

## Editorial

We are pleased to present this special issue “**Pharmaceutical Formulation and Development**” of Advanced Materials Research. The papers included in this issue are selected from the peer review process and are original contributions reflecting the state-of-the-art, new materials and technologies for pharmaceutical, nutraceutical and cosmeceutical industries, and define major research challenges in the subject area.

Major topics covered by the papers published in this issue include

- Formulation, manufacture and fabrication, characterization and evaluation of materials and dosage forms
- Drug and material design, synthesis and process technologies
- Biomedical and health applications

The call for abstracts and papers stimulated good responses with more than 100 abstracts from different countries across the world. Only 56 full papers were accepted, after peer-review process, for publication in the Advanced Materials Research indexed in Scopus, EI Compendex, Thomson ISI (ISTP), and other indexing services. We would greatly appreciate the efforts of the authors and referees for enhancing the quality of the papers.

*Professor Pornsak Sriamornsak, Faculty of Pharmacy, Silpakorn University, Thailand*

*Associate Professor Sontaya Limmatvapirat, Faculty of Pharmacy, Silpakorn University, Thailand*

*Associate Professor Suchada Piriayaprasarth, Faculty of Pharmacy, Silpakorn University, Thailand*
