

Table of Contents

Preface, Sponsors and Reviewers

Chapter 1: Materials Science, Technology and Application

Research of Silver-Plated Filament Embedded Woven Fabric's Wearing Properties Y. Xie, Q.B. Zhu, X.L. Ye, J.N. Zhang and F.Y. Zou	3
HA Coating on the Surface of Titanium and Titanium Alloy L. Hu, Y.Q. Chen, X.F. Xing and W.M. Gao	7
Phase Field Simulation of Effect of Super-Cooling Degree on Nickel Dendrite Growth S.T. Li	11
Research on Bridge Seismic Performance of Reinforced Concrete Reinforced by Carbon Fiber L.J. Ma	15
A Study on the Change of Fluorescent Powder Component by Orthogonal Design D. Zhang, Y. Zhang, Y.F. Hu and Y. Liu	19
Penetration Resistance Research of Fiber Reinforced RPC C. Xu	23
Study on Modifying of Polypropylene and Calcium Carbonate Y. Chen and G. Zeng	27
The Summary on Important Damage Detection Technology of Composite Materials T.J. Liu, W.F. Zhang and X.L. Fang	32
Design of Assembled Post-Tensioned Prestressed Reactive Powder Concrete Wind Turbine Tower X.W. Ma, S. Zeng, C.H. Dong, Z. Yu and G.Q. Huang	38
Influence of Dachuanxiong Gelata on Nitric Oxide (NO), Nitric Oxide Synthase (NOS) and Calcitonin Gene-Related Peptide (CGRP) in Plasma of Rat Having a Headache H. Jin, Y.W. Du, X.J. Lv, X.Y. Liu and J.J. Chen	44
Preparation of Gel-Formed Dachuanxiong Prescription Delivered through Nasal Mucosa H. Jin, X.Y. Liu, W. Quan, Y.Y. Han and J.J. Chen	50
Alumina High Pressure Dissolving Temperature Object Model Identification Q.J. Zhang, Y. Chen, H.Y. Huang, L. Liu and K.W. Zhang	54
Research on Dedusting Technology in the Concrete Mixing Station Powder Silo P. Zhang, X.Y. Guo and Z.G. Guan	59
Experimental Research on the Characteristics of the Magnetic Compound Fluid by Grinding Solar Wafers Z.C. Chen, B. Wu, W. Fan and Y.L. Zhou	63
Influence of Electrochemical Etching Parameters on Morphology of Porous Silicon L. Lan, X. Yan, X.M. Ren and R.Z. Xie	68
Study on Friction Property of the Ni/ZrO₂ Composite Infiltrated Layer on Cast Steel Surface under Dry Fraction X.M. Sun, G.R. Yang, L. Wei and Y.L. Liu	73
Investigation on Properties of MEMS Based Micropyrotechnic Igniter X. Yan, C. Ping, R. Zhang, R. Xiaoming, L. Lan and R.Z. Xie	78
The Application of New Type Fiber to the Sports Equipment D.Y. Yang	84
The Reproduction of New Clothing Materials - Lotus Effect X.Y. Wei	88
Evaluation System's Research on Textile Fiber Material Ecological Recycling G. Wang	92

Chapter 2: Applied Mechanics, Measurements, Detection, Electrical, Mechanical and Construction Engineering

Analog Circuit Fault Diagnosis Based on Support Vector Machine J. Shi and T. Shu	99
Propagation Rules and Development of Shock Wave Caused by Roof Caving in Goaf H.Y. Feng, G.F. Ren, J.L. Lv and S.S. Zhang	103
Analysis and Calculation of Earth Pressure Based on Nonlinear Theory W. Zhang, B. Zhang, W.H. Zhang, S.W. Li, Y.Z. Luo, X. Liu, X.L. Ren and K. Wei	109
The Research of Three-Phase Power System Data Detecting Device Based on ADUC836 P. Huang	114
The Design of Power Harmonic Analyzer Based on UC/OS-II L. Cai	118
The Application of Riegl Laser Scanner in Topographic Survey Y.R. Song, G.F. Chen and Q.Y. Cheng	122
The Key Construction Techniques of Long Span Continuous Rigid Frame Bridge of the Expressway in Mountain Areas D.D. Shen and Q. Zheng	127
Research on the Influence of Deep Foundation Pit Excavation on Neighboring Buildings W.J. Chai	131
Analysis on the Reliability of Power Supply for Fire-Fighting Equipment S. Peng	135
Analysis of Technology and Quality Control Measures of Road Bridge Construction M. Yang, H. Wang, F. He and Q.M. Liu	139
Optimization of the Damping Seat's Body Structure Based on the Task Space H.X. Zhao	143
Effect of Mount Position of Main Winch on Drilling Mast Strength in Rotary Drilling Rig H.M. Kang and Y.S. Xu	147
Effect of Bionic Concave Surface to the Drag Reduction Performance of Cylinder Sealing Ring G. Zhao, F. Li, W.X. Liu, J.Y. Zhao and H.S. Bi	152
Research on the Voltage Balance Strategy of Modular Multilevel Converter J.M. Jing, J.Z. Wang and Y.C. Ji	157
Fatigue Life Prediction of Gear Transmission Based on ANSYS T. Wang, W.Z. Zhang, C. Xie, D.X. Zhang and Y. Ru	161
Modeling and Predicting Grinding Force of the Grinding Process N.L. Zhao and W.F. Guan	165
Research on Ultimate Bearing Capacity of Reinforced Concrete Columns Subjected to Fire R.L. Song	171
Analysis and Optimization of Ride Comfort for Semi-Active Suspension Based on Variable Damping S.B. Zhang, M. Li and Y.X. Liu	175
MPPT Techniques - A Review S.K. Sahoo and M. Bansal	182
Performance Analyses of a Combined Auxiliary Measures SGSP - Experiment Means H.S. Liu, D. Wu and W.C. Sun	188
Analysis of Thermal Performance of Solar Collector in Solar Water Heating System J. Zhao, Z.P. Wang, K.Z. Wang and X. Lu	193
Analysis of Nonlinear Vibration in Continuous Mixer Q.X. Meng, Z.H. Wang, X.T. Yang, Q.T. Xi and X.R. Xiong	199
The Impact of the Aerogun Recoil Test Bench Stiffness on the Test Precision C.A. Di, S.S. Xue and D.J. Che	206
Study on Design and Fabrication of Micro-Pyrotechnical Actuator R.Z. Xie, L. Liu, X.M. Ren, Y. Xue, L. Sun and C. Ping	213
The Analysis of Optimal Clamping Scheme Based on Genetic Algorithm J. Yu, X.F. Zhu and Y.L. Gao	218
Trajectory Dynamic Control for CNC Machining Based on Motion Equation Y.M. Jiang and D.K. Yue	224
Finite Element Analysis and Stress Test of Quayside Container Crane J. Ling, S.P. Zhou and F.Q. Wu	229

