

Preface

The aim of the 3rd International Conference on Electrical and Electronics Engineering (ICEEE 2016, April 11-12, 2016, Istanbul, Turkey, sponsored by Gazi University) has been to unite academic scientists, engineers, industry researchers for exchanging their experiences and research results and for discussion of the encountered practical challenges. We hope all participants got valuable experience in the process of communication during the conference.

The proceedings by results of ICEEE 2016 contain the selected papers from the conference which were presented at the conference orally or via poster sessions. Each paper was peer-reviewed by international reviewers who were drawn from the organizing and advisory committee members as well as other external reviewers invited from all over the world. The proceedings are divided into topics which are related to mobile communication and wireless technology; antenna design and microwave engineering; signal transferring, analysis and processing; image processing and electronics and electrical engineering.

On behalf of the organizing committees, we would like to thank the organization staff, the members of the program committees and reviewers. They have worked very hard reviewing papers and making valuable suggestions for the authors to improve their work. We also would like to express our gratitude to the external reviewers, for providing extra help in the review process, and the authors for contributing their research results to the conference.

We look forward to seeing all of you next year at ICEEE.
