

Table of Contents

Preface, Organizers and Committees

Chapter 1: Road and Railway Engineering

The Calculation of the Supporting Stress of Track Plate in Ballastless High-Speed Rail Structure Y. Wang, Q.M. Gong and M.F. Li	3
The Study of Fatigue Life of Cold-Recycled Base Material Based on the Fracture Mechanics Method H. Zhang and Y. Zang	10
Experimental Study on Stresses Distribution under Embankment H.B. Xiao and G.L. Jiang	17
Research on Designing Optimum Asphalt Content of Asphalt Mixture by Calculation and Experimental Method W.F. Liu, H.M. Li and B.P. Tian	23
Impact of Subgrade Resilience Modulus on Heavy Load Asphalt Pavement Mechanical Properties T. Xiao, H.R. Pi and C.Z. Jin	28
Contrast Study on Prediction Models of the Post-Construction Settlement of Embankment in Saline Soil Area T.W. Lai and Q.Y. Zhou	32
Research on Prediction Method of Soft Soil Foundation Settlement X.M. Dong	36
Dynamic Response in ALF Aggregate Base Asphalt Pavement C.Y. Zhuang, A.Q. Shen and L. Wang	40
Two-Parameter Weibull Distribution Theory Testing Analysis in Fatigue Life of Asphalt Mixture J. Sun, J.M. Yu and H.S. Zhao	45
The Seismic Stability Numerical Analysis of Embankment High Slope with Different Filling J.L. Wu, Y.X. Zhang and N. Peng	49
Numerical Analysis of Highmay under the Traffic Load Y.M. Zhang and Z.H. Pan	55
Research on Load Transfer of Continuously Reinforced Concrete Pavement with Hollow Foundation X.B. Chen, X.M. Huang and J.H. Tong	60
The Analysis and Solvement of some Geotechnical Topics in Post-Disaster Reconstruction Highway H.J. Chai, C.L. Zhang, Y.W. Meng and H.P. Li	69
Numerical Simulation Study on Superposed Combined Exterior Protected Structure X.X. Yan, Z.M. Li and Y.H. Chu	73
Study on Stability of High Embankment with Strong Weathering Filling under Complicated Stress Conditions S.C. Liu	78
The Relationship between Deflection and Maximum Stress Distributed on the Layer Bottom in the Typical Semi-Rigid Bituminous Pavement Structure Z.Z. Zhao, K. Li and N. Zhang	85
Nonlinear Finite Element Research for the Rutting of Asphalt Pavement Base on Shear Stress Analysis Y. Dong, M.J. Peng, Y.Q. Ma and W. Feng	91
Effects of Ramp Spacing on Freeway Mainline Crashes Y.Q. Guo	95
Design Optimization and Safety Evaluation of Cross-Sea Bridge Barrier L. Fang, L. Zhang, S.M. Yan, N. Jia, M. Jing and L. Ma	100

