuderová	213
<b>Approximate Determination of Eigen-Values of Classically Damped System with Added Viscous Damper</b> S. Hračov	221
<b>Multibody Based Tool for Simulation of the Turbocharger Rotor Dynamics</b> J. Knotek, P. Novotný and O. Maršálek	229
<b>Solution of Large Engineering Problems on Parallel Computers</b> J. Kruis	235
<b>A Computational Model of ATV Vehicle for Real-Time Simulation</b> P. Kučera and V. Pištěk	242
<b>Failure of Window Glass Plate under Blast Load</b> D. Makovička and D. Makovička	248
<b>Non-Linear Normal Modes in Dynamics - Discrete Systems</b> J. Náprstek and C. Fischer	254
<b>Modified Approach to the Simulations of Bus Driving Tests</b> P. Polach and J. Václavík	266
<b>Dynamics of Simple Gearing Model with Flexible Planetary Pins</b> L. Půst, L. Pešek and A. Radolfová	274
<b>Dynamic Analysis of the Structure Exposed to the Moving Periodic Force and Viscoelastic Models of the Human Body</b> V. Sana	282
<b>Preliminary Investigations of Machine Frame Vibration Damping Using Eddy Current Principle</b> G.J. Stein, P. Tobolka and R. Chmúrny	288
<b>Amplitude-Temperature Analysis of Hard Rubber by Torsional Vibration</b> P. Šulc, L. Pešek, V. Bula, J. Cibulka and J. Košina	295
<b>Wind Tunnel Experimental Study of Coupled Rocking-Swivelling Model of Guyed Mast Shaft</b> S. Urushadze, M. Pirner and O. Fischer	303
<b>Investigations of Transient Oscillations of Rotors Supported by Magnetorheological Squeeze Film Dampers Using Bilinear Material to Model the Lubricant</b> J. Zapoměl, J. Kozánek and P. Ferfecki	309
<b>Prediction of the Nuclear Fuel Rod Abrasion in the Probability Sense</b> V. Zeman and Z. Hlaváč	317

<b>Measuring of a Nose Landing Gear Load during Take-Off and Landing</b> I. Jebáček and M. Horák	325
<b>Parallel Computing Procedure for Dynamic Relaxation Method on GPU Using NVIDIA's CUDA</b> V. Rek and I. Němec	331

### **Chapter 3: Static Analysis and Strength of Technical Systems, Materials for Mechanical Engineering and their Properties**

<b>Different Approaches to Parallelization of Vector Assembly</b> M. Bošanský and B. Patzák	341
<b>Simulation of Damage in Hybrid Composite Cell Structure</b> J. Had and M. Růžička	349
<b>Detailed Topometry FEM Optimization of Wing Structural Panel</b> T. Katrňák and J. Juračka	357
<b>Finite Elements Modeling of Mechanical and Acoustic Properties of a Ceramic Metamaterial Assembled by Robocasting</b> A. Kruisová, H.S. Seiner, P. Sedlák, M. Landa, B. Román-Manso, P. Miranzo and M. Belmonte	364
<b>Issue of Rigidity of the Ball Screw Nut Exposed to Bending Stress during Bending Stress of the Ball Screw</b> L.W. Novotný, J. Marek and T. Marek	372
<b>Methodology of Geometry Testing and Measuring of Machine Tool Components Having Big Dimensions and their Verification Using the FEM Method</b> L.W. Novotný and O. Učeň	378
<b>Crash Test of Carbon Composite</b> M. Petrů, M. Syrovátková and M. Novotná	385
<b>Stochastic Wang Tiles Generation Using the Discrete Element Method</b> J. Stránský and M. Doškář	392
<b>Properties of Ultrafine-Grained Tungsten Prepared by Ball Milling and Spark Plasma Sintering</b> M. Vilémová, B. Nevrlá, Z. Pala, L. Kocmanová, M. Janata, J. Matějčík and D. Tonarová	399
<b>Acoustic Emission Localization in Testing of Composite Structures</b> M. Weis, J. Cejpek and J. Juračka	405
<b>Modelling of Fabric in Plain Weave</b> J. Žák	412
<b>Testing of Energy Absorption Capability of Sandwich Structures Based on Metal Foams for Design of Protective Helmets</b> P. Zlámal, T. Fila and V. Králík	420
<b>Deformation Mechanisms of Auxetic Microstructures for Energy Absorption Applications</b> P. Koudelka, M. Neuhauserova, T. Fila and D. Kytýř	428
<b>Determination of Mechanical Properties of Magnesium Alloys and Composites by Small Punch Testing</b> D. Bártková, J. Langer, P. Dymáček and L. Válka	435
<b>Experimental Measurement of Elastic-Plastic Fracture Parameters Using Digital Image Correlation Method</b> I. Jandejsek and D. Vavřík	442
<b>Verification of Ductile Fracture Criteria Based on Selected Calibration Tests</b> F. Šebek, P. Kubík and J. Petruška	450
<b>Measuring of Cyclist Impact Dynamics</b> Z. Radová and L. Nouzovský	456
<b>Fracture Toughness Testing for Improving the Safety of Gas Pipelines</b> L. Gajdoš and M. Šperl	464
<b>Study of Surface Quality and Mechanical Properties of Composite Material Based on Natural Reinforcement</b> Z. Hutyrová, D. Mital', M. Harničárová, J. Zajac and J. Valíček	471
<b>Comparison of Hybrid Metal-Composite Small-Pin Joints with Conventional Ones in Terms of Static and Fatigue Strength</b> G. Beketova, M. Shevtsova and V. Symonov	479

