

Preface

The 4th International Conference of Mechanical Engineering is a traditional event, with a high scientific level, organized by the Faculty of Mechanics, University of Craiova.

Since the first edition, organized in 2010, the stated purpose of the conference was to bring together researchers and specialists from the country and abroad, so that the ICOME conference has become the place where the scientists, researchers and industrial professionals changes their experiences, ideas and the latest developments activities in the field of mechanical engineering.

This goal has always been achieved at the conference sessions with a considerable number of participants, the interest being equally for the specialists from the country as well as for those from Europe, USA and Japan.

Like all editions, at the opening ceremony, as invited speakers, the guests from the United States, the Academy of Technical Science of Romania and from local business companies, presented the latest achievements in the field mechanical engineering.

In this way, we would like to express our gratitude to all authors for their papers and participation on different subjects, covering the fields of Mechanical Engineering, and to the reviewers for the time, effort, and for sharing their knowledge in order to improve the presentations' quality.

With best regards,
