

Table of Contents

Preface and Scientific Committee

Analysis of Powder Samples Extracted from Concrete Structures of Nuclear Plant J. Zatloukal and P. Bezdička	1
Nanoparticle Injection into Concrete Using Electromigration J. Němeček and Y.P. Xi	6
Design of Portable Device for Rapid Temperature Testing of Concrete Specimens: System Circuit Design Phase A. Pallegedara, M. Petřík and P. Štemberk	11
Influence of Basalt Fibres and Aggregates on the Thermal Expansion of Cement-Based Composites D. Koňáková, V. Špedlová, M. Čáchová, E. Vejmelková and R. Černý	17
Influence of Ceramic Fibers on Mechanical Characteristics of Refractory Composites O. Holčápek, P. Reiterman and P. Konvalinka	22
Behavior of FRP-RC Members during Exposure to Fire D. Horak, M. Zlámál and P. Štěpánek	27
Comparison of Refractory and Non-Refractory Components in Cement Composites after High Temperatures Load O. Holčápek, P. Reiterman, M. Jogl and P. Konvalinka	33
Usage of Heat Pretreatment for Reduction of Explosive Spalling of High Performance Concrete I. Nováková, U. Diederichs and L. Bodnárová	37
Proposal of Fire Resistant Composites with Application of Lightweight Aggregate Liaver M. Jogl, P. Reiterman, O. Holčápek and J. Koťátková	43
Impact Resistance of Fibre-Reinforced Concrete S. Řeháček, P. Huňka, D. Čítek, J. Kolísko and I. Šimunek	48
Experimental Investigation on Concrete Slab Fatigue Resistance L. Vébr, B. Novotný and P. Pánek	54
Mechanical Properties and Resistance to Water Ingress of Cement Concrete Made with Non-Cyclic Alkanes R. Jaskulski and W. Kubissa	58
Asphalt Composites for Places with Higher and Atypical Load P. Mondschein and A. Konvalinka	64
Long-Term Sorption Properties of Mortars Modified by Crystallizing Admixture P. Reiterman and V. Bäumelt	71
Application of Polypropylene Fibre with Various Surface Treatments in Concrete L. Bodnárová, P. Macháňová, D. Kopkáně, P. Herka and P. Stahel	75
Effects of Different Types of Steel Fibers on the Mechanical Properties of High Strength Concrete J. Koťátková and P. Reiterman	80
The Possibilities of Application of Cellulose Fibers in Cement Composites, Monitoring the Properties L. Bodnárová, K. Kostelanská and F. Jankech	85
Ground Granulated Blast Furnace Slag as Partial Replacement of the Binder of High Performance Concrete M. Ženíšek, T. Vlach and L. Laiblová	90
Testing of Bond Behavior of UHPC D. Čítek, P. Huňka, S. Řeháček, T. Mandlík and J. Kolísko	95
Study of the Strength Development of the Cement Matrix for Textile Reinforced Concrete F. Vogel, O. Holčápek and P. Konvalinka	99
Comparison of Different Methods for Determination of Modulus of Elasticity of Composite Reinforcement Produced from Roving T. Vlach, L. Laiblová, A. Chira, M. Novotná, C. Fiala, M. Ženíšek and P. Hájek	104
Technical Textiles as an Innovative Material for Reinforcing of Elements from High Performance Concretes (HPC) L. Laiblová, T. Vlach, A. Chira, M. Novotná, C. Fiala, M. Ženíšek and P. Hájek	110

Experimental Verification of Pre-Stressed Beams J. Tichý and R. Cvancigerová	116
Study of Accelerated Production of Prestressed Concrete Sleepers Using Strut-and-Tie Model P. Tantipidok, D. McLaughlin and P. Štemberk	122
Monitoring of Self Compacting Concrete Characteristics Development K. Křížová, P. Novosad and D. Ůrsáková	128
Study of Correlation Relationships Aerated Concrete Intended for Waterproof Tunnel Lining A. Hubáček	132
Economic Calculation of Binder in Concrete with a Higher Content of Fly Ash O. Zobal, P. Padevřt and V. Šmilauer	138
Development of Structural Concrete with Fly Ash R. Hela and M. Ťařký	143
The Capillary Action of Water in the Binder Gels T. Otcovská and P. Padevřt	148
Comparative Investigations of some Properties Related to Durability of Cement Concretes Containing Different Fly Ashes W. Kubissa, B. Pacewska and I. Wilińska	154
Multiscale Model of Influence of Heat Curing on Fly-Ash Concrete Mixtures T. Váchal, R. Šulc and P. Svoboda	162
Utilisation of Fluidised Fly Ash for Reduction of CO₂ Emissions at Portland Cement Production M. Fridrichová, K. Kulisek, O. Hoffmann, K. Dvořák and R. Magrla	168
Properties of Materials from Activated Fly Ash from Fluidized Burning J. Polacek and R. Šulc	173
Application of Mixed Ceramic Powder in Cement Based Composites J. Pokorný, J. Fořt, M. Pavlíková, J. Studnička and Z. Pavlík	177
Fracture Properties of Cement Pastes Modified by Fine Ground Ceramic Powder P. Reiterman, O. Holčapek, K. Polozhiy and P. Konvalinka	182
Influence of Metashale as Cement Replacement on the Hygric Transport Properties of Concrete D. Koňáková, V. Hovorková, E. Vejmelková, M. Keppert and R. Černý	188
Mechanical and Thermal Properties of Moderate-Strength Concrete with Ceramic Powder Used as Supplementary Cementitious Material E. Vejmelková, D. Koňáková, T. Kulovaná, A. Hubáček and R. Černý	194
Utilization of Fine Recycled Aggregate and the Calcareous Fly Ash in CLSM Manufacturing W. Kubissa, R. Jaskulski, J. Szpetulski, A. Gabrjelska and E. Tomaszewska	199
Pore Distribution and Water Vapor Diffusion Parameters of Lime Plasters with Waste Brick Powder M. Čáchová, D. Koňáková, E. Vejmelková, K. Polozhiy and R. Černý	205
Influence of PCM Admixture on Thermal Behavior of Composite Plaster J. Fořt, A. Trník and Z. Pavlík	209
Composite Material Based on Cement and PVA: Evolution of Mechanical Properties during First 28 Days M. Lidmila, P. Tesárek, T. Plachy, Z. Prošek, V. Neřerka and J. Topiř	215
The Static and the Dynamic Modulus of Elasticity of Recycled Aggregate Concrete T. Pavlů and M. Šefflová	221
Thermal Properties of Concrete with Recycled Aggregate M. Šefflová, M. Volf and T. Pavlů	227
Mechanical Properties of Recycled Binder/Micro-Filler Cement-Based Material M. Lidmila, J. Topiř, T. Plachy, Z. Prošek, V. Neřerka and P. Tesárek	234
Mechanical and Thermal Properties of Composites Containing Waste Coir Pith M. Čáchová, D. Koňáková, E. Vejmelková, M. Keppert, P. Reiterman, A. Krojidlová and R. Černý	238
Destructive and Nondestructive Characteristics of Old Concrete O. Holčapek, J. Litoř and J. Zatloukal	243

Coloured Concrete with Focus on the Properties of Pigments J. Koťátková and P. Reiterman	248
MSWI Bottom Ash as an Aggregate for a Lightweight Concrete K. Polozhiy, P. Reiterman and M. Keppert	254
Size Factor of Rammed Earth Specimen F. Havlík and J. Růžička	258
Fibre Reinforced Concrete with Recycled Concrete and Insulation Material STERED K. Šeps and J. Vodička	262