Modal Analysis Calculation and Simulation of Ramming Chain P.C. Yan, C.Y. Hao, H.G. Sun and C. Liu	234
Based on the Safe Operation of Electrified Railway Traction Power Supply Research of Harmonic Suppression P.X. Ji and X.W. Li	238
Nature Gas Station Control System Design Based on Automatic Monitoring and Control Theory S.S. Bai, F.Y. Liu and Z.C. Feng	242
Research on Miner Detection System M.X. Ma, X.G. Li and W. Cui	246
Switch Equipment Interface Properties Testing System Design Based on the Reconfigurable Concept Z.C. Wu, Y.S. Tan, T.H. Zhang and H.X. Sun	250
The Study of the Difference Methods with Variable Grids Seismic Wave Numerical Simulation in Multi-Scale Complex Media J. Zhang, F.S. Meng and Y.S. Li	254
Discussions on the Electrical Construction Points in Indoor Decoration Y.Y. Zhang	259
Reliability Evaluation of Laser Initiation System R. Zhang, F.Y. Xu, A.F. He, J.H. Chen, B. Jing and C.Q. Cao	263
Harmonic Energy Metering Algorithm Optimization L.Z. Wang	267
Reactive Power Optimization Analysis of 35KV Regional Power Grid Based on the Genetic Algorithm P. Huang	271
Ceiling Radiation and Fresh Air for the Influence of Heating Room Temperature Y.N. Hu, H. Ding and S.S. Hu	275
About how to Optimize Earthing Switch Circuit Bar Z.Y. Tu	283
Experimental Study on the Influencing Factors of Piston Liquid Filling Accuracy G.T. Shen, B. Wu, J. Wan, K. Xiang and L.Q. Chen	287
Analysis of the Effect and Position of the Guangdong Province Standard in Engineering Construction Quality Assurance Y. Zhang, A.M. Wei, Y.S. Wang, Y. Zhang and Y.F. Cheng	293
The Management of High-Rise Building Construction Safety Risks Z.G. Su	297
Research on the Piano String Sound Reconstruction and its Implementation Based on the Theory of String Vibration D.J. Li	301

Chapter 3: Products and Systems Design, Modeling, Simulation and Control

Study on Virtual Scene Technology and Motion Simulation S.F. Li	307
Railway Traction Power Supply System of Modeling and Simulation Optimization Research X.W. Li and P.X. Ji	312
Finite Element Simulation Analysis of Micro Thermoelectric Switch Structure C. Ping, R. Zhang, Y. Xue, D.X. Fu, H. Li and Z.H. Du	316
Research on the Two-Direction Optimization of Shafting Alignment Using Invasive Weed Optimization Y.Q. Cai, F.M. Zeng and J.L. Liu	322
Position Tracking Control of Permanent Magnet Synchronous Motor Based on Fuzzy Sliding Mode Principle R.H. Wen, T. Lu, F. Liu and X. Gao	328
Research on the Control Strategy of Eye-to-Hand Target Track Real-Time Tracking System J.X. Zhang, X.L. Yao and J.T. Miao	334

CNC Compensation System Based on Computer Virtual Technology D.K. Yue and Y.M. Jiang	338
Research on the Computer Graphic Design and Visual Communication Design J.W. Huang	342
Character Pattern Design to Achieve Digital Media J.W. Huang	346
Research on Intelligent Control Framework Applied in Agricultural Production Process Based on Internet of Things R.H. Cheng, F. Ma and Y.H. Liang	350
Research and Design of the Rehabilitation Platform Based on the Kinect Motion Acquisition M. Zhang	354
Maximum Wind Power Tracking Control Based on PID and Feedback Linearization R.F. Cheng and L.H. Chen	358
Design of Portable Educational Technology Terminal Based on Embedded System X.Y. Zhao	363
Design and Implementation of the Stage Lighting and Music Control System C. Jun	367
Expert System of Fault Diagnosis for Flight Simulator Based on Fault Tree Analysis G. Li, Z.G. Ba and H.Z. Zhang	371
Adaptive Genetic Algorithm Based Parameters Optimization of PI Controller for Battery System in Wind Farm H. Ren, D. Wei, D. Watts and J.Q. Fan	375
An Optimization Model for Condition-Based Maintenance Decision Considering Total Risk of Grid Operation H. Ren, R.R. Cui and Y. Tang	383
Wind Farm Micro-Siting Optimization and Benefits Analysis Z.J. Hua, Y.Z. Gu and C.X. Hou	389