Study on Temperature Field of Low Heat Accumulation Asphalt Concrete Pavement Z.Z. Li and J.G. Xie	108
Maintenance Technologies Research of High Speed Turnout H. Xu, P. Wang, D. Liu, J.H. Xu and R. Chen	114
Research on Calculation Model of Minimum Net Distance between Interchanges on Eight-Lane Expressway B.H. Pan and L.C. Kong	121
Evaluation on High Temperature Performance of Asphalt Mixture by Triaxial Dynamic Compression Test C.H. Wu	130
Effects of Design and Construction Factors on Continuously Reinforced Concrete Pavement Performance R. Fang and J. Chen	138
Mechanical Response Analysis of Heavy Traffic on Semi-Rigid Base Pavement Performance C.F. Yang, H.R. Pi, T. Xiao and C.Z. Jin	146
Testing Study and Numerical Analysis of Dynamic Compaction on the Red Sandstone Rubble Soil X.L. Kuang	151
The Study on Portable Falling Weight Deflectometer Based on the Elastic Half-Space Theory D.C. Feng, W.X. Zuo, Y. Zhao and P. Cao	156
Study on the Water Damage Resistance Performance of Micro-Surfacing G.X. Wu, M. Yu and W. Tan	162
Study on the Application of Plant-Mixed Hot-Regenerated AC in the Maintenance of Expressway X.Y. Zhang, D.Y. Sun and B. Lai	167
Research of the Low Temperature Crack Resistance for the Mineral Fiber Rein-Forced Asphalt Mixture L.H. Zhao, G. Xu and J. Zhao	172
Study on Highway Investment Decision under Uncertainty with Shackle Model Q. Xu, L.T. Geng and C.Z. Song	176
The Stopping Sight Distance Test for Freeway Based on the Operating Speed Y. Zhang	180
Calculating Method and Safety Evaluation of Highway 3D Available Sight Distance C. Zhang, S.W. Yang and M. Zhang	185
The Analysis of Temperature and Displacement Coupling in Freeze-Thaw Process of Soil S.G. Hou	192
Application Research on Uniform Design in Proportion of Compound Mineral Admixture Y. Li, L.J. Wang, H. Yin and M.Z. Chen	199
Research in Analysis of Asphalt Pavement Performance Evaluation Based on PSO-SVM K.Z. Yan and Z. Zhang	203
Coupled Dynamic Analysis and Verification of Vehicle-Road System H. Luo and B. Liang	208
Effects of Hydrated Lime on Consistency Properties of Asphalt Binders A.D. Mwanza, P.W. Hao and H.N. Wang	214
Research on Shear Strength for Asphalt Mixture by the Uniaxle Penetration Test Method Y. Cai	220
The Analysis of Causes and Treatment of Countermeasures for the Accident-Prone Section of Yu-Chang Freeway G.J. Ren and D.C. Zhang	226
Analysis of Temperature-Load Coupling Stress for Asphalt Overlay Using Three-Dimensional Finite Element Model Q. Yang, X.H. Yu and Q. Li	230
Theoretical Analysis and Simulation Study on Track Rigidity of Turnout L. Liu, Y. Xuan, L. Wang and J.L. Sun	235
Numerical Simulation of the Process of Partial Void Formation under Cement Concrete Pavement Slab X.C. Zhang, S.S. Liu, S.K. Hu and N. Zhang	241

Deformation Analysis and Engineering Practice of Post-Processing Method in Thick Filled Subgrade	
Y.C. Guo and H.T. Liu	247
Experimental Study on Asphalt Pavement Damage by Application of Acetate-Base Deicer	
Q.Y. Xiao, H.J. Wang, N.L. Li and C.L. Zhang	251
Research on the Efflux Angle to Emergency Escape Ramp of Mountain Roads	
B.H. Pan and R.J. Liang	257
Ballast Flying DEM Microscopic Analysis and Counteracting Measures	
G.Q. Jing, L. Gao and X.L. Sun	266
Study on the Axle Load Conversion Formula for Asphalt Pavement Based on Actually Measured Deflection Equivalent	
J.S. Sun, T. Xiao, C.F. Yang and J.C. Sun	271
Experimental Study on Shear Resistance and Water Retention of Graded Gravel Base	
W.J. Yuan and X.S. Wang	275
Experimental Study on Fatigue Characteristics of Asphalt Concrete in Bridge Pavement	
Y.L. Li and Y.Q. Tan	280
Research on Evaluation Models of Soft Foundation Treatment Technology of National Defense Highway	
X.R. Yang, L.Y. Zhang, H.C. Li and D. Ran	284
Contrastive Studies of Asphalt Pavement on Suction Exothermic Properties and Cooling Measures	
W.G. Li, Z.D. Han, Z.B. Lv and Y.H. Duan	290
Design Method for Highway Underground Trench Filter Layer in Loess Donga	
L.P. Liu	297
Experiment and Research of Using Fiber Bragg Grating to Monitor the Dynamic Response of Asphalt Concrete	
K. Li and J.G. Xie	301
Analysis of the Dynamic Response for Saturated Asphalt Pavement under Moving Vehicle Loads by Three-Dimensional Finite Element Method	
R.B. Ren, L.T. Geng and W.Y. Qi	305
Application of Comprehensive Evaluation of the Airport Site Selection	
D.L. Ding, L.C. Cai, X.L. Wang, B. Shao and Y. Zheng	311
Analysis of Concrete Pavements Characteristics of Oblique Distribution Forms of Prestressed Reinforcement	
H. Cai, F.S. Li and X. Li	316
The Research on the Anti-Icing and Pavement Performance of the Chloride-Stored Asphalt Mixture	
X.H. Zhao and X.D. Zhang	321
Research on the Rail Transit Station Spacing Based on Passenger Travel Choice	
Q.Q. Dai, Y.F. Li, F. Wang and Y. Wang	327
Analysis of the Mechanical Impact of High-Modulus Asphalt Concrete on Road Structure	
X.S. Wang, T.J. Chen and X.J. Ding	334
Application of Inverted Function to Alignment Optimization Design of Interchange Ramp	
C. Zhang, S.W. Yang and M. Zhang	340
The Application of Assets Evaluation in Analysis of Asphalt Pavement Maintenance Technology	
Y.T. Zhu and M.J. Lei	347
Test Analysis on Shear Resistance Performance between Rubber-Asphalt Waterproofing Adhesive Layers	
Z.Z. Li, J.H. Wu and X.Y. Song	352
Road Macula Analysis and Evaluation	
J.C. Sun and L.S. Wang	360
Study on Properties and Pavement Performance of Anti-Flaming and Warm-Mix SBS Modified Asphalt	
Y.C. Huang and Z.Y. He	367
Effects of Fluidity and Strength on Cement Mortar with Compound Mineral Admixture	
G.R. Luan, L.J. Wang and Y. Li	373
Wheel-Rail Multi-Point Contact Method for Railway Turnouts	
Z.W. Chen, L. Li, S.G. Sun and J.L. Zhou	378

