

Table of Contents

Preface, Conference Scientific Committee, Organizing Committee

Chapter 1: Materials and Structures in Mechanical Engineering

Sandwich Roof of the Bus – Fatigue and Strength Tests K. Doubrava and C. Novotný	3
Application of Indentation Method for Quality Control of Processing of Ceramic Details V.V. Kuzin, S.N. Grigoriev and S. Fedorov	7
Impacted Object Kinematic L. Pešík and O. Kohl	11
Measuring Device for the Cutting Parameters Monitoring during Drilling A. Lufinka and J. Votoček	15
Environmental Conditions Effect for Adhesive Connections in Glass Structures K. Machalická and M. Eliášová	19
Clinched Joint Tensile Test P. Malý, F. Lopot, V. Dynybyl and J. Sojka	23
Influence of Coating on the Poisson's Ratio of Woven Fabrics D. Šimić Penava, Ž. Penava and M. Tkalec	27
Non-Destructive Measurement of Plastic Deformation under the Extreme Environments R. Pernicová and J. Zeman	31
Experimental Verification of Vibration Reduction of the Steel Platform for Two Limestone Sorters J. Šmejkal and F. Plánička	35
Solid Particle Erosion of Selected HVOF Sprayed Coatings Š. Houdková, Z. Česánek and P. Polach	39
Testing of Space Frames Made of Composite Materials A. Potěšil, A. Lufinka and P. Horník	47
CFRP Fuselage Panel Behavior Monitoring Using Fibre Optic and Resistance Sensors and Optical Contactless Measurements R. Růžek, M. Kadlec, K. Tserpes and E. Karachalios	51
Experimental Analysis of Planetary Transmission Load Sharing O. Berka, M. Dub, F. Lopot and V. Dynybyl	57
An Experimental Analysis of Bending Behavior of Sandwich Constructions for Transport Industry L. Fojtl, S. Rusnáková, M. Žaludek and V. Rusnák	61
3-D ESPI Measurements Applied to Selected Engineering Problems R. Halama, L. Horňáček, L. Pečenka, M. Krejsa and J. Šmach	65
Optical Investigation of Component Made by FDM Technology M. Jurčíšin, M. Blažo and J. Slota	69
Experimental and Numerical Analysis of Stress and Stick-Slip Effect of the Test Stand M. Petřů, L. Ševčík, P. Srb and R. Kovář	73
Dynamic Pressure Measurement and Uncertainty Analysis Using a Piezoelectric Transducer for a Combustion Engine A. Bąkowski, L. Radziszewski and M. Żmindák	77
Long-Term Measuring of Loadings in a Real Operation of Structures V. Chmelko and M. Šulko	83
Torsional Characteristics Measurement of a Gearbox M. Dub, O. Berka, F. Lopot, F. Starý and V. Dynybyl	87
Enhanced Frequency Response Function Technique as Tool for Mode Separation in Experimental Modal Analysis R. Huňady and M. Hagara	91
Testing Equipment Location on Springing Base Plate O. Kohl and L. Pešík	95

