

Table of Contents

CFD Analysis of Wind Effects on High-Rise Buildings Complex "Panorama City in Bratislava"	
R. Antal and N. Jendzelovsky	1
Numerical Analysis of Deformations of the Shallow Square Foundations with Variable Relative Stiffness	
L. Hrustinec and J. Sumec	5
The Effects of Earthquake on the Cylindrical Tanks	
N. Jendzelovsky and L. Baláž	10
Seismic Assessment of Unreinforced Masonry Buildings	
J.A. Avila-Haro, A.S. Elshoura and J. Maca	16
Laboratory Tests of RC Beams Strengthened Against Flexure and Shear by the Use of SRP Overlays	
R. Krzywon	22
Stable Paths in the Postbuckling of an Imperfect Slender Web Loaded in Compression	
J. Havran and M. Psotný	28
Comparison of Cement Pastes Creep with Admixtures of Fly Ash	
P. Padevĕt and P. Bittnar	34
Post-Tensioned Composite Bridge: Reliability-Based Optimization of Selected Design Parameters	
O. Slowik, D. Lehký, M. Šomodíková and D. Novák	38
Historical Covered Timber Bridge in Gelnica near Station	
I. Balaz, Z. Kamenicka and Y. Kolekova	44
Stability Analysis of an Imperfect Slender Web Subjected to the Shear Load	
M. Psotný	52
Numerical Analysis of the Influence of the Geometrical Parameter of the Flat Slabs Connected with Wide Beams	
M. Wieczorek	58
Probability Aspects in Foundation Plate Design	
K. Tvrďa	64
A New Elasto-Plastic Critical State Model RU+MCC for Overconsolidated Soil	
R. Uliniarz	68
An Experiment Focused on Fans Behaviour and Induced Grandstand Vibrations during a Football Match	
M. Verner, T. Plachy and M. Polak	75
Distribution of Forces in Reinforcing Bars in Slab-Column Connections of RC Structures	
B. Wieczorek	79
An Experimental Analysis of Large Vibrations of Selected Cable-Stays on a Cable-Stayed Bridge	
M. Polak, T. Micka, T. Klier, T. Plachy and M. Simler	85
Analysis of Dynamic Parameters of Rail Fastening by Born-Jordan Transformation	
J. Smutny and L. Pazdera	89
Bearing Capacity of a Scarf Joint	
P. Fajman and J. Maca	94
Cable-Membrane Structures - Numerical Analysis and Practical Application	
M. Huttner, J. Maca and P. Fajman	99
Global Buckling of Frames with Laced Compression Members	
M. Kovac and Z. Vanik	103
Microstructure of Unburned Clay and its Shrinkage during Drying	
T. Otcovská and P. Padevĕt	109
Self-Supporting Form for the Production of Prestressed Concrete Prefabricates	
L. Snirc, M. Nagyova and J. Ravinger	113
Viscoelastic Effects in Solid Phase Continuous Media - Stress-Strain Relations	
I. Veghova and J. Sumec	121

Utilization of Biodynamic Models of Human Body in Dynamic Analysis of Footbridges V. Sana	127
Impact of Works Parameters on Resistance of Fasteners D. Dudek and P. Knap	131
Initial Experimental Test of the Port Bridge for Structural Health Monitoring M. Venglar, M. Sokol, R. Aroch and J. Budaj	135
Penetration Testing of Liquefaction Potential of Ashes due to Seismic Load I. Slavik	140
Experimental Tests of the Load-Bearing Capacity of the Bottom Reinforcement Bars Passing over the Column B. Wieczorek	146
Parameters of Acoustic Emission Signals Obtained During the Setting and Hardening of Concrete Mixtures with Different Water-Cement Ratio L. Topolář, K. Timcakova, P. Misák and L. Pazdera	152
Experimental Research of Destruction of Internal Field of a Slab-Column Structure Caused by Overload M. Wieczorek	157
Time-Dependent Response of Mass Continuous Solid Phase Media by Integral Form of Constitutive Equations - Mathematical Modeling J. Sumec and L. Hrustinec	163
From Fracture Experiments to Advanced Design and Assessment of Precast Structural Members D. Novák, D. Lehký, O. Slowik and L. Řoutil	167
Modeling of Load Test of Piles L. Prekop	175
Reinforcement Corrosion and its Effect on Bond Behaviour I. Holly, K. Gajdosova and R. Sonnenschein	179
Numerical Fracture Analysis of Foamed Concrete Beam Using XFEM Method M. Kozlowski, M. Kadela and M. Gwozdz-Lason	183
Analysis of the Natural Frequencies of a Plexiglass Plate K. Zabakova Vrablova, N. Jendzelovsky and L. Konecna	187
Human-Induced Loads on Grandstands as Non-Stationary Gaussian Processes O. Rokos and J. Maca	191
Three-Point Bending Test Evaluation of Concrete Specimens by Non-Traditional Analysis of Acoustic Emission Method L. Pazdera, L. Topolář, T. Vymazal, P. Daněk and J. Smutny	198
The Influence of the Wind Flow Around the Free Ends of High-Rise Building on the Values of External Wind Pressure Coefficients O. Hubova and L. Konecna	203
Capability of Two Equation $k-\omega$ Turbulence Model to Predict Pressure Values on “Quarter-Circular” Object J. Kralik, O. Hubova and L. Konecna	209
Nonlinear Probabilistic Analysis of the Failure Pressure of NPP Shielding Plate J. Kralik, J. Kralik Jr., M. Klabnik and A. Grmanova	214
Concrete Carbonation Monitoring by Nonlinear Ultrasonic Spectroscopy M. Matysik and K. Timcakova	222
Analysis of Bearing Systems of Tower Blocks D. Meri and O. Ivankova	226
An Influence of a Shape of a Flaw on a Value of Stress on Beams J. Kovacikova, O. Ivankova and D. Drobny	230
