

Table of Contents

Preface

Chapter 1: Building Materials, Components and Structures

Applicability Analysis of Selected Methods of Determining the Moisture Content of Highly Porous Thermal Insulations	
L. Kalousek, R. Brzoň and Z. Fišarová	3
Case Study of Chimney and Flue Fires in Timber Constructions in Slovak Republic	
J. Olbřímek, Z. Lišková and S. Leitnerová	11
Case Study on Determination of Tensile Properties of Construction Sealants at Variable Temperatures	
B. Nečasová, P. Liška, J. Šlanhof and M. Šimáčková	18
Characteristics of Mechanically Fastened Joints of Single-Layer Bitumen Sheets	
T. Petříček, J. Plachý, P. Kacálek and R. Smolka	27
Compare of Experimental and Numerical Evaluation of Structure with Application of Reflective Insulation	
J. Kalánek, L. Šteffek and M. Ostrý	34
Modern Lightweight Structures	
Z. Vaník and M. Magura	42
Experimental Investigation of the Tensile Properties of Ventilated Facade Cladding with Bonded Joints	
P. Liška, J. Šlanhof, B. Nečasová and B. Kovářová	50
Dependency Analysis of Selected Thermal Properties of Reinforced Bitumen Sheets for Waterproofing	
J. Plachý, J. Vysoká, J. Šulistová and R. Vejmelka	60
Designing and Testing of the Recycled Vegetative-Retention Layer of the Vegetative Upper Skin of the Pitched Roof	
K. Necadova, P. Selník, M. Mohapl and H. Bedliva	67
Gluing as a Type of Stabilization Flat Roofs	
M. Bogárová and J. Stodůlka	77
Graphic Survey and Analysis of the Outer Walls and Floor Plan of the Royal Corpus Christi College-Seminary in Valencia	
C. Lerma, Á. Mas, E. Gil, J. Vercher and M. Galiana	84
Impact of Hydrophobic Additives on Properties of Clay Plaster	
B. Lišková, P. Jelínek and M. Ostrý	92
Measuring the Thermo-Technical Parameters of Autoclaved Aerated Concrete	
A. Struhárová	100
Nanomaterials, Nanocomposites Uses in Construction	
M. Ledererová	108
Optimization of Re-Mixing Recyclated Concrete Aggregates	
V. Venkrbec	116
Modern Stucco Elements	
A. Holešovská	124
Risk Analysis of Foundation Structures According to the Method of Founding	
M. Bilanič, P. Vlček and K. Kubečka	132
Stone in the Restoration of Architectural Heritage - Deterioration of Stone Structures Caused by Humidity	
P. Pauliny	140
The Assessment of Reaction to Fire of Crushed Straw	
J. Teslík, M. Vodičková and K. Kutilová	148
The Influence of Additional Insulation of Facades to their Aesthetic Devaluation by Vegetation of Algae, Fungi and Cyanobacteria	
V. Kučeriková, D. Donová and D. Kubečková	156

Verification of Sealing Possibilities of Cement – Based Structures without Additional Surface Treatment	
J. Šlanhof, B. Nečasová, P. Liška and M. Šimáčková	164
Understructure of Passive Houses in Terms of Materials	
K. Kubenková and M. Jašek	172
The Operational and Environmental Consequences of the Polystyrene Insulation Disposal	
J. Pasek, M. Casensky and J. Stransky	180
Construction Details from Secondary Raw Materials	
R. Smolka, J. Plachý, P. Kacálek and T. Petříček	188

Chapter 2: Indoor Environment and its Hygienic Aspects

Analysis of the Relationship of the System “Operationally Efficient Building – Indoor Environment Quality – User”	
J. Pasek, I. Matouskova, P. Ort, V. Chlubna, K. Paskova, M. Cupal, L. Kolarova, D. Tvrznikova and J. Horak	199
Architecture Indoor Environment as a Healing Factor of Depression and Seasonal Affective Disorder	
G. Szántová and M. Rychtárikova	210
Indoor Environment Influenced by Radiant Effect of Floor Heating	
M. Budiaková	218
Latex Paint Influence on the Oriented Strand Boards and the Indoor Climate	
T. Bečkovská, L. Vacková and V. Tichomirov	226
Mold Growth Risk Analysis on the Surfaces of an Organic Building Structure Based on <i>In Situ</i> Monitoring	
D. Bečkovský, F. Vlach, J. Vitík and E. Šuhajdová	235
Movement of CO₂ Concentration in the Room	
M. Vodičková, Z. Jaroň and V. Šípková	243
Quantitative Microbiological Aspects of the Indoor Environment	
L. Frič, I. Sýkorová, E. Velísková and O. Rubinová	251
Reduction of Environmental Stress through Spatial Arrangements and Different Choices of Body Positions in Indoor Environment	
V. Kotradyová and E. Vavrinský	259
Influence of Orientation of Building on Indoor Conditions in a Roof Truss	
L. Sibilla, M. Vlček, K. Struhala and P. Kříž	267
Potential of Vegetation in Improving Indoor Thermal Comfort and Natural Ventilation	
F. Szkordilis and M. Kiss	278
Acoustic Analysis of Double Transparent Facades in Bratislava	
D. Urbán and P. Tomašovič	288

