## Preface

## Chapter 1: Research and Design in Mechanical Engineering

|                                                                                                                                                                                                      |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Applying FEA and MBD Analysis for a Racing Car Conversion</b><br>J. Rishmany, M. Choucair and C. Lahoud                                                                                           | 3  |
| <b>Design and Topological Optimization of a Wheel Upright Using Finite Element Analysis</b><br>A.S. Eltanany, A.T. Hamada, K. Kadri, O. Al Hussaini and M. Alkhader                                  | 13 |
| <b>Design and Fabrication an Novel Orbital Welding Equipment</b><br>T.N. Thien, P.S. Minh, D.T. Trung and T.M.T. Uyen                                                                                | 23 |
| <b>Investigation of the Mechanical Properties of Recycled Cotton Denim Fabric</b><br>H.M. Haq, M.A. Azim, M.I. Islam, A. Rahman and M.I. Bijoy                                                       | 31 |
| <b>The Ultimate Strength of Deck Barge 270 Feet under of Global Load Using Numerical Simulation Method</b><br>A. Alamsyah, M.Z. Juliansyah, M.U. Pawara, R.J. Ikhwan, M.Z. Muis Alie and A. Ardianti | 45 |
| <b>Influence of the Residual Stress on the Critical Rotational Speed of Circular Saw Blades with Different Structures</b><br>Y. An and B. Li                                                         | 59 |
| <b>Numerical Simulation of Internal Sprays in a Constant Chamber Using Large Eddy Simulation Techniques</b><br>M. Kaewbumrung and C. Plengsa-Ard                                                     | 73 |

## Chapter 2: Mechatronics and Power Electronics

|                                                                                                                                                                                          |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Multipurpose Smart Bridge Health Monitoring System Using Arduinio Based Sensors</b><br>K.A. Latha, A. Navya, R. Prakash Raju, V. Poorna Chandar and K. Bharath Raj                    | 91  |
| <b>Smart Water Quality Monitoring System Using Arduino Based Sensors: A Practical Approach</b><br>K.A. Latha, K. Mahesh, T. Varadarajulu, P. Dharani Kumar, C. Bharat Kumar and K. Sadik | 101 |
| <b>Solar-PV Integrated Electric Vehicle Charging System with Bilateral Chopper</b><br>K.R. Prasanna, T.N. Kumar, M.S. Sankar, Y.C. Kumar, M. Snehalatha and N. Bhavana                   | 109 |
| <b>Design of an Automatic Transmitter Coil Positioning Adjustment System for Wireless Charging</b><br>N. Kasemsinthu, P. Jeebkum, C. Panya-Isara and C. Sumpavakup                       | 117 |

## Chapter 3: Building Materials and Coastal Engineering

|                                                                                                                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Effect of Sea Water on Concrete Using Artificial Clamshell Powder and Fly Ash Aggregates</b><br>W.A. Fistcar, D. Iranata, C.A. Prastyanto, J.J. Ekaputri, A.M. Hairudin, J. Agustina and Z. Rasyid | 127 |
| <b>Modelling Sand Wave Evolution and Migration in North Sea Using ROMS</b><br>L.P. Adnyani, S. Draper, H.W. An and L. Cheng                                                                           | 139 |
| <b>Performance of Modified Buton Asphalt with Marine Fuel Oil in Asphalt Pavement Mixtures</b><br>I.D.M.A. Karyawan, B. Anshari, I.P. Rahmatin, I.A.O.S. Sideman and M. Mahendra                      | 153 |

## Chapter 4: Structures and Infrastructure Engineering

|                                                                                                                                           |     |
|-------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>BIM Technologies in the Reconstruction of Architectural Monuments of Odessa</b><br>V. Surianinov, A. Pandas, A. Perperi and A. Perperi | 165 |
| <b>BIM Technologies in Ukraine: State and Development Prospects</b><br>M. Surianinov, D. Kirichenko, O. Chuchmai and M. Stashenko         | 173 |

|                                                                                                                                            |     |
|--------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Study of the Technical Condition of the Bridge Structure</b><br>Y. Otrosh, N. Rashkevich, I. Mamontov and O. Kuleba                     | 181 |
| <b>Development of a Numerical Model of the "Soil-Foundation-Building" System</b><br>R. Purdenko, R. Maiboroda, N. Rashkevich and Y. Otrosh | 191 |
