

Table of Contents

Preface, Committee and Sponsors

Chapter 1: Material Science and Chemical Technologies

Preparation and Properties of Polysiloxane Modified Epoxy Encapsulating Material H.R. Zhou, H.X. Li and W.M. Yu	3
Preparation and Properties of the Phase Inversion Emulsification of Epoxy Resin H.R. Zhou and X.J. Fang	7
Non-Asbestos Gasket Materials for Formula Design X.C. Yuan and M.H. Liu	11
The Heat Upsetting Process for the Titanium Alloy Spherical Bone Screws J.G. Liu, F.L. Liu, H.D. Liu, Y.F. Wang and L.D. Wang	15
Thickening Carbon Dioxide by Designing New Block Copolymer S.W. Meng, J. Zhang, G.W. Lu, X.T. Li, L.J. Xiao, T.F. Hou, P.F. Chen and R. Zhang	20
Effect of Adding Rare Earths into Iron-Carbon Micro Electrolysis Process on Degradation of Dyeing Wastewater J.C. Kuang	25
Relative Ratio Method for Material Selection Problem with Interval Numbers S.L. Yuan and H. Zhou	29
Research on Material Thickness and Material Properties with Application of Sensors Z.Q. Xu	33
Corrosion Behavior of 3Cr Steel in Different Water Cut Z.C. Qiu, X. Liu and N. Zhang	37
Prospects of China's Aromatic Hydrocarbon Industry Based on Material Properties J. Du	42
Thermal Entanglement Entropy Signature of Spin-Peierls Transition in Dimerized Isotropic XY Chain with Multi-Spin Interactions H.L. Huang, L.J. Ding and Z.Y. Sun	46
Dithiolate Mixed with Diimine and it's Metal Effects on Sensors Y.H. Jia and C. Xu	52
Kinetics on the Leaching of Total Flavonoids from <i>Arctium lappal</i> Root J. Li, P. Zhao, M. Wang, L. Wang and C. Deng	56

Chapter 2: Construction Technologies, Building Materials and Structures

Strengthening of RC-Brick Masonry Walls with Opening Using Basalt Fiber Reinforced Polymer Z. Lei, J.T. Qu and Y. Wang	63
Special Strength Curve of Ultrasonic-Rebound Combined Method for Concrete of Oujiang River Bridge H.Y. Liu and S.C. Zhao	68
Tangent Stiffness Matrix of Spatial Beam Element Considering Bend and Torsion Coupling Effect L. Du, P. Lan and N.L. Lu	73
Analysis of the Bearing and Deformation Characteristics for Large Diameter Pile D.X. Zhang	79
Destructive Criteria for Highway Thick Filling Area Based on Stress Path Analysis H.F. Tong	83
Analysis on Relationship with Pedestrian Network through Space Syntax - Paldalmoon Market in Suwon J.H. Son, H.Y. Park and D.B. Kim	87

Monitoring and Analysis of a Deep Excavation in Hefei X.Q. Wang and L.J. Zhao	91
The Impact on the Surrounding Buildings of a Deep Excavation in Hefei J.Y. Wang and X.Q. Wang	96
The Influence of Raft Foundation Temperature Stress Calculation by Radiation Condition L.J. Zhao	100
The Masonry Crack Propagation Simulation Based on LS-DYNA Y.F. Lou, B.T. Sun and X. Zhang	105
Study on Threaded Connection's Strength in Gas Storage Well Using Finite Element Analysis B.S. Cai	111
The Dynamic Measuring Method of Nondestructive Testing the Overall Performance of Some Frame Shear Wall Structure Y.Q. Zhao, Y.S. Zhang and W.T. Jiang	115
Finite Element Analysis of Mechanical Properties of Reinforced Concrete Cross-Shaped Column Node C.X. Han, D.H. Zhou, Y.H. Yang and S.J. Huang	119
Experimental Research of Recycled Tires-Asphalt Sands Base Isolation Device for Low-Raise Masonry Structure under Vibrating Load M.L. Song	123
Viscous Dampers Utilized at an Operating Electronic Facility for Reducing Seismic Risk H.S. Chang and J.P. Ge	128
Compressive Characteristics with Variation of Length of Shear Connections for Steel-Plate Concrete Structures Adding Hwangtho H.Y. Park and B.J. Choi	140
Evaluation of Flexural Strength about Shape of the Steel Plate-Concrete Composite Beam with Bolt D.B. Kim and B.J. Choi	144
Numerical Analysis of Tension-Type Stress - Concentration Cable and Stress-Dispersed Cable J. Zhao and R.W. Liang	148
Research on Seismic Strengthening with the Performance of the Dynamic Measurement Method J.J. Zhang and Y.S. Zhang	152
Research on Building Construction with Application and Analysis of Total Float in the Activity-on-Arrow Network Q.F. Qi, G. Chen, X.Y. Ren and L. Jiang	156