Experimental Analysis and Optimization of Vibrations of a Clamping Device by Using Hyperelastic Elements	
M. Petrů, R. Kovář, T. Martinec, P. Srb, A. Lufinka and P. Kulhavý	99
Hydraulic Exciter Control for Shock and Vibration Testing	
J. Petřík and A. Lufinka	105
Verification of the Geometric Parameters of the Ring-Core Method	
P. Šarga, F. Menda and F. Trebuňa	109
X-Ray Diffraction and Barkhausen Noise Diagnostics of Thick Welds Prepared by Metal Active Gas and Laser Welding	
K. Kolařík, N. Ganey, K. Trojan, O. Řídký, L. Zuzánek and J. Čapek	113
Inverse Hole-Drilling Method for Residual Stress Investigation	
J. Vaclavík, S. Holy, J. Jankovec, P. Jaros and O. Weinberg	117
Residual Fatigue Lives of Steam Turbine Blades	
M. Balda and O. Červená	121
Residual Stress Analysis of Austenitic Steel Designed for Nuclear Energetics in Surface Layers	
A. Czan, M. Šajgalík, A. Martikan and V. Kuzdak	125
Shear Properties and Modulus of 3D Glass Fibre Reinforced Polyester Thermoformed Composite	
I. Černý, L. Remar and M. Černá	129
Demoulding of Tires from Segmented Mould	
E. Hnatkova and Z. Dvorak	133
Numerical Model of the Static Loading of a Stitched Seam in the Composite Cover of Car Seat	
P. Kulhavý, N. Kovalova and J. Vosáhl	137
Analysis of Mechanical and Impact Properties of Prepreg Composites under Elevated Temperature	
S. Rusnáková, L. Fojtl, M. Žaludek, A. Čapka and V. Rusnák	141
Low Velocity Impact on Fiber Reinforced Geocomposites	
S. Samal, D. Reichmann, I. Petrikova and B. Marvalova	145
Strength Determination of Composite Flexible Joint	
F. Sedláček, V. Lašová and R. Kottner	149
Experimental Analysis and Study of the Shock Absorption of Carbon Composite	
M. Petrů, L. Ševčík, A. Lufinka and M. Syrovátková	157
Bond Joint Analysis of Thermoplastic Composite Made from Stacked Tailored Blanks	
J. Šedek, R. Hron and M. Kadlec	161
Strain and Deformation of Fiat 500 L Tailgate Made from Thermoformed Polyester Composite in Comparison with Steel	
I. Černý, M. Jersák and M. Černá	169
Applications of Multi-Level Method of Stress-Strain State Analysis in Ceramic Tools Design	
V.V. Kuzin, S.N. Grigoriev and M. Fedorov	173
Localized Corrosion in Alloy Steel of Steam Turbines	
M. Cerny	177
Computer Aided Evaluation of the Stress Tensor in the Two-Dimensional Photoelasticity	
F. Fojtík, P. Ferfecki and Z. Paška	181
The Environment Influence on Bladed Steel during Operational Conditions	
J. Janoušek, J. Strejcius and S. Hřeben	185
Effect of Thermal Loading on Stresses in Defective Surface Layer of Ceramics	
V.V. Kuzin, S.N. Grigoriev and M. Portnoy	189
Load Capacity of Dynamically Loaded Gears with Different Case-Hardened Depth	
K. Petr	193
Plastic Behavior of Steam Turbine Low Pressure Part	
F. Straka, P. Pánek and P. Albl	197
Mechanical Concepts for Simulation of Nonlinear Attachment of Engine on Aeroelastic Demonstrator	
J. Čečrdle, J. Maleček, V. Hlavatý and P. Malínek	201
Nonlinearity in Oscillations of Large Displacement Pendulum	
M. Hagara, R. Huňady and M. Pástor	205

Chapter 2: Building Structures and Materials

Impact of Increased Temperature on Cohesiveness of Textile Glass Reinforcement with UHPC Matrix	
T. Bittner, J. Čech, P. Bouška, M. Vokáč and Š. Nenadálova	211
Volumetric Changes of the UHPC Matrix and its Determination	
D. Čítek, M. Rydval and J. Kolísko	215
Stability of Glass Structural Elements Subjected to Bending	
I. Horčíčková and M. Eliášová	219
Influence of Compressed Area on Capacity of Headed Studs Used as Wall/Slab Reinforcement	
J. Fornůsek, R. Lovichová, J. Zatloukal and P. Konvalinka	223
Investigation of Bending Capacity of Concrete Elements Strengthened by Textile Reinforced Concrete	
O. Holčápek	227
Pulse Method Used for Non-Destructive Assessment of Glued Laminated Timber Beams	
P. Klapálek, L. Melzerová and T. Plachy	231
CFRP Strengthening of Damaged Stone Masonry Column	
J. Kubat	235
Testing of 3-Dimensional Stabilizing Elements for Protection of Slopes: Possibilities of <i>In Situ</i> Testing	
M. Lidmila, Z. Prošek, J. Trejbal and V. Nežerka	239
Creep of GLT Beams during Four-Point Bending Test	
L. Melzerová, M. Šejnoha and P. Klapálek	243
Clay Building Materials and their Properties	
I. Žabičková, T. Otcovská and P. Padevět	247
Creep of the Four Month Old Cement Paste with Content of Fly Ash	
P. Padevět and P. Bittnar	251
The Development of the Fine-Aggregate Concrete Strength with Recycled Cement Powder	
T. Pavlů and M. Šefflová	255
Experimental Verification of Demountable Precast Column System	
A. Polák	259
Assessment of Serviceability of the Footbridge Across Opatovska Street	
V. Sana	263
Study of the Mechanical Properties Development of Concrete Containing Fine Recycled Aggregate	
M. Šefflová and T. Pavlů	267
The Experimental Determination of One-Axial Tensile Strength of the Textile Reinforced Concrete	
F. Vogel, J. Machovec and P. Konvalinka	271
Study of Fine-Grained Composites Exposed to Sulfuric Acid and Sodium Sulfate	
M. Výšvařil and M. Rovnaníková	275
Non-Linear Numerical Analysis of Unreinforced Masonry Column and Masonry Column Reinforced by FRP Wrapping	
A. Maroušková	279
Critical Force Analysis of Thin-Walled Symmetrical Open-Section Beams	
D. Šimić Penava and M. Baniček	283
Components of Fracture Response of Steel Fibre Reinforced Concrete Specimens	
I. Havlíková, P. Frantík, P. Schmid, H. Šimonová, V. Veselý, A. Abdulrahman and Z. Keršner	287
Compressive Strength of Lime-Based Mortars Reinforced by Micro Glass Fibers	
J. Trejbal, L. Kopecký and Š. Potocký	292
Destructive and Nondestructive Evaluation of Frost Resistance of Cement Pastes with Fly Ash	
O. Zobal, P. Padevět and T. Plachy	296
Evaluation of the Railway Substructure in the Turnout with the Movable Frog by Help of Decomposition	
L. Pazdera and J. Smutny	300