Analysis Based on 3DGIS System for Channel Evolution W. Wang, D.P. Zhao and D.Q. Wang	382
Research on Dynamic Load Coefficient Based on the Airfield Pavement Roughness X.M. Zhang, L.L. Sun, C.F. Hu and Z.C. Sun	386
The Application of Stochastic User Equilibrium Model to Traffic Diverging during Highway Expanding Construction L. Jiang and Y.Q. Lang	391
A Method of Data Processing for Determining Shear Strength Parameters of Rock Z.R. Jia and J. Shi	397
Study of Load Spectra of the Jaozhou Bay Expressway Based on MEPDG L.Y. Guo, J.C. Wei and S.P. Cui	402
The Material and Mechanical Property of Heavy-Duty Prestressed Concrete Sleeper C.L. Hwang, C.T. Chen, L.S. Lee, L.A.T. Bui, B.S. Hou and H.Y. Hsieh	408
Application Researches on Lasso Steel Sheet Pile Based on Foundation Pit Support Close to Railway Bridge Z.C. Hu, K.W. Zhuang and F.C. Hu	414
Study on Preventive Measures of Labor Injury of Crew on-Board Based on the Management X. Zhang and A.L. Chen	418
Experimental Study on the Performances of Cement Stabilized Iron Ore Tailing Gravel in Highway Application J.S. Sun, Y.M. Dou, Z.X. Chen and C.F. Yang	425
Research on Ice and Snow Melting by Conductive Asphalt Concrete Y.Q. Yuan, D.Y. Gao, H.J. Shao and Y.D. Fan	429