Chapter 3: Mechanical Engineering and Electrical Engineering

Motor Speed Detection Based on Single Chip Microcomputer and Waveform Recording System Design S.Q. Ma and C.J. Wang	163
Integration with QFDs, TRIZ and FMEA for Control Valve Design C.M. Hu, C.A. Lin, C.H. Chang, Y.J. Cheng and P.Y. Tseng	167
The Simulation Research and Analysis of Transformer with Differential Protection in Shipboard Medium Voltage Based on Matlab B. Shen, H.Z. Zhang, X.Y. Jiang and G.S. Xu	181
Design and Test of Forest Seed Loam Cutting Machine H.Y. Jiang, A.J. Zhang, B.J. Cui, J.T. Liu, X.N. Qi and X.H. Zhang	186
Experimental Studies of Mechanical Vibration Assisted Induction Heating Hot-Pressing F. Wu, Z.Y. Zhou, M.L. Dong and B.B. Yao	190
The Design of the High-Power LED Constant Current Drive Circuit and Research S.Q. Ma and C.J. Wang	196
Experimental Research on CuCr Contacts Cathode Spots with Material Properties G.S. Xu, G.L. Wu and J.W. Zhuang	200
The Static and Modal Analysis of 12000KN Fine Blanking Press Frame R. Xiong, C.D. Zhu and X.Y. Li	205

Numerical Estimation of Ship Resistance Using CFD with Different Turblence Model H. Abdelkhalek, D.F. Han, L.T. Gao and Q. Wang	209
Research of Mechanics Based on Accident Collision Z.Q. Xu	214
Research of Particle Mechanics Application Based on Conveying Machinery Z.Q. Xu	218

Chapter 4: Environment Engineering

Changes in Air Quality of the Yuxi City Urban Area C. Qiu, H. Chen, C.L. Ye, Y.J. Yang and C.B. Ye	225
Analysis of Environmental Tobacco Smoke in China C. Qiu, H. Chen, C.L. Ye, Y.J. Yang and C.B. Ye	229
Research on Methane Fermentative Residue with Material Properties for Raising Pigs X.Y. Ji, W.D. Zhang, F. Yin, S.Q. Liu, C.M. Wang, X.L. Zhao, J. Liu and H. Yang	233
Study of Iron-Carbon Micro-Electrolysis Degrading Dyeing Effluent by Appending Transition Metals and Rare Earths J.C. Kuang	240

Chapter 5: Applied Information Technologies

Research on Application of Information Technology in Commercial Bank Y. Li	247
Information Processing in HFMFs Based Risk Evaluation for Virtual Enterprise D.Y. Xie, X.J. Wu, F.Q. Lu and M. Huang	251
Applied-Information Technology in Barrier-Free Service of University Library Q. Chen	257
High Loss Improved Broadcasting Retransmission Approach Based on Network Coding H. Liu, J. Li and G. Chen	261
On the Performance Analysis of Self-Cooperative Network Coding in Wireless Communications G. Chen, J. Li and H. Liu	266
