

Table of Contents

Preface, Organisation and Acknowledgements

Keynotes

Gear Hobbing – Research Activities and State of the Art B. Karpuschewski, M. Beutner, M. Köchig and M. Wengler

3

Chapter 1: Assembly

Analysis and Visualisation of the Positioning Accuracy and Underlying Effects of Industrial Robots

M. Ulrich, G. Lux and T. Piprek 15

Worker Information Systems Including Dynamic Visualisation: A Perspective for Minimising the Conflict of Objectives between a Resource-Efficient Use of Inspection Equipment and the Cognitive Load of the Worker

M. Lušić, K. Schmutzler Braz, S. Wittmann, C. Fischer, R. Hornfeck and J. Franke 23

An Ultrasonic Non-Contact Handling Device from Quartz Glass for Middle and High Temperature Applications

E. Locmelis 31

Spatial Programming for Industrial Robots: Efficient, Effective and User-Optimised through Natural Communication and Augmented Reality

J. Lambrecht and J. Krüger 39

Structural Mechanics Process Simulation of Linear Coil Winding

J. Bönig, B. Bickel, M. Ebenhöch, M. Spahr, C. Fischer and J. Franke 47

Chapter 2: Cutting and Grinding

A Simulation Model for Analysis of Roll Tensioning of Circular Saw Blade

U. Heisel, T. Stehle and H. Ghassemi 57

Advanced Machining Processes for CFRP

I. Rieck and E. Uhlmann 67

Analogy Studies of the Effect of Finishing on the Tribological Running-In Behaviour of Engine Components Using the Example of the Cylinder Running Surface

B. Karpuschewski, F. Welzel and K. Risse 75

Analysing Internal Material Loads in Manufacturing Processes

S. Kuschel, J. Sölter and E. Brinksmeier 83

Analysis and Simulation of Surface Topographies in Grinding of Thermally Sprayed Coatings

S. Rausch, T. Siebrecht, P. Kersting and D. Biermann 91

Analytical Model Approach for Tool Temperature Prediction in Broaching Nickel-Based Alloys

S. Gierlings and M. Brockmann 99

Binderless-cBN as Cutting Material for Ultra-Precision Machining of Stainless Steel

J. Polte, M. Polte, D. Lorenz, D. Oberschmidt, H. Sturm and E. Uhlmann 107

Dry and Residue-Free Cutting with High-Pressure CO₂-Blasting

M. Bilz and E. Uhlmann 115

Dry Ice Blasting as a Pre-Treatment Process for Electroplating

E.M. Baira, M. Kretzschmar, R. Hollan, F. Heitmüller and E. Uhlmann 123

Enzymatic Degradation of Epoxy Resins: An Approach for the Recycling of Carbon Fiber Reinforced Polymers

K. Moeser 131

Force Requirements in Shear Cutting of Metal-Polymer-Metal Composites

D. Übelacker, J. Hohmann and P. Groche 137

Interaction of Load and Residual Stresses in Sintered 1.3344 High Speed Steel	145
B. Denkena, T. Grove and H. Lucas	
Investigations on Cryogenic Turning to Achieve Surface Hardening of Metastable Austenitic Steel AISI 347	153
P. Mayer, B. Kirsch and J.C. Aurich	
Material Behaviour of Armco-Iron and AISI 4140 at High Speed Deformation during Machining	161
F. Zanger and M. Gerstenmeyer	
Micromachining of Silicon - Study on the Material Removal Mechanism	167
M. Carrella and J.C. Aurich	
Robot-Assisted Vibration Polishing of NiCo Retroreflector Moulds	175
F. Elsner-Dörge, O. Riemer and E. Brinksmeier	
Modelling of Tool Engagement and FEM-Simulation of Chip Formation for Drilling Processes	183
M. Tiffe and D. Biermann	
A New Approach for the Prediction of Surface and Subsurface Properties after Grinding	189
S. Jermolajev and E. Brinksmeier	