Chapter 2: Transportation Planning, Construction and Operation Organization

Simulation and Analysis of the Variable Speed Limit Controls on Highway Maintenance B.Y. Shi, X.Y. Gao, Z. Ge and X.P. Ma	435
Study on City Road Network Reserve Capacity under Ice and Snow Condition Y.L. Ma, L.F. Han and Y.L. Pei	440
Construction Features & Existing Problems of High Speed Railway Passenger Stations in China S.L. Xia and H. Yang	445
Exploratory Research of Driving Fault-Tolerance of Road Traffic Devices: A New Traffic Safety Concept L.W. Hu, Y.L. Pei and M.R. Chen	449
Research on PDL Ticket Pricing in Light of Service Quality J. Liu, S.W. He and J.L. Jiang	453
Best Repairing Algorithm for Transportation Lifeline Network under Major Natural Disasters Z.J. Li, F.J. Chen and P.Y. Chen	458
Financial Analysis of Railway Construction Projects Based on Network F.B. Bai, R.H. Hou, H. Liu and J.M. Zhu	463
Effect of Obstacle on Evacuation Process for Mixed Pedestrians Dynamics Y.F. Wei, W. Shi and T. Song	471
Threshold Determination Based on Reliability of Road Service Level X.J. Zhao, Z.Q. Tang and M.J. Liu	475
Influence of the Moving Bottleneck on the Traffic Flow on Expressway Q.R. Li, Y.X. Pan, L. Chen and C.G. Cheng	480
Comprehensive Optimization Model of Stage Development about Marshalling Stations Y. Wang, L.J. Wang, T.W. Zhang and Q.D. Zhou	485
Study on Road Traffic Safety Evaluation Based on Improved Bayes Model Y.P. Li, J.L. Li, B. Li and L.W. Hu	489
Study on the Resultant Impedance Model and its Application for Hazardous Material Transportation C.X. Ma and Z.Z. Chen	494

Wagon Hours Saved by Transferring Wagons without Sorting Operations at Technical Station	
J.B. Xie, L. Gao and J. Zhang	498
The Correction Model of Webster Method for Intersection Delay	
H. Bai, K. Deng, N. Wang and Q.Q. Qiao	503
Research on Supply Chain Hybrid Competition and Channel Pervasion Effects in E-Commerce Age	
P.Q. Li	507
Spatial Analysis Based Urban Road Network Partition Method for Macroscopic Evaluation	
W.J. Zou, J.C. Weng, J. Rong and W. Zhou	512
Application of Access Management at Urban Intersection Safety Improving	
Y.W. Ren, S.R. Wu and B. Wang	518
Multi-Train Movement Simulation Research for Urban Rail Transit under Sudden Failure	
Z.Q. Wang	523
Evaluation Analysis and Optimization Design of Urban Road Traffic Condition Based on VISSIM	
X. Qiu, A.X. Zheng, Y. Zhu and B. Xu	531
A Method of Parameter Design for Passenger Train Line Plan Based on Multi-Agent Model	
X. Jiang, L.K. Wu and Y. Bao	535
Expected Value Model for Vehicle Detection Station Location Problem with Random Detection Demand and Different Transportation Cost	
G.D. Tian, Y.M. Liu, J. Xie, Z.J. Lai and X.N. Cao	542
Analytical Solution of Congested Traffic Pattern Formation for a Viscous High-Order Model	
X.L. Li, T. Song and H. Kuang	546
Study on Optimization for Taxiway Routing Arrangement Based on Simulation	
Y.X. Liu	550
Study on Integrated Land-Use of Rail Station Areas Based on Two-Way Balanced Passenger Flow	
W.S. Liu and Q. Tan	554
Multi-Resolution Modeling of High Speed Railway Infrastructure for Train Operation Simulation	
X. Jiang, X.S. Ji and J. Liu	560
Safety Evaluation and Countermeasure Research on Fringe Area	
Y.N. Zheng, H.Y. Yao and Z. Zhou	566
Preferred Mode Choice Model for Commuter Purpose Based on Multinomial Logit Model	
Y. Han, H.Z. Guan and M. Xue	570
Analysis on Game Behaviors of Passengers in Emergency Evacuation in Subway Station	
L. Hong and R.H. Xu	576
The Impacting Factors of Shopping Duration on Workdays in Ningbo, China	
L.X. Shao, H.B. Zhu, H.P. Jiang and L.H. Qiou	583
Study on Ice-Snow Road and its Traffic Operating Characteristics in Wintry Harbin China	
L.W. Hu and Y.L. Pei	587
Generating Scenarios for Simulation Modeling of Container Ship Arrivals	
J. Chen, J. Lu and S.L. Qi	591
Research on Sustainable Development Evaluation of Urban Rail Transit Investment Project Based on Rough Set	
R.H. Hou, F.B. Bai and J.M. Zhu	596
Drainage Performance Analysis of Pavement Structure with Permeable Base Course and Edge Drainage System	
X.Z. Cui, N.K. Liu, W.D. Cao, J.Q. Ou, C. Wang and X. Zheng	601
A Mode Choice Model for a Public Transport Transfer Center in Istanbul	
H.O. Tezcan, F. Yonar and S. Topuz Kiremitci	606
Anti-Skid Thin Layer on Asphalt Pavement of Super Long Downgrades	
H.X. Guan, J. Liu, Q.S. Zhang and C.J. Xu	611