Chapter 3: Energy Performance of Buildings

The Use of a Mathematical Model for the Management and Distribution of Heat	
P. Komínek and J. Hirš	299
The Influence of Thermal Bridges on the Energy Need for Heating after Renewal: A Case Study	
R. Mend'an and M. Pavčeková	307
The Impact of Balcony Glazing on the Selected Building Envelope	
Z. Perina, H. Sevcikova, R. Fabian, M. Halirova and E. Rykalova	315
The Effect of Thermal Bridges on Energy Balance of Wood Frame Houses	
T. Varga and R. Ingeli	323
The Applicability of Existing Methods for Testing the Base Layers of ETICS	
M. Novotny	331
Added Convex Windows for Improving the Energy Balance	
A. Kerekes and A. Zold	339
Analysis of Energy Consumption in Building with NZEB Concept	
R. Ingeli and M. Čekon	347

Spreading of Temperature Field Caused by Microwave Radiation M. Procházka and J. Sobotka	355
Analysis of the Internal Insulation of Renovated Building S. Baďurová, J. Jošt, F. Bahleda and J. Ďudák	363
Analysis of Thermal Performance of Energy Storage System M. Jurigová, M. Minarova and I. Chmurný	371
Annual Analysis of Boundary Conditions on Air Flow through Building Envelope M. Horáčková	379
Application of Data Sets Obtained from the Detached Experimental Weather Station in Conditions of Real Building D. Štaffenová, P. Juráš and P. Ďurica	387
Assessment of Energy Efficiency in Different Façade Solutions J. Vercher, E. Gil, C. Lerma, Á. Mas, M. Vidal and F. Cubel	395
Contemporary State and Development of a Concept of Passive House M. Kraus, P. Bednářová and K. Kubečka	403
The Effect of the Vegetative Roof Construction and the Influence of the Effect of the Designed Air Gap on the Thermal Stability in the Testing Building K. Necadova, P. Selnik, M. Majsnier and H. Bedliva	411
Development of a Mathematical Model to Find the Best Solutions for the Refurbishment of Energy-Efficient Buildings R. Leuck	421
Heat Thermal Transmittance of Log Wall P. Řihák and P. Školník	429
High-Tech Solutions for Building Retrofit: Investigation of Window Systems with Vacuum Glazing O. Proskurnina, U. Pont, M. Schuss, C. Sustr, E. Heiduk, P. Schober and A. Mahdavi	437
Influence of External Surface Resistance and Thermal Insulation Level on Energy Need for Cooling I. Chmurný	445
Influence of Structural Design of Balcony Panels on the Course and the Size of Thermal Bridges M. Lavický, Š. Karlík and J. Pěněčík	453
Mechanically Fastened Single Casing Roof in Terms of Building Physics J. Stodůlka, L. Matějka, J. Plachý and M. Bogárová	461
Nearly Zero-Energy Buildings & Buildings Built with Industrialized Technology: The Case of Hungary A. Talamon, V. Sugár and F. Pusztai	469
Obtainable Method of Measuring the Solar Radiant Flux Based on Silicone Photodiode Element M. Čekon, R. Slávik and P. Juras	477
Optimalization of the Heat Pump Design in the Phase of the Evaporator Selection P. Vlček, M. Formánek, P. Tomáš and S. Jobánek	485
Overhead Reduction or Energy Efficiency Measures K. Severnyak	493
Dependence of the Shape of the Temperature Field around Basement Structures on the Properties of Surrounding Soils P. Kacálek, J. Plachý, R. Smolka and T. Petříček	503
Energy Consumption for Heating Considering Interior and Exterior Conditions in Production Buildings D. Katunský, J. Katunská and M. Zozulák	511
Operative Temperature Predicting of a Room in Summer: An Approach for Validating of Empirical Calculation Models R. Slávik, M. Čekon, P. Oravec and R. Kolář	519
Numeric Thermal Bridges Simulation: Approaching Optimized Usability for Sloped and Rounded Shapes T. Kornicki, C. Volko, M. Kornicki and U. Pont	527
Simulation of Summer Thermal Stability and Comparison with Measurement L. Šteffek, J. Kalánek and M. Ostrý	536