Detection of Cracks on Small Specimens Based on Modal Analysis T. Plachy, T. Svoboda, P. Tesárek and M. Polak	304
An Experimental Analysis of the Real Dynamic Behavior and the Reliability Verification of an Existing Footbridge E. Fanfulová, T. Plachy and M. Polak	308
An Experimental Analysis of Grandstand Vibrations Caused by Crowd of Spectators during Two Football Matches M. Verner, M. Polak and T. Plachy	312
Use of Materials with Pozzolanic Properties as Partial Cement Replacement in Development of Heat Resistant Composite M. Jogl, J. Kořátková and P. Reiterman	316
Composite Middle Lamella Hardness and Young's Modulus of Artificial Dried Spruce Wood by Nanoindentation Z. Prošek, J. Topič, P. Tesárek, V. Nežerka and V. Králik	320
Mechanical and Durability Properties of Selected Types of Sandstones P. Reiterman and O. Holčapek	324
Measurement of Volume Changes of High Performance Cement Based Composites K. Kolář, J. Litoš, Z. Bažantová and P. Reiterman	328
Cement Composite Reinforced with Synthetic Fibers: Comparison of Three-Point and Four-Point Bending Test Results J. Topič, J. Bartoš, L. Kopecký, K. Šeps, Z. Prošek and J. Trejbal	332
Use of Open Source DIC Tools for Analysis of Multiple Cracking in Fiber-Reinforced Concrete V. Nežerka, J. Antoš, T. Sajdlová and P. Tesárek	336
The Identification of Cracks Formed during the Spontaneous Drying and Hardening of Alkali-Activated Slag for Different Curing Times L. Topolář, H. Šimonová and L. Pazdera	340
Optical Fiber Sensor for Timber Structure Monitoring J. Včelák, P. Kuklík, R. Zelený, L. Velebil, M. Dvořák and J. Demuth	344
Effect of Reinforcement on Flexural Strength and Ductility of Gypsum-Based Composites with Recycled Wires from Automobile Tires P. Tesárek, J. Trejbal, J. Topič, Z. Prošek, V. Nežerka and M. Lidmila	348
Identification of Glass Alloy Elastic Constants Using Rod Samples K. Vítek	352

Chapter 3: Biomechanics and Biomaterials

Locking Compression Plate for Distal Tibia Fractures G. Theisz, K. Frydryšek, F. Fojtík, L. Pečenka, T. Kubín, M. Sadilek, J. Kratochvíl, J. Demel, R. Madeja and L. Pleva	359
Micromechanical Analysis of Dental Implants and their Surface Modification A. Jíra and F. Denk	367
Influence of Dental Caries for Dental Materials and their Micromechanical Properties L. Řehounek, A. Jíra and F. Denk	371
Measurement of the Temperature and Pressure Characteristics of the Car Seats - Relationship between Humans R. Martonka and V. Fliegel	375
The Simulation of Collision of Standing Passenger with Rigid and Deformable Floor S. Spirk	379
Inflation Test of Developed Biological Composite Reinforced by Polyester Mesh J. Veselý, H. Chlup, M. Krajíček and R. Žitný	383