Chapter 3: Modern Logistics System Planning and Optimization

A New Genetic Algorithm for Continuous Berth and Quay Crane Allocation Problem N. Li, Z.H. Jin and E. Massami	619
Research on Regional Logistics Spatial Evolution Based on Geographic Simulation System W. Wang and X.J. Feng	623
An Investigation of the Planning and Designing of Road Network in Logistical Parks D.Y. Chen and H.L. Zhang	629
Optimization of Container Terminal Unloading Operations Based Upon Multistage Flexible Flowshop Scheduling E. Massami and Z.H. Jin	633
Applying Genetic Algorithm for Min-Max Vehicle Routing Problem C.Y. Ren	640
Study on Construction Order of Logistics Park Based on Combined Model of Analytic Hierarchy Process and Gray Comprehensive Evaluation Y. Yang, T. Pu and K.Y. Li	644
Studies on Risk Pre-Warning and Emergency Treatment of Thermal Coal Supply Chain J. Lu, J. Chen and S.L. Qi	648
The Research on Location of Multi-Level Network Distribution Centers Y. Wu, Y. Lu and Y. Li	653
Developing a Competitive Strategy for the Port of Qingdao: An Application of the Analytic Hierarchy Process to Ports in Bohai Bay Y.C. Lv, K. Cullinane and P. Lu	659
Study on the Application of Internet of Things in the Logistics in Forest Industry C. Zhao, X.S. Li and J.S. Chen	664
Balancing between Headway and Frequency Scheduling for Bus Service M.H. Hafezi and A. Ismail	669

Chapter 4: Vehicle Engineering

Research on Modeling and Control Strategy of Electric Power Steering C.S. Zhan, N. Xu and Z.J. Ma	677
The Research of Vehicle Braking Performance Uncertainty Based on Probabilistic Perturbation G.B. Xiao, B.R. Han, Y.J. Min and Q.W. Qiu	681
Research on Steering Characteristics of Multi-Axles Steering Vehicle Y.C. Wang, E.Z. An and M. Zhou	685
Topology Optimization of Sub-Frame Structure of 2500HP Fracturing Truck J. Liu, H. Pang, H.C. Wu and W.S. Xiao	690
Design and Research of Stiffness Instrument for Automotive Panel X.H. Zhang, C.X. Lei, J.J. Cui and Z.W. Xing	694
Numerical Simulation of Flowfield around High Speed Trains Passing by each other at the same Speed M.L. Zhang, Y.R. Yang, L. Lu and C.G. Fan	698
Fault Diagnosis for Misfire and Abnormal Clearance in a Diesel Engine Based on EEMD J.M. Lu, F.L. Meng, H. Shen, L.B. Ding and J. Ma	702
Vibrating Simulation of Diesel Engine Based on Multi-Body Dynamics K. Shao, C.W. Liu, F.R. Bi, X.F. Du, X. Wang and J.H. Zhang	706
Numerical Simulation of Effect of Nose Shape on Tunnel Entry/Exit Wave Induced by a High-Speed Train Passing through a Tunnel J.L. Xu, Y.G. Mei, F. Yang and X. Liu	712
The Control Study of Vehicle Active Suspension with Electro-Hydrostatic Actuator F.R. Kou	716
Analysis and Research of Dynamic Characteristics of Synchronous Belt of a Diesel Using Multi-Body Dynamics Y.M. Li, Z.Y. Hao and J. Li	721
Research on Scheme of Power Conflux Planetary Train of Multi-Range Hydro-Mechanical Transmission System Z.L. Han, Y.Y. Fang, F. Liu and J. Zhao	726

