

Table of Contents

Preface

Extraction of Maximum Power of Organic Photovoltaic Generator Using MPPT Technique G. Touhami, L. Sliman, A.F. Zohra, H. Abdelkader and D. Khalil	1
Thermophysical Characteristics of a Cold Compressed Granular Medium: An Experimental Investigation K. Hadjadj, L. Hachani and M. Filali	7
Experimental Analysis of the Degradation of PV UDTS-50 W Modules Exposed to Extreme Weather Conditions in a Saharan Environment L. Slimane, G. Touhami, A.F. Zohra and T. Touahri	21
Advanced Control of Doubly Fed Induction Generator for Wind Power Systems: Optimal Control of Power Using PSO Algorithm I. Boussaid, A. Harrouz and P. Wira	29
Energy and Exergy Analysis of the Performance of a Double Effect LiBr-H₂O Absorption Chiller Using the Adapted Characteristic Equations Method G. Belkacem, B. Boumeddane and G. Mahmoud	43
Modeling of a Photovoltaic Array with Maximum Power Point Tracking Using Neural Networks M. Bouzidi, H. Abdelkader, S. Mansouri and V. Dumbrava	53
Optimal Sizing of Passive Filters for Typical Industrial Power Systems G. Hachemi, H. Abdelkader and D. Rachid	65
Renewable Energy Sources Scheduling Approach for Windfarm Layout Optimization by Using Ant Lion Optimization Algorithm T. Nawal, B. Bachir, C. Saliha, H. Abdelkader and R. El-Sehiemy	79