## Chapter 4: Engineering Mechanics in Practice of Construction

<b>Wang Tilings in Numerical Homogenization</b> M. Doškář and J. Novák	489
<b>Nonlinear Behaviour of Concrete Foundation Slab</b> J. Fiedler and T. Koudelka	495
<b>Calibration of Hypoplastic Models for Soils</b> T. Kadlíček, T. Janda and M. Šejnoha	503
<b>Experiment E7/0,3 – Time Behaviour of Active Pressure of Non-Cohesive Sand after Wall Translative Motion</b> P. Koudelka	512
<b>Micromechanical Homogenization of Ultra-High Performance Concrete</b> V. Koudelková, T. Sajdlová and J. Němeček	518
<b>Mechanical Properties of Fiber Reinforced Lime-Based Mortars Evaluated from Four-Point Bending Test</b> M. Přinosil and P. Kabele	526
<b>Definition of Effective Material Properties of Recycled Plastic: Image Analysis and Homogenization</b> Z. Procházková, V. Králík, K. Doubrava and M. Šejnoha	532
<b>The “Miracle” of Post-Buckled Behaviour in Thin-Walled Steel Construction and its Breathing-Induced Limitation</b> M. Škaloud, M. Zörnerová and S. Urushadze	539
<b>Computer-Aided Plastic Limit Analysis of Plates</b> V. Vančík and M. Jirásek	547
<b>Theoretical Method of Calculation to Determination the Change of Axial Force in a Reinforcing Bar during the Destruction of the Support Zone of the Central Column in the RC Structures</b> B. Wieczorek	555
<b>Influence of Geometrical Parameters on Simplified Models of the Slab-Beam Connection of Joist Structures</b> M. Wieczorek	563
<b>Simplified Model for Calculating the Value of the Failure Load in the Internal Span Zone of Slab-Column Structures</b> M. Wieczorek	571
<b>Adaptive Remeshing Technique in Discrete Models of Random Geometry</b> J. Eliáš	579
<b>Evaluation of Fracture Tests of Concrete Specimens via Advanced Tool for Experimental Data Processing</b> I. Havlikova, P. Frantík, J. Masek, J. Sobek, H. Šimonová, V. Veselý, Z. Keršner, S. Seitzl, I. Merta and A. Schneemayer	585
<b>Numerical Investigation of Wind Effects on the Perforated Structures</b> R. Král and S. Pospíšil	591