Study on Matching Optimization of EPS Fuzzy Control J.J. Xiao, S.M. Huang and Y.S. Wang	730
Control Methods of Active Front Wheel Steering for 4WD Electric Vehicle M.H. Zhao, L.D. Wang, L. Ma and H. Hou	735
Fault Diagnose of Rolling Bearing Based on EEMD and Instantaneous Energy Density Spectrum J.M. Lu, F.L. Meng, H. Shen, L.B. Ding and S.N. Bao	741
CFD Numerical Simulation of Internal Flow for Electronic Gasoline Injector X.Y. Li, Z.D. Zhang, H. Qian and Q. Cheng	745
Research of Aerodynamic Characteristics about Minibus J.Y. Wang, X.J. Hu, Y.C. Zhang and B. Yang	752
The Combine Friction Material Influence on the Noise of the Vehicle Braking K. Zhang and C.P. Jian	756
Handling and Stabilities Calculation and Analysis of Automobile Steer by Wire System Driven by Graphic User Interface L.Y. Yu, Z.L. Wu and W.Z. Zhao	761
Random Dynamic Fatigue Analysis of Body Structures of Coach Z. Qin and W.T. Xu	765
Effects of Driveline and Tire Model on the Performance of Active Differential: Modeling and Simulation J. Ji, Y.W. Li and H. Peng	771

Chapter 5: Carrier Operation Engineering

Function-Based Classification Method for Traffic Hub X.R. Wang and C.H. Rong	779
Computation of Longitudinal Launching for a Multi-Purpose Cargo Ship Y.S. Huang, H.X. Zhao, H.M. Wang and X.F. Wang	783
Research on Network Communication Model of Intelligent Ship Handling Simulator S.H. Yang, G.Q. Chen, X.H. Wang and Y.B. Yang	787
Design of Probabilistic Pilot Model with Fuzzy Controller for Microburst Escape Z.X. Gao, H.B. Gu and Z. Gao	794
Application of Grid Management to Traffic Risk Control in China's Coastal Waters J.P. Zhang, S.P. Hu, Y.T. Xi and Q.G. Fang	798
Numerical Calculation of Added Mass for Ship Dynamic Stability by High Order Panel Method H.M. Wang, H.X. Zhao, Y.L. Yang and X.S. Rui	802
The Design of Transmission Scheme about 8-Speed AT Basing on Lever Method Q. Wen, M.F. You, Z.W. Li and J.J. Li	806
Design on Passenger Ground Wheel-Rail Cable Car in Transport System Y.J. Hu and X. Qiu	813
Safety Analysis of Aircraft Flying through Low Altitude Wind Shear Z.X. Gao and H.B. Gu	817
Simulation and Optimization Research on Ignition Timing of the Engine Burning Gasohol Z.J. Li, S.H. Cui, X.G. Song and Y.N. Fan	821
A Method for Marine Human Error Probability Estimate: APJE-SLIM Y.T. Xi and C. Guo	825
Establishment of Engine Condition Monitoring Alarm System Based on Fuzzy Neural Network Y.B. Liu, Y.D. Liu, X.D. Wang and Y.J. Jiang	831
Tensional Ability of Basalt Fiber Enforced Asphalt Mixture C.M. Gao, W.Z. Dong, X.Y. Liu, H. Wang and M.L. Zhang	837

Chapter 6: ITS Theory and Applications

Application Research on Traffic Modal Choice Based on Decision Tree Algorithm Z.H. Peng and X. Luan	843
---	-----

An Ensemble Learning Short-Term Traffic Flow Forecasting with Transient Traffic Regimes J.S. Zhu	849
Design and Implement on Intelligent Target Ship for Ship Handling Simulator X.H. Wang, S.H. Yang and G.Q. Chen	854
A Recognition Method for Driver's Intention Based on DS Evidence Theory S.P. Zhou and C.Z. Wu	859
A City Intelligent Transportation Management Command System Y.J. Wang	863
Simplified Monte Carlo Model of Real-Time Traffic Flow Prediction J.P. Xing, L.G. Meng, C. Sun and J.W. Li	867
Research on Traffic Guidance and Control System Coordinated Agent Model Z.H. Peng and J.J. Xu	872
Traffic Flow on Gradient Highway and its Stability W.X. Zhu, R.L. Yu and Z.P. Jia	877
Improvement A* Algorithm Based on Dynamic Consistency Assumption L. Zou, Z. Zhang and L.X. Zhu	883
Fuzzy Logic Based Traffic Density Control via Ramp Metering X.R. Liang and D.Q. Wang	888
Research on Speed Limit of Freeway Tunnel Group Based on Artificial Neural Network S.R. Zhang, H.L. Yan, W.J. Niu and R. Cao	892
New Design of Intelligent Navigational Simulator G.Q. Chen, Y. Yin, L.N. Li and S.H. Yang	896
Analysis Model for the Continuity Evaluation of Guiding Information M. Huang, H.B. Wu and M.L. Rao	903
Urban Transportation Crowded Recognition Technology and Application Z.M. Gao, F.S. Liu and M. Chen	907
Bus Scheduling Model for Adjustment Headway of Bus Carriers M.H. Hafezi and A. Ismail	911