Chapter 3: Forming

A New Method to Enhance the Accuracy of the Buckling Test Using Modified Yoshida Sample	199
F. Han and M. Liewald	
Adjusting of Roller Levellers by Finite Element Simulations Including a Closed-Loop Control	207
M. Grüber, M. Oligschläger and G. Hirt	
An Improvement of the Time Dependent Method Based on the Coefficient of Correlation for the Determination of the Forming Limit Curve	215
M. Merklein, A. Kuppert and E. Affronti	
Composite Hot Extrusion of Functional Elements	223
M. Schwane, C. Dahnke, M. Haase, N. Ben Khalifa and A.E. Tekkaya	
Considering Anisotropic Material Behaviour of Sheet Metals for Ductile Fracture Prediction	229
A. Sabathil, I. Heinle, A. Lipp, J. Meinhardt and M. Merklein	
Design of an Electromagnetic System to Avoid Horizontal Ram Displacement	237
M. Gröne, V. Salfeld and R. Krimm	
Development of a Pneumatic Bulge Test for High Temperatures and Controlled Strain Rates	245
A. Braun, J. Storz, M. Bambach and G. Hirt	
Effect of Surface Enlargement and of Viscosity of Lubricants on Friction Behaviour of Advanced High Strength Steel Material during Deep Drawing	253
M. Singer and M. Liewald	
Experimental and Numerical Analysis of Dry Shearing of Aluminum 6082	261
F. Steinbach, L. Chen, A. Güner and A.E. Tekkaya	
Influence of Manufacturing Process on the Fatigue Strength of Gears	269
A. Reiβ and U. Engel	
Decrease of Springback by Geometrical Modification of the Sheet Metal Part	277
A. Weinschenk and W. Volk	
Process Chains for Fibre Metal Laminates	285
R. Neugebauer, V. Kräusel and A. Graf	
Reproducibility of Wear Tests and the Effect of Load on Tool Life in Sheet Metal Forming	293
M. Christiany and P. Groche	
Bending of Tailored Blanks Using Elastic Tools	301
A. Weinrich, C. Becker, F. Maevus, S. Chatti and A.E. Tekkaya	
Smart FE-Based Tool Design in Cold Forging	309
K. Andreas, C. Kiener, U. Engel and M. Merklein	

Wear Analysis of Tool Surfaces Structured by Machine Hammer Peening for Foil-Free Forming of Stainless Steel	317
F. Klocke, D. Trauth, M. Terhorst and P. Mattfeld	
Numerical Approach to Determine Natural Strain of Spherical Preforms in Open Die Upsetting	325
H. Brüning and F. Vollertsen	
A Novel Tool Design Strategy for Electromagnetic Forming	333
R. Neugebauer, V. Psyk and C. Scheffler	
Wear Prediction for Hot Forging Dies under Consideration of Structure Modification in the Surface Layer	341
A. Klassen, A. Bouguecha and B.A. Behrens	