## Chapter 5: Mechatronics

<b>Model Based Design of Fuel Pump Control</b> O. Andrs, J. Vetiska, M. Holub and J. Kovar	601
<b>Analysis of Machine Tool Spindles under Load</b> M. Holub, J. Vetiska, J. Knobloch and P. Minar	608
<b>Reduction of Pneumatic Tyred Roller Fuel Consumption</b> T. Panáček and M. Klapka	614
<b>Comparison of Energy Efficiency of the Redundant Actuation of Positioning Axes</b> K. Šubrt, R. Knoflíček and P. Houška	620
<b>Issues with Determining of Mean Time to Dangerous Failure and Diagnostic Coverage in Safety Functions of Machine Tools</b> J. Zahálka, F. Bradáč, J. Tůma and M. Synek	626

<b>Experimental Verification of Balanced Control Valve</b> M. Miczán, L. Bednář, M. Hoznedl and L. Tajč	632
<b>Prediction of Optimal Load and Performance of Thermal Batteries</b> M. Kušnerová, J. Valíček, M. Harničárová and H. Tozan	641
<b>Determination of Turning Knife Thermal Stress during Longitudinal Turning</b> M. Stránský and J. Horský	649

## Chapter 6: Biomechanics and Biomedical Engineering

<b>Finite Element Modelling of the Effect of Stiffness and Damping of Vocal Fold Layers on their Vibrations and Produced Sound</b> P. Hájek, P. Švancara, J. Horáček and J.G. Švec	657
<b>Deformation Behaviour of Gellan Gum Based Scaffold Subjected to Compression Loading</b> D. Kytýr, T. Doktor, M. Adorna, M. Neuhauserova, J. Sleichert, N. Fenclova, A. Gantar and S. Novak	665
<b>Sensitivity of Acoustic Resonance Properties to a Change in Volume of Piriform Sinuses</b> V. Radolf	671
<b>Simple Model of the Cajal-Like Interstitial Cell and its Analysis</b> J. Rosenberg, M. Štengl and M. Byrtus	677
<b>Finite Element Analysis of Fixation System Influence on the Thoracolumbar Spine Stability</b> K. Szkoda and C. Pezowicz	685
<b>Numerical Simulation of Interaction of Fluid Flow and Elastic Structure Modelling Vocal Fold</b> J. Valášek, P. Sváček and J. Horáček	693

## Chapter 7: Random Load Parameters and Reliability of Structures

<b>Safety Evaluation of EC2 and MC 2010 Models for Assessment of Punching Resistance of Footings</b> J. Hanzel, L. Majtánová and J. Halvonik	703
<b>Load Carrying Capacity of Steel Arch Reinforcement Taking into Account the Geometrical and Physical Nonlinearity</b> P. Janas, L. Koubova and M. Krejsa	709
<b>Application of the DOProC Method in Solving Reliability Problems</b> M. Krejsa, P. Janas and V. Krejsa	717
<b>Probabilistic Nonlinear Analysis of Bubble Tower Structure due to Extreme Pressure and Temperature</b> E.J. Králik and J. Kralik	725
<b>Steel Arch Stabilized by a Textile Membrane</b> O. Svoboda and J. Machacek	733
<b>Reliability of Approach Slabs and Modelling of Transition Zones of Bridges</b> K. Laco and V. Borzovič	741
<b>Experimental and Numerical Analysis of Concrete Slender Columns by Stability Failure</b> V. Benko, Ľ. Fillo, P. Kendrický and V. Knapcová	747
<b>Long-Term Trends in Annual Ground Snow Maxima for the Carpathian Region</b> Á. Rózsás, M. Sýkora and L.G. Vigh	753
<b>Punching Resistance of Flat Slabs</b> Ľ. Fillo, T. Augustín, J. Hanzel and V. Knapcová	761
<b>Probabilistic Assessment of Historic Reinforced Concrete Bridge</b> J. Krejsa, M. Sýkora and M. Drahorád	767
<b>Limit States Design and Partial Factors <math>\gamma_{M0}</math> and <math>\gamma_{M1}</math> in Metal Eurocodes</b> I. Balaz and Y. Kolekova	774
<b>Assessment of Cast-Iron Columns Using Analytical Models</b> I. Brych and M. Sýkora	782