Chapter 7: Traffic Control and Information Technology

The Monitoring System on the Security Situation in Service Area Operations of Expressway Based on the Neural Network Expert System X.J. Rui and H. Bai	919
The Impact of Traffic Information on Drivers' Day-to-Day Route Choice Behavior S.X. Liu and H.Z. Guan	925
Method of Modeling the Excitation Spectrum of Train Based on Track Irregularity E.W. Chen, T.M. Zhou and Z.S. Liu	931
The Traffic Characteristics Caused by Lane Reduction Bottleneck in an Optimal Velocity Model J. Zhang, X.L. Li, Z.P. Li and X.L. Han	935
A Multi-Objective Optimization Method for Coordinated Control Y.F. Gao, H. Hu, T. Wang and X.G. Yang	942
A Traffic Accident Predictive Model Based on Neural Networks Algorithm and Rough Set Theory Q.R. Li, L. Chen, C.G. Cheng and Y.X. Pan	947
Evaluating Travel Time Reliability Based on Fuzzy Logic X.F. Zhang, R.M. Li, M. Liu and Q.X. Shi	952
Pedestrian Evacuation Based on a Dynamic Parameters Model N. Zhu, B. Jia and C.F. Shao	956
Evaluation of Waterway Navigation Environment Based on SPA H.Z. Chen and Y.F. Tian	960
Compare and Analysis of Kalman and H_{∞} Filtering Algorithms in GNSS Vehicle Navigation Data Filtering J. Sun, J.P. Xing, Y. Wu, Z.L. Ma and Y.B. Wu	964

The Design of Car Networking Based on WiMax and Zigbee Technology H.W. Yuan and Q.W. Song	971
Stress Strain Test System for Rail Vehicle on Virtual Instrument W.L. Zhu, J. Li and F. Yu	976
The Prediction Model of Macro-Road Traffic Accident Basing on Radial Basis Function C.J. Song and Q.Y. Li	981
Research on SA-Based Addressing Model of Slot in Container Terminal J.S. Huang and Z.Z. Ren	985
Coordinated Ramp Metering Based on Ant Colony Optimization X.R. Liang and J. Xiong	990
Analysis and Comparison of Locomotive Traction Motor Intelligent Fault Diagnosis Methods Z.P. Chen, Z. Wang, L.M. Jia and G.Q. Cai	994
A Critical Review of the Istanbul Strait Transportation Policies P. Alpkokin, S. Topuz Kiremitci and G. Aksoy	1003
A Vision-Based Lane Markings Detection and Recognition Method for Lane Departure Warning System X.F. Chen and Z.K. Shi	1007