Chapter 4: Machines

Adaptive Friction Bearing for Reduction of Stick-Slip Effects	351
T. Engel, A. Lechler and A. Verl	
Avoiding Collision Damage of Motor Spindles through an Innovative Overload Protection System	357
M. Berger and D. Korff	
Determination of the Technical Energy Flexibility of Production Systems	365
R.S.H. Popp and M.F. Zaeh	
Evaluating Mobile Machine Tool Dynamics by Substructure Synthesis	373
M. Law, H. Rentzsch and S. Ihlenfeldt	
FE-Simulation for a Safe Design of Machine Tool Safety Guards	381
F. Meister and E. Uhlmann	
Integration of Carbon Fibre Reinforced Structures in Machine Tools Using the Example of a Swivel Arm	387
A. Bretz, A. Landmann and R. Rost	
Methodology for the Efficient Analysis of Thermal and Thermo-Elastic Behaviour of Machine Tools	395
K. Großmann, A. Galant, M. Merx and M. Riedel	
Methods to Design the Adjustment of Parameters for Thermal Machine-Tool Models	403
B. Kauschinger and S. Schroeder	
Modular Control Integrated Correction of Thermoelastic Errors of Machine Tools Based on the Thermoelastic Functional Chain	411
X. Thiem, K. Großmann and A. Mühl	
Parameter Identification of NC-Axes during Regular Operation of a Machine Tool	419
A. Hellmich, K. Hipp, H. Schlegel and R. Neugebauer	
Square Foot Manufacturing - Concept and Design of an Electrorheological Inchworm Feed Drive	427
A. Breitfeld, H. Freyer and P. Conflant	
The Printed Machine Tool for Micro Machining	433
C. Batke, K.H. Wurst, A. Lechler and A. Verl	
3D Printing of Inorganic Sand Moulds for Casting Applications	441
R. Ramakrishnan, B. Griebel, W. Volk, D. Günther and J. Günther	
A Robust Algorithm for Autotuning Controllers in Mechatronic Modules	451
C. Friedrich, A. Stanicki, M. Bröcker, A. Lechler and A. Verl	

Chapter 5: Organisation

An Approach towards Improving the Robustness of Production Systems	461
N. Stricker and G. Lanza	
Approach to Assess and Compare the Performances of Production Structures	469
G. Schuh, T. Potente, C. Thomas, T. Nuyken, C. Hausberg and S. Dany	
Cognitive Self-Optimization for Quality Control Loops – Potentials and Future Challenges in Research	477
R.H. Schmitt, E. Permin and M. Fuhrmann	

Identification and Improvement of Communication in Factories S. Tschöpe and C. Reinema	485
Dimensional <i>In Situ</i> Shape and Surface Inspection of Metallic Micro Components in Micro Bulk Manufacturing D. Weimer, S. Huferath von Luepke, A. Tausendfreund, R.B. Bergmann, G. Goch and B. Scholz-Reiter	493
Energy KPI's, Challenges for Sustainable Manufacturing Strategies, Analysis of Existing Rules and Indicators in an Industrial Environment in Relation to the Establishment of Energy Benchmark S. Kreitlein, T. Rackow and J. Franke	501
Lean Production Systems in the Context of Social Trends: Job Satisfaction the Key Factor to Success T. Stock	509
Learning Factories for Sustainable Manufacturing - A Generic Design Approach R. Helm, C. Reise and D. Rößle	517
Mechanical Properties of Large Three-Dimensional Specimens Build through Direct Powder Deposition P. Khazan, M. Stroth, H. Freiße and H. Köhler	525
Model Based Optimization of Forging Process Chains under the Consideration of Penalty Functions M. Dannenberg, A. Georgiadis and B.A. Behrens	533
Model-Based Development Process of Cybertronic Products and Production Systems H. Meissner, M. Cadet, N. Stephan and C. Bohr	539
Reference Model for the Description of Digital Engineering Tools Based on Mechatronic Principles and Concepts B. Drescher and G. Reinhart	547
Scenario-Based Determination of Alternative Product Architecture Designs G. Schuh, M. Schiffer and C. Ortlieb	555
Product-Quality Based Scheduling of Automated Food Processing M. Wagner, T. Schleimer, T. Seeberger and G. Reinhart	563
Scientific Management 2.0 – A Design Model for Experimental Research in Production Management G. Schuh, T. Gartzen and F. Basse	571
Simulation-Based Sequencing Algorithm for MRO Operations of Train Couplings A. Georgiadis	581
Target-Based Evaluation of Disturbances in Production Systems K. Knüppel and I. Nikitin	589
An Analytical Model Describing the Lateness Distribution of Storage Processes M. Grigutsch, J. Nywlt and S. Bertsch	597
An Approach to Analyse the Volume Flexibility of Production Systems J. Busch, M. Görke and D. Krämer	605