Summer Thermal Stability of a Passive House in Moravany - The Czech Republic and Thermal Storage Mass M. Němeček and M. Kalousek	544
Usage of Raspberry Pi for Temperature and Relative Humidity Measurements and Comparison with HAM Simulation P. Juras and R. Slávik	552

Chapter 4: Hygrothermal Performance of Buildings

Analysis of Thermal – Moisture Problems in Massive Wooden Sandwich Structures J. Dohnal and J. Pěňčík	563
Diffusion of Water Vapour through the Damaged Light Weight Wooden Wall M. Uvizlová, T. Bečkovská, L. Vacková and V. Tichomirov	571
Hygrothermal Properties of Steel Fiber Reinforced Concretes B. Nagy and D. Szagri	579
Initial State Sorption Measurements A. Lakatos	589
Simulation and Measurement of Hygrothermal Behaviour of Newly Developed Plasters J. Hroudová, M. Sedlmajer, V. Novák and J. Zach	598
The Effect of Moisture and Relative Humidity on Oriented Strand Boards Properties L. Vacková and D. Bečkovský	606
Vaporization Box for Monitoring of Moisture Generation Depending on the Temperature and Relative Humidity R. Kolář and R. Brzoň	614

Chapter 5: Ventilation of Buildings

Analysis of Natural Ventilation Systems in Schoolrooms M. Budiaková	625
Dust Analyses in Ventilation Ducts K. Vyhřídlová, P. Vlček, O. Rubinová and J. Bernard	633
Experimental Assessment of the Influence of Outlet Geometry on the Airflow and Temperatures in the Ventilated Facade Cavity E. Šagát, L. Matějka and J. Pěňčík	641
Optimization of Air Distribution of Social Hall P. Vojkůvková, O. Sikula and T. Kral	649
Risk Assessment of Airtightness of Building Envelope M. Kraus, P. Bednářová and K. Kubečka	657

Chapter 6: Daylighting

Annual Daylight Condition in Bratislava M. Fabian, D. Janal and S. Darula	669
Errors of <i>In Situ</i> Illuminance Measurements M. Hlásková, L. Gábrová and F. Vajkay	676
Testing of Illuminance Meters L. Prokopová, S. Darula and D. Bošová	684
Architectural Models for Measurement of Daylight Factor D. Bošová and L. Prokopová	692
Insolation of Interiors: The Dead Angle Analysis S. Darula and M. Malíkova	699
The Influence of Selected Type of Daylight Device on Horizontal and Vertical Internal Illuminance L. Maňková, P. Hanuliak and P. Hartman	707

The Effect of Colored Surfaces and Tinted Window Glazing on Daylight Spectral Characteristics and Illuminance Levels in Deep Space Rooms and its Evaluation for Human Visual and Biological Response	
P. Hartman, L. Maňková and P. Hanuliak	715
Measurement and Calculation of Luminous Characteristics of Photovoltaic Glazing Samples	
P. Šujanová and J. Hraška	724
Comparative Evaluation of Daylighting Simulation Programs	
L. Gábrová, M. Hlásková and F. Vajkay	732
Implementation of Simulation-Based Virtual Sensors Using Radiance and Java	
V. Jain and A. Mahdavi	740

Chapter 7: Sustainable Buildings and Environmental Assessments

Green Building – Towards Sustainable Architecture	
B. Bielek	751
LCA of Fibre Flax Thermal Insulation	
K. Struhala, Z. Stránská and J. Sedlák	761
Facades with Photovoltaic Elements: A Review	
J. Hraška	770
Cool Roofs vs Solar Systems	
D. Kassai-Szoó and A. Zöld	779
Decreasing Negative Influence of Under-Flow Rainwater Inverted Green Roofs on Passive Houses, Using Accumulating Hydrophilic Mineral Wool Panels	
P. Vacek and L. Matějka	786
Extensive Roof Green in Central European Climate	
M. Kravka, M. Daněk and R. Rabenseifer	795
Exploitability of Renewable Resources in Administrative Buildings	
J. Šibal and M. Kalousek	803
Effect of Vegetation on Wind-Comfort	
F. Szkordilisz and A. Zöld	811

Chapter 8: Engineering Management in Architecture and Construction

Bridging the Gap between Systems Controls and Architectural Design	
B. Rader and A. Mahdavi	821
Toward Visual Accessibility in the Built Environment: The ViDeA Project	
M. Maringer, D. Wolosiuk, N. Hauck, U. Pont, C. Vogelauer, E. Fürst, F. Buser and A. Mahdavi	829
Effort and Effectiveness Considerations in Architectural Design: Two Case Studies of Architectural Design Studios	
U. Pont, S. Swoboda, A. Jonas, K. Tavoussi and A. Mahdavi	836
The Issue of Escape Routes in the Setting up Additional Kindergarten in the Existing Elementary School Building	
M. Rusinová and J. Šlanhof	845