Chapter 8: Transportation and Social Economic Development

The Research on the Evaluation to the Cost-Effectiveness for Economies of the Logistics Transportation Network Z.M. Fang and Z.Y. Chen	1015
Location Analysis for Dry Ports Based on FCM Z. Chang, J. Lu and Z. Qi	1022
The Study on Accident Probability Risk Assessment Methods for Shipwrecks in Inland Waterways H. Xing, S.L. Duan, H.L. Yu and Q.A. Liu	1027
Research on the Urban Transportation Development in Our Country Based on the Traffic Congestion Pricing W. Kou and L. Cheng	1032
Informatization Promotes the Development of Integrated Transportation System X.T. Gao, C.H. Rong and X.L. Cheng	1038
Regression Analysis of Rural Road Traffic Accidents Causes C.J. Sun, R.Y. Bai and Y.Y. Yu	1042
Fresh Agricultural Products Logistics under “Farmer-Supermarket Direct-Purchase” Problems and Suggestions Analysis X.Y. Han	1046
Railway Passenger Train Dispatch Benefit Prediction Model Analysis and Application Based on Operating Data Warehouse X.D. Du, R. Shang and Z.Y. Gao	1050
Pond Sediments as Indicator of Traffic Related Lead Pollution in Rural Area: A Case Study from Sixian County, Northern Anhui Province, China L.H. Sun	1055
Developing Seaport Logistics in Weifang Binhai Economic-Technological Development Area: SWOT Analysis W. Liu	1059
Statistical Analysis and Countermeasures Study on Road Transportation Accidents of Dangerous Goods X.J. Ban, C.J. Sun and J.G. Gao	1063

Chapter 9: Low-Carbon Transportation Technology

The Concrete Application Research of Drop and Pull Transport in Energy Saving and Emission Reduction — with SF's Case L. Xue	1071
--	------

A Novel Vibration Energy Harvesting Method via Pulse Liquid Flow Q. Liu, C.R. Liao, D.X. Zhao and L. Xie	1076
The Interior PMSM DTC Drive Used for Electrical Vehicle Y.H. Li, J.Y. Liu, Q. Yu and J. Ma	1081
Preliminary Numerical Investigation of Effect of Interceptor on Ship Resistance R. Deng, D.B. Huang, G.L. Zhou and H.W. Sun	1085
An Improved Switching Table for PMSM DTC Drive Used in Electrical Vehicle Y.J. Meng, Y.H. Li and M.X. Wang	1091
Study on Application of TerraZyme in Road Base Course of Road Y.J. Li, L. Li and H.C. Dan	1098
Survey and Analysis to the Energy-Saving & Emission-Reduction Effect of BRT in Jinan B.Y. Shi, C.H. Liu, J.Z. Wang, R.H. Zhang and L. Lei	1109

Chapter 10: Urban Transportation Planning and Management

Transit Network Design: The Necessity of Elastic Demand Consideration A. Ranjbari, A. Shariat Mohaymany and S.M.M. Amiripour	1117
Solving the Traffic Problems in Kunming X.Y. Liu and Y. Wang	1123
Based on the Sustainable Development of Urban Transport Planning and Management Z.M. Gao, F.S. Liu and M. Chen	1127
Mass Transit as Urban Tourist Transport R.J.L. Sia, B.H. Wu and J.H. Li	1131
Green Transportation: the Essential Way for Transportation in the Future D.N. Zhang and A.P. Fei	1135
Calculating PA Matrix of Transit Trip from Passenger Flow Volume Y. Liu	1141
The Implementation Mode of Urban Rail Based Transit Joint Development — Experiences from United States, Japan and Hong Kong L.F. Sheng, C.H. Rong and Y. Song	1149
Study Behaviour of Passengers on Transit Operation M.H. Hafezi and A. Ismail	1154
Study on the Integration Plan of Weihai's Urban and Suburban Bus System Based on the Operational Efficiency Analysis B. Liu, J.P. He and Z.W. Wang	1158
Evaluation and Optimization on Colors in Urban Traffic Based on PSO and GT-BPANN H.W. Yuan and W.B. Zhang	1162
Macroscopic Simulation of Pedestrian Flow through a Bottleneck Y.Q. Jiang and P. Zhang	1168
Urban Transport Database Design in China H.Y. Wu	1176
Measuring Passenger's Perceptions of Taxi Service Quality with Weighted SERVPERF Z.G. Yao and X.D. Ding	1181
Interaction between Bus Stops Location and Traffic on Bus Operation M.H. Hafezi and A. Ismail	1185
The Timing of Urban Rail Transit Construction Based on the Weighted Gray Correlation X.Q. Luo, Y.Y. Guo and Y. Wu	1189
The Optimized Design of the Electronic Bus Stop Board Y. Liu, Y.F. Zhang and Y.K. Xing	1195
Interactive Relations between Urban Arterial Transit Route and Land-Use under TOD Mode B.L. Xie, C. Ding and Y.W. Wang	1201
